CAIL PROGRAM LEARNING OUTCOMES

Our Mission

Creative Action provides all BFA students with a series of collaborative experiences that extends beyond the boundaries of their own major, integrates disciplinary skills and knowledge, and is sited within a public context. Students work in interdisciplinary teams with a community organization, and focus on team building and research to address the needs of the communities and to implement real- world solutions when possible. The goal is to move beyond the traditional boundaries of the classroom and respond to community challenges using students' diverse visions.

Creative Action Mission Statement: How Can Art Transform a Community?

Through collaboration between real-world partners and multidisciplinary teams, students investigate contemporary issues and utilize their art and design skills to propose innovative solutions. Creative Action, an Integrated Learning Program (CAIL), empowers students to consider the transformative power of their work. CAIL classes actively engage diverse communities on issues of social responsibility, environmental sustainability, and cultural diversity in a cooperative effort to affect change.

Foundation

Flowing from the PLOs, each class-level has specific learning outcomes that tie into the larger goals of the program. They are exposed to best practices as well as successful case studies in multidisciplinary collaboration. The foundation year teaches through participant observation, with students visiting partner sites as well as interacting with guest speakers and one another. Most of the faculty in the foundation year are practicing fine artists or illustrators and grades are given based on outcomes, collaborative skills, and professional development.

Formally, foundation year learning outcomes are:

- Students will understand best practices for working in teams on a collaborative visual art and design.
- Students will be able to give a clearly articulated classroom presentation,
- Students will respond to an issue and/or site using skills and concepts based on their community engagement and basic research.

Sophomore

The sophomore CA class is administered through Otis College's Liberal Arts and Sciences Program (LAS) and focuses on strengthening the academic research and response skills of students. Social scientists, art historians, and community organizers predominantly teach LAS classes. A major signature assignment for sophomore LAS classes is a research paper. Every student completes an 8-page research paper that is focused on relevant topics to their site partner and students create hypothetical art and design projects in groups.

Formally, sophomore year learning outcomes are:

- Students will engage in context-driven research (in terms of history, culture, and/or politics) for a specific purpose.
- Students will develop collaborative skills and work in teams.
- Student teams will organize their concepts and communicate their ideas to community partner or group.

Junior

The junior level CA classes are the ultimate culmination of the skills learned at the foundation and sophomore level. At this point, students actively engage with their site partner, are able to independently research and assess needs within the community served, and finally utilize their art and design skills collaboratively with other Otis College students to fulfill the mission of the partner organization. Specifically, students do project-driven research; they look at the ethical implications of art and design; negotiate the complexities of art and design in each unique environment; and begin to learn about project management and successful implementation. While previous sophomore and foundation classes do not focus on the creation of an actual object or piece of intellectual property, junior CA classes require this.

Formally, junior year learning outcomes are:

- Through diverse research practices, students will be able to critically analyze the social, cultural and environmental contexts of art and design problems, identify ethical considerations and develop sustainable solutions that address the needs and aspirations of the communities we engage with.
- Student groups will synthesize knowledge and organize ideas in an oral and visual presentation to a community partner, a classroom or organization.
- Students will plan, propose and in some cases implement creative solutions for a specific context, informed by engagement with a community and/or group.

Elective Descriptions

CAIL 200 - Food & Community Garden (3.00)

Food and Urban Gardening: Food justice is defined by three principles: 1. Access to fresh, healthy, locally grown, and culturally appropriate food 2. Living wages and fair working conditions for all food system workers 3. Community control over food systems, through community-based agriculture, cooperatives, faith-based initiatives, etc (Los Angeles Community Garden Council). Moreover, food justice as a theoretical concept recognizes that "food choice" is impacted by intersecting factors such as race, class, and gender at all levels: production, distribution, and consumption. A food justice framework shows how inadequate access to nutritious and whole food options leads to chronic ailments that could be prevented if people had affordable, healthy choices in their neighborhoods. Corporate control of food, along with real estate practices, have contributed to the development of food deserts, which further impacts BIPOC women and children's right to access affordable and healthy food options. This class will therefore explore food justice through partnership with Holy Nativity Community Garden in Westchester, which has been helping to address food injustice since 2008. Through meetings with the garden manager/master gardener, students will learn why the garden was started, the community it serves, and other ways they contribute to food justice in the city. Students will use ethnographic fieldwork techniques (e.g., observation and mapping) to understand how the places where we live fundamentally impact our health. Fieldwork practices will be complemented by collaborative games and a group project that will challenge students to develop socially responsible, culturally relevant, and sustainable responses to food injustice in their communities.

CAIL 201 - Human Ecology (3.00)

CAIL 200 - Innovative Materials Research (3.00)

This course will be a long-term project for the duration of several semesters. It is a course that benefits students across all majors. Materials are being used in every discipline. The goal is that students of all majors will help to develop and build a materials collection within the library.With the help of the Head Librarian and her team as a committing partner/client, students will envision the space, and design innovative ways to display them effectively. They will develop the first step to an innovative materials collection that, in the long run, will be a permanent section of the library and will serve as a reference tool for students and faculty of all majors. Eventually, depending on budget and space, even a hands-on interdisciplinary maker lab, similar to the KEA lab in Copenhagen.

CAIL 200 - kNOw Memorials (3.00)

Together we will research the history of the monument as a means to visually represent hegemonic power structures in society, and how artists and designers have historically upended this visual structure of power. This CAIL 200 course will partner with a local arts and culture organization to help study and build place-based community-centered environments open to the public. Course Learning Outcomes: Students will: Practice context-driven research (in terms of history, culture, and/or politics). Develop collaborative skills. Develop communication skills. Develop an awareness of cultural bias. Demonstrate a respect for the diversity of ideas

CAIL 200 - LA Past Lives (3.00)

LA Past Lives: Villa Aurora will focus on the cultural landmark and artists' residency at Villa Aurora in Pacific Palisades. This historic home of exiled German-Jewish writer Lion Feuchtwanger and his wife Marta is a metaphor for the urban history of Los Angeles and the creative communities concerned with the ongoing explorations associated with art and design. We will focus on Villa Aurora's history and impact on Los Angeles both as a site of refuge and residence for an international body of artists.

CAIL 200 - Paranormal LA (3.00)

In this course we will look at paranormal movements, cults, spaces, places and occurrences that have happened in Los Angeles and the wider landscape. We will explore the movements of Spiritualism, the New Age, religious ecstatic sects, and various folk religious groups. We will look at local paranormal legends, ghost stories and hauntings. Students will perform ethnography and also work in a team to identify, research and write about a real site where something supernatural occurred and will work to create an app that can be used to map the paranormal spaces of Los Angeles

CAIL 200 - Shelter Me (3.00)

This course supports the development of research techniques, collaboration, critical analysis, creative thinking, articulate expression, and information literacy. The Site Partner for this course is SELAH, a coalition of neighborhood organizers who recognize unhoused individuals as fellow members of our community worthy of the same dignity, respect, and representation afforded to any housed person. It's a sad fact that both nationally and locally, we are seeing dramatic increases in the number of people living on the streets. The demographics of homelessness have changed; people experiencing homelessness are not only getting younger, but they are more likely to work at full-time jobs. Research indicates that one in three people who are homeless have college degrees. Many are families with children. Some are elderly who have aged into homelessness. Still others have fallen on hard times and can't afford the high housing prices. It is vital to gain a historical perspective of the current conditions that lead to homelessness - by understanding the past and present, we can hopefully visualize a better future.

CAIL 200 - Trees in Paradise (3.00)

"Trees in Paradise asks students to consider the landscaped and endemic history of California by researching both native and non-native trees and plants in local Los Angeles ecosystems. Through a series of fields trips, lectures and group research students will understand the role these plants and trees play in the current state of climate change in the state of California, and how we can manage them to help create an environmentally sustainable future for the state. Working with Friends of Ballona Wetlands, students will have the opportunity to take part in plant restoration and creek clean-up projects to protect

one of LA County's only remaining wetlands and use their knowledge and skills to create tools to assist the organization in educating and raising awareness of the environmental importance of the Ballona wetlands and the restoration and preservation of native species. Partner: Helper Foundation"

CAIL 200 - True Stories (3.00)

This course improves writing, self-expression, communication, and collaborative skills by introducing students to interviewing techniques and writing skills that will be useful in their professional practice. Small interdisciplinary student groups conduct interviews at the Wende Museum or the Culver City Senior Center. The research focuses on learning about an elder's life experiences and the associated historical period and location in which they lived. As they collect the information, students are guided through a process in which they work individually and collectively to create an original book that explores the Elder's personal identity, family history, and various compelling intergenerational issues. The illustrated book is based on transcriptions of the interviews, students' research, observations, and revelations concerning the seniors' life experiences. The course culminates in presentations of each subject's life story and the associated student artwork at the Wende Museum.

CAIL 301 - Birding in Winged Los Angeles (3.00)

Birding is exploding in popularity, and the city of Los Angeles is well positioned as a bird's paradise with 500+ native species recorded, more than any county in the United States. But bird populations are under threat. The 2025 US State of the Birds reported continued widespread declines in American bird populations across all mainland and marine habitats, with 229 species requiring urgent conservation action, including the much-loved Allen's hummingbird found nesting throughout Southern California. This class will explore and learn about the birds of Los Angeles, their habitats, and habits, and will partner with a local Audubon organization to promote and support conservation efforts for LA's feathered friends.

CAIL 301 - Otis Goes Green (3.00)

This course provides art and design students with the knowledge and tools needed to make ecodesign an integral part of the design process. Students in this course will have an opportunity to discuss Green Design with top Green Designers and work with Otis College's Environmental Steering Committee to create green solutions for the campus. We believe it is at the design education level where we have the best opportunity to create a sustainable future. Sustainability minor elective. Partner: Environmental Steering Committee, Otis College

CAIL 301 - Collaborating with Catastophy (3.00)

In line with disaster design projects such as the 2008 Post-Disaster Design Competition in which New York City sought innovative ideas for providing provisional housing for residents who may lose their homes as the result of a catastrophic coastal storm, Collaborating w/ Catastrophe: Disaster Design will engage in a site-specific, conceptually dynamic approach to disaster design. This course will take into consideration pre-disaster and post-disaster potentials and engage a variety of design processes to develop emergency housing solutions, survival products or other cultural engagements with how we, as a society, cope with catastrophe. Students will be put into work groups that take into account varied experiences and skill sets. These work groups will spend the first part of the semester doing research into the cultural ideas surrounding disaster. Field trips to outside sites and institutions, such as the El Segundo Fire Department, are planned so that students will have a chance to meet with individuals and organizations involved with "disaster". The same groups will then begin the design process of their final projects, which will be completed by the end of the semester.

CAIL 301 - Comic Book Heroes (3.00)

An exploration of comics and their rich history of championing progressive causes, creating community, and inspiring real-life heroes. This course focuses on the power of storytelling and collaboration in the medium of comics. Working with students from different programs of study, and hearing from distinguished guest speakers with years of experience in the world of comic creation, you will learn techniques to create a compelling visual narrative and the value of teamwork as it applies to comic production and beyond. By the end of this class, you and your team will deliver and present to the community partner a final work that will serve as a form of outreach and inspiration for LGBTQ+ youth. Community Partner: It Gets Better.

CAIL 301 - Community Radio (3.00)

Student teams learn about FM, AM, and Internet radio production, producing content that reports on, engages, and rediscovers the Westchester community. Students gain hands-on experience in the audio production studios at both Otis and LMU, while learning to listen, record, and edit the sound around them. They produce a creative, fun, and informative radio show, available online at Otis and rebroadcast on the LMU radio stations. Partners: KXLU, KLMU

CAIL 301 - Made For Kids Malawi (3.00)

Black Lives Matter Everywhere. Enacting and reinforcing values central to creating equitable lives and opportunities for all people requires participation. The Made for Kids: Malawi class, team-taught by CAIL studio and LAS faculty, applies real-world research and design processes in two settings. First in Los Angeles and second via Zoom in Malawi. By working with local and international partners, students have two opportunities to learn about colonialism's effect on Black lives everywhere. Although we will be working online with students from Malawi, you also will have a chance to help them develop their creative skills by working in collaborative teams. Students in Los Angeles and Malawi will participate in one or two workshops led by artists to introduce new creative practices. By the end of the semester, you will have completed a socially conscious research project, designed, and recorded a lesson plan based on your skill set, and strengthened your research, collaborative, and professional skills.

CAIL 301 - Reimagining MacArthur Park (3.00)

This course engages students in a process that looks at history, urban planning, art, design, and community organizing in order to reimagine MacArthur Park in the Westlake neighborhood of Los Angeles (the original home of Otis College). Student work will support three planned closures of Wilshire Blvd where it bisects the park. Working with the City of Los Angeles Council District 1 as a client, Student artists will design alternative visions of the park that interrogate the park's history, reunify its 35 acres of greenspace and reimagine its place in the city.

CAIL 301 - Rise Above Plastics (3.00)

Students develop creative ideas and strategies to support the mission of the class partner to help reduce global single-use plastic pollution and microplastics from cosmetics and textiles. The class will educate students in understanding how plastic pollution fits into the broader issues of social and environmental justice, climate change, and the context of the gas and oil industries. Starting with research on the impact plastic trash has on our local oceans, wildlife, and communities, they will then work in multidisciplinary teams to develop and execute project proposals to educate and encourage the reduction, reuse, and refusal of single-use plastics such as plastic bags, bottles, and packaging and create awareness around microplastic and nanoplastic pollution.

BFA IN ANIMATION

Our Mission

Animation students bring characters and stories to life through the magic of computer animation. Using a wide variety of techniques, from traditional 2D animation to 3D computer-generated imagery (CGI), students learn to develop narratives that evoke emotion and create the illusion of movement. Special emphasis is placed on critical thinking and problem-solving, technical and creative skills, as well as acting and business acumen.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Animation program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and

the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

ANIM 210 - Storytelling Fundamentals (3.00)

The basic principles of story structure are applicable to any medium: film, TV, novels, comic books, theatre, video games, even works of sculpture and dance. A foundational understanding of basic storytelling structure will deepen audience engagement and help to create emotional resonance. This course will utilize multimedia presentations, group work, reading and viewing assignments, response papers, and creative writing to foster a deeper understanding of the nature of story structure, its role in various mediums, and techniques to enhance its effectiveness.

ANIM 220 - Desgn & Drawng for Animation I (3.00)

In this course students will learn how to apply research, critical analysis, brainstorming, and improvisational techniques to enhance a students' drawing capabilities with a focus on space and objects in space. Emphasis is on developing a basic understanding of, and familiarity with, perspective as a means of organizing space and defining a point of view.

ANIM 230 - Animation Basics (3.00)

In this course, students will learn industry standard principles and techniques for creating professional animation t. Students will gain an introductory level understanding of the "12 animation principles" using Digital 2D and 3D animation tools and techniques. In each class, students will concentrate on a series of exercises related to the many topics of study in Traditional Animation techniques.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

ANIM 211 - 3D Fundamentals (3.00)

This course provides an overview of the tools and techniques used to produce digital art for animation. This includes 2D and 3D art assets, animation, sound and video. Upon completion of this module, students will gain a working knowledge of the common tools, techniques and terminologies used in the Digital Media industry.

ANIM 215 - Storyboarding and Pre-viz (3.00)

In this class students will learn how to illustrate a story through the use of storyboarding and Previsualization (Pre-viz). Students will learn how to break down a script and translate it onto a presentable, self-explanatory, traditional and digital format. Pre-viz will be used to expand on storyboards, testing different shot angles, timing and transitions with different camera placements and movements.

ANIM 250 - Animation Studio Project I (3.00)

Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management using shotgrid.

AHCS 228 - Art History of Animation (3.00)

The "Art History of Animation" course provides a comprehensive survey of the history of animation from its earliest beginnings to the present day. The course explores the development of animation techniques, styles, and themes, and their relationship to cultural and social contexts. Students will gain a thorough understanding of the artistry and creative processes that underlie animated productions and develop an appreciation for the role of animation in shaping popular culture. Upon completion of this course, students will be able to: Identify the key historical milestones in the development of animation as an art form, and the social and cultural contexts in which they occurred. Analyze the visual language and stylistic techniques used in animated productions, including the use of color, line, and shape. Evaluate the role of animation in shaping cultural values and attitudes towards race, gender, and identity. Discuss the cultural and artistic significance of major animated films and series, and their impact on popular culture. Demonstrate an understanding of the creative processes involved in animation, including storyboarding, character design, and animation production. Required for Animation majors.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

ANIM 320 - Des & Drawing for Animation II (3.00)

This focuses on advance design concepts with an emphasis on creating memorable characters with interesting personalities & shapes to tell a story. The goal is to get students used to the idea of research and sketching from life or reference. Then apply the process of revisions to refine their designs in better serving the story. Students will practice draftsmanship to demonstrates the interplay of structure, anatomy, design, and expression in effective figures.

ANIM 340 - Acting for Animation (3.00)

This class will introduce acting techniques of the to enhance animation principles. Students will work on selected monologue and scene work, to utilize the different concepts learned. Scenes are extensively rehearsed and performed, and students will receive critiques and adjustments from the lecturers and fellow students.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ANIM 332 - Advanced Animation (3.00)

n this course, students will expand their understanding of character animation and motion graphics using Maya 3d software as well as using traditional animation media. In addition to basic animation theory, the students will draw from and incorporate 2d elements into their projects using various techniques. Traditional design studies will be translated into 3d environments. Modeling, texturing and lighting techniques will also be explored. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

ANIM 350 - Animation Studio Project II (3.00)

Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management. This is an advancement of Animation Studio project I. Student will be expected to use advance techniques.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ANIM 420 - Des & Drawng for Animation III (3.00)

Students will explore concepts through research, critical analysis, and brainstorming to create elements needed for conveying story. Design and Drawing Fundamentals III is a class that combines artistic exploration, perceptions, observations, personal narratives, and intuition to create new work. A series of stories and situations will provide both context and a point of departure for our projects.

ANIM 450 - Animation Senior Project I (3.00)

This course provides a practical introduction to skills for acquiring and keeping a job, as well as the processes for developing a final project. Class and professional critiques help students develop their work, while learning from the creative processes of their classmates. Students collect their work from drawing classes, their storyboards, and other parts of the creative process, to be used as windows into their personal working styles.

ANIM 470 - Animation Internship (3.00)

This course engages students to work with established companies that are related to their academic and career interests. The purpose of this course is to expose students to live workplace environments and expand networking resources. Students are expected to do well and represent Otis and the BFA animation program. At the end of the Internship, students will report on their experience through a sharing session. Students who wish to participate in the internship program need to submit updated resume, portfolios and websites. **Students need to apply for internship opportunities on their own or through career services

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

ANIM 445 - Animation Explorations (3.00)

In this course, students will focus on creating several animated pieces experimenting with multiple techniques with the dual purpose of telling stories and embracing the idea of play. In addition to completing assignments, students are expected to participate in group discussions and be present during in-class work sessions.

ANIM 451 - Animation Senior Project II (3.00)

Animation Senior Project II is a production class which takes students through the process of conceptualizing, proposing, planning and executing an original project. Students will learn how to deliver professional level work and deliver presentations to represent their work. Goal setting, scheduling, research, and expanding knowledge will be skills developed through the class. For the final project, each student will complete an original work or project and present it to members of the professional community. Goal: To create an original work and demo reel in a production environment.

ANIM 470 - Animation Internship (3.00)

This course engages students to work with established companies that are related to their academic and career interests. The purpose of this course is to expose students to live workplace environments and expand networking resources. Students are expected to do well and represent Otis and the BFA animation program. At the end of the Internship, students will report on their experience through a sharing session. Students who wish to participate in the internship program need to submit updated resume, portfolios and websites. **Students need to apply for internship opportunities on their own or through career services

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MOTN: Pro Studio Practices	MOTN 310	3.00

Elective Descriptions

ANIM 310 - 2D Character Animation (3.00)

In this course, students will develop skills and techniques for creating 2D character animation. Students will learn in-depth character design, development, rigging, and animation techniques, used to create facial expressions and lip syncing.

Pre-requisites: ANIM 230

MOTN 490 - 3D Motion Graphic Cinema 4D II (3.00)

This course builds on foundational skills in Cinema 4D and introduces students to advanced concepts in 3D motion design. Emphasis will be placed on dynamic simulations, lighting and rendering. Through a series of projects, students will strengthen their ability to conceptualize and execute motion graphics that combine technical skill with strong design principles. By the end of the course, students will have developed portfolio-ready pieces that demonstrate mastery of advanced 3D animation techniques and industry-standard production practices.

Pre-requisites: MOTN 230

ANIM 310 - 3D Rigging & Animation (3.00)

This hands-on course provides a comprehensive introduction to essential rigging techniques for 3D animation. Students will learn the technical processes required for 3D character animation, non-linear 3D animation, and procedural rigging setups. Key topics include joint systems, constraints, skinning, and FK/IK controls, enabling students to create functional rigs for a range of animation applications. The course emphasizes mechanical rigging for hard-surface models as well as organic character rigs. Through lectures, demonstrations, and hands-on projects, students will develop a strong understanding of rigging's role within production pipelines, equipping them to collaborate effectively with animators and modelers.

Pre-requisites: ANIM 230

ANIM 490 - Advanced Storyboarding (3.00)

This course will cover the concepts of storyboarding for 2D television animation, visual storytelling, and basic filmmaking/ cinematography. Lecture topics will begin with reverse engineering thumbnails and move through assignments that simulate a variety of visual storytelling projects which commonly are seen in the industry. Basic professional practices for today's working storyboard artists will also be included.

ANIM 310 - Character Design for Animation (3.00)

The purpose of the class is to introduce students to methodologies and styles for designing characters with appeal that are ready to animate. Assignments and critiques develop problem-solving, collaboration, creative visual interpretations that result in portfolio ready art/ illustrations of unique character designs for the purpose of animation.

Pre-requisites: ANIM 230

ANIM 490 - Digital Painting II (3.00)

This course will train you in the fundamentals of digital painting/design. Students will learn to use the tools and techniques of digital painting to produce artwork with applications to the fields of game design and animation such as animation backgrounds, textures for 3D animation, concept art, and illustration.

ANIM 490 - Digital Sculpting &Z-Brush II (3.00)

This course advances students' skills in digital sculpting through the creation of a single, production focused project. Emphasis is placed on developing models intended for animation, with attention to form, topology, anatomy, and surface detail. Students will refine their workflow for character and creature sculpting, preparing assets for rigging and texturing within a professional animation pipeline.

ANIM 310 - Directing for Film and TV (3.00)

This course offers an introduction to the creative, technical, and collaborative responsibilities of a director. Through a combination of lectures, screenings, readings, and hands-on projects, students will explore the art of directing from both artistic and analytic perspectives, while developing their unique artistic voices and gaining a deeper understanding of the director's role in production. Working on class-based voice and on-camera projects, developing shot lists, visualizing scripts, and learning to make effective storytelling choices, students will develop their communication, leadership, and problem-solving skills within a production environment.

Pre-requisites: ANIM 230

ANIM 310 - Pixels to Products (3.00)

Pixels to Products is an elective course for Animation students to transform digital designs into marketable products, including T-shirts, stickers, and more. Students will learn techniques for designing physical merchandise, building brand identity, and understanding eco-conscious production options like drop shipping, sourcing local and sustainable manufacturing. This course blends creative design with practical skills, preparing students to bring their digital art to a broader audience through merchandisable products.

Pre-requisites: ANIM 230

ANIM 310 - Scriptwriting for Animation (3.00)

In "Scriptwriting for Animation" we will dive into the vibrant, detailed world of animation storytelling, crafting engaging scripts and bringing your animated characters and worlds to life. Through a mix of lectures, hands-on exercises, and collaborative projects, you'll explore the unique narrative techniques specific to animation, including character development, dialogue, and visual storytelling. There's a reason Homer J. Simpson is still on the air! Through collaborative projects and peer workshops, you'll gain hands-on experience as you learn to write for various formats. We'll analyze iconic animated works, from Disney to Seth MacFarlane, break down their scripts, and discuss the role of visual elements in enhancing stories. With a mix of playful exercises, insightful discussions, and industry insights, this course will empower you to turn your imaginative ideas into captivating animated narratives. Perfect for both seasoned writers and newcomers. Get ready to bring your stories to life in a lively, supportive environment.

Pre-requisites: ANIM 230

MOTN 310 - MOTN: Pro Studio Practices (3.00)

In this class students will be immersed in the environment of a professional motion design studio. Begging with concept development including creating storyboards, the class will break down the project into production phases and develop a plan how to produce the project as a motion design team. The class will then focus on the last phase of the production pipeline of finishing, rendering and delivering the final motion design assets. Emphasis will be on learning professional studio practices including: file hierarchy,

BFA IN ANIMATION: MOTION DESIGN

Our Mission

Animation students bring characters and stories to life through the magic of computer animation. Using a wide variety of techniques, from traditional 2D animation to 3D computer-generated imagery (CGI), students learn to develop narratives that evoke emotion and create the illusion of movement. Special emphasis is placed on critical thinking and problem-solving, technical and creative skills, as well as acting and business acumen.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Animation program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and

the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

ANIM 210 - Storytelling Fundamentals (3.00)

The basic principles of story structure are applicable to any medium: film, TV, novels, comic books, theatre, video games, even works of sculpture and dance. A foundational understanding of basic storytelling structure will deepen audience engagement and help to create emotional resonance. This course will utilize multimedia presentations, group work, reading and viewing assignments, response papers, and creative writing to foster a deeper understanding of the nature of story structure, its role in various mediums, and techniques to enhance its effectiveness.

ILUS 220 - Type for Illustrators (3.00)

In this class we will apply your skills as illustrators to the practice of fine typography. We will examine the ways in which illustration and typography intersect and the ways in which they differ. You'll be introduced to typographic theory and challenged to expand your type vocabulary, especially in regards to experimentation and typographic complexity. As illustrators, you are well acquainted with form and meaning; you'll be surprised at how closely related your experience is to the practice of typography. We will look for the unique connections that illustrators have to typography – a practice all designers need to master as a part of their skill set. The sequence of projects is designed to start focused and then expand in scope, so that you have time to become acquainted with fundamental concepts and build on them over the course of the semester.

ANIM 230 - Animation Basics (3.00)

In this course, students will learn industry standard principles and techniques for creating professional animation t. Students will gain an introductory level understanding of the "12 animation principles" using Digital 2D and 3D animation tools and techniques. In each class, students will concentrate on a series of exercises related to the many topics of study in Traditional Animation techniques.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self,

identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

MOTN 230 - Motion Design Fundamentals (3.00)

An introduction to basic design and motion design principles and techniques. The pre-requisite for Motion Design Fundamentals (Storytelling for Digital Artists) will be waived for Motion Design minors

ANIM 215 - Storyboarding and Pre-viz (3.00)

In this class students will learn how to illustrate a story through the use of storyboarding and Previsualization (Pre-viz). Students will learn how to break down a script and translate it onto a presentable, self-explanatory, traditional and digital format. Pre-viz will be used to expand on storyboards, testing different shot angles, timing and transitions with different camera placements and movements.

ANIM 250 - Animation Studio Project I (3.00)

Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management using shotgrid.

AHCS 228 - Art History of Animation (3.00)

The "Art History of Animation" course provides a comprehensive survey of the history of animation from its earliest beginnings to the present day. The course explores the development of animation techniques, styles, and themes, and their relationship to cultural and social contexts. Students will gain a thorough understanding of the artistry and creative processes that underlie animated productions and develop an appreciation for the role of animation in shaping popular culture. Upon completion of this course, students will be able to: Identify the key historical milestones in the development of animation as an art form, and the social and cultural contexts in which they occurred. Analyze the visual language and stylistic techniques used in animated productions, including the use of color, line, and shape. Evaluate the role of animation in shaping cultural values and attitudes towards race, gender, and identity. Discuss the cultural and artistic significance of major animated films and series, and their impact on popular culture. Demonstrate an understanding of the creative processes involved in animation, including storyboarding, character design, and animation production. Required for Animation majors.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

ANIM 320 - Des & Drawing for Animation II (3.00)

This focuses on advance design concepts with an emphasis on creating memorable characters with interesting personalities & shapes to tell a story. The goal is to get students used to the idea of research and sketching from life or reference. Then apply the process of revisions to refine their designs in better serving the story. Students will practice draftsmanship to demonstrates the interplay of structure, anatomy, design, and expression in effective figures.

MOTN 330 - Motion Design I (3.00)

This course gives students a comprehensive overview of the motion graphic production process using industry standard applications. Emphasis will be placed on the fundamental concepts of digital media, motion design, editing techniques and art direction.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ANIM 332 - Advanced Animation (3.00)

n this course, students will expand their understanding of character animation and motion graphics using Maya 3d software as well as using traditional animation media. In addition to basic animation theory, the students will draw from and incorporate 2d elements into their projects using various techniques. Traditional design studies will be translated into 3d environments. Modeling, texturing and lighting techniques will also be explored. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

ANIM 350 - Animation Studio Project II (3.00)

Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management. This is an advancement of Animation Studio project I. Student will be expected to use advance techniques.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ANIM 420 - Des & Drawng for Animation III (3.00)

Students will explore concepts through research, critical analysis, and brainstorming to create elements needed for conveying story. Design and Drawing Fundamentals III is a class that combines artistic exploration, perceptions, observations, personal narratives, and intuition to create new work. A series of stories and situations will provide both context and a point of departure for our projects.

ANIM 450 - Animation Senior Project I (3.00)

This course provides a practical introduction to skills for acquiring and keeping a job, as well as the processes for developing a final project. Class and professional critiques help students develop their work, while learning from the creative processes of their classmates. Students collect their work from drawing classes, their storyboards, and other parts of the creative process, to be used as windows into their personal working styles.

ANIM 470 - Animation Internship (3.00)

This course engages students to work with established companies that are related to their academic and career interests. The purpose of this course is to expose students to live workplace environments and expand networking resources. Students are expected to do well and represent Otis and the BFA animation program. At the end of the Internship, students will report on their experience through a sharing session. Students who wish to participate in the internship program need to submit updated resume, portfolios and websites. **Students need to apply for internship opportunities on their own or through career services

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

MOTN 325 - Motion Design Explorations (3.00)

This course guides students through the full process of creating a comprehensive identity rebrand campaign for an existing product. Through research, concept development, design production, and professional-style pitch sessions, students will learn how to translate strategic insights into a polished, portfolio-ready campaign. Learning objectives: • Conduct in-depth research and competitive analysis within the industry • Identify core brand challenges and interpret a creative brief • Develop a distinctive, concept-driven identity rebrand • Produce visual assets that demonstrate strong design craft and cohesive brand systems • Present and defend creative decisions in a professional pitch environment • Assemble a refined, portfolio-ready identity rebrand campaign

ANIM 451 - Animation Senior Project II (3.00)

Animation Senior Project II is a production class which takes students through the process of conceptualizing, proposing, planning and executing an original project. Students will learn how to deliver professional level work and deliver presentations to represent their work. Goal setting, scheduling, research, and expanding knowledge will be skills developed through the class. For the final project, each student will complete an original work or project and present it to members of the professional community. Goal: To create an original work and demo reel in a production environment.

ANIM 470 - Animation Internship (3.00)

This course engages students to work with established companies that are related to their academic and career interests. The purpose of this course is to expose students to live workplace environments and expand networking resources. Students are expected to do well and represent Otis and the BFA animation program. At the end of the Internship, students will report on their experience through a sharing session. Students who wish to participate in the internship program need to submit updated resume, portfolios and websites. **Students need to apply for internship opportunities on their own or through career services

Elective Descriptions

ANIM 310 - 2D Character Animation (3.00)

In this course, students will develop skills and techniques for creating 2D character animation. Students will learn in-depth character design, development, rigging, and animation techniques, used to create facial expressions and lip syncing.

Pre-requisites: ANIM 230

MOTN 490 - 3D Motion Graphic Cinema 4D II (3.00)

This course builds on foundational skills in Cinema 4D and introduces students to advanced concepts in 3D motion design. Emphasis will be placed on dynamic simulations, lighting and rendering. Through a series of projects, students will strengthen their ability to conceptualize and execute motion graphics that combine technical skill with strong design principles. By the end of the course, students will have developed portfolio-ready pieces that demonstrate mastery of advanced 3D animation techniques and industry-standard production practices.

Pre-requisites: MOTN 230

ANIM 310 - 3D Rigging & Animation (3.00)

This hands-on course provides a comprehensive introduction to essential rigging techniques for 3D animation. Students will learn the technical processes required for 3D character animation, non-linear 3D animation, and procedural rigging setups. Key topics include joint systems, constraints, skinning, and FK/IK controls, enabling students to create functional rigs for a range of animation applications. The course emphasizes mechanical rigging for hard-surface models as well as organic character rigs. Through lectures, demonstrations, and hands-on projects, students will develop a strong understanding of rigging's role within production pipelines, equipping them to collaborate effectively with animators and modelers.

Pre-requisites: ANIM 230

ANIM 490 - Advanced Storyboarding (3.00)

This course will cover the concepts of storyboarding for 2D television animation, visual storytelling, and basic filmmaking/ cinematography. Lecture topics will begin with reverse engineering thumbnails and move through assignments that simulate a variety of visual storytelling projects which commonly are seen in the industry. Basic professional practices for today's working storyboard artists will also be included.

ANIM 310 - Character Design for Animation (3.00)

The purpose of the class is to introduce students to methodologies and styles for designing characters with appeal that are ready to animate. Assignments and critiques develop problem-solving, collaboration, creative visual interpretations that result in portfolio ready art/ illustrations of unique character designs for the purpose of animation.

Pre-requisites: ANIM 230

ANIM 490 - Digital Painting II (3.00)

This course will train you in the fundamentals of digital painting/design. Students will learn to use the tools and techniques of digital painting to produce artwork with applications to the fields of game design and animation such as animation backgrounds, textures for 3D animation, concept art, and illustration.

ANIM 490 - Digital Sculpting &Z-Brush II (3.00)

This course advances students' skills in digital sculpting through the creation of a single, production focused project. Emphasis is placed on developing models intended for animation, with attention to form, topology, anatomy, and surface detail. Students will refine their workflow for character and creature sculpting, preparing assets for rigging and texturing within a professional animation pipeline.

ANIM 310 - Directing for Film and TV (3.00)

This course offers an introduction to the creative, technical, and collaborative responsibilities of a director. Through a combination of lectures, screenings, readings, and hands-on projects, students will explore the art of directing from both artistic and analytic perspectives, while developing their unique artistic voices and gaining a deeper understanding of the director's role in production. Working on class-based voice and on-camera projects, developing shot lists, visualizing scripts, and learning to make effective storytelling choices, students will develop their communication, leadership, and problem-solving skills within a production environment.

Pre-requisites: ANIM 230

ANIM 310 - Pixels to Products (3.00)

Pixels to Products is an elective course for Animation students to transform digital designs into marketable products, including T-shirts, stickers, and more. Students will learn techniques for designing physical merchandise, building brand identity, and understanding eco-conscious production options like drop shipping, sourcing local and sustainable manufacturing. This course blends creative design with practical skills, preparing students to bring their digital art to a broader audience through merchandisable products.

Pre-requisites: ANIM 230

ANIM 310 - Scriptwriting for Animation (3.00)

In "Scriptwriting for Animation" we will dive into the vibrant, detailed world of animation storytelling, crafting engaging scripts and bringing your animated characters and worlds to life. Through a mix of lectures, hands-on exercises, and collaborative projects, you'll explore the unique narrative techniques specific to animation, including character development, dialogue, and visual storytelling. There's a reason Homer J. Simpson is still on the air! Through collaborative projects and peer workshops, you'll gain hands-on experience as you learn to write for various formats. We'll analyze iconic animated works, from Disney to Seth MacFarlane, break down their scripts, and discuss the role of visual elements in enhancing stories. With a mix of playful exercises, insightful discussions, and industry insights, this course will empower you to turn your imaginative ideas into captivating animated narratives. Perfect for both seasoned writers and newcomers. Get ready to bring your stories to life in a lively, supportive environment.

Pre-requisites: ANIM 230

MOTN 310 - MOTN: Pro Studio Practices (3.00)

In this class students will be immersed in the environment of a professional motion design studio. Begging with concept development including creating storyboards, the class will break down the project into production phases and develop a plan how to produce the project as a motion design team. The class will then focus on the last phase of the production pipeline of finishing, rendering and delivering the final motion design assets. Emphasis will be on learning professional studio practices including: file hierarchy,

BFA IN FASHION DESIGN

Students in our program work alongside expert, professional faculty and guest mentors, who are current and notable designers. This interaction allows students to become educated in all aspects of the design process. Throughout their experience, students produce original designs, building collections for their portfolio. In their Junior and Senior years, they have a chance to work in teams on targeted projects inspired by historical and cultural influences, creating unique designs under the guidance of Mentors. Students learn by emulating professional designers while following the industry's seasonal schedule. Junior and Senior designs are featured at the annual Fashion Show.

The Fashion program will periodically team up with industry partners like award-winning Costume Designers and celebrity stylists to produce original designs and dynamic collections. Whenever possible, depending on mentors' availability, Juniors and Seniors will have a chance to work on targeted projects inspired by historical and cultural influences.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Fashion Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society.

You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

FSHD 214 - Sophomore Studio I (3.00)

Your journey into the fashion studio starts here! This on campus course introduces you to processes used in garment construction including draping, patternmaking and sewing. Beginning with these basic principles you will learn industry techniques to construct muslin garments, sewing samples, and paper patterns using industrial equipment. By the end of this course, you will have created a sample garment, paper patterns, a draped basic dress, and a sewing notebook to use for future courses.

FSHD 244 - Sophomore Fashion Design I (3.00)

Fashion Illustration is the language designers use to quickly express their ideas in a 2-dimensional format. This course introduces you to drawing techniques fashion designers use to show their thought process. You will draw clothes on the figure, as well as rendering techniques to communicate a variety of textiles. You will develop an understanding of garment construction through flat technical drawings. Throughout the course you will have completed multiple projects that highlight specific markets. Your semester will culminate in a resort-wear collection that will demonstrate your knowledge of design development, croquis sketches, composition/layout, and technical flats.

FSHD 234 - Digital Design I (3.00)

Take your fashion croquis to the next level using Adobe Photoshop and a drawing tablet. In this online course you will learn how to render, make quick and easy color changes, and digitally drape fabric prints onto your fashion croquis. You will learn to create your own custom brushes to replicate elements like lace and stitching. Using drawing tools and filters you will develop fashion graphics and basic textile print designs to use in your work while learning digital terminology and professional practices. Mastering these tools will help you generate engaging mood-boards and professional fashion design presentations.

AHCS 234 - History of Costume (3.00)

Study fibers, yarns, knit construction and acquire a practical understanding of how each affects the appearance and performance of the textile product. Knit swatches using a variety of stitches, combining yarns of varying gauges. Other topics include dyeing, printing, and finishes as processes that affect the aesthetic appeal of the finished product, and as functional finishes which enhance performance. The impact of these processes and issues of sustainability are examined as they relate to the cultivation and production of fibers. Learn to make fabric choices based on an understanding of the woven structure and knowledge of individual fabric properties.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

FSHD 215 - Sophomore Studio II (3.00)

Diving deeper into techniques used for garment construction, this in-class course builds on the foundational knowledge of draping, pattern making and sewing acquired in Sophomore Studio I. You will construct and pattern increasingly complex garments using industry procedures and equipment. You will be challenged to interpret 3-dimensional design ideas through the creation of garments using fabrics that accurately reflect your sketches. During this

course, you will create one garment of your own design, a full-size sample knit t-shirt, paper patterns, and complete a sewing notebook to use as reference for your career as a designer. Prerequisite: FSHD214 Sophomore Studio I

FSHD 235 - Digital Design II (3.00)

Introduction to Adobe Illustrator to draw flats/CADs is a requirement for anyone working in the fashion industry. In this online course, beginners will learn the tools and techniques needed to draw industry standard flats quickly and efficiently including digital terminology, professional workflow, and presentations. Throughout this course you will learn to create a custom brush library including specialty stitches, zippers, and trims. You will create a symbol library containing buttons, buttonholes, eyelets, rivets, bar tacks, and zipper pulls. These libraries along with custom templates, and graphic styles will be used to draw a range of different garment types including shirts, blazers, jackets, skirts, pants, jeans, denim jackets, turtleneck sweaters, and cardigans that you can build on in your professional career.

FSHD 245 - Sophomore Fashion Design II (3.00)

Fashion Design is communicated in a 2-dimensional format, a critical skill for professional fashion designers. This course introduces you to the design process, and what it means to follow a design direction. You will implement your drawing skills obtained in previous coursework to create fashion croquis (quick sketches) that express your design concepts. You will continue to explore croquis sketching and flats, while integrating your experience from Sophomore Studio I by creating sewing samples to support your 2-dimensional designs. During this course, you will complete two projects that will expand your understanding of fabric/color stories, research, and adequate execution of your designs in a 2-dimensional format. Your semester will culminate with an athletic inspired collection that will prepare you for your first Mentor Project at Junior level. Prerequisites: FSHD244 Sophomore Fashion Design I, FSHD214 Sophomore Studio I.

NSCI 315 - Textile Science (3.00)

Study fibers, yarns, knit construction and acquire a practical understanding of how each affects the appearance and performance of the textile product. Knit swatches using a variety of stitches, combining yarns of varying gauges. Other topics include dyeing, printing, and finishes as processes that affect the aesthetic appeal of the finished product, and as functional finishes which enhance performance. The impact of these processes and issues of sustainability are examined as they relate to the cultivation and production of fibers. Learn to make fabric choices based on an understanding of the woven structure and knowledge of individual fabric properties. Required textbook: Fabric for Fashion: The Swatch Book, Second Edition, by Clive Hallett & Amanda Johnston. Lab Fee: $30 Required for Fashion Design Majors. Available to non-majors as approved by the Chair.

LIBS 210 - Contemporary Fashion Issues (3.00)

FASHION is a cultural and social phenomenon that involves us all. The most visible form of consumption and most relevant form of non-verbal communication, fashion is also a representation and objectification of our identity, enabling and supporting social roles and structures. It accords us individuality while validating our group belongings. It is, in short, a fascinating and befuddling aspect of human history, and one that deserves attention. Particularly now. Since the last decades of the twentieth century, what we traditionally consider 'fashion' has morphed into a global practice that is subverting its own traditions and jeopardizing our environmental survival. Fast Fashion is a multi-billion-dollar business and one of the biggest causes of global pollution and waste production. Widely recognized but not addressed in commercial fashion practices, the destructive power of fast fashion is now – and in the face of mounting social pressure – becoming a pivotal concern for the survival of the industry. This course aims at promoting an understanding of the most pressing issues in the field of fashion. It examines fashion theories, trends, and culture from the early 20th century to the present through the lenses of globalism, gender identity, environmental concerns, labor injustice, and ethical issues. Students will explore recent revolutions, present conditions, and possible future scenarios in the fashion world and be encouraged to question the conventional assumptions of fashion history, particularly as they determined the current crisis. Selected topics will include: the early development of the fashion industry and mid-century democratization of dress, fashion revolutions at the end of the last millennium, the phenomenon of fast fashion and the environmental crisis it caused – including current research and future trends. Required for Fashion Design majors.

FSHD 314 - Junior Studio I (6.00)

Knowledge of construction is crucial for becoming a successful fashion designer. This on-campus course focuses on everything related to the moderately priced market. You will construct different types of garments through in-person demonstrations, instructional videos, and step-by-step pictorial manuals. Along the process, you will also learn how to create treatment samples for your Mentor Projects. Woven pants, a Bomber jacket, and a swimsuit are a few projects you will develop. You will also complete a bustier in cotton twill by draping, pattern making, fitting, and sewing, using intermediate-level industry methods. This project parallels the production process used in the fashion industry. You will also learn how to generate spec sheets and cost sheets, and how to incorporate them into a basic design technical packet (Tech Pack) digitally. Prerequisite: FSHD215 Sophomore Studio II, Co-requisite: FSHD344 Junior Fashion Design I

FSHD 344 - Junior Fashion Design I (3.00)

Clothing centered around streetwear, dress and performance markets is accessible to every consumer of that division at the moderate price-level. This course introduces you to your first Mentor project with focus on the Junior market. Using fashion forecast resources, this course enables you to create fabric stories, garment construction and fashion croquis. You will have the opportunity to work with industry designers, with possibility for a sustainability project. By the end of the course, you will produce a collection, including fabric stories with surface treatments and industry level flat sketches to present to your Mentor during sketch selection. You will produce your top design selected by the Mentor in Junior Studio II class. Prerequisite: FSHD245 Sophomore Fashion Design II, Co-requisite: FSHD314 Junior Studio I

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

MATH 136 - Math for Artists and Designers (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FSHD 315 - Junior Studio II (6.00)

Transform your own designs from 2-dimensional drawings to real-life garments. This on-campus course allows you to apply the skills and knowledge you've acquired while continuing to explore more advanced draping and pattern-making techniques. You will approach the mentor project by following the same methods used in the fashion industry, developing a work calendar, and incorporating your treatment samples made in Junior Studio I into your selected design. You will also create a more advanced Tech Pack based on the mentor project which mirrors the requirements of the fashion industry. There are also opportunities for advanced draping exercises. The final project focuses on constructing a pair of pants inspired by one of your own. Prerequisites: FSHD314 Junior Studio I, FSHD344 Junior Fashion Design I

FSHD 345 - Junior Fashion Design II (3.00)

Self-expression and a focus on your individual design aesthetic is a key element to becoming a good fashion designer. Through this course, you will develop your own design concepts for a series of design competitions focused on the contemporary market. This opportunity allows you to compete in the world with other designers and enables you to gain both exposure and scholarship funds. There will be opportunities for a sustainable project if you

so desire. By the end of this course, you will have designed two collections for a contemporary market, a sketch book, fabric stories with treatments and designer level flat sketches aimed at preparing you for an internship in the fashion industry. Prerequisite: FSHD344 Junior Fashion Design I

FSHD 390 - Special Topics in Fashion: (3.00)

These studio-based courses will explore cross-disciplinary special topics or broader topics in fashion. Course titles and descriptions will vary based upon topic to be determined on the basis of faculty and student interest. The department will provide a listing of course offerings each semester. Prerequisite: Students must have completed their sophomore year courses.

AHCS 224 - Theories and Trends (3.00)

"This class covers the paradigm shift from modernity to contemporary culture through an analysis of these general and closely inter-related themes; your faculty will select which they emphasize but all of these should be familiar to you when you complete this class: Race in Contemporary Art, Media, Culture Bodies in Contemporary Art, Media, Culture Gender in Contemporary Art, Media, Culture Technologies in Contemporary Art, Media, Culture Identity in Contemporary Art, Media, Culture Consumerism in Contemporary Art, Media, Culture Hi-Low Art/Design in Contemporary Art, Media, Culture Contemporary art, design and media involve multi-dimensional social and artistic shifts taking us from "late modern" society into the so termed "post-modern" age. The class covers years beginning after World War II, marked by society-altering ideas and events that radically change how we view creatives, art, design, entertainment, technology, race, gender, and identity in a global context. We will learn what these terms mean, why they're important to working artists/designers and how ideas and events since the 1960s up through the current day impact fields from fine art to digital media, to fashion and graphic design. Conversely, we look at how art and design work to create who we are and how we think. We look at the global impact of the spread of TV, video, computers, the internet, the civil rights movements including #blacklivesmatter and BIPOC initiatives, gender rights revolutions including the feminist movements, LGBTQ+ culture, and various other multi cultural and counter-cultural perspectives like Latinx and Asian art movements. We study how global contemporary art and design are impacted by legacies of European ethnocentrism, and how multi disciplinary contemporary art fields recognize diverse subject positions to both reflect and challenge western white colonial and patriarchal power."

FSHD 414 - Senior Studio I (6.00)

The global contemporary Fashion Market is growing at an unprecedented rate. This on-campus course introduces you to construction techniques used by the industry. You will learn about tailoring techniques needed to construct a classic tailored jacket. In preparation for your Senior Mentor Project, your instructors will guide you to drape, draft a pattern and sew a finished garment. Through these projects you will come to understand the handling and construction of diverse fabrics and experiment with hand-sewing techniques. By the end of the course, you will create a classic tailored jacket and a Mentor-guided look of your own design. Prerequisite: FSHD315 Junior Studio II; Co-requisite: FSHD444 Senior Fashion Design

FSHD 444 - Senior Fashion Design (3.00)

Senior students design apparel for Mentor Projects representing the designer/contemporary markets. Working with designers following the fashion industry's seasonal schedule, students design contemporary clothes in better fabrics and finishing techniques. Students learn how to sketch their ideas to capture a look appropriate to the project, develop technical flats using analog and digital methods and create fabric boards with advanced fabric treatments. This course will culminate in a contemporary men's and women's collection. Prerequisite: FSHD345 Junior Fashion Design II; Co-requisite: FSHD414 Senior Studio I

LIBS 414 - Business of Fashion (3.00)

Assuming a position in the Fashion industry requires business knowledge necessary for merchandising, product development, marketing, creative presentations and sales. Through lectures by industry professionals, this online class provides an overview of the apparel manufacturing process outside the realm of the design room, and the marketing partnership of wholesale manufacturers and retailers. The semester begins with professional practice protocols and job search strategies in preparation for successful entry into the workplace. Required for Fashion Design majors.

LIBS 440 - Capstone: Fashion (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

FSHD 415 - Senior Studio II (6.00)

Turning your 2-Dimensional design into a 3D garment entails precise construction methods. This on-campus course further engages you in the 3-D interpretation and completion of your original designs developed for Mentor Projects. You will perform intermediate applications of draping, pattern drafting, classic tailoring, and sewing techniques for a contemporary label that could include an eveningwear project. You will develop and abide by strict timelines during professional fittings. By the end of the course, you will complete an original designer-level creation, work independently within the context of a professional working environment. Prerequisites: FSHD414 Senior Studio I, FSHD444 Senior Fashion Design.

FSHD 445 - Senior Portfolio (3.00)

The Fashion Portfolio is the apparatus used to showcase the skills you've acquired as a designer to prospective employers. Students develop professional Portfolios, targeting a specific market in the fashion industry, and produce four collections to that end, each including a concept board, color story, fabric and treatment developments, fashion drawings and technical flats. A Tech Pack developed in Junior Studio is included. This course concludes with a Senior Exhibit Portfolio Review where industry representatives and recruiters provide insightful critique of portfolios and potential job offers. Prerequisite: FSHD444 Senior Fashion Design

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Electives

Course Title	Course Number	Credits
ST: CLO Studio Elective	FSHD 390	3.00
ST: Fashioning the Fantastic	FSHD 390	3.00
ST: Tech Pack Mastery for Fash	FSHD 390	3.00

Elective Descriptions

FSHD 390 - ST: CLO Studio Elective (3.00)

Watch your designs come to life in a virtual 3D environment before ever cutting the fabric. Using industry standard software CLO3D, students will learn to take their designs from 2D to 3D allowing them to instantly modify and view colors, patterns, fit, and fabrication. Throughout this on-campus course students will learn the techniques and tools needed to confidently navigate the CLO workspace. Using basic knowledge of patternmaking, you will create digital patterns that can be printed for physical samples or virtually stitched together in a 3D environment. This will open a whole new world of opportunities for designers to explore fabrication, drape, and fit in a virtual environment.

FSHD 390 - ST: Fashioning the Fantastic (3.00)

As the intersection of technology and fashion continues to evolve, students will develop digital-only fashion runway collections inspired by a game franchise, or brand. The project will showcase digital runway show that will serve as the backdrop for fantastical collections created on avatars. Students will integrate a fashion/digital perspective to widen the demographic of the gaming community in a fashion fantasy world.

FSHD 390 - ST: Tech Pack Mastery for Fash (3.00)

Step behind the scenes of fashion production and bring your designs to life! This course teaches you how to create professional, production-ready Tech Packs, essential blueprints that turn creative ideas into real garments. You'll learn to translate your designs into precise technical documents, complete with flats, spec sheets, material lists, and labeling details. You will master the skills needed to communicate confidently with manufacturers, ready to take the next step in your career.

BFA IN FINE ARTS: PAINTING

Our Mission

Contemporary artists use their talent, imagination, and skill to create works of art that add beauty and richness to the world. They produce work for a vast global network of museums, commercial art galleries, publicly funded arts organizations, and artist-run spaces. Taught by a faculty of active professional artists, students in Fine Arts delve into each of the core disciplines—Painting, Sculpture/New Genres, and Photography—before selecting an area of emphasis.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Fine Arts: Emphasis in Painting program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

PNTG 204 - Painting I (3.00)

This is a hands-on investigation of technical and formal issues in painting (oil, acrylic, and mixed media), focusing on developing technical abilities in collaboration with concepts and exploration of different methods of achieving visual "dexterity." Offered fall semester only

PHOT 204 - Photography I (3.00)

This course introduces students to the technical, aesthetic, and conceptual aspects of the medium of photography. Basic skills, including digital and analog (film) camera operation, the fundamentals of image exposure, black-and-white film processing, black-and-white and digital color printing, and basic presentation techniques, are covered in regular lab sessions. Group critiques, slide lectures, and field trips help students to develop a critical vocabulary. Offered fall semester only

SCNG 204 - Sculpture/New Genres I (3.00)

An introduction to the history and practice of sculpture and new genres (new art forms that use time and space). Students are introduced to technical and contemplative approaches to commanding space and material to produce meaningful objects, events, or places. Technical instruction covers introductory use of wood and metal shops (including digital 3D printer), adhesives and joinery, basic mold making and casting, as well as contemporary new genres forms such as performance and installation art. Offered in Fall semester only.

FINA 217 - Digital Media (3.00)

Digital Media is an introductory course in new media – exposing students to a wide range of digital art-making practices while providing the technical fundamentals that enable students to begin integrating digital methods in their respective practices. The course consists of lectures, demonstrations, and computer lab experience. Particular attention is placed on balancing technical skills with creative content and experimental approaches. We will explore the evolution of new media and the corresponding social and cultural impact. The core software is Adobe Premiere, InDesign and Photoshop.

AHCS 237 - Sophomore Seminar: Global Ar (3.00)

The Sophomore Seminar 1 & 2 sequence is a key part of the Fine Arts curriculum and a course required of all sophomores. Sophomore Seminar 1 is designed to introduce Fine Art majors to key concepts in ancient and modern philosophy and its relationship to art and culture. Sophomore Seminar 2 critically considers postmodern theorists and artists who question the philosophical canon and the function of art in society. In both courses/semesters, students learn to evaluate the ideological impact of power, gender, economics, and social class on social and artistic norms. The purpose of the course is to develop the student's capacity to think critically about a broad range of issues and their relationship to the student's artistic practice. The course is a blended studio and seminar course that places a strong emphasis on close reading, critical listening, open-minded group discussion and critical making. Required for Fine Arts majors.

AHCS 226 - FA Contemporary Art Survey (3.00)

This Contemporary Art for Fine Artists is a survey of key fine art objects, practices and issues from the late 1950s to the present. Taking key historical events as its structure, the class uses contemporary art movements and counter movements to investigate mechanisms of form, taste, value, class, gender and exclusion, as these are demonstrated and challenged by artists in the US and globally. Included is a consideration of postmodern theory and fine art creation as systems capable of both perpetuating and effectively challenging normalized and marginalized identities. Required for Fine Arts majors.

PNTG 214 - Painting II (3.00)

Painting 2 is the second core class devoted to painting. Each person who teaches it will have a slightly different approach but in general the class will provide students with an intermediate level painting experience. Equipped with the skills and knowledge of painting 1, students in Painting 2 will further develop their command of the technical and conceptual knowledge of western painting. They will develop a group of works specific to the requirements of the class and they will increase their confidence and their production. Perhaps devoted to critical concepts of interpretation or to material exploration or both, painting 2 will provide a dynamic and open, inclusive environment in which students will feel supported as they explore their own ideas and the rich landscape of contemporary painting.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 238 - Sophomore Seminar II (3.00)

Sophomore Seminar 2 builds on Seminar 1 through the lens of late modern and postmodern theorists and artists who challenge philosophical canons and investigate the social function of art. Students analyze the ideological dimensions of culture and artistic practice, including the ways land, space, and ecological systems inform meaning and power. The course continues to emphasize close reading, critical listening, open-minded discussion, and critical making, supporting students as they refine their capacity for thoughtful, critically engaged artmaking. Required for Fine Arts majors. Available to non-majors as approved by the Chair.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

FINA 374 - Studio III (3.00)

This advanced studio course allows students to learn advanced methods, materials, and techniques in painting, photography, and sculpture/new genres and accomplish advanced projects with the guidance of faculty. The course is also a welcoming place for students and faculty to exchange artistic and cultural attitudes, beliefs, and assumptions to develop together a more open-minded and generative approach to our artmaking and the evaluation of the works of other artists. Attending the Visiting Artist Lecture Series is required. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 375 - Studio IV (3.00)

This production-oriented advanced studio course emphasizes concepts, processes, and visual strategies toward developing an individual studio practice across the three main disciplines. Critiques, seminars, and individual meetings provide insight into contemporary discourses and practices while helping students find the working methods that best suit them. Attending the Visiting Artist Lecture Series is required. Offered spring semester only

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 474 - Senior Studio I (6.00)

Each student is given their own studio and works with a group of faculty mentors to develop a body of work. Critiques, individual meetings with mentors, visiting artists and critics, and group exhibitions expand students' knowledge base while focusing their practice. Attending the Visiting Artist Lecture Series is required. Prerequisite: FINA375 Studio IV. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

FINA 475 - Senior Studio II (6.00)

This course is devoted to completing a cohesive body of work culminating in the building and mounting of the senior exhibition. Students continue independent studio practices, discussions, and critiques with mentors, peers, visiting artists, and critics. This course addresses issues that prepare students for a life in art. Attending the Visiting Artist Lecture Series is required. Prerequisite: Senior Studio I. Offered spring semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Elective Descriptions

SCNG 306 - Adv Tec: Into the Fold: Fabric (3.00)

Historically and pre-historically fabric(s) have been used as protection, coded language, resistance, structure, identity, style, communication, play, community building, camouflage, and more. Through skill building in context, students will grow confident in their ability to engage techniques, be supported to expand upon them, to develop a way of working within their own practice(s). This course will include hand and machine sewing, pattern-making based in but going beyond methodologies of garment construction, felting, weaving, dying, hand, machine and digital embellishment/adornment (embroidery, beading, couching), three dimensional "soft sculpture" and stretching/draping on an armature. Knitting, knot-work, macramé and crochet subject to interest. This course will move towards an interdisciplinary integration of digital and analog media. Maximizing the facilities, labs and equipment at Otis, students will grow comfortable using Adobe Creative Cloud software (Photoshop and Illustrator) and understand how these are set up to work with vector based output machines, for "fabric-informed" projects. Working with fabric as a pliable structure, surface and conceptual framework, we explore its construction, historical and cultural contexts (including with/by the more-than-human) to develop and expand upon skills to make projects possible within fields of sculpture, installation (including video, sound, multi-sensory work), performance, painting and drawing.

FINA 415 - Adv. Sem: All About Love (3.00)

Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. We will learn alongside theorists in somatics, performance studies, feminist studies, queer and trans studies, and Indigenous and Black studies to guide our foray into the inter-personal, political, performative, and transformative aspects of love as they shape our relationships to one another and to our creative practices. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

SCNG 237 - Advanced Ceramics (3.00)

This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

FINA 406 - Advanced Critique (3.00)

Through sustained critical dialogue, this course gives advanced students a unique opportunity to assess how their work and that of their peers is (or is not) relevant to current conditions in contemporary art and culture. Unlike beginning and intermediate course work, the sustained critiques in this course are not focused on how works conform to faculty designed assignments but rather on how the student's self-directed approach has the potential to find an audience.

SCNG 236 - Ceramics (3.00)

FINA 420 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

DRWG 204 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

PNTG 306 - Distinguished Visiting Artist (3.00)

PNTG 306 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

PHOT 335 - Phot Genres: Steal This Class (3.00)

What is appropriation, and what are its rules? Who is permitted to borrow from whom? At what point does imitation become theft, and reuse into ripping-off? Is the "taking" of a photograph ever not an apprehension of something else? Is there even such a thing as an original? In this class, we will search out society's rules in order to break them. Students will investigate the long legacies of appropriation, citation, parody, and pastiche within photography and fine art, and find new frontiers of possibility. We will embezzle each other, ourselves, and our favorite photographic forebears. We will consider how context and gesture have the unique power to "move us to tears." Students will be expected to produce and share presentations on relevant artists, generate their own work in response to thematic assignments, and contribute to group discussions.

PHOT 335 - Phot Genres:Personal Histories (3.00)

Since Photography's inception, "The Portrait" has been used as a vehicle for representation. In this course, students will explore themes of personal histories as it relates to portraiture. Through a series of readings, film screenings, technical lighting demos, gallery visits, guest lectures and critiques students will develop a body of work that investigates themes related to their topic of choice. Experimentation and research will be critical to the student's success as they work through approximately 4 shooting assignments and a final project. Students will engage in discussions and develop critical inquiries surveying a wide range of topics that are contextualized by photo history such as representations of the body, utilizing the archive, voyeurism and the rise in selfie culture. The class will culminate with a week-long exhibition at The Fulcrum Press gallery in Chinatown.

PHOT 214 - Photography II (3.00)

SCNG 309 - SCNG: Experimental Film (3.00)

In this introductory filmmaking class, we will consider expansive ways to think about personal, non-narrative, and independent film practices through investigations of the moving image's essential components: light, movement, and time. We will examine examples from around the world and throughout cinema history to explore what constitutes "experimental" film and how this form challenges conventional cinematic language. Particular attention will be given to artists and filmmakers historically excluded from the dominant canon, especially women, queer artists, and filmmakers of color, whose work expands and complicates the boundaries of experimental practice. Drawing inspiration from class discussions, assigned readings, and weekly creative exercises, students will create two short films one using analog Super 8 film and one using digital technologies. Emphasis will be placed on hands-on experimentation, in-camera editing, sound-image relationships, and alternative approaches to structure, rhythm, and visual expression. Students will be encouraged to challenge typical cinematic conventions and engage deeply with both material, form and process. Alongside production, students will practice skills in critical viewing, analysis, and constructive critique to support a collaborative learning environment supporting vulnerability, openness, and individual expression. This course is designed to nurture personal vision while situating experimental filmmaking within the evolving landscape of contemporary visual culture and aesthetics.

SCNG 214 - Sculpture/New Genres II (3.00)

BFA IN FINE ARTS: PHOTOGRAPHY

Our Mission

Contemporary artists use their talent, imagination, and skill to create works of art that add beauty and richness to the world. They produce work for a vast global network of museums, commercial art galleries, publicly funded arts organizations, and artist-run spaces. Taught by a faculty of active professional artists, students in Fine Arts delve into each of the core disciplines—Painting, Sculpture/New Genres, and Photography—before selecting an area of emphasis.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Fine Arts: Emphasis in Photography program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

PHOT 204 - Photography I (3.00)

This course introduces students to the technical, aesthetic, and conceptual aspects of the medium of photography. Basic skills, including digital and analog (film) camera operation, the fundamentals of image exposure, black-and-white film processing, black-and-white and digital color printing, and basic presentation techniques, are covered in regular lab sessions. Group critiques, slide lectures, and field trips help students to develop a critical vocabulary. Offered fall semester only

PNTG 204 - Painting I (3.00)

This is a hands-on investigation of technical and formal issues in painting (oil, acrylic, and mixed media), focusing on developing technical abilities in collaboration with concepts and exploration of different methods of achieving visual "dexterity." Offered fall semester only

SCNG 204 - Sculpture/New Genres I (3.00)

An introduction to the history and practice of sculpture and new genres (new art forms that use time and space). Students are introduced to technical and contemplative approaches to commanding space and material to produce meaningful objects, events, or places. Technical instruction covers introductory use of wood and metal shops (including digital 3D printer), adhesives and joinery, basic mold making and casting, as well as contemporary new genres forms such as performance and installation art. Offered in Fall semester only.

FINA 217 - Digital Media (3.00)

Digital Media is an introductory course in new media – exposing students to a wide range of digital art-making practices while providing the technical fundamentals that enable students to begin integrating digital methods in their respective practices. The course consists of lectures, demonstrations, and computer lab experience. Particular attention is placed on balancing technical skills with creative content and experimental approaches. We will explore the evolution of new media and the corresponding social and cultural impact. The core software is Adobe Premiere, InDesign and Photoshop.

AHCS 237 - Sophomore Seminar: Global Ar (3.00)

The Sophomore Seminar 1 & 2 sequence is a key part of the Fine Arts curriculum and a course required of all sophomores. Sophomore Seminar 1 is designed to introduce Fine Art majors to key concepts in ancient and modern philosophy and its relationship to art and culture. Sophomore Seminar 2 critically considers postmodern theorists and artists who question the philosophical canon and the function of art in society. In both courses/semesters, students learn to evaluate the ideological impact of power, gender, economics, and social class on social and artistic norms. The purpose of the course is to develop the student's capacity to think critically about a broad range of issues and their relationship to the student's artistic practice. The course is a blended studio and seminar course that places a strong emphasis on close reading, critical listening, open-minded group discussion and critical making. Required for Fine Arts majors.

AHCS 226 - FA Contemporary Art Survey (3.00)

This Contemporary Art for Fine Artists is a survey of key fine art objects, practices and issues from the late 1950s to the present. Taking key historical events as its structure, the class uses contemporary art movements and counter movements to investigate mechanisms of form, taste, value, class, gender and exclusion, as these are demonstrated and challenged by artists in the US and globally. Included is a consideration of postmodern theory and fine art creation as systems capable of both perpetuating and effectively challenging normalized and marginalized identities. Required for Fine Arts majors.

PHOT 214 - Photography II (3.00)

This is an intermediate course within the Photography program that aims to build upon technical knowledge and conceptual structuring acquired in Photo 1. Students will spend time working with image capture and output processes, refining technical and communication methods, and making decisions to achieve their desired aesthetic and conceptual frameworks. Experimentation with new processes is expected as is the development of artistic and critical reasoning.

PHOT 230 - Lighting Studio I (3.00)

This course introduces students to basic studio skills in lighting and electronic flash applications, including 4x5 and medium formats, tungsten and strobe lighting, and in-depth exploration of genres such as photo illustration, still life and portraiture. Students develop a critical understanding of how imagery functions within a commercial context and the relationship between fine art and commercial work. Shooting assignments include still life, portraiture, and photo illustration projects. This course is required for Photography emphasis. Prerequisite: Photo I or equivalent

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 238 - Sophomore Seminar II (3.00)

Sophomore Seminar 2 builds on Seminar 1 through the lens of late modern and postmodern theorists and artists who challenge philosophical canons and investigate the social function of art. Students analyze the ideological dimensions of culture and artistic practice, including the ways land, space, and ecological systems inform meaning and power. The course continues to emphasize close reading, critical listening, open-minded discussion, and critical making, supporting students as they refine their capacity for thoughtful, critically engaged artmaking. Required for Fine Arts majors. Available to non-majors as approved by the Chair.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

FINA 374 - Studio III (3.00)

This advanced studio course allows students to learn advanced methods, materials, and techniques in painting, photography, and sculpture/new genres and accomplish advanced projects with the guidance of faculty. The course is also a welcoming place for students and faculty to exchange artistic and cultural attitudes, beliefs, and assumptions to develop together a more open-minded and generative approach to our artmaking and the evaluation of the works of other artists. Attending the Visiting Artist Lecture Series is required. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 375 - Studio IV (3.00)

This production-oriented advanced studio course emphasizes concepts, processes, and visual strategies toward developing an individual studio practice across the three main disciplines. Critiques, seminars, and individual meetings provide insight into contemporary discourses and practices while helping students find the working methods that best suit them. Attending the Visiting Artist Lecture Series is required. Offered spring semester only

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 474 - Senior Studio I (6.00)

Each student is given their own studio and works with a group of faculty mentors to develop a body of work. Critiques, individual meetings with mentors, visiting artists and critics, and group exhibitions expand students' knowledge base while focusing their practice. Attending the Visiting Artist Lecture Series is required. Prerequisite: FINA375 Studio IV. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

FINA 475 - Senior Studio II (6.00)

This course is devoted to completing a cohesive body of work culminating in the building and mounting of the senior exhibition. Students continue independent studio practices, discussions, and critiques with mentors, peers, visiting artists, and critics. This course addresses issues that prepare students for a life in art. Attending the Visiting Artist Lecture Series is required. Prerequisite: Senior Studio I. Offered spring semester only.

Elective Descriptions

SCNG 306 - Adv Tec: Into the Fold: Fabric (3.00)

Historically and pre-historically fabric(s) have been used as protection, coded language, resistance, structure, identity, style, communication, play, community building, camouflage, and more. Through skill building in context, students will grow confident in their ability to engage techniques, be supported to expand upon them, to develop a way of working within their own practice(s). This course will include hand and machine sewing, pattern-making based in but going beyond methodologies of garment construction, felting, weaving, dying, hand, machine and digital embellishment/adornment (embroidery, beading, couching), three dimensional "soft sculpture" and stretching/draping on an armature. Knitting, knot-work, macramé and crochet subject to interest. This course will move towards an interdisciplinary integration of digital and analog media. Maximizing the facilities, labs and equipment at Otis, students will grow comfortable using Adobe Creative Cloud software (Photoshop and Illustrator) and understand how these are set up to work with vector based output machines, for "fabric-informed" projects. Working with fabric as a pliable structure, surface and conceptual framework, we explore its construction, historical and cultural contexts (including with/by the more-than-human) to develop and expand upon skills to make projects possible within fields of sculpture, installation (including video, sound, multi-sensory work), performance, painting and drawing.

FINA 415 - Adv. Sem: All About Love (3.00)

Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. We will learn alongside theorists in somatics, performance studies, feminist studies, queer and trans studies, and Indigenous and Black studies to guide our foray into the inter-personal, political, performative, and transformative aspects of love as they shape our relationships to one another and to our creative practices. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

SCNG 237 - Advanced Ceramics (3.00)

This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

FINA 406 - Advanced Critique (3.00)

Through sustained critical dialogue, this course gives advanced students a unique opportunity to assess how their work and that of their peers is (or is not) relevant to current conditions in contemporary art and culture. Unlike beginning and intermediate course work, the sustained critiques in this course are not focused on how works conform to faculty designed assignments but rather on how the student's self-directed approach has the potential to find an audience.

SCNG 236 - Ceramics (3.00)

FINA 420 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

DRWG 204 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

PNTG 306 - Distinguished Visiting Artist (3.00)

PNTG 306 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

PNTG 214 - Painting II (3.00)

PHOT 335 - Phot Genres: Steal This Class (3.00)

What is appropriation, and what are its rules? Who is permitted to borrow from whom? At what point does imitation become theft, and reuse into ripping-off? Is the "taking" of a photograph ever not an apprehension of something else? Is there even such a thing as an original? In this class, we will search out society's rules in order to break them. Students will investigate the long legacies of appropriation, citation, parody, and pastiche within photography and fine art, and find new frontiers of possibility. We will embezzle each other, ourselves, and our favorite photographic forebears. We will consider how context and gesture have the unique power to "move us to tears." Students will be expected to produce and share presentations on relevant artists, generate their own work in response to thematic assignments, and contribute to group discussions.

PHOT 335 - Phot Genres:Personal Histories (3.00)

Since Photography's inception, "The Portrait" has been used as a vehicle for representation. In this course, students will explore themes of personal histories as it relates to portraiture. Through a series of readings, film screenings, technical lighting demos, gallery visits, guest lectures and critiques students will develop a body of work that investigates themes related to their topic of choice. Experimentation and research will be critical to the student's success as they work through approximately 4 shooting assignments and a final project. Students will engage in discussions and develop critical inquiries surveying a wide range of topics that are contextualized by photo history such as representations of the body, utilizing the archive, voyeurism and the rise in selfie culture. The class will culminate with a week-long exhibition at The Fulcrum Press gallery in Chinatown.

SCNG 309 - SCNG: Experimental Film (3.00)

In this introductory filmmaking class, we will consider expansive ways to think about personal, non-narrative, and independent film practices through investigations of the moving image's essential components: light, movement, and time. We will examine examples from around the world and throughout cinema history to explore what constitutes "experimental" film and how this form challenges conventional cinematic language. Particular attention will be given to artists and filmmakers historically excluded from the dominant canon, especially women, queer artists, and filmmakers of color, whose work expands and complicates the boundaries of experimental practice. Drawing inspiration from class discussions, assigned readings, and weekly creative exercises, students will create two short films one using analog Super 8 film and one using digital technologies. Emphasis will be placed on hands-on experimentation, in-camera editing, sound-image relationships, and alternative approaches to structure, rhythm, and visual expression. Students will be encouraged to challenge typical cinematic conventions and engage deeply with both material, form and process. Alongside production, students will practice skills in critical viewing, analysis, and constructive critique to support a collaborative learning environment supporting vulnerability, openness, and individual expression. This course is designed to nurture personal vision while situating experimental filmmaking within the evolving landscape of contemporary visual culture and aesthetics.

SCNG 214 - Sculpture/New Genres II (3.00)

BFA IN FINE ARTS: SCULPTURES/ NEW GENRES

Our Mission

Contemporary artists use their talent, imagination, and skill to create works of art that add beauty and richness to the world. They produce work for a vast global network of museums, commercial art galleries, publicly funded arts organizations, and artist-run spaces. Taught by a faculty of active professional artists, students in Fine Arts delve into each of the core disciplines—Painting, Sculpture/New Genres, and Photography—before selecting an area of emphasis.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Fine Arts: Emphasis in Sculptures and New Genres program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

SCNG 204 - Sculpture/New Genres I (3.00)

An introduction to the history and practice of sculpture and new genres (new art forms that use time and space). Students are introduced to technical and contemplative approaches to commanding space and material to produce meaningful objects, events, or places. Technical instruction covers introductory use of wood and metal shops (including digital 3D printer), adhesives and joinery, basic mold making and casting, as well as contemporary new genres forms such as performance and installation art. Offered in Fall semester only.

PNTG 204 - Painting I (3.00)

This is a hands-on investigation of technical and formal issues in painting (oil, acrylic, and mixed media), focusing on developing technical abilities in collaboration with concepts and exploration of different methods of achieving visual "dexterity." Offered fall semester only

PHOT 204 - Photography I (3.00)

This course introduces students to the technical, aesthetic, and conceptual aspects of the medium of photography. Basic skills, including digital and analog (film) camera operation, the fundamentals of image exposure, black-and-white film processing, black-and-white and digital color printing, and basic presentation techniques, are covered in regular lab sessions. Group critiques, slide lectures, and field trips help students to develop a critical vocabulary. Offered fall semester only

FINA 217 - Digital Media (3.00)

Digital Media is an introductory course in new media – exposing students to a wide range of digital art-making practices while providing the technical fundamentals that enable students to begin integrating digital methods in their respective practices. The course consists of lectures, demonstrations, and computer lab experience. Particular attention is placed on balancing technical skills with creative content and experimental approaches. We will explore the evolution of new media and the corresponding social and cultural impact. The core software is Adobe Premiere, InDesign and Photoshop.

AHCS 237 - Sophomore Seminar: Global Ar (3.00)

The Sophomore Seminar 1 & 2 sequence is a key part of the Fine Arts curriculum and a course required of all sophomores. Sophomore Seminar 1 is designed to introduce Fine Art majors to key concepts in ancient and modern philosophy and its relationship to art and culture. Sophomore Seminar 2 critically considers postmodern theorists and artists who question the philosophical canon and the function of art in society. In both courses/semesters, students learn to evaluate the ideological impact of power, gender, economics, and social class on social and artistic norms. The purpose of the course is to develop the student's capacity to think critically about a broad range of issues and their relationship to the student's artistic practice. The course is a blended studio and seminar course that places a strong emphasis on close reading, critical listening, open-minded group discussion and critical making. Required for Fine Arts majors.

AHCS 226 - FA Contemporary Art Survey (3.00)

This Contemporary Art for Fine Artists is a survey of key fine art objects, practices and issues from the late 1950s to the present. Taking key historical events as its structure, the class uses contemporary art movements and counter movements to investigate mechanisms of form, taste, value, class, gender and exclusion, as these are demonstrated and challenged by artists in the US and globally. Included is a consideration of postmodern theory and fine art creation as systems capable of both perpetuating and effectively challenging normalized and marginalized identities. Required for Fine Arts majors.

SCNG 214 - Sculpture/New Genres II (3.00)

Sculpture New Genres 2 is an intermediate studio course that expands on concepts and skills in 3- dimensional and time based media developed in SCNG I. This class will consist of a series of both short and long term prompts, lectures, readings, critiques and demos aimed at providing a wide range of cultural concepts, contexts and techniques to consider when developing works and situating them within time and space. New skills will include advanced techniques of construction in wood, metal, clay, fabric, video, further mold making, some plastics, and new computer technologies.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 238 - Sophomore Seminar II (3.00)

Sophomore Seminar 2 builds on Seminar 1 through the lens of late modern and postmodern theorists and artists who challenge philosophical canons and investigate the social function of art. Students analyze the ideological dimensions of culture and artistic practice, including the ways land, space, and ecological systems inform meaning and power. The course continues to emphasize close reading, critical listening, open-minded discussion, and critical making, supporting students as they refine their capacity for thoughtful, critically engaged artmaking. Required for Fine Arts majors. Available to non-majors as approved by the Chair.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

FINA 374 - Studio III (3.00)

This advanced studio course allows students to learn advanced methods, materials, and techniques in painting, photography, and sculpture/new genres and accomplish advanced projects with the guidance of faculty. The course is also a welcoming place for students and faculty to exchange artistic and cultural attitudes, beliefs, and assumptions to develop together a more open-minded and generative approach to our artmaking and the evaluation of the works of other artists. Attending the Visiting Artist Lecture Series is required. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 375 - Studio IV (3.00)

This production-oriented advanced studio course emphasizes concepts, processes, and visual strategies toward developing an individual studio practice across the three main disciplines. Critiques, seminars, and individual meetings provide insight into contemporary discourses and practices while helping students find the working methods that best suit them. Attending the Visiting Artist Lecture Series is required. Offered spring semester only

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

FINA 474 - Senior Studio I (6.00)

Each student is given their own studio and works with a group of faculty mentors to develop a body of work. Critiques, individual meetings with mentors, visiting artists and critics, and group exhibitions expand students' knowledge base while focusing their practice. Attending the Visiting Artist Lecture Series is required. Prerequisite: FINA375 Studio IV. Offered fall semester only.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences

Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

FINA 475 - Senior Studio II (6.00)

This course is devoted to completing a cohesive body of work culminating in the building and mounting of the senior exhibition. Students continue independent studio practices, discussions, and critiques with mentors, peers, visiting artists, and critics. This course addresses issues that prepare students for a life in art. Attending the Visiting Artist Lecture Series is required. Prerequisite: Senior Studio I. Offered spring semester only.

Elective Descriptions

SCNG 306 - Adv Tec: Into the Fold: Fabric (3.00)

Historically and pre-historically fabric(s) have been used as protection, coded language, resistance, structure, identity, style, communication, play, community building, camouflage, and more. Through skill building in context, students will grow confident in their ability to engage techniques, be supported to expand upon them, to develop a way of working within their own practice(s). This course will include hand and machine sewing, pattern-making based in but going beyond methodologies of garment construction, felting, weaving, dying, hand, machine and digital embellishment/adornment (embroidery, beading, couching), three dimensional "soft sculpture" and stretching/draping on an armature. Knitting, knot-work, macramé and crochet subject to interest. This course will move towards an interdisciplinary integration of digital and analog media. Maximizing the facilities, labs and equipment at Otis, students will grow comfortable using Adobe Creative Cloud software (Photoshop and Illustrator) and understand how these are set up to work with vector based output machines, for "fabric-informed" projects. Working with fabric as a pliable structure, surface and conceptual framework, we explore its construction, historical and cultural contexts (including with/by the more-than-human) to develop and expand upon skills to make projects possible within fields of sculpture, installation (including video, sound, multi-sensory work), performance, painting and drawing.

FINA 415 - Adv. Sem: All About Love (3.00)

Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. We will learn alongside theorists in somatics, performance studies, feminist studies, queer and trans studies, and Indigenous and Black studies to guide our foray into the inter-personal, political, performative, and transformative aspects of love as they shape our relationships to one another and to our creative practices. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

SCNG 237 - Advanced Ceramics (3.00)

This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

FINA 406 - Advanced Critique (3.00)

Through sustained critical dialogue, this course gives advanced students a unique opportunity to assess how their work and that of their peers is (or is not) relevant to current conditions in contemporary art and culture. Unlike beginning and intermediate course work, the sustained critiques in this course are not focused on how works conform to faculty designed assignments but rather on how the student's self-directed approach has the potential to find an audience.

SCNG 236 - Ceramics (3.00)

FINA 420 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

DRWG 204 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

PNTG 306 - Distinguished Visiting Artist (3.00)

PNTG 306 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

PNTG 214 - Painting II (3.00)

PHOT 335 - Phot Genres: Steal This Class (3.00)

What is appropriation, and what are its rules? Who is permitted to borrow from whom? At what point does imitation become theft, and reuse into ripping-off? Is the "taking" of a photograph ever not an apprehension of something else? Is there even such a thing as an original? In this class, we will search out society's rules in order to break them. Students will investigate the long legacies of appropriation, citation, parody, and pastiche within photography and fine art, and find new frontiers of possibility. We will embezzle each other, ourselves, and our favorite photographic forebears. We will consider how context and gesture have the unique power to "move us to tears." Students will be expected to produce and share presentations on relevant artists, generate their own work in response to thematic assignments, and contribute to group discussions.

PHOT 335 - Phot Genres:Personal Histories (3.00)

Since Photography's inception, "The Portrait" has been used as a vehicle for representation. In this course, students will explore themes of personal histories as it relates to portraiture. Through a series of readings, film screenings, technical lighting demos, gallery visits, guest lectures and critiques students will develop a body of work that investigates themes related to their topic of choice. Experimentation and research will be critical to the student's success as they work through approximately 4 shooting assignments and a final project. Students will engage in discussions and develop critical inquiries surveying a wide range of topics that are contextualized by photo history such as representations of the body, utilizing the archive, voyeurism and the rise in selfie culture. The class will culminate with a week-long exhibition at The Fulcrum Press gallery in Chinatown.

PHOT 214 - Photography II (3.00)

SCNG 309 - SCNG: Experimental Film (3.00)

In this introductory filmmaking class, we will consider expansive ways to think about personal, non-narrative, and independent film practices through investigations of the moving image's essential components: light, movement, and time. We will examine examples from around the world and throughout cinema history to explore what constitutes "experimental" film and how this form challenges conventional cinematic language. Particular attention will be given to artists and filmmakers historically excluded from the dominant canon, especially women, queer artists, and filmmakers of color, whose work expands and complicates the boundaries of experimental practice. Drawing inspiration from class discussions, assigned readings, and weekly creative exercises, students will create two short films one using analog Super 8 film and one using digital technologies. Emphasis will be placed on hands-on experimentation, in-camera editing, sound-image relationships, and alternative approaches to structure, rhythm, and visual expression. Students will be encouraged to challenge typical cinematic conventions and engage deeply with both material, form and process. Alongside production, students will practice skills in critical viewing, analysis, and constructive critique to support a collaborative learning environment supporting vulnerability, openness, and individual expression. This course is designed to nurture personal vision while situating experimental filmmaking within the evolving landscape of contemporary visual culture and aesthetics.

BFA IN GAME AND ENTERTAINMENT DESIGN

Our Mission

The Game and Entertainment Design curriculum combines both technical and artistic coursework that covers the visual development, analytical, and technical skills necessary to work within the Game and Real-time Development industry pipeline

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Game and Entertainment Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for

the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

GAME 200 - Game Design I (3.00)

A foundational understanding of the basics of game designing for various platforms like PCs, laptops, mobiles, TVs, and tablets. The course teaches students the technical skills required for creating games, including industry pipelines to make real-time development projects, team positions, and tools.

GAME 220 - Design & Drawing for Game I (3.00)

This 15-week Design and Drawing for Games course covers the fundamentals of game art and design, Props and Assets, character and environment design, storytelling, worldbuilding, animation, and portfolio development. Students will learn to create 2D and 3D game assets, design game characters and environments, translate game scripts, and develop a personal brand for their game design portfolio. The course includes a mid-term project, where students will create a concept art package for a game character or environment, and a final project where students will design a game level or world that includes a narrative, environment design, character design, and animation, and present it in the form of a pitch package with a playable demo or video walkthrough. By the end of the course, students will have the skills and knowledge to prepare for a career in game art and design.

GAME 260 - 3D for Game & Entertainment I (3.00)

In 3D for Games and Entertainment, students will learn the basics of game art design. Using software such as Maya, Blender, Substance Painter, and Photoshop. The course includes topics such as creating and manipulating 3D models, applying textures and materials, designing game environments, and basic principles of lighting and shading. The course also covers intermediate 3D game art modeling, Unreal Engine, advanced texturing and surfacing, set dressing and lighting, and a final project that involves developing a small area of a game or game experience using Unreal Engine. Students will gain a solid foundation in game art design and CG content creation and will have the opportunity to apply their skills in creating a game art environment or game experience.

AHCS 229 - Art History of Game Design (3.00)

This course provides an overview of the history of video games, tracing their evolution from their early beginnings to the present day. Through a combination of lectures, readings, discussions, and hands-on experiences, students will explore the social, cultural, and technological factors that have shaped the development of video games. Topics covered in the course include: The Origins of Video Games: The course will begin with an overview of the early history of video games, including the development of the first electronic games, such as Spacewar!, and the emergence of arcade games in the 1970s. Iconic Games: The course will examine some of the most iconic and influential video games in history, such as Pac-Man, Super Mario Bros., and Doom. Students will analyze the gameplay mechanics, cultural impact, and historical significance of these games. Landmark Companies: The course will also explore the companies that have played a significant role in the development of video games, such as Atari, Nintendo, and Sony. Students will learn about the business strategies, marketing tactics, and technological innovations that enabled these companies to succeed in the industry. Innovative Technology and Hardware: The course will delve into the technological advancements that have driven the evolution of video games, such as the introduction of 3D

graphics, motion controls, and virtual reality. Students will also examine the hardware platforms that have enabled video games to become increasingly sophisticated and immersive. By the end of the course, students will have gained a comprehensive understanding of the history of video games and the cultural impact they have had on society. They will be able to analyze and critically evaluate video games as a form of media, and understand the challenges and opportunities facing the video game industry today. Required for Game and Entertainment majors.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

GAME 210 - Game Engine Fundamentals (3.00)

The Game Engine Fundamentals course is a 15-week program that is divided into five main areas of study. The first part of the course introduces students to game engines, their history, types, and architecture, which includes scene management and rendering pipelines. The second part delves into asset management, importing assets, resource management, and guides students in creating a simple game. The third part covers physics, collision detection and response, as well as input methods such as keyboard, mouse, and touch input. The fourth part focuses on cross-platform development, API abstraction, platform-specific optimizations, and advanced rendering techniques, such as lighting, shading, and post-processing effects. The fifth and final part explores advanced physics, audio implementation, and optimization techniques such as profiling, debugging, and performance tuning, culminating in a final project where students apply their knowledge in creating their own game using the game engine.

GAME 215 - Color and Lighting for Games (3.00)

This course on Color and Lighting for Games covers the fundamentals of color theory and lighting techniques as they relate to game development. The course is broken down into five topics: Fundamentals of Color Theory, Lighting Techniques, Color and Mood, Dynamic Lighting Effects, and Case Studies and Best Practices. Throughout the course, students will learn how to use color and lighting effectively in game design, through assignments and projects that reinforce their learning and allow them to apply the techniques and concepts discussed in class. By the end of the course, students will have a comprehensive understanding of color and lighting for games, and a portfolio of work showcasing their skills in this area.

GAME 250 - Game Studio Project I (3.00)

Students will work solo to create a real-time development project, synergizing skills learned in all previous courses. Students will be exposed to the self-management and importance of project management in a controlled environment

AHCS 224 - Theories and Trends (3.00)

"This class covers the paradigm shift from modernity to contemporary culture through an analysis of these general and closely inter-related themes; your faculty will select which they emphasize but all of these should be familiar to you when you complete this class: Race in Contemporary Art, Media, Culture Bodies in Contemporary Art, Media, Culture Gender in Contemporary Art, Media, Culture Technologies in Contemporary Art, Media, Culture Identity in Contemporary Art, Media, Culture Consumerism in Contemporary Art, Media, Culture Hi-Low Art/Design in Contemporary Art, Media, Culture Contemporary art, design and media involve multi-dimensional social and artistic shifts taking us from "late modern" society into the so termed "post-modern" age. The class covers years beginning after World War II, marked by society-altering ideas and events that radically change how we view creatives, art, design, entertainment, technology, race, gender, and identity in a global context. We will learn what these terms mean, why they're important to working artists/designers and how ideas and events since the 1960s up through the current day impact fields from fine art to digital media, to fashion and graphic design. Conversely, we look at how art and design work to create who we are and how we think. We look at the global impact of the spread of TV, video, computers, the internet, the civil rights movements including #blacklivesmatter and BIPOC initiatives, gender rights revolutions including the feminist movements, LGBTQ+ culture, and various other multi cultural and counter-cultural perspectives like Latinx and Asian art movements. We study how global contemporary art and design are impacted by legacies of European ethnocentrism, and how multi disciplinary contemporary art fields recognize diverse subject positions to both reflect and challenge western white colonial and patriarchal power."

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

GAME 300 - Game Design II (3.00)

In this course, students continue their journey into real-time development. Students are introduced to other applications for the Unreal Game engine outside of games. Students will be introduced to basic blueprints, character and animation implementation, and tools and plugins to help create experiences that will bring their projects to life. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

GAME 320 - Cultural & Social Des for Game (3.00)

This course will focus on the cultural and social aspects of game through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of the SSCI LAS requirement: Cultural and Social Design for Games

GAME 332 - VFX for Games (3.00)

This 15-week VFX course for games using Unreal Engine and Houdini is divided into five topics. In the first three weeks, students will learn the fundamentals of VFX creation in Unreal Engine, including an introduction to Niagara, Unreal's VFX system, and basic workflows in Houdini. In weeks four to six, they will explore advanced techniques for controlling particle behavior and creating complex VFX using both Unreal Engine and Houdini. Weeks seven to nine focus on lighting and post-processing effects, while weeks ten to twelve cover creating VFX for different types of games. The final three weeks are dedicated to a hands-on project, where students will apply the concepts and techniques covered in the course to create a custom VFX sequence using Unreal Engine, Houdini, and Niagara. The course will provide students with a comprehensive understanding of VFX workflows and techniques for games, as well as practical experience creating VFX sequences for different genres of games. May be taken in either the fall or spring semesters. Must be completed in the junior year.

SSCI 213 - Cultural & Social Des for Game (3.00)

This course will focus on the cultural and social aspects of games (computer games / video games) through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of GAME331: Cultural and Social Design for Games In this course we will engage with how developers and artists are navigating AI and ethics in practical and imaginative ways. These ideas will be grounded in the perspectives of local artists, and prominent reference points connecting representation, cultural concerns, the use and exploitation of art/artists, and if the characters and world created reflect the cultural values of the workplace and industry that creates these games. Games will be explored in holistic and tangential ways to explore the complex formation of culture (for example parsing the differences between appropriation and theft). Furthermore, we will start with a study- group styled introduction to how historical technological advancements shifted the landscape and playing style of art/games and how that connects to the present day. After a cursory exploration of bias in race, class, gender and other identity markers, students will shift towards teaching giving the class their own deep dive presentation on a topic of their choice resulting in either a re-imagined game or drawing from lived experiences of researching games. Disability justice will also be used to guide our activities where we embrace interdependence (relying on one another), auditing products for their accessibility, and to practice creating solidarity and promoting diversity and equity ahead of entering the workplace. Overall, students will actively participate in shaping the

course experience. This course aims to have students lead discussions and classroom activities pre-figuring their professional work. By practicing a critical engagement with 'neutral' tools, students will develop a comprehensive understanding of the cultural and social design of games and be able to advocate for conscientious choices in characters, worlds, and game play.

MATH 247 - Programming/Scripting for Game (3.00)

This course is your gateway to the realm of game development, focusing on the programming and scripting aspects using the powerful Unreal Engine. Dive into the fundamentals of game programming, exploring programming languages, logic, and syntax. Learn to write scripts that control gameplay mechanics, implement AI, and create interactive elements. Through hands-on exercises, you'll gain practical experience and master debugging techniques to ensure smooth game performance. In the second part of the course, we'll delve deeper into the Unreal Engine and its scripting language, Blueprint. Unlock the potential of Blueprint's node-based system to create visually stunning and highly interactive games. Discover event-driven programming and object-oriented design to craft complex behaviors. Through engaging projects, you'll design game mechanics, create user interfaces, and integrate audio-visual effects. By the end, you'll have a solid foundation in programming and scripting for games using the Unreal Engine. Unleash your creativity into Programming/Scripting for Games, empowering you to bring your game ideas to life! Required of all Game and Entertainment Design majors.

GAME 360 - 3D for Game & Entertainment II (3.00)

The 3D for Game and Entertainment II course is a 15-week program that focuses on character modeling, hero piece asset creation, advanced material/PBR creation, texturing and UV mapping, character prop creation, lighting, rendering, and portfolio presentation. Students will learn the fundamentals of character modeling, including anatomy, topology, and sculpting techniques, and create a simple character model based on provided concept art. They will also create hero piece assets, learn advanced material and physically based rendering techniques, texture the models using industry-standard software, and create character props such as weapons, tools, or accessories. The course will culminate in a portfolio review and presentation.

GAME 350 - Game Studio Project II (3.00)

For Game Studio Project II, students will work in teams to develop a game experience using the principles and techniques learned in all prior courses. The project will be developed in Unreal Engine and will be a more complex and ambitious experience than the solo project in Game Studio Course I. Students will be required to work collaboratively and use best practices in project management, version control, and QA. The group project will be presented during the last week of the course, where each team will showcase their game to the class. Additionally, throughout the course, students will be encouraged to build a portfolio of their work and incorporate it into their résumé. By the end of the course, students will have a solid understanding of advanced game design principles, programming and game mechanics, game art and sound design, project management and collaboration, and portfolio creation for game development.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

GAME 460 - 3D fr Game & Entertainment III (3.00)

3D for Game Entertainment III is a 15-week course focused on teaching students about pipelines for level assembly, optimization, and workflows to take their game projects to a final status. The course will be divided into 5 topics: Introduction to Game Entertainment III, Level Assembly, Optimization, Workflows, and Finalizing and Presenting. Throughout the course, students will learn about game development processes, level design, optimization techniques, workflow management, and adding finishing touches to their games. The course aims to equip students with the necessary skills to present their projects in a professional manner and succeed in the gaming industry.

GAME 450 - Game Senior Project I (3.00)

Game Senior Project I is a 15-week course that focuses on creating a real-time development project that meets the criteria for a Senior show and creating work for a high-level portfolio. The course is divided into five sections, with the first section focusing on project planning and proposal, the second section focusing on project design and development, the third section focusing on project testing and refinement, the fourth section focusing on portfolio creation, and the fifth section focusing on networking and final presentations. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a real-time project, refined it based on user feedback, and created work for a high-level portfolio while establishing a professional network.

GAME 470 - Game Internship (3.00)

The 15-week Game Internship course is divided into two parts. The first part, spanning weeks 1-7, focuses on establishing networks within the internship. Students will learn about professionalism, networking, communication skills, goal setting, time management, and professional development. In the second part, spanning weeks 8-15, students will focus on creating a portfolio that includes work and experience from the internship. They will learn about portfolio basics, content, presentation, and review. The course will culminate in a final sharing session where students will present their portfolios and share their experiences and lessons learned during the internship, receiving feedback and support from their peers and faculty.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

GAME 445 - Technical Game Arts (3.00)

The Technical Game Art class is a 15-week course divided into five topics that introduce Real-time Development experiences, including In Camera VFX (ICVFX), AR/VR, Virtual Production, and project integration tools. The course begins with an overview of the industry, followed by deep dives into ICVFX, AR/VR, and Virtual Production, covering their principles, technical aspects, and software tools. The final topic brings everything together by applying the learned knowledge to a project, exploring project management techniques and collaboration tools to ensure a successful outcome. By the end of the

course, students will have gained a strong foundation in Real-time Development experiences and experience using industry-standard tools, which will benefit their future careers in the gaming or film industry.

GAME 451 - Game Senior Project II (3.00)

Game Senior Project II is a 15-week course that builds upon the skills learned in Game Senior Project I. The course is divided into five sections, with the first section focusing on advanced project development, the second section focusing on project testing and iteration, the third section focusing on multiplayer and online game development, the fourth section focusing on game business and marketing, and the fifth section focusing on final project presentation and industry networking. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a more advanced real-time project, refined it based on user feedback, learned about advanced game development techniques such as multiplayer and online gameplay, and established relationships with industry professionals.

GAME 470 - Game Internship (3.00)

The 15-week Game Internship course is divided into two parts. The first part, spanning weeks 1-7, focuses on establishing networks within the internship. Students will learn about professionalism, networking, communication skills, goal setting, time management, and professional development. In the second part, spanning weeks 8-15, students will focus on creating a portfolio that includes work and experience from the internship. They will learn about portfolio basics, content, presentation, and review. The course will culminate in a final sharing session where students will present their portfolios and share their experiences and lessons learned during the internship, receiving feedback and support from their peers and faculty.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Elective Descriptions

GAME 315 - Adv Game Creative w/ USC I (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

GAME 316 - Adv Game Creative w/ USC II (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 315

GAME 317 - Adv Game Creative w/ USC III (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 316

GAME 310 - Anatomy for Entertnmnt Design (3.00)

This course is designed to guide students in mastering the art of bringing characters to life by deeply understanding the human figure from the inside out. Students will learn to visualize the structure of the body by studying gestures, skeletal frameworks, muscles, and forms, and translating them into dynamic figures. They will work with various basic shapes—such as cylinders, cubes, and blocks—to build figures with accurate proportions and motion. As they progress, students will focus on challenging aspects such as hands, feet, and the head in perspective, and learn techniques to stylize anatomy and create exaggerated poses for more dynamic storytelling in their designs. In addition to technical skill development, this course will explore how muscle movement, body types, and aging impact character design. A diverse range of body types, genders, and ages will be examined to ensure students can create authentic, relatable characters. The course will also delve into light logic, hair studies, and value rendering to give students a holistic approach to figure drawing and visual storytelling. Ultimately, students will develop their skills to creatively connect anatomical accuracy with expressive, narrative-driven character designs in the context of entertainment.

GAME 310 - Animal + Creature Drawing (3.00)

This course teaches fundamental skills and techniques for creating realistic and imaginative animal and creature drawings. You will learn anatomy, structure, proportions, perspective, texture, and detail, which are essential for creating convincing and dynamic drawings. You will also develop your creativity and design skills by inventing your own unique creatures. Throughout the course, you will practice through a series of exercises and projects and receive feedback to refine your skills. By the end of the course, you will have a solid foundation in animal.

GAME 490 - Character Design for Game (3.00)

Conceptual designers for the game and animation industry must skillfully combine real world logic and design techniques to create unique and compelling environments, interiors, exteriors, props and vehicles for a variety of stories and historical eras. This requires a dynamic understanding of architecture, industrial design, structure and materials, as well as using illustration, design and modeling techniques to present cohesive architectural narratives, imaginative environments and accurate planning. DESIGN CONCEPTS FOR GAMES is an introduction to the conceptual process of Environment Design and World Building for visual development for feature animation, video games and film. Students will create original design solutions for real world situations utilizing scale, accurate layout, location, structural realities and available materials to create believable environments. Students will create plan and elevation drawings and dimensional studies in support of their original conceptual structures. Students will obtain a solid understanding of how to create original environments utilizing traditional methods, available technology and 3D visualization techniques to create layouts. Over the course of the semester students will design their own unique functioning community as an asset to an Environment Design Portfolio.

GAME 310 - Gesture Drawing (3.00)

Gesture Drawing emphasizes observational drawing from live models to develop strong posing skills for artists In animation, storyboard, illustration and fine arts tracks. In class lectures and demos will reinforce principles of animation. This course is designed to introduce and develop an understanding of life drawing that will serve as foundation for further studies in animation and entertainment arts. The class will focus on aspects of drawing that are used in the field of entertainment arts including but not limited to: Constructive Drawing based on gesture and form. Narrative or storytelling drawing and creating strong poses with emotion and impact. Observational drawing. Review of anatomical features. Thumbnail and quick sketch for quick concept sharing. Students will become familiar with successful artists relating to this field..

GAME 310 - Introduction to Blender (3.00)

This course is designed for artists who wish to implement 3D software into their 2D pipeline. Prerequisites include a basic understanding of Photoshop and a familiarity with Blender or other 3D programs. Throughout this course, students will learn world-building techniques starting from 2D sketches to composition thumbnails, 3D sketching in Blender, intermediate to advanced Blender functions such as modeling, texturing, simple UV mapping, lighting techniques, cameras/composition, and render passes; finalizing with Photoshop with digitally painting and post-processing. Students will learn to incorporate these techniques into their artwork regardless of art style to create professional-grade digital paintings and learn fundamental workflows for any industry or pipeline.

BFA IN GAME AND ENTERTAINMENT DESIGN

Our Mission

The Game and Entertainment Design curriculum combines both technical and artistic coursework that covers the visual development, analytical, and technical skills necessary to work within the Game and Real-time Development industry pipeline

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Game and Entertainment Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for

the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

GAME 200 - Game Design I (3.00)

A foundational understanding of the basics of game designing for various platforms like PCs, laptops, mobiles, TVs, and tablets. The course teaches students the technical skills required for creating games, including industry pipelines to make real-time development projects, team positions, and tools.

GAME 220 - Design & Drawing for Game I (3.00)

This 15-week Design and Drawing for Games course covers the fundamentals of game art and design, Props and Assets, character and environment design, storytelling, worldbuilding, animation, and portfolio development. Students will learn to create 2D and 3D game assets, design game characters and environments, translate game scripts, and develop a personal brand for their game design portfolio. The course includes a mid-term project, where students will create a concept art package for a game character or environment, and a final project where students will design a game level or world that includes a narrative, environment design, character design, and animation, and present it in the form of a pitch package with a playable demo or video walkthrough. By the end of the course, students will have the skills and knowledge to prepare for a career in game art and design.

GAME 260 - 3D for Game & Entertainment I (3.00)

In 3D for Games and Entertainment, students will learn the basics of game art design. Using software such as Maya, Blender, Substance Painter, and Photoshop. The course includes topics such as creating and manipulating 3D models, applying textures and materials, designing game environments, and basic principles of lighting and shading. The course also covers intermediate 3D game art modeling, Unreal Engine, advanced texturing and surfacing, set dressing and lighting, and a final project that involves developing a small area of a game or game experience using Unreal Engine. Students will gain a solid foundation in game art design and CG content creation and will have the opportunity to apply their skills in creating a game art environment or game experience.

AHCS 229 - Art History of Game Design (3.00)

This course provides an overview of the history of video games, tracing their evolution from their early beginnings to the present day. Through a combination of lectures, readings, discussions, and hands-on experiences, students will explore the social, cultural, and technological factors that have shaped the development of video games. Topics covered in the course include: The Origins of Video Games: The course will begin with an overview of the early history of video games, including the development of the first electronic games, such as Spacewar!, and the emergence of arcade games in the 1970s. Iconic Games: The course will examine some of the most iconic and influential video games in history, such as Pac-Man, Super Mario Bros., and Doom. Students will analyze the gameplay mechanics, cultural impact, and historical significance of these games. Landmark Companies: The course will also explore the companies that have played a significant role in the development of video games, such as Atari, Nintendo, and Sony. Students will learn about the business strategies, marketing tactics, and technological innovations that enabled these companies to succeed in the industry. Innovative Technology and Hardware: The course will delve into the technological advancements that have driven the evolution of video games, such as the introduction of 3D

graphics, motion controls, and virtual reality. Students will also examine the hardware platforms that have enabled video games to become increasingly sophisticated and immersive. By the end of the course, students will have gained a comprehensive understanding of the history of video games and the cultural impact they have had on society. They will be able to analyze and critically evaluate video games as a form of media, and understand the challenges and opportunities facing the video game industry today. Required for Game and Entertainment majors.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

GAME 210 - Game Engine Fundamentals (3.00)

The Game Engine Fundamentals course is a 15-week program that is divided into five main areas of study. The first part of the course introduces students to game engines, their history, types, and architecture, which includes scene management and rendering pipelines. The second part delves into asset management, importing assets, resource management, and guides students in creating a simple game. The third part covers physics, collision detection and response, as well as input methods such as keyboard, mouse, and touch input. The fourth part focuses on cross-platform development, API abstraction, platform-specific optimizations, and advanced rendering techniques, such as lighting, shading, and post-processing effects. The fifth and final part explores advanced physics, audio implementation, and optimization techniques such as profiling, debugging, and performance tuning, culminating in a final project where students apply their knowledge in creating their own game using the game engine.

GAME 215 - Color and Lighting for Games (3.00)

This course on Color and Lighting for Games covers the fundamentals of color theory and lighting techniques as they relate to game development. The course is broken down into five topics: Fundamentals of Color Theory, Lighting Techniques, Color and Mood, Dynamic Lighting Effects, and Case Studies and Best Practices. Throughout the course, students will learn how to use color and lighting effectively in game design, through assignments and projects that reinforce their learning and allow them to apply the techniques and concepts discussed in class. By the end of the course, students will have a comprehensive understanding of color and lighting for games, and a portfolio of work showcasing their skills in this area.

GAME 250 - Game Studio Project I (3.00)

Students will work solo to create a real-time development project, synergizing skills learned in all previous courses. Students will be exposed to the self-management and importance of project management in a controlled environment

AHCS 224 - Theories and Trends (3.00)

"This class covers the paradigm shift from modernity to contemporary culture through an analysis of these general and closely inter-related themes; your faculty will select which they emphasize but all of these should be familiar to you when you complete this class: Race in Contemporary Art, Media, Culture Bodies in Contemporary Art, Media, Culture Gender in Contemporary Art, Media, Culture Technologies in Contemporary Art, Media, Culture Identity in Contemporary Art, Media, Culture Consumerism in Contemporary Art, Media, Culture Hi-Low Art/Design in Contemporary Art, Media, Culture Contemporary art, design and media involve multi-dimensional social and artistic shifts taking us from "late modern" society into the so termed "post-modern" age. The class covers years beginning after World War II, marked by society-altering ideas and events that radically change how we view creatives, art, design, entertainment, technology, race, gender, and identity in a global context. We will learn what these terms mean, why they're important to working artists/designers and how ideas and events since the 1960s up through the current day impact fields from fine art to digital media, to fashion and graphic design. Conversely, we look at how art and design work to create who we are and how we think. We look at the global impact of the spread of TV, video, computers, the internet, the civil rights movements including #blacklivesmatter and BIPOC initiatives, gender rights revolutions including the feminist movements, LGBTQ+ culture, and various other multi cultural and counter-cultural perspectives like Latinx and Asian art movements. We study how global contemporary art and design are impacted by legacies of European ethnocentrism, and how multi disciplinary contemporary art fields recognize diverse subject positions to both reflect and challenge western white colonial and patriarchal power."

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

GAME 300 - Game Design II (3.00)

In this course, students continue their journey into real-time development. Students are introduced to other applications for the Unreal Game engine outside of games. Students will be introduced to basic blueprints, character and animation implementation, and tools and plugins to help create experiences that will bring their projects to life. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

GAME 320 - Cultural & Social Des for Game (3.00)

This course will focus on the cultural and social aspects of game through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of the SSCI LAS requirement: Cultural and Social Design for Games

CONC 300 - Concept Art Drawing Intensive (3.00)

This course is an in-depth exploration of the fundamentals of perspective drawing, composition, and visual storytelling in concept art. Students will develop essential skills in creating immersive environments, mastering perspective techniques, and refining their craft through iterative design processes. Assignments will emphasize research, reference gathering, and professional presentation to align with industry standards.

SSCI 213 - Cultural & Social Des for Game (3.00)

This course will focus on the cultural and social aspects of games (computer games / video games) through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of GAME331: Cultural and Social Design for Games In this course we will engage with how developers and artists are navigating AI and ethics in practical and imaginative ways. These ideas will be grounded in the perspectives of local artists, and prominent reference points connecting representation, cultural concerns, the use and exploitation of art/artists, and if the characters and world created reflect the cultural values of the workplace and industry that creates these games. Games will be explored in holistic and tangential ways to explore the complex formation of culture (for example parsing the differences between appropriation and theft). Furthermore, we will start with a study- group styled introduction to how historical technological advancements shifted the landscape and playing style of art/games and how that connects to the present day. After a cursory exploration of bias in race, class, gender and other identity markers, students will shift towards teaching giving the class their own deep dive presentation on a topic of their choice resulting in either a re-imagined game or drawing from lived experiences of researching games. Disability justice will also be used to guide our activities where we embrace interdependence (relying on one another), auditing products for their accessibility, and to practice creating solidarity and promoting diversity and equity ahead of entering the workplace. Overall, students will actively participate in shaping the course experience. This course aims to have students lead discussions and classroom activities pre-figuring their professional work. By practicing a critical engagement with 'neutral' tools, students will develop a comprehensive understanding of the cultural and social design of games and be able to advocate for conscientious choices in characters, worlds, and game play.

MATH 247 - Programming/Scripting for Game (3.00)

This course is your gateway to the realm of game development, focusing on the programming and scripting aspects using the powerful Unreal Engine. Dive into the fundamentals of game programming, exploring programming languages, logic, and syntax. Learn to write scripts that control gameplay mechanics, implement AI, and create interactive elements. Through hands-on exercises, you'll gain practical experience and master debugging techniques to ensure smooth game performance. In the second part of the course, we'll delve deeper into the Unreal Engine and its scripting language, Blueprint. Unlock the potential of Blueprint's node-based system to create visually stunning and highly interactive games. Discover event-driven programming and object-oriented design to craft complex behaviors. Through engaging projects, you'll design game mechanics, create user interfaces, and integrate audio-visual effects. By the end, you'll have a solid foundation in programming and scripting for games using the Unreal Engine. Unleash your creativity into Programming/Scripting for Games, empowering you to bring your game ideas to life! Required of all Game and Entertainment Design majors.

GAME 360 - 3D for Game & Entertainment II (3.00)

The 3D for Game and Entertainment II course is a 15-week program that focuses on character modeling, hero piece asset creation, advanced material/ PBR creation, texturing and UV mapping, character prop creation, lighting, rendering, and portfolio presentation. Students will learn the fundamentals of character modeling, including anatomy, topology, and sculpting techniques, and create a simple character model based on provided concept art. They will also create hero piece assets, learn advanced material and physically based rendering techniques, texture the models using industry-standard software, and create character props such as weapons, tools, or accessories. The course will culminate in a portfolio review and presentation.

CONC 301 - Storytelling for Concept Art (3.00)

This course focuses on visual storytelling as it applies to concept art for games, film, and animation. Students will explore composition, framing, sequential storytelling, and environmental storytelling to create compelling narrative-driven imagery. Through research, thumbnails, and final illustrations, students will develop skills in staging, lighting, and character/environment interaction to enhance storytelling clarity and impact.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

CONC 400 - Concept Art Production & Devel (3.00)

This team-based course simulates a real-world concept art production pipeline, where students collaborate to develop cohesive visual assets for a game or film project. Emphasizing professional workflows, students will explore ideation, iteration, visual research, style development, and final presentation. The course covers both character and environment design, prop development, and technical considerations for production-ready assets. By working in teams, students will gain experience in industry-standard collaborative workflows, feedback integration, and refining work based on production constraints.

GAME 450 - Game Senior Project I (3.00)

Game Senior Project I is a 15-week course that focuses on creating a real-time development project that meets the criteria for a Senior show and creating work for a high-level portfolio. The course is divided into five sections, with the first section focusing on project planning and proposal, the second section focusing on project design and development, the third section focusing on project testing and refinement, the fourth section focusing on portfolio creation, and the fifth section focusing on networking and final presentations. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a real-time project, refined it based on user feedback, and created work for a high-level portfolio while establishing a professional network.

GAME 470 - Game Internship (3.00)

The 15-week Game Internship course is divided into two parts. The first part, spanning weeks 1-7, focuses on establishing networks within the internship. Students will learn about professionalism, networking, communication skills, goal setting, time management, and professional development. In the second part, spanning weeks 8-15, students will focus on creating a portfolio that includes work and experience from the internship. They will learn about portfolio basics, content, presentation, and review. The course will culminate in a final sharing session where students will present their portfolios and share their experiences and lessons learned during the internship, receiving feedback and support from their peers and faculty.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

CONC 401 - Concept Art Packaging & Finish (3.00)

This course focuses on the final stages of concept art production, emphasizing professional presentation, refinement, and packaging of assets for industry use. Students will learn to prepare their work for production bibles, pitches, portfolios, and marketing materials. The course covers composition, polish, layout design, and final rendering techniques to ensure concept art is clear, compelling, and production-ready. Through iterative feedback and industry-standard formatting, students will create high-quality, polished concept presentations suitable for professional portfolios and pitches.

GAME 451 - Game Senior Project II (3.00)

Game Senior Project II is a 15-week course that builds upon the skills learned in Game Senior Project I. The course is divided into five sections, with the first section focusing on advanced project development, the second section focusing on project testing and iteration, the third section focusing on multiplayer and online game development, the fourth section focusing on game business and marketing, and the fifth section focusing on final project presentation and industry networking. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a more advanced real-time project, refined it based on user feedback, learned about advanced game development techniques such as multiplayer and online gameplay, and established relationships with industry professionals.

GAME 470 - Game Internship (3.00)

The 15-week Game Internship course is divided into two parts. The first part, spanning weeks 1-7, focuses on establishing networks within the internship. Students will learn about professionalism, networking, communication skills, goal setting, time management, and professional development. In the second part, spanning weeks 8-15, students will focus on creating a portfolio that includes work and experience from the internship. They will learn about portfolio basics, content, presentation, and review. The course will culminate in a final sharing session where students will present their portfolios and share their experiences and lessons learned during the internship, receiving feedback and support from their peers and faculty.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Elective Descriptions

GAME 315 - Adv Game Creative w/ USC I (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

GAME 316 - Adv Game Creative w/ USC II (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 315

GAME 317 - Adv Game Creative w/ USC III (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 316

GAME 310 - Anatomy for Entertnmnt Design (3.00)

This course is designed to guide students in mastering the art of bringing characters to life by deeply understanding the human figure from the inside out. Students will learn to visualize the structure of the body by studying gestures, skeletal frameworks, muscles, and forms, and translating them into dynamic figures. They will work with various basic shapes—such as cylinders, cubes, and blocks—to build figures with accurate proportions and motion. As they progress, students will focus on challenging aspects such as hands, feet, and the head in perspective, and learn techniques to stylize anatomy and create exaggerated poses for more dynamic storytelling in their designs. In addition to technical skill development, this course will explore how muscle movement, body types, and aging impact character design. A diverse range of body types, genders, and ages will be examined to ensure students can create authentic, relatable characters. The course will also delve into light logic, hair studies, and value rendering to give students a holistic approach to figure drawing and visual storytelling. Ultimately, students will develop their skills to creatively connect anatomical accuracy with expressive, narrative-driven character designs in the context of entertainment.

GAME 310 - Animal + Creature Drawing (3.00)

This course teaches fundamental skills and techniques for creating realistic and imaginative animal and creature drawings. You will learn anatomy, structure, proportions, perspective, texture, and detail, which are essential for creating convincing and dynamic drawings. You will also develop your creativity and design skills by inventing your own unique creatures. Throughout the course, you will practice through a series of exercises and projects and receive feedback to refine your skills. By the end of the course, you will have a solid foundation in animal.

GAME 490 - Character Design for Game (3.00)

Conceptual designers for the game and animation industry must skillfully combine real world logic and design techniques to create unique and compelling environments, interiors, exteriors, props and vehicles for a variety of stories and historical eras. This requires a dynamic understanding of architecture,

industrial design, structure and materials, as well as using illustration, design and modeling techniques to present cohesive architectural narratives, imaginative environments and accurate planning. DESIGN CONCEPTS FOR GAMES is an introduction to the conceptual process of Environment Design and World Building for visual development for feature animation, video games and film. Students will create original design solutions for real world situations utilizing scale, accurate layout, location, structural realities and available materials to create believable environments. Students will create plan and elevation drawings and dimensional studies in support of their original conceptual structures. Students will obtain a solid understanding of how to create original environments utilizing traditional methods, available technology and 3D visualization techniques to create layouts. Over the course of the semester students will design their own unique functioning community as an asset to an Environment Design Portfolio.

GAME 310 - Gesture Drawing (3.00)

Gesture Drawing emphasizes observational drawing from live models to develop strong posing skills for artists In animation, storyboard, illustration and fine arts tracks. In class lectures and demos will reinforce principles of animation. This course is designed to introduce and develop an understanding of life drawing that will serve as foundation for further studies in animation and entertainment arts. The class will focus on aspects of drawing that are used in the field of entertainment arts including but not limited to: Constructive Drawing based on gesture and form. Narrative or storytelling drawing and creating strong poses with emotion and impact. Observational drawing. Review of anatomical features. Thumbnail and quick sketch for quick concept sharing. Students will become familiar with successful artists relating to this field..

GAME 310 - Introduction to Blender (3.00)

This course is designed for artists who wish to implement 3D software into their 2D pipeline. Prerequisites include a basic understanding of Photoshop and a familiarity with Blender or other 3D programs. Throughout this course, students will learn world-building techniques starting from 2D sketches to composition thumbnails, 3D sketching in Blender, intermediate to advanced Blender functions such as modeling, texturing, simple UV mapping, lighting techniques, cameras/composition, and render passes; finalizing with Photoshop with digitally painting and post-processing. Students will learn to incorporate these techniques into their artwork regardless of art style to create professional-grade digital paintings and learn fundamental workflows for any industry or pipeline.

BFA IN GRAPHIC DESIGN

Our Mission

The major in Graphic Design offers a culturally rich learning experience focused on creating effective and arresting visual communication across a wide range of digital and analog media. Students are challenged to research, develop, and refine projects that create meaning through image-making and typographic form. Graphic Design majors learn to understand and create visual systems, tell complex stories, and build compelling user experiences and interfaces. They develop skills and fluency with digital, analog, and conceptual tools that embrace and evolve with technology.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Graphic Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

GDES 200 - Graphic Design I (3.00)

Graphic Design I is an introduction to the mechanics (technique), histories, culture and methodologies (practice and process) used by graphic designers in visual communication. Through exercises and projects, you will develop a process of articulating ideas, research, concept generation, experimentation, form-making, and craft skills. The coursework will oscillate between technique and culture throughout the semester, working incrementally from basic form-making to complex meaning and composition.

GDES 220 - Typography I (3.00)

Typography I introduces the mechanics (technique) and concepts (culture) of typographic applications. Throughout the semester's coursework, the class will oscillate between learning basic typesetting techniques and reading about and discussing the cultural conversations that typography can be part of. The coursework evolves incrementally: beginning with single letterforms and sentences to paragraphs and complex typographic applications.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

GDES 201 - Graphic Design II (3.00)

Graphic Design II is the continued exploration of the visual communication theories and methodologies commonly used by graphic designers. Through exercises and projects emphasizing type + image integration and visual + cultural literacy, you will continue to develop a work process that involves articulation of intent, visual research, concept generating, form-making, and craft skills.

GDES 221 - Typography II (3.00)

Typography II is a continuation of Typography 1, extending the typographic palette beyond form and composition to focus on the detail in typography—letter-spacing, typesetting, typographic history, type systems, typeface familiarity, complex layout, grid structures, and multi-page applications. You will work on assignments with rigorous parameters, increasing in complexity throughout the semester. You will develop and refine your typographic sensibility and design process. Prerequisite: GDES220 Typography I or approval of Chair

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

AHCS 222 - Graphic Design/ Illus History (3.00)

This course explores the interconnected histories of graphic design and illustration from early visual communication to contemporary digital practices. Students will analyze how these disciplines have shaped—and continue to shape—social, political, and cultural identities across different geographical areas and time periods. Through a chronological framework, students will develop critical thinking skills by examining historical works through multiple lenses: formal analysis, social history, semiotics, and intersectional perspectives including race, class, and gender. Key focus areas include the evolution of text-image relationships, technological innovations in visual communication, and the changing role of designers and illustrators as cultural producers. Students will connect historical movements to contemporary practice while examining the ethical responsibilities of visual communicators in today's global context. By the end of this course, students will understand how past movements and practitioners inform current design and illustration practices, enabling them to situate their own creative work within broader historical and cultural contexts.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

GDES 300 - Graphic Design III (3.00)

Graphic Design III is an increasingly sophisticated examination of design and its applications. Students broaden their understanding of effective design as a visual language in print and screen-based media. Assignments focus on form-making and problem-solving for specific audiences, using research, prototyping, testing, iteration, and developing proposals. The course builds on the skills learned in Graphic Design 1 and 2, preparing students to practice professionally in the 21 century. Prerequisite: GRDS201 Graphic Design II or approval of Chair

GDES 320 - Typography III (3.00)

Typography III focuses on designing and building complex typographic systems/structures for printed publications. The publication design process will help you understand and create relationships between these systems and your concept, content, and narrative. We will place heavy emphasis on understanding an advanced application of grid systems and typographic detailing and refinement (typographic craft). Through rigorous research and design presentations, you will also expand your visual literacy in contemporary and historical publications.

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

GDES 301 - Graphic Design IV (3.00)

Graphic Design IV expands and builds upon the previous course by focusing on experimentation with form and media and building increasingly complex visual systems and narratives. Students cultivate their interests via research and begin developing their working methods, emphasizing presentation skills, iteration, articulation, and refinement. Throughout the course, students develop visual narratives and apply them to print and screen-based media, including 2d, 3d, 4d, using analog and digital methods. Prerequisite: GRDS300 Graphic Design III

GDES 321 - Typography IV (3.00)

Typography IV is an expansion of typographic fundamentals from Type 1–3 (hierarchy, composition, system, structure, sequence/ pacing) to new contexts and mediums. Although projects are more self-directed and outcomes are more open-ended, assessment of work is still based on functionality, legibility in context, visual interest, and typographic craft regardless of medium, scale, or format. The projects emphasize a dialogue between classroom work and the larger cultural and historical context. There is no programming requirement for this class.

GDIL 354 - Professional Practice (3.00)

This course will establish a baseline understanding of professionalism in the Graphic Design and Illustration fields. We will define these terms collectively and consider how being a professional reflects our communication (written and spoken), preparation, business acumen, and presentation. Additionally, this course will ask you to reflect and expand your perspectives and working process. What is often overlooked in school is the ability to think/act as both an artist and a business-minded individual——understanding that the two are intertwined. May be taken in either fall or spring, must be completed in the junior year

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

GDES 453 - Systems and Identity (3.00)

In this course, students explore the past, present, and future of visual identity, branding, and systems design. The course asks whether a static mark can truly represent an organization in our hyper-connected global world. The work produced in the course focuses on identity as a system (typography, voice, color, application, etc...) of interrelated parts derived from a research-driven, conceptual premise. In seeking more nuanced approaches, students will create a distinctive visual identity system through a structured, yet experimental process. They will work through iterations and build an expansive visual language that moves beyond traditional branding applications. While developing these applied skills, students will begin to think about these practices critically from socio-political contexts as well as potentially through speculative investigations and world-building. Class Level Eligibility: Must be at Senior Level Standing

GDES 459 - Visual Language (3.00)

In this course, we will investigate what visual language is through reading, discussion, and your creation of a visual language and a multi-modal campaign (series of separate but related components) built in response to a concept, audience, and context determined by you. The project outcomes can be in any format, medium or scale. The class is structured as a studio workshop. Class time will be used for work, discussion, and visual research with your classmates and teachers. Critique will be both individual and group-based.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

GDES 440 - Senior Project(Graphic Design) (3.00)

In Senior Project/Seminar, students explore conceptual, theoretical, and experimental communications problems in graphic design, offering them the opportunity to integrate their personal vision with professional goals into a semester-long project. The course schedule is self-driven—each student is expected to define the goals, milestones, and schedule of their project. Weekly lectures, demonstrations, and workshops supplement the coursework and expand/expose students to a variety of technical and critical approaches defining a well-rounded contemporary practice. The result is a well-researched, thoroughly executed project representative of the culmination of education up to this point.

GDIL 410 - Entrepreneurship 101 (3.00)

An intensive introduction to all facets of running a business - marketing, promotion, developing a client base, pricing, legal, ethical, financial aspects, mindset, networking, interviewing. Students will learn best practices from: creative agencies, creative directors, Otis Alumna, clients, an accountant, an attorney, business coach and recruiters. This course teaches students how to plan, establish, and sustain a meaningful studio, office, and/or agency. It also provides tools and insights for sustaining winning strategies and securing FT work within an organization - integrating with career services, job fairs and recruitment opportunities. Eligibility: senior level standing. Must be at senior level standing.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Elective Descriptions

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 442 - Exhibition Design/Senior Show (3.00)

Exhibition: Senior Show is a course in which students work collaboratively to conceptualize, design, and produce the Senior Exhibitions showcasing the work of Seniors in the Graphic Design and Illustration Departments at Otis College of Art & Design. Forming a real team and working closely with the faculties, from pitching the curation concept, designing identity, to the entire execution - this is a valuable experience for students to rehearse their leadership, curation, environmental & identity design, digital campaign, career networking and communication skills before stepping into the professional career. Aside from the main thread, there will be hands-on demos based on needs, including but not limited to: environmental design presentation, creative coding and web architecture, advanced print production, etc. Open to seniors. Prerequisite: GDES301 or ILUS301

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

ILUS 358 - ST: Digital Paths (3.00)

Digital paths is a basic introduction to computer graphics and video editing software, such as Adobe Photoshop/Illustrator/After Effects/Media Encoder and Procreate in iPad. Students do not need relevant experience to enroll in this course, but the final assignments are presented in digital media. Through classroom demonstration and video watching, students will be able to make one motion graphic animation, and one experimental film.

ILUS 358 - ST: Energetic Editorial Exp. (3.00)

This class explores the dynamic blend of illustration and animation, teaching students how to create animated editorial illustrations for digital platforms such as online portfolios, news websites, and streaming services. Students will develop practical skills in bringing illustrations to life with movement and storytelling.. No prior experience is required.

ILUS 358 - ST: Narrative Illustration (3.00)

Students will create illustrations that convey moments in a story or script. They will use existing or personal ideas to illustrate these scenes while learning from film compositions, scripts, books, and other works to help communicate the narrative. Students should have a Tablet or Drawing Tablet that can attach to a laptop or computer, styles pen to use with Photoshop.

ILUS 358 - ST: Painting For Illustrators (3.00)

This course is designed for illustrators at all levels interested in painting.Through a series of projects students will learn to paint on different substrates as well as various techniques. Students will develop skills in rendering, conceptual and representational painting using photo references and observation. Assignments are based on typical areas of concentration found in the field of illustration including conceptual, narrative, editorial, and exhibition.

ILUS 358 - ST: Scientific Illustration (3.00)

Scientific Illustration will introduce students to scientific illustration as it could be used to educate, preserve, advertise, etc for various types of California farms. These could include food farms (vegetable, animal, orchards, vineyards, olive, date), non food farms (biofuels, building- hemp, bamboo, flax, and pharmaceuticals), using traditional farming methods or non-traditional such as hydroponics or aquaculture. Projects will be based on one chosen farm and include taxonomy of a farmed species, diagrams of the species and informational illustrations of farmed species.

ILUS 358 - ST: Watercolor Illustration (3.00)

Students are introduced to traditional and contemporary watercolor approaches and concepts, with emphasis on its formal language and the fundamentals of artistic expression using this medium. It helps prepare students for the field of illustration. Students will be using watercolors to paint from observation as well as from imagination in conjunction with reference materials and various other painting and mixed media methods.

GDES 458 - Advanced Imagemaking (3.00)

This class will be an exploration into practicing, contextualizing, and reflecting on image-making processes that you are already familiar with, as well as discovering new ways of making. We will connect reading to making, ideas to making, research to making, and language to making through weekly exercises. The goal is for you to understand and articulate processes that can become tools for making and investigating your subject matter in a critical way. Open to juniors, seniors and graduate students only.

GDIL 499 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

GDIL 499 - Advanced Image Making (3.00)

BFA IN ILLUSTRATION

Our Mission

The Illustration major is for students who love drawing, painting, and image making. Many creative and professional pathways open up to to illustrators who develop a strong personal style in their work and use their skills to support the communication needs of a variety of clients in multiple contexts, including but not limited to: editorial illustration, comics, children's books, murals, concept art, animation, design, and creative direction.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Illustration program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

ILUS 200 - Illustration I (3.00)

Professional Illustrators capture your attention and compel you to look further. Illustration 1 is an introduction to the visual communication methodologies that illustrators use to craft that skill. You will explore exercises and projects in diverse media to begin to develop a work process that involves visual research, observational drawing, concept generation, and journalistic storytelling. Projects are designed to encourage expression of your individual voice. The coursework includes historical and contemporary perspectives that have shaped history and culture,and examines the range of markets available to illustrators.

ILUS 212 - Drawing and Painting I (3.00)

This first part of consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting. Drawing and Painting I will focus on value, line, observation, material, composition, color, narrative, and development of your unique style and perspective through the form of visual communication.

ILUS 220 - Type for Illustrators (3.00)

In this class we will apply your skills as illustrators to the practice of fine typography. We will examine the ways in which illustration and typography intersect and the ways in which they differ. You'll be introduced to typographic theory and challenged to expand your type vocabulary, especially in regards to experimentation and typographic complexity. As illustrators, you are well acquainted with form and meaning; you'll be surprised at how closely related your experience is to the practice of typography. We will look for the unique connections that illustrators have to typography – a practice all designers need to master as a part of their skill set. The sequence of projects is designed to start focused and then expand in scope, so that you have time to become acquainted with fundamental concepts and build on them over the course of the semester.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

ILUS 201 - Illustration II (3.00)

Effective illustration can inform, provoke, and delight while shaping ideas and culture. Illustration II is a continued exploration of the visual communication theories and methodologies used by professional illustrators. Through exercises and projects emphasizing concept development, cultural literacy, type and metaphor, this course will further develop personal image-making, visual problem solving, editorial and narrative methods. Projects will focus on strategies and skills through the conditions of real world illustration projects.

ILUS 213 - Drawing and Painting II (3.00)

This second part of Illustration core consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting with a focus on perspective, hard surfaces, materials, and rendering in color.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

AHCS 222 - Graphic Design/ Illus History (3.00)

How do the communication arts reveal the expectations and values of a culture and society at any given time? What are the moral and ethical responsibilities of the communication artist? From typography to photography, trademarks to corporate logos, and from posters to postcards to illustrated electronic paperless forms, the communication arts provide a crucial link to people, places, and to popular culture. This course presents an overview of the communication arts, focusing upon the instrumentality of graphic design, advertising, and illustration in the construction of complex social, political, cultural, racial, ethnic, and gender identities. Activities and assignments such as panel discussions and photo essays afford students a chance to see the connection between their work, and larger historical, contemporary, and global aspects of culture. Most significantly, this course provides an opportunity to understand the vast influence that the communication arts have wielded and continue to wield across the world. This course may be taken in either fall or spring, must be completed in the sophomore year.

ILUS 300 - Illustration III (3.00)

An increasingly sophisticated examination of illustration concepts and their applications; students broaden their understanding of illustration as visual language in projects that involve research and analysis, focusing on image making, aesthetics, message clarity, audience, and intent with refined use of media and technique. Prerequisite: ILUS201 Illustration II or approval of Chair

ILUS 312 - Drawing and Painting III (3.00)

Students will be introduced to a variety of real-world illustration assignments and explore a variety of mediums, both traditional and digital, through image making, visual communication, message, creativity and intent. Emphasis will be on improving drawing and observational skills while developing a work process that includes research and analysis, ideation, media exploration, color theory and visual literacy. This course includes demonstrations in digital applications and includes professional illustration practices such as file management and presentation.

GDIL 354 - Professional Practice (3.00)

This course will establish a baseline understanding of professionalism in the Graphic Design and Illustration fields. We will define these terms collectively and consider how being a professional reflects our communication (written and spoken), preparation, business acumen, and presentation. Additionally, this course will ask you to reflect and expand your perspectives and working process. What is often overlooked in school is the ability to think/act as both an artist and a business-minded individual——understanding that the two are intertwined. May be taken in either fall or spring, must be completed in the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ILUS 301 - Illustration IV (3.00)

An increasingly sophisticated examination of illustration concepts and their applications; students broaden their understanding of illustration as visual language in projects that involve research and analysis, focusing on image making, aesthetics, message, audience, and intent with refined use of media and technique. Prerequisite: For ILUS301 is ILUS300

ILUS 313 - Drawing and Painting IV (3.00)

This course further develops students' use and understanding of advanced tools and applications defining the most forward-thinking sectors of contemporary Illustration. Students improve technical skills in both traditional and experimental media with regard to line, form, lighting, and space, while focusing on critical and conceptual issues framing the future of Illustration. Students create ambitious projects designed to engage expansive and dispersed audiences. Intensive real-world assignments prepare students for professional experience in diverse established and exploratory venues. Prerequisite: ILUS312 Drawing and Painting III

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

ILUS 363 - Alt Materials & Processes (3.00)

Course focuses on the use of mixed media and alternative materials for image construction. The class explores the "use values" of different mediums and how they affect communication. Some materials explored are graphite, paint, paper collage, cloth, digital collage, transfers, oil bars, duct tape, resin, inks, wax, and more. Exploring and experimenting with different combinations of materials is required. Class instruction will include lectures, assigned projects, media demonstrations, readings, slide presentations, and group feedback. Prerequisite: ILUS301 Illustration IV

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

ILUS 440 - Senior Project (Illustration) (3.00)

The purpose of this course is to develop complete and professional work derived from research collected during the previous semester in Senior Project Research. In this course, each student will define their own goals, methodologies and schedule of deadlines. We will address appropriate target audiences for each project and the media to best reach those audiences, as well as the specific direction each student wishes to pursue as a professional artist. Emphasis is placed on physical realization of each project's content. Students explore conceptual, theoretical, experimental communications problems offering them the opportunity to integrate personal vision with professional goals. In cross-disciplinary teams facilitated by faculty advisors, students define the scope and objectives of their inquiry and outline research and production methodologies.

GDIL 410 - Entrepreneurship 101 (3.00)

An intensive introduction to all facets of running a business - marketing, promotion, developing a client base, pricing, legal, ethical, financial aspects, mindset, networking, interviewing. Students will learn best practices from: creative agencies, creative directors, Otis Alumna, clients, an accountant, an attorney, business coach and recruiters. This course teaches students how to plan, establish, and sustain a meaningful studio, office, and/or agency. It also provides tools and insights for sustaining winning strategies and securing FT work within an organization - integrating with career services, job fairs and recruitment opportunities. Eligibility: senior level standing. Must be at senior level standing.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Elective Descriptions

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 442 - Exhibition Design/Senior Show (3.00)

Exhibition: Senior Show is a course in which students work collaboratively to conceptualize, design, and produce the Senior Exhibitions showcasing the work of Seniors in the Graphic Design and Illustration Departments at Otis College of Art & Design. Forming a real team and working closely with the faculties, from pitching the curation concept, designing identity, to the entire execution - this is a valuable experience for students to rehearse their leadership, curation, environmental & identity design, digital campaign, career networking and communication skills before stepping into the professional career. Aside from the main thread, there will be hands-on demos based on needs, including but not limited to: environmental design presentation, creative coding and web architecture, advanced print production, etc. Open to seniors. Prerequisite: GDES301 or ILUS301

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

ILUS 358 - ST: Digital Paths (3.00)

Digital paths is a basic introduction to computer graphics and video editing software, such as Adobe Photoshop/Illustrator/After Effects/Media Encoder and Procreate in iPad. Students do not need relevant experience to enroll in this course, but the final assignments are presented in digital media. Through classroom demonstration and video watching, students will be able to make one motion graphic animation, and one experimental film.

ILUS 358 - ST: Energetic Editorial Exp. (3.00)

This class explores the dynamic blend of illustration and animation, teaching students how to create animated editorial illustrations for digital platforms such as online portfolios, news websites, and streaming services. Students will develop practical skills in bringing illustrations to life with movement and storytelling.. No prior experience is required.

ILUS 358 - ST: Narrative Illustration (3.00)

Students will create illustrations that convey moments in a story or script. They will use existing or personal ideas to illustrate these scenes while learning from film compositions, scripts, books, and other works to help communicate the narrative. Students should have a Tablet or Drawing Tablet that can attach to a laptop or computer, styles pen to use with Photoshop.

ILUS 358 - ST: Painting For Illustrators (3.00)

This course is designed for illustrators at all levels interested in painting.Through a series of projects students will learn to paint on different substrates as well as various techniques. Students will develop skills in rendering, conceptual and representational painting using photo references and observation. Assignments are based on typical areas of concentration found in the field of illustration including conceptual, narrative, editorial, and exhibition.

ILUS 358 - ST: Scientific Illustration (3.00)

Scientific Illustration will introduce students to scientific illustration as it could be used to educate, preserve, advertise, etc for various types of California farms. These could include food farms (vegetable, animal, orchards, vineyards, olive, date), non food farms (biofuels, building- hemp, bamboo, flax, and pharmaceuticals), using traditional farming methods or non-traditional such as hydroponics or aquaculture. Projects will be based on one chosen farm and include taxonomy of a farmed species, diagrams of the species and informational illustrations of farmed species.

ILUS 358 - ST: Watercolor Illustration (3.00)

Students are introduced to traditional and contemporary watercolor approaches and concepts, with emphasis on its formal language and the fundamentals of artistic expression using this medium. It helps prepare students for the field of illustration. Students will be using watercolors to paint from observation as well as from imagination in conjunction with reference materials and various other painting and mixed media methods.

GDES 458 - Advanced Imagemaking (3.00)

This class will be an exploration into practicing, contextualizing, and reflecting on image-making processes that you are already familiar with, as well as discovering new ways of making. We will connect reading to making, ideas to making, research to making, and language to making through weekly exercises. The goal is for you to understand and articulate processes that can become tools for making and investigating your subject matter in a critical way. Open to juniors, seniors and graduate students only.

GDIL 499 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

GDIL 499 - Advanced Image Making (3.00)

BFA IN ILLUSTRATION: CONCEPT ART

Our Mission

The Illustration major is for students who love drawing, painting, and image making. Many creative and professional pathways open up to to illustrators who develop a strong personal style in their work and use their skills to support the communication needs of a variety of clients in multiple contexts, including but not limited to: editorial illustration, comics, children's books, murals, concept art, animation, design, and creative direction.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Illustration program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

ILUS 200 - Illustration I (3.00)

Professional Illustrators capture your attention and compel you to look further. Illustration 1 is an introduction to the visual communication methodologies that illustrators use to craft that skill. You will explore exercises and projects in diverse media to begin to develop a work process that involves visual research, observational drawing, concept generation, and journalistic storytelling. Projects are designed to encourage expression of your individual voice. The coursework includes historical and contemporary perspectives that have shaped history and culture,and examines the range of markets available to illustrators.

ILUS 212 - Drawing and Painting I (3.00)

This first part of consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting. Drawing and Painting I will focus on value, line, observation, material, composition, color, narrative, and development of your unique style and perspective through the form of visual communication.

ILUS 220 - Type for Illustrators (3.00)

In this class we will apply your skills as illustrators to the practice of fine typography. We will examine the ways in which illustration and typography intersect and the ways in which they differ. You'll be introduced to typographic theory and challenged to expand your type vocabulary, especially in regards to experimentation and typographic complexity. As illustrators, you are well acquainted with form and meaning; you'll be surprised at how closely related your experience is to the practice of typography. We will look for the unique connections that illustrators have to typography – a practice all designers need to master as a part of their skill set. The sequence of projects is designed to start focused and then expand in scope, so that you have time to become acquainted with fundamental concepts and build on them over the course of the semester.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

ILUS 201 - Illustration II (3.00)

Effective illustration can inform, provoke, and delight while shaping ideas and culture. Illustration II is a continued exploration of the visual communication theories and methodologies used by professional illustrators. Through exercises and projects emphasizing concept development, cultural literacy, type and metaphor, this course will further develop personal image-making, visual problem solving, editorial and narrative methods. Projects will focus on strategies and skills through the conditions of real world illustration projects.

ILUS 213 - Drawing and Painting II (3.00)

This second part of Illustration core consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting with a focus on perspective, hard surfaces, materials, and rendering in color.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

AHCS 222 - Graphic Design/ Illus History (3.00)

How do the communication arts reveal the expectations and values of a culture and society at any given time? What are the moral and ethical responsibilities of the communication artist? From typography to photography, trademarks to corporate logos, and from posters to postcards to illustrated electronic paperless forms, the communication arts provide a crucial link to people, places, and to popular culture. This course presents an overview of the communication arts, focusing upon the instrumentality of graphic design, advertising, and illustration in the construction of complex social, political, cultural, racial, ethnic, and gender identities. Activities and assignments such as panel discussions and photo essays afford students a chance to see the connection between their work, and larger historical, contemporary, and global aspects of culture. Most significantly, this course provides an opportunity to understand the vast influence that the communication arts have wielded and continue to wield across the world. This course may be taken in either fall or spring, must be completed in the sophomore year.

CONC 300 - Concept Art Drawing Intensive (3.00)

This course is an in-depth exploration of the fundamentals of perspective drawing, composition, and visual storytelling in concept art. Students will develop essential skills in creating immersive environments, mastering perspective techniques, and refining their craft through iterative design processes. Assignments will emphasize research, reference gathering, and professional presentation to align with industry standards.

ILUS 312 - Drawing and Painting III (3.00)

Students will be introduced to a variety of real-world illustration assignments and explore a variety of mediums, both traditional and digital, through image making, visual communication, message, creativity and intent. Emphasis will be on improving drawing and observational skills while developing a work process that includes research and analysis, ideation, media exploration, color theory and visual literacy. This course includes demonstrations in digital applications and includes professional illustration practices such as file management and presentation.

GDIL 354 - Professional Practice (3.00)

This course will establish a baseline understanding of professionalism in the Graphic Design and Illustration fields. We will define these terms collectively and consider how being a professional reflects our communication (written and spoken), preparation, business acumen, and presentation. Additionally, this course will ask you to reflect and expand your perspectives and working process. What is often overlooked in school is the ability to think/act as both an artist and a business-minded individual——understanding that the two are intertwined. May be taken in either fall or spring, must be completed in the junior year

NSCI 307 - Natural Science Elective (3.00)

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

CONC 301 - Storytelling for Concept Art (3.00)

This course focuses on visual storytelling as it applies to concept art for games, film, and animation. Students will explore composition, framing, sequential storytelling, and environmental storytelling to create compelling narrative-driven imagery. Through research, thumbnails, and final illustrations, students will develop skills in staging, lighting, and character/environment interaction to enhance storytelling clarity and impact.

ILUS 313 - Drawing and Painting IV (3.00)

This course further develops students' use and understanding of advanced tools and applications defining the most forward-thinking sectors of contemporary Illustration. Students improve technical skills in both traditional and experimental media with regard to line, form, lighting, and space, while focusing on critical and conceptual issues framing the future of Illustration. Students create ambitious projects designed to engage expansive and dispersed audiences. Intensive real-world assignments prepare students for professional experience in diverse established and exploratory venues. Prerequisite: ILUS312 Drawing and Painting III

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

CONC 400 - Concept Art Production & Devel (3.00)

This team-based course simulates a real-world concept art production pipeline, where students collaborate to develop cohesive visual assets for a game or film project. Emphasizing professional workflows, students will explore ideation, iteration, visual research, style development, and final presentation. The course covers both character and environment design, prop development, and technical considerations for production-ready assets. By working in teams, students will gain experience in industry-standard collaborative workflows, feedback integration, and refining work based on production constraints.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

ILUS 440 - Senior Project (Illustration) (3.00)

The purpose of this course is to develop complete and professional work derived from research collected during the previous semester in Senior Project Research. In this course, each student will define their own goals, methodologies and schedule of deadlines. We will address appropriate target audiences for each project and the media to best reach those audiences, as well as the specific direction each student wishes to pursue as a professional artist. Emphasis is placed on physical realization of each project's content. Students explore conceptual, theoretical, experimental communications problems offering them the opportunity to integrate personal vision with professional goals. In cross-disciplinary teams facilitated by faculty advisors, students define the scope and objectives of their inquiry and outline research and production methodologies.

GDIL 410 - Entrepreneurship 101 (3.00)

An intensive introduction to all facets of running a business - marketing, promotion, developing a client base, pricing, legal, ethical, financial aspects, mindset, networking, interviewing. Students will learn best practices from: creative agencies, creative directors, Otis Alumna, clients, an accountant, an attorney, business coach and recruiters. This course teaches students how to plan, establish, and sustain a meaningful studio, office, and/or agency. It also provides tools and insights for sustaining winning strategies and securing FT work within an organization - integrating with career services, job fairs and recruitment opportunities. Eligibility: senior level standing. Must be at senior level standing.

CONC 401 - Concept Art Packaging & Finish (3.00)

This course focuses on the final stages of concept art production, emphasizing professional presentation, refinement, and packaging of assets for industry use. Students will learn to prepare their work for production bibles, pitches, portfolios, and marketing materials. The course covers composition, polish, layout design, and final rendering techniques to ensure concept art is clear, compelling, and production-ready. Through iterative feedback and industry-standard formatting, students will create high-quality, polished concept presentations suitable for professional portfolios and pitches.

ELEC 299 - Studio Elective (3.00)

Studio Elective See each major and minor for a list of electives.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Electives

Course Title	Course Number	Credits
Bookmaking Projects	GDIL 456	3.00
Exhibition Design/Senior Show	GDIL 442	3.00

Advanced Image Making	GDIL 499	3.00

Elective Descriptions

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 442 - Exhibition Design/Senior Show (3.00)

Exhibition: Senior Show is a course in which students work collaboratively to conceptualize, design, and produce the Senior Exhibitions showcasing the work of Seniors in the Graphic Design and Illustration Departments at Otis College of Art & Design. Forming a real team and working closely with the faculties, from pitching the curation concept, designing identity, to the entire execution - this is a valuable experience for students to rehearse their leadership, curation, environmental & identity design, digital campaign, career networking and communication skills before stepping into the professional career. Aside from the main thread, there will be hands-on demos based on needs, including but not limited to: environmental design presentation, creative coding and web architecture, advanced print production, etc. Open to seniors. Prerequisite: GDES301 or ILUS301

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

ILUS 358 - ST: Digital Paths (3.00)

Digital paths is a basic introduction to computer graphics and video editing software, such as Adobe Photoshop/Illustrator/After Effects/Media Encoder and Procreate in iPad. Students do not need relevant experience to enroll in this course, but the final assignments are presented in digital media. Through classroom demonstration and video watching, students will be able to make one motion graphic animation, and one experimental film.

ILUS 358 - ST: Energetic Editorial Exp. (3.00)

This class explores the dynamic blend of illustration and animation, teaching students how to create animated editorial illustrations for digital platforms such as online portfolios, news websites, and streaming services. Students will develop practical skills in bringing illustrations to life with movement and storytelling.. No prior experience is required.

ILUS 358 - ST: Narrative Illustration (3.00)

Students will create illustrations that convey moments in a story or script. They will use existing or personal ideas to illustrate these scenes while learning from film compositions, scripts, books, and other works to help communicate the narrative. Students should have a Tablet or Drawing Tablet that can attach to a laptop or computer, styles pen to use with Photoshop.

ILUS 358 - ST: Painting For Illustrators (3.00)

This course is designed for illustrators at all levels interested in painting.Through a series of projects students will learn to paint on different substrates as well as various techniques. Students will develop skills in rendering, conceptual and representational painting using photo references and observation. Assignments are based on typical areas of concentration found in the field of illustration including conceptual, narrative, editorial, and exhibition.

ILUS 358 - ST: Scientific Illustration (3.00)

Scientific Illustration will introduce students to scientific illustration as it could be used to educate, preserve, advertise, etc for various types of California farms. These could include food farms (vegetable, animal, orchards, vineyards, olive, date), non food farms (biofuels, building- hemp, bamboo, flax, and pharmaceuticals), using traditional farming methods or non-traditional such as hydroponics or aquaculture. Projects will be based on one chosen farm and include taxonomy of a farmed species, diagrams of the species and informational illustrations of farmed species.

ILUS 358 - ST: Watercolor Illustration (3.00)

Students are introduced to traditional and contemporary watercolor approaches and concepts, with emphasis on its formal language and the fundamentals of artistic expression using this medium. It helps prepare students for the field of illustration. Students will be using watercolors to paint from observation as well as from imagination in conjunction with reference materials and various other painting and mixed media methods.

GDIL 499 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

GDIL 499 - Advanced Image Making (3.00)

BFA IN PRODUCT DESIGN

Our Mission

Whether students want to work for a major brand or build something of their own, the Product Design program at Otis helps them gain the skills, tools, and experience needed to begin a meaningful and sustainable career in design.

We live in a world shaped by the products, systems, and experiences that designers create. The Product Design program prepares students to navigate and contribute to this world through a hands-on education that blends traditional art and craft with technology, industry practices, and design knowledge.

With a focus on 2D and 3D skills, craftsmanship, and real-world problem solving, students learn a process that develops from research and discovery through design development to the delivery of meaningful solutions, using both physical and digital tools. The program is intentionally expansive, connecting to many other art and design disciplines. It offers flexible electives so students can tailor their path to match their skills, interests, and career goals.

Students graduate prepared for a wide range of creative and technical careers. Alumni have launched their own businesses, work as independent designers, or hold positions at companies such as Apple, Google, Raytheon, SpaceX, Crate & Barrel, Target, Disney, Coach, Guess, Vans, Herman Miller, IBM, Mattel, Nike, Adidas, PepsiCo, and many more. They work across industries including furniture, consumer electronics, fashion, footwear, packaging, toys, medical devices, digital product design, exhibition design, and more.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Product Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which

encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

PRDS 202 - Design Studio I (3.00)

This course forms the introduction to the profession, practices, and thinking involved in the product design process. Through a series of individual and team-based investigations and projects, students begin their acculturation into the field of Product Design. They use the design process while applying various 2D drawing, computer, and making skills to develop their ideas and explore the relationships between form, function, and how culture can be expressed by and be an influence on the object of design. Skills introduced: design process, user experience, identification of form and function relationships, cultural design influence and forces.

PRDS 210 - Design Communication I (3.00)

Sketching and technical drawings are fundamental to product design in developing and communicating ideas, designs, and concepts. This course presents techniques, tips, and tricks, from quick concept sketching to producing technical drawings to develop and communicate ideas. Students will begin to delineate 3-D forms in 2-D space and the various phases and deliverables of the design process. Skills introduced: rapid ideation, iterations, concept sketches, perspective drawing and shading, color rendering, visual fluency, cross-sections, exploded views and digital rendering, 3-D modeling, and visual presentation. Skills reinforced: design process, design communication, storytelling, and intention.

PRDS 230 - Methods & Materials I (3.00)

An introduction to all the shops, labs, tools and techniques used in the fabrication of both study and presentation models for Product Design. In this hands-on studio, students work with various materials in a series of small skills-oriented projects. This is an introduction to the basic tools used for both hard and soft materials. Students develop skills in form making, surface treatments, and finishing techniques. Field trips and off-site workshops at local manufacturers enhance students' knowledge of production techniques. Skills introduced: model making, shop skills, 3D form, surface finishing, sketching, visual fluency, and forces on the form,

AHCS 225 - History & Future Product Desg (3.00)

When did art become design? Product design influences and is influenced by culture and technological developments. From the Dark Satanic Mills and the Spinning Jenny to advanced 3D printers and the advent of AI, how have technology and manufacturing processes influenced and driven product design and what were the global societal and cultural consequences of these? Objects and products do not exist in a vacuum and thus must be seen through various lenses and themes such as the continual search for utopia and social reforms, the economic and psychological implications of man vs. machine, material exploration for functional and aesthetic potential, human inspiration from the natural world and our impact on the environment. This course examines how technology shaped today's design thinking and its potential impact on transforming the future of designed objects and the world as we know it. Required for Product Design majors.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

PRDS 203 - Design Studio II (3.00)

Students deploy the skills learned in the first semester, in thoroughly investigated and contextualized designs, that demonstrate cultural awareness, and self-expression. Digital modeling and design components are introduced as part of the design process. Different projects throughout the semester, allow students to learn how to distill research, contextualize and visualize data and information, recognize trends, and understand the user. Students will connect these insights to questions and decision-making in their design process. Skills introduced: Students learn to communicate their design concepts and user scenarios using 2D, 3D, and 4D methods (UX). Skills reinforced: design process, research, contextualization, user interaction.

PRDS 211 - Design Communication II (3.00)

Students continue to develop a 2D drawing foundation of 3D space by hand and digitally. Interface design is introduced to add a digital element to the previous semester's project. Students will learn orthographic hand drawing and rendering (precise annotation, translating physical assets and photographic references into graphic representations) with pencil, pen, and marker, as well as 2D digital drawing and rendering (Illustrator, Photoshop, basic technical package for manufacturing, storyboarding), and advanced digital sketching. Skills introduced: orthographic drawing, composition, digital drawing. Skills reinforced: hand and digital rendering, 2D form, visual fluency, and visual stylization. Software and tools: Illustrator, Photoshop, InDesign, Figma. Students will learn to prepare work for portfolios, presentations, exhibitions, decks, and websites. Pre-requisite: PRDS210 or Chair approval

PRDS 231 - Methods & Materials II (3.00)

A continuation of the previous semesters' course students continue to visit manufacturers and work with various materials in a series of small skills oriented projects. Students build upon their prior semester's experience and begin to integrate the design process skills they have learned in the Design Studio courses while exploring processes and materials. Skills reinforced: sketching, 3D form giving, forces of form, visual fluency, surface finishing, and craftsmanship.

LIBS 214 - Sophomore LAS Elective (3.00)

These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

PRDS 302 - Design Studio III (3.00)

Students further develop their design process while learning to design a family of products within a brand's design language and visual vocabulary. Projects may include consumer electronics, lighting, or other hard-goods categories. The focus is on exploring human factors, needfinding, materials, functionality, internal components, and user/product interaction, with a strong emphasis on concept development and formal excellence. The content, theme, and focus of the studio vary each semester, allowing for dynamic and responsive learning opportunities. Skills and knowledge introduced: product category analysis, business dynamics, value analysis, product development, and design writing. Skills reinforced: prototyping, sketching, photography, 2D layout, information design, branding, materials, manufacturing, sustainability, industry awareness, individual and group critique, meaning/semantics, model making, 3D form, storytelling, visual and oral presentation, design research, observational research, ideation, and brainstorming.

PRDS 310 - Design Communication III (3.00)

This introductory course to SolidWorks teaches the basics of 3D modeling, rendering techniques, and the processes for manufacturing. Students learn to digitally build and manipulate 3D forms and communicate these renderings, drawings, or 3D objects. There are weekly demonstrations of the software techniques and capabilities. Feedback on each student's design process and abilities is provided through individual desk crits as well as group presentations and critiques. Skills introduced: Solidworks 3D CAD software, modeling, rendering, and 3D print output. Skills reinforced: drafting, rendering, 2D digital fluency, visual stylization, and composition. Software: Solidworks, Keyshot.

PRDS 299 - Product Design Elective (3.00)

SSCI 210 - Social Science Elective (3.00)

Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

PRDS 303 - Design Studio IV (3.00)

In this junior-level course, students apply and expand upon foundational soft goods–making skills to design objects within the soft goods category, including fashion accessories, footwear, and apparel. Students design and construct three-dimensional products from flat patterns, developing a deep understanding of form, function, and style. The course emphasizes concept development, material exploration, and technical execution. Students investigate human factors, need finding, material and hardware selection, and performance considerations while producing high-quality prototypes. Skills and knowledge introduced: patternmaking, CLO software. Skills reinforced: prototyping, sketching, photography, 2D layout, information design, branding, materials, manufacturing, sustainability, industry awareness, individual and group critique, meaning/semantics, modelmaking, 3D form, storytelling, visual and oral presentation, design and observational research, ideation, and brainstorming.

PRDS 311 - Design Communication IV (3.00)

This studio course is a continuation of Design Communication III. The instructor provides feedback on each student's design process and abilities through individual desk crits and group presentations, and critiques. Skills reinforced: 3D modeling, digital rendering, and visual storytelling. Skills introduced: SolidWorks or Rhino 3D CAD software, modeling, rendering, and 3D print output. Skills reinforced: drafting, rendering, 2D digital fluency, visual stylization, and composition. Pre-requisites: PRDS310

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 319 - Human Factors in Product Des (3.00)

This course introduces Product Design students to human-centered design principles that explore physical, sensory, and emotional responses to consumer products. Through a combination of lectures and hands-on practice, students will assess a range of products for mechanical function and stylistic impact, focusing on enhancing user interaction and experience. Students will engage with statistical data tables and human factors terminology (no mathematical calculations required) to understand the diversity of the human body—its sensory capabilities, physical measurements, and dynamic movement—when designing usable and appealing products. Assignments will feature real-world manufacturing constraints, particularly within light assembly environments. Additionally, students will analyze regulatory compliance and product safety protocols as essential components of responsible and ethical design. Required for Product Design majors.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

PRDS 402 - Design Studio V (3.00)

This advanced project-based studio guides students through complex product design scenarios, exploring potential solutions, users, and markets. Students conduct research within a field of interest to identify a problem, theme, or opportunity, and develop a self-directed brief rooted in their personal interests and professional goals. This brief guides their design direction and supports the development of their senior project. Students are expected to integrate previous learning and knowledge into a comprehensive design process that includes research, concept development, and design. Instructors assign key deliverables throughout the semester. Final outcomes include a presentation, physical models, and written process book. Students are assessed on critical thinking, creativity, aesthetics, functionality, craftsmanship, communication, and presentation Skills developed: research, teamwork, information design, sustainability, prototyping, leadership, ideation, time management, semantics, design writing, ethics, and personal voice. Pre-requisite PRDS 302 & 303

PRDS 410 - Design Communication V (3.00)

This studio allows students to further advance their digital skills as they prepare to graduate. Skills introduced or reinforced: 3D modelling, digital rendering, and visual storytelling. Solidworks or Rhino 3D CAD software, rendering, and 3D print output. Software: SolidWorks or Rhino 3D CAD software. Keyshot, drafting, rendering, 2D digital fluency, visual stylization, and composition. Pre-requisite PRDS 311

PRDS 440 - Design & Market I (3.00)

Design-driven companies increasingly seek hybrid designers who can navigate the intersections of design, business strategy, and marketing while maintaining a strong foundation in creative thinking and craft. Many designers also pursue independent careers as entrepreneurs or individual consultants, where the ability to position, brand, and launch a product becomes essential. This advanced, project-based course challenges Product Design seniors to integrate real-world market considerations into their design process. Students will work within defined market segments, brand identities, and manufacturing constraints to develop product concepts that are not only insightful but viable for production and distribution. Through assigned, industry-facing projects, students will examine how market research, consumer insights, competitive analysis, branding, and pricing affect product design decisions. Emphasis is placed on collaboration, critical thinking, and adaptability as students refine their concepts with the realities of positioning, promotion, and scalability in mind. Line extensions, packaging, and product families may also be explored as students learn to develop cohesive, strategically aligned offerings. Rather than emphasizing purely personal expression or speculative design, this course mirrors professional practice, preparing students to respond to real-world design briefs and contribute meaningfully within industry contexts.

PRDS 299 - Product Design Elective (3.00)

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

PRDS 403 - Design Studio VI (3.00)

Having completed their designs the previous semester, the course serves as a place to execute and create a professional-grade prototype. This course also prepares students for their post-Otis experience by introducing professional practices germane to product design. This includes a heavy focus on their presentation skills and exhibition design aimed at their Senior Exhibition. Skills introduced: Exhibition design, graphic communication, video, animation, and editing. Skills reinforced: design research, observational research, UX-UI, FIGMA, teamwork, information design, sustainability, prototyping, leadership, ideation, brainstorming, time management, meaning/semantics, design writing, ethics, point of view, and voice. Pre-requisites: PRDS 402

PRDS 441 - Design & Market II (3.00)

Students continue to deepen their understanding of brand alignment, production considerations, and user experience. The course integrates strategic thinking and encourages cross-disciplinary collaboration as part of the design process. Students are guided to think beyond the studio, considering how their designs function within markets and larger systems of use, value, and communication, as well as how they operate within professional contexts. Skills reinforced: collaboration, strategic thinking, brand development, production planning, communication, and presentation. Pre-requisite PRDS 440

PRDS 299 - Product Design Elective (3.00)

PRDS 299 - Product Design Elective (3.00)

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Electives

Course Title	Course Number	Credits
Beginning Ceramics	PRDS 362	3.00
Intermediate Ceramics	PRDS 363	3.00
Prod Design: Luxury Packaging	PRDS 345	3.00
Prod Dsgn: Future of Furniture	PRDS 345	3.00
Product Design – Jewelry	PRDS 345	3.00

Elective Descriptions

PRDS 362 - Beginning Ceramics (3.00)

PRDS 363 - Intermediate Ceramics (3.00)

PRDS 345 - Prod Design: Luxury Packaging (3.00)

This course positions the designer as a director of storytelling, branding, form development, communication, and execution. Co-taught by two expert instructors, this course offers a holistic approach to fragrance packaging design within the context of luxury fashion brands. Students integrate two- and three-dimensional design principles with advanced visualisation and prototyping methods, exploring how narrative, sensory experience, and material choice shape perception, narrative, and brand positioning. Emphasis is placed on deep three-dimensional form exploration, time-based storytelling, and cohesive brand communication through packaging, both as an object and an experience.

PRDS 345 - Prod Dsgn: Future of Furniture (3.00)

Transform the way we live by partnering with Jonathan Louis, one of the largest furniture companies in the US, to define the future of interiors. In this course, you'll collaborate with working designers, trend forecasters, and sample makers to craft visionary solutions that reflect the evolving needs of contemporary and future living spaces. With cultural, technological, environmental and economic developments, the world of interiors is changing fast. This is your opportunity to tap into those trends, designing furniture that harmonizes with diverse living environments—from compact city apartments to flexible home offices. You'll delve into the psychology of what makes a living space feel like home and explore how an existing furniture company can adapt and broaden its offerings to meet the needs of renters, urban dwellers, and design-forward consumers. By understanding the driving factors behind furniture choices, you'll design innovative furniture pieces and expand the realm of modern interior design.

PRDS 345 - Product Design – Jewelry (3.00)

This course examines jewelry and adornment as a bridge between product and fashion design. Students explore the cultural, functional, and expressive roles of wearable objects through both traditional and digital fabrication methods. Coursework integrates metalworking, forming, CAD modelling and 3D printing to develop a comprehensive understanding of materials, processes, and form. Emphasis is placed on designing for the body with attention to ergonomics, movement, and narrative expression. Through iterative prototyping and critical discussion, students develop their ability to merge craft and technology in the creation of meaningful contemporary adornment.

BFA IN TOY DESIGN

Our Mission

Toys and play are an essential part of our world. Otis College offers one of the only four-year Bachelor of Fine Arts degree in Toy Design. Taught by faculty and guest mentors who are renowned toy and entertainment professionals, the program focuses on the process of designing and bringing toys to market. Students create toys for all ages, across numerous categories, with a focus on play. Our graduates will shape the industry, impact society, and inspire generations to come.

Toy Design is a specialized major and requires skills from many disciplines, including drawing, engineering, sculpting, prototyping, and digital design. Students will gain knowledge in child psychology, storytelling, presentations, and business practices. They'll learn about manufacturing, product safety, sustainability, and packaging, and will gain an understanding of the evolution of a toy from concept to the end consumer.

Many of the world's largest toy and entertainment companies are a few miles from campus. They are at the center of a multibillion-dollar industry that provides an enormous professional stepping-stone for our emerging toy designers. The Toy Design program offers students the opportunity to participate in summer internships after their sophomore and junior years. Often our students are hired by the companies where they worked.

Students will graduate with a final portfolio that highlights their unique talents, technical skills, and innovative ideas to launch them into a creative, rewarding, and meaningful career.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Toy Design program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which

encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103 - Exp Studio:Drawing (3.00)

These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104 - Exp Studio Dimensional Studies (3.00)

Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105 - Exp Studio Transmedia (3.00)

Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Thought Lab 2 (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

TOYD 200 - Toy Design I (3.00)

Toys are fundamental to our growth and culture. We learn to make decisions, socialize, and create through play. In these on-campus courses, you will develop an understanding of the creative process of toy design and learn the fundamentals of becoming a successful toy designer. Emphasis is placed on brainstorming and designing both hard and soft good toys that engage children across various play patterns. You'll apply drawing, model-making, and fabrication skills to create original toy concepts across categories such as Plush and Preschool toys. You'll learn to conduct market research and analysis to ensure your designs are viable and positioned strategically for their intended audience. Using various fabrication techniques, you'll translate your idea into a 3-D model and present the final product to faculty and visiting toy industry professionals. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined.

TOYD 232 - Visual Communication I (3.00)

To communicate effectively, a designer should have a broad range of both traditional and digital drawing skills. In these on-campus courses, you will develop your ability to communicate ideas through drawing from quick ideation sketches to final illustrations. Through the study of shape, perspective, style, use of character, and storytelling, students will learn to communicate with compelling, dynamic drawings. On the digital side, you'll learn how to take a concept from rough sketch to a refined set of technical illustrations. You'll learn Adobe digital tools that will enable you to produce drawings that accurately convey your design intent and serve as a blueprint when creating a prototype model. The skills acquired during these courses will be utilized throughout the remainder of your Toy Design studio courses.

TOYD 242 - Design Prototyping I (3.00)

As a Toy Designer, it's essential to know how to translate your 2D concepts into 3D form. These on-campus classes will equip you with practical prototyping skills and vocabulary that will enable you to develop and communicate your designs accurately. With guidance from your instructor, you'll work in the model shop, and learn to use the tools, equipment, and machinery. You'll integrate these skills and techniques into your concepts, developing an

understanding of the design and development process. Ultimately, these courses will provide you with working knowledge in the processes and techniques used in model-making for the toy industry. Fabrication, sculpting, molding, and casting will be taught through lectures and hands-on experience. With the building blocks learned throughout the year, you can move on with confidence to more advanced prototyping in subsequent courses.

SSCI 211 - Child Psych:Development& Play (3.00)

This course provides a comprehensive overview of child development from birth to adolescence, including developmental stages, critical periods, effects of early stimulation, environmental enrichment, and how to apply this information when designing children's toys, books, games, products, and entertainment. Special attention is given to toy design issues of aesthetics, safety, age-relevance, socio-cultural parameters, marketability, and characteristics of successful toys. By the end of this course students will have an introduction to the principles, theories, and practices of developmental psychology as they relate particularly to the periods of infancy, childhood, and adolescence. They will demonstrate the ability to apply these principles in the design process for toys and games. Specifically, they will: • Demonstrate that they can think about toys from a developmental perspective. • Learn to see the activity of play as central to developing healthy individuals. • Will demonstrate that they can creatively apply the results of developmental psychology to design, creation, and critique of toys. • Understand qualitative and quantitative tenets and tools of consumer research as they relate to play and toy design. • Be able to identify concepts of play such as play patterns and storytelling to name a few and how they impact toy design and development in positive ways for children. Required for Toy Design Majors

AHCS 224 - Theories and Trends (3.00)

This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

TOYD 201 - Toy Design II (3.00)

Toys are fundamental to our growth and culture. We learn to make decisions, socialize, and create through play. In these on-campus courses, you will develop an understanding of the creative process of toy design and learn the fundamentals of becoming a successful toy designer. Emphasis is placed on brainstorming and designing both hard and soft good toys that engage children across various play patterns. You'll apply drawing, model-making, and fabrication skills to create original toy concepts across categories such as Plush and Preschool toys. You'll learn to conduct market research and analysis to ensure your designs are viable and positioned strategically for their intended audience. Using various fabrication techniques, you'll translate your idea into a 3-D model and present the final product to faculty and visiting toy industry professionals. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined. TOYD 200 - Toy Design I is a prerequisite for TOYD 201 - Toy Design II

TOYD 233 - Visual Communication II (3.00)

To communicate effectively, a designer should have a broad range of both traditional and digital drawing skills. In these on-campus courses, you will develop your ability to communicate ideas through drawing from quick ideation sketches to final illustrations. Through the study of shape, perspective, style, use of character, and storytelling, students will learn to communicate with compelling, dynamic drawings. On the digital side, you'll learn how to take a concept from rough sketch to a refined set of technical illustrations. You'll learn Adobe digital tools that will enable you to produce drawings that accurately convey your design intent and serve as a blueprint when creating a prototype model. The skills acquired during these courses will be utilized throughout the remainder of your Toy Design studio courses. TOYD 232 - Visual Communication I is a prerequisite for TOYD 233 - Visual Communication II

TOYD 243 - Design Prototyping II (3.00)

As a Toy Designer, it's essential to know how to translate your 2D concepts into 3D form. These on-campus classes will equip you with practical prototyping skills and vocabulary that will enable you to develop and communicate your designs accurately. With guidance from your instructor, you'll work in the model shop, and learn to use the tools, equipment, and machinery. You'll integrate these skills and techniques into your concepts, developing an understanding of the design and development process. Ultimately, these courses will provide you with working knowledge in the processes and techniques used in model-making for the toy industry. Fabrication, sculpting, molding, and casting will be taught through lectures and hands-on experience. With the building blocks learned throughout the year, you can move on with confidence to more advanced prototyping in subsequent courses. TOYD 242 - Design Prototyping I is a prerequisite for TOYD 243 - Design Prototyping II

LIBS 219 - Methods and Materials (3.00)

Methods and Materials gives students a strong foundation for understanding the vast assortment of materials and methods by which things are built, made, manufactured with an emphasis on toys and consumer products. One will learn the fundamental technical means for successfully expressing a design concept in mass production. Manufacturing will also be discussed and learned from a world view highlighting in depth global centric topics like Factory Conditions, Product Safety, Sustainability and Up and Recycling. Finally, while the course will be comprehensive and rigorous, the speakers, lectures and course activities will infuse the excitement of what it's like to truly understand and participate in the miraculous supply change of goods and services and view this dynamic system as everything comes together to make, develop, and manufacture products. Required of all Toy Design majors. Available to non-majors as approved by the Chair.

CAIL 200 - Creative Action LAS Elective (3.00)

An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

TOYD 302 - Toy Design III (3.00)

Students will apply principles they have learned in Toy Design I and II to create original toys across categories such as Dolls, Action Figures, Vehicles and Playets, which can be expanded to become a toy brand with line extensions. Story-based toys and line extensions are important in building toy brands. In these on-campus courses, you will conceptualize and bring a character based product line to life. Storyboarding will be utilized to show how the characters live in their world. You will also create your own accessory as a stand-alone item or to complement your existing toy line. Advanced presentation and building techniques will be used to showcase toy concepts and features. Students will learn the most effective methods of presenting their toy concepts visually, demonstrating new features digitally when it is the most effective way of communicating play patterns and function. Corporate sponsored projects may occur during either semester, but regardless, critiques will include visiting toy industry professionals. TOYD 201 - Toy Design II is a prerequisite for TOYD 302 - Toy Design III

TOYD 334 - Visual Communication III (3.00)

Sketching original characters and developing storyboards is an effective way of communicating original concepts and features of toys and related accessories. In this on-campus drawing and portfolio development class, you'll acquire advanced skills in the theory and practice of sketching, drawing, and rendering techniques as applied to toy products. You'll design a logo and create a promotional sheet that reflects your graphic skill and creative styling with best-in-class examples of your work. You will also concentrate on the creation, organization, and presentation of your portfolio. Finally, you'll write a résumé that expresses your creativity and design experience with links to a digital portfolio. TOYD 233 - Visual Communication II is a prerequisite for TOYD 334 - Visual Communication III

TOYD 340 - Design Prototyping III (3.00)

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as Rhino, which is often used in the construction of prototype models. You'll learn modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. Students will progress to more advanced modeling techniques and will continue to develop their rendering and animation skills. You'll be introduced to programs such as Adobe After Effects to create more compelling digital video presentations with animation, titles, sound effects, and transitions. Students will be able to apply acquired learning to improve all their toy design projects and presentations.

AHCS 236 - History of Toys (3.00)

Today we understand play as a child's universal language and right. But was it always this way? This synchronous online course explores historical global perspectives on toys, trends, and play, providing valuable context for the emerging toy designer. You will develop a cultural awareness of the evolution of the toy industry reflected by past and current societal changes. Active research, videos, readings, and discussions inform personal narrative writing along with engaging, creative group projects. Class projects will be relevant and enhance the experience of studio toy design classes. By the semester's end, you will have completed quality research on your favorite childhood toy and designed an instructional game focusing on a chosen era, genre, or region related to the history of toys. Required for Toy Design majors.

MATH 136 - Math Elective (3.00)

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

TOYD 303 - Toy Design IV (3.00)

Students will apply principles they have learned in Toy Design I and II to create original toys across categories such as Dolls, Action Figures, Vehicles and Playsets, which can be expanded to become a toy brand with line extensions. Story-based toys and line extensions are important in building toy brands. In these on-campus courses, you will conceptualize and bring a character based product line to life. Storyboarding will be utilized to show how the characters live in their world. You will also create your own accessory as a stand-alone item or to complement your existing toy line. Advanced presentation and building techniques will be used to showcase toy concepts and features. Students will learn the most effective methods of presenting their toy concepts visually, demonstrating new features digitally when it is the most effective way of communicating play patterns and function. Corporate sponsored projects may occur during either semester, but regardless, critiques will include visiting toy industry professionals. TOYD 302 - Toy Design III is a prerequisite for TOYD 303 - Toy Design IV

TOYD 343 - Design Prototyping IV (3.00)

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as Rhino, which is often used in the construction of prototype models. You'll learn modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. Students will progress to more advanced modeling techniques and will continue to develop their rendering and animation skills. You'll be introduced to programs such as Adobe After Effects to create more compelling digital video presentations with animation, titles, sound effects, and transitions. Students will be able to apply acquired learning to improve all their toy design projects and presentations. TOYD 340 - Design Prototyping III is a prerequisite for TOYD 343 - Design Prototyping IV (3.00)

CAIL 301 - Creative Action Junior Studio (3.00)

An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

NSCI 308 - Human Factors in Toy Design (3.00)

The class will be a seminar course with lectures, homework assignments and exams. The students will obtain a basic understanding of structural engineering and develop some of the skills necessary to describe the structural systems of their creations. Students are introduced to basic concepts of structural loads, vectors (forces & moments), equilibrium in 2-D and 3-D, and strength of materials (stress and deformation). The course focuses on understanding these fundamental concepts as they relate to art and design with emphasis on the form making opportunities of expressing structural engineering and construction. Various structural elements will be examined for their role in resisting different types of loads and forces including analysis of simple (determinate) beams, trusses, columns, cables, arches, walls, frames and design of beams. Sustainability will be consistently discussed throughout the course with awareness of the environmental impacts of construction in the lectures, assignments and assigned reading. The lectures and reading assignments will include examples of extraordinary engineers and amazing structures including many examples from the instructor's portfolio of work. The signature and team assignments will require the students to develop structural design techniques through collaboratively exploring unconventional structural systems, architecturally exposed structures, and the structural support of sculptures. The course assignments will explore engineering creativity, design thinking, controlled tectonic expression, embodied mind and making. Engineered form generation with sketches and model making will emphasize design and learning about structural behavior through physical contact (touch) with design trajectories that arise through these form-making physical interactions. Concept creation skills will be emphasized through analysis of precedents, scheme generation, sketching and physical model making. Students will learn about how to develop structural design concepts, team collaboration, and how to make good structural design decisions using criteria to evaluate their schemes (conceptual design, engineering performance, environmental impacts, cost effectiveness & buildability). The students will learn together on the project assignments with pin-ups, class discussions and desk crits. Required for Toy Design majors.

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

TOYD 404 - Toy Design V (3.00)

In this advanced level on-campus course, students will continue in their development of conceptual, technical, and creative skills and methodologies relating to toy design across categories such as Games, Collectibles or a category of their choice. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined. TOYD 303 - Toy Design IV is a prerequisite for TOYD 404 - Toy Design V

TOYD 436 - Visual Communication IV (3.00)

This advanced on-campus computer lab course featuring programs in the Adobe Creative Suite allows you to apply your skills and knowledge to improve ongoing projects and enhance your portfolio. Students may have participated in summer internships where they gained real world experience and will be able to apply that learning as well as their classroom experience to design and prepare their final projects, portfolio, and senior show. The course covers a wide range of Advanced Photoshop techniques, including AI Art integration into your ideation process and how to prepare your digital assets for senior show.

TOYD 442 - Design Prototyping V (3.00)

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as ZBrush, which is often used in the construction of prototype models. You'll learn advanced modeling and prototyping

techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine.

TOYD 452 - Professional Development I (3.00)

This two-course professional development series requires students to engage in an immersive manner on career development and working professionalism by exploring and participating in all facets of career development in the toy and related industries. These classes are part of a professional development journey that requires each student to engage in a path of focused study of working professionalism by actively participating in and interacting with classroom simulations, industry speakers, and seminars that will bring the toy industry directly to the classroom in a one-of-kind hands on experience. Students will gain an understanding of toy industry practices across the board. It introduces core behaviors, business and industry concepts including but not limited to advertising, brand directional outlines, consumer behavior, costing, legal, logistics, marketing, marketing research, management, manufacturing, merchandising, operations, pricing, product development, sales, and social media as well as workplace recognition and decolonization. Students will understand how this industry scaffold impacts design and how it will affect them as designers.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

TOYD 405 - Toy Design Vi (3.00)

The focus of this advanced level on-campus course is professional preparation and presentation of a collected body of work to be displayed at the Annual Senior Exhibition. Seniors will participate individually and work cooperatively as a class to prepare. Seniors will plan and execute a formal exhibition with each student having their own designated "gallery space" where they will display selected projects that showcase their best work. Students will participate in the scheduled event with industry professionals. In addition, the class will work together to curate and create a class website. Each student will also have completed a personal design website, pdf portfolio, resume, promo sheet, and contribute work to the online Otis Senior Exhibition. All required TOYD courses must be completed or in progress and students must be eligible for Commencement in order to participate in TOYD 405 - Toy Design VI

TOYD 437 - Package Design (3.00)

Branding and packaging play a pivotal role in the success of toy products. This on-campus course emphasizes developing branding strategies and creating three-dimensional package mockups to address a range of packaging styles and retail challenges. In conjunction with marketing considerations, package design must also account for storage, safety, and sustainability factors. Participants can tackle these issues while implementing unique graphic treatments on full-color 3D mockup packages. Upon course completion, attendees will understand various packaging types, including the closed box, window box, tray box, and blister card options. They will recognize the significance of effective communication on packaging to engage consumers.

TOYD 443 - Design Prototyping Vi (3.00)

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as ZBrush, which is often used in the construction of prototype models. You'll learn advanced modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. TOYD 442 – Design Prototyping V is a prerequisite for TOYD 443 – Design Prototyping VI

TOYD 453 - Professional Development II (3.00)

This two-course professional development series requires students to engage in an immersive manner on career development and working professionalism by exploring and participating in all facets of career development in the toy and related industries. These classes are part of a professional development journey that requires each student to engage in a path of focused study of working professionalism by actively participating in and interacting with classroom simulations, industry speakers, and seminars that will bring the toy industry directly to the classroom in a one-of-kind hands on experience. Students will gain an understanding of toy industry practices across the board. It introduces core behaviors, business and industry concepts including but not limited to advertising, brand directional outlines, consumer behavior, costing, legal, logistics, marketing, marketing research, management, manufacturing, merchandising, operations, pricing, product development, sales, and social media as well as workplace recognition and decolonization. Students will understand how this industry scaffold impacts design and how it will affect them as designers. TOYD 452 - Professional Development I is a prerequisite for TOYD 453 - Professional Development II

LIBS 314 - LAS Upper Division Elective (3.00)

This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

Electives

Course Title	Course Number	Credits

Elective Descriptions

FOUNDATION PROGRAM LEARNING OUTCOMES

Our Mission

The Foundation Program at Otis College is a rigorous first-year experience designed to empower a diverse community of makers as they build fundamental skills, critical thinking, problem-solving, research methodologies, social responsibility, and meaningful communication skills in Art and Design.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the BFA in Animation program learning outcomes here or request information.

Course Descriptions

FNDT 100 - Form and Figure (3.00)

This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills

of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101 - Color and Design (3.00)

Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

CAIL 102 - Contemp Studio & Creative Actn (3.00)

Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

AHCS 122 - Visual Culture 1 (3.00)

"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

ENGL 108 - Writing as Discovery (3.00)

How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

FNDT 103A - Exp Studio:Drawing (3.00)

In this course, students will explore color, composition, and various drawing materials through working from direct observation. Our unique and exciting compositional setups within the classroom will provide the students with the arena to investigate color relationships, compositional strategies and complexities of ideas. Students will acquire research skills and examine modern and contemporary approaches to cityscape and landscape by experimenting with a wide range of drawing media, and students will begin to shape their personal artistic vision.

FNDT 103B - Exp Studio:Drawing (3.00)

Structural drawing, perceptual and conceptual approaches, and figurative drawing skills are expanded through the study of the figure's relation to design, composition, environments, draping, and movement. Students discover personal approaches to drawing and mark-making by experimenting with a variety of traditional and contemporary methods, media, and techniques.

FNDT 103D - Exp Studio:Drawing (3.00)

Students will build on acquired drawing skills and learn to communicate concepts from ideation to object, using drawing as a language. Projects can include working from specific concepts to working from imagination or memory. Courses will be speculative, critical, and design focused. These projects can range from rendering a single object or a figure to building a whole environment and narrating a story. Note: The two rotating topics (Experimental Drawing & Drawing and Concept Visualization) will be offered bi-annually

FNDT 104A - Exp Studio Dimensional Studies (3.00)

This course explores art and design for and about the human and more-than-human body. By focusing on the scale and interaction, the coursework will Investigate making objects in relation to the body. It will incorporate elements such as silhouette, scale, textiles, fibers, sculpture, wearables, time, while considering topics such as disability access, social and political dimension of body and identity, post-humanism, cyborg, anime. Research themes could deal with fashion, ergonomics, participatory/performance art. (open media, clay, or fiber)

FNDT 104C - Expanded Studio Dimensional St (3.00)

This material studies course will explore the principles and elements of 3D design while offering an introduc-tion to basic 3D modeling software skills. Students will engage in exercises to learn about the political, eco-logical, and historical implicattion of materials while working from concept through iteration to a final product using the model shop and expanding on their existing hand building skills. Note: The two rotating topics (World-Building & Materials and Fab-lab) will be offered bi-annually.

FNDT 105A - Exp Studio Transmedia (3.00)

This course explores design principles in visual communication across cultural contexts and contemporary media. Students will engage in projects, critiques, and discussions that focus on the relationship between media, platforms, technology, and society. Emphasis is placed on collaborative problem-solving, innovative thinking, and the exploration of media.

FNDT 105C - Expanded Studio Transmedia (3.00)

This course explores intersections of photography, imaging, language, graphic design, print and digital media in service of sharpening the designer's liberatory voice. Students explore visual language and compositional strategies across image-text fields that lead to innovative design solutions with a focus on social justice and design/publishing's revolutionary potential. Note: The two rotating topics (Documentary Strategies & Design for Change) will be offered bi-annually.

FNDT 150 - Major Studio Elective (3.00)

The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

AHCS 123 - Visual Culture 2 (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions

and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

AHCS 123 - Visual Culture 2--Advanced (3.00)

Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

LIBS 115 - Activism, Change, and Justice (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

LIBS 115 - Media:Environments &Experience (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

LIBS 115 - Narrative: Story and Culture (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

LIBS 115 - Technology: Innovation &Design (3.00)

Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

Elective Descriptions

ANIM 101 - Intro to 3D Graphics (3.00)
The purpose of the class is to introduce students to basic principles of working with 3D software in general (terms, interface, operations, operating in 3D space) and working specifically with Autodesk Maya. To this end, the class will consist of assignments and critiques to develop problem-solving, critical thinking and a basic understanding of the Maya interface.

ANIM 101 - Intro to Digital Drawing (3.00)

Students in this course will engage in a series of concepting exercises in traditional media and learn the process of those concepts into Abode Photoshop. Students will develop concept ideas for characters, props, and environments in traditional media, and then develop essential skills to bring those concepts to life in Adobe Photoshop.

GDES 101 - Intro to Graphic Design (3.00)

Students will have an immersive experience by being introduced to the many facets of graphic design in a studio setting that will allow them to work independently and collaboratively. Using image, type, form, color, and employing the essential tools of design practically and comprehensively: including typesetting, bookbinding, web design tools, and self-guided research, students will have the opportunity to produce various experimental outcomes.

ILUS 101 - Intro to Illustration (3.00)

Illustrators explore visual language and narrative skills through drawing, sketching, sequencing, researching, and observation for applications in entertainment, animation, character development, concept art, publication (books, zines, comics) and editorial. In this course, we introduce a range of basic Illustration concepting skills and production strategies/ techniques to develop your own personal illustration practice. We study the origins of illustration as a professional practice and major historical departure points informing the industry today. We also explore the topics of branding, marketing, client interface and production deliverables. As we move through the course, you will begin to conceptualize/ develop your artistic style by relating the topics and theories and how they connect to your own life experiences.

FSHD 101 - Digital Print Design for Fash (3.00)

Step into the world of fashion textiles and bring your ideas to life! In this online course, you'll explore how to design bold, colorful print patterns using Adobe Photoshop and Illustrator. From mood boards to repeat patterns, you'll learn how to recolor, remix, and refine your designs, then see them come to life on real products like tote bags, zipper pouches, and phone cases. Perfect for freshman students curious about fashion design, this course offers a fun, creative space to experiment with color, shape, and storytelling through print.

FSHD 101 - Intro to Fashion Design (3.00)

This course introduces students to the fundamentals of designing and rendering a fashion collection. Students will learn how to develop a fashion pose, research and develop a direction for their design work, appropriately apply their inspiration to their designs, draw technical flats and render their design concepts onto a fashion figure.

FINA 101 - Intro to Fine Arts (3.00)

This course will introduce students to the fundamental skills and concepts of fine art photography and video. Students will learn about the technical aspects of photography and videography and the history and theory of these art forms. The course will also explore the role of photography and video in contemporary society, considering how these mediums are used to represent and shape our understanding of race, gender, sexuality, and other social issues. Technical Skills will include camera operation, exposure, lighting, composition, video capture, editing, and sound. By the end of this course, you will be able to create photographs and videos that are both technically proficient and conceptually engaging and have a deeper understanding of the power of these mediums to shape our world.

FINA 101 - Intro to Fine Arts (3.00)

This introductory course delves into the fundamental techniques and concepts in painting and sculpture, giving students a strong technical and conceptual foundation for artistic expression. Students learn core techniques in various painting mediums and explore a range of sculptural materials. The course will teach students how to analyze artworks and consider how artists use form, color, and materials to convey meaning. In addition to giving students studio time to develop their ideas and approaches to art making, class presentations, discussions, and critiques will consider the diverse practices in contemporary art and their cultural and social impact.

GAME 101 - Drawing to Digital for Games (3.00)

The objective of this course is to build the skills necessary to create effective concept designs. This will be done through developing strong fundamental drawing skills that communicate the student's intentions with confidence. Students will also learn the importance of research and how it helps to build strong concepts and provide visual references. Additionally, students will engage in a series of exercises and assignments to learn the process of developing and executing concepts into Adobe Photoshop. They will develop concept ideas for characters, props, and environments and learn the essential skills to bring those concepts to life in Adobe Photoshop.

GAME 101 - Intro to Game & Ent Design (3.00)

Introduction to Game and Entertainment Design is an introductory course that explores the fundamentals of Content Creation for Game and Entertainment. Students will be introduced to the principles, theories, and practices essential for designing engaging, interactive, and immersive games and entertainment experiences across various platforms. Through lectures, discussions, hands-on projects, and critiques, students will gain a foundational understanding of game design elements, storytelling techniques, user experience, and the overall creative process involved in developing interactive media.

GAME 101 - Intro to Storytellng for Games (3.00)

The objective of this course is to build the skills necessary to create effective concept designs. This will be done through developing strong fundamental drawing skills that communicate the student's intentions with confidence. Students will also learn the importance of research and how it helps to build strong concepts and provide visual references. Additionally, students will engage in a series of exercises and assignments to learn the process of developing and executing concepts into Adobe Photoshop. They will develop concept ideas for characters, props, and environments and learn the essential skills to bring those concepts to life in Adobe Photoshop.

PRDS 101 - Designing the World (3.00)

Co-taught by multiple Product Design guest faculty, this course allows students to explore the wide-ranging possibilities of Product Design, from everyday objects to unique experiences. Through guided exploration and hands-on projects, students experiment with design thinking, ideation, modelling, and concept development. Drawing and making skills are developed through work in a variety of materials, encouraging curiosity, creativity, and confidence in translating ideas into tangible form. By the end of the course, students gain a broad understanding of how Product Design connects imagination, function, and human experience across and within virtually every design field.

TOYD 101 - Introduction to Toy Design (3.00)

The role of a Toy Designer is to enhance the world in which we play. This introductory course covers the toy design process from concept to consumer and the social, cultural and/or environmental challenges facing an ever-evolving industry. Exploring multiple toy categories, students will develop original toy concepts and learn the benefits of play, age-appropriate play patterns, category expectations, research techniques, brainstorming and ideation, sketching and rendering, and pitching and presenting.

LIBERAL ARTS AND SCIENCES

Our Mission

The Liberal Arts and Sciences are the nexus of all education, providing us with the tools to understand the past, negotiate the present, and create the future. Without them we are lost; with them, we can reimagine anything.

Degree Requirements

Liberal Arts and Sciences Course Offerings

All Liberal Arts and Sciences courses are 3 credits.

Students may take Natural Science, Social Science, and Math courses off campus, unless a specific course at Otis College is required by their major. Students must get their substitute courses approved through the Advising Department before they enroll at another institution.

Students may not take Art History, English, Creative Action Integrated Learning (CAIL) or Capstone courses off campus without the written permission of the Chair of the Liberal Arts and Sciences Department.

Elective Descriptions

AHCS 122 - Visual Culture 1 (3.00)

AHCS 123 - Visual Culture 2 (3.00)

AHCS 123 - Visual Culture 2--Advanced (3.00)

Planned as a continuation of Visual Culture 1, Visual Culture 2: Unpacking Art, Power & Modernity offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

AHCS 222 - Graphic Design/ Illus History (3.00)

AHCS 224 - Theories and Trends (3.00)

AHCS 229 - Art History of Game Design (3.00)

CAIL 200 - Food & Community Garden (3.00)

Food and Urban Gardening: Food justice is defined by three principles: 1. Access to fresh, healthy, locally grown, and culturally appropriate food 2. Living wages and fair working conditions for all food system workers 3. Community control over food systems, through community-based agriculture, cooperatives, faith-based initiatives, etc (Los Angeles Community Garden Council). Moreover, food justice as a theoretical concept recognizes that "food choice" is impacted by intersecting factors such as race, class, and gender at all levels: production, distribution, and consumption. A food justice framework shows how inadequate access to nutritious and whole food options leads to chronic ailments that could be prevented if people had affordable, healthy choices in their neighborhoods. Corporate control of food, along with real estate practices, have contributed to the development of food deserts, which further impacts BIPOC women and children's right to access affordable and healthy food options. This class will therefore explore food justice through partnership with Holy Nativity Community Garden in Westchester, which has been helping to address food injustice since 2008. Through meetings with the garden manager/master gardener, students will learn why the garden was started, the community it serves, and other ways they contribute to food justice in the city. Students will use ethnographic fieldwork techniques (e.g., observation and mapping) to understand how the places where we live fundamentally impact our health. Fieldwork practices will be complemented by collaborative games and a group project that will challenge students to develop socially responsible, culturally relevant, and sustainable responses to food injustice in their communities.

CAIL 201 - Human Ecology (3.00)

CAIL 200 - Innovative Materials Research (3.00)

This course will be a long-term project for the duration of several semesters. It is a course that benefits students across all majors. Materials are being used in every discipline. The goal is that students of all majors will help to develop and build a materials collection within the library.With the help of the Head Librarian and her team as a committing partner/client, students will envision the space, and design innovative ways to display them effectively. They will develop the first step to an innovative materials collection that, in the long run, will be a permanent section of the library and will serve as a reference tool for students and faculty of all majors. Eventually, depending on budget and space, even a hands-on interdisciplinary maker lab, similar to the KEA lab in Copenhagen.

CAIL 200 - kNOw Memorials (3.00)

Together we will research the history of the monument as a means to visually represent hegemonic power structures in society, and how artists and designers have historically upended this visual structure of power. This CAIL 200 course will partner with a local arts and culture organization to help study and build place-based community-centered environments open to the public. Course Learning Outcomes: Students will: Practice context-driven research (in terms of history, culture, and/or politics). Develop collaborative skills. Develop communication skills. Develop an awareness of cultural bias. Demonstrate a respect for the diversity of ideas

CAIL 200 - LA Past Lives (3.00)

LA Past Lives: Villa Aurora will focus on the cultural landmark and artists' residency at Villa Aurora in Pacific Palisades. This historic home of exiled German-Jewish writer Lion Feuchtwanger and his wife Marta is a metaphor for the urban history of Los Angeles and the creative communities concerned with the ongoing explorations associated with art and design. We will focus on Villa Aurora's history and impact on Los Angeles both as a site of refuge and residence for an international body of artists.

CAIL 200 - Paranormal LA (3.00)

In this course we will look at paranormal movements, cults, spaces, places and occurrences that have happened in Los Angeles and the wider landscape. We will explore the movements of Spiritualism, the New Age, religious ecstatic sects, and various folk religious groups. We will look at local paranormal legends, ghost stories and hauntings. Students will perform ethnography and also work in a team to identify, research and write about a real site where something supernatural occurred and will work to create an app that can be used to map the paranormal spaces of Los Angeles

CAIL 200 - Shelter Me (3.00)

This course supports the development of research techniques, collaboration, critical analysis, creative thinking, articulate expression, and information literacy. The Site Partner for this course is SELAH, a coalition of neighborhood organizers who recognize unhoused individuals as fellow members of our community worthy of the same dignity, respect, and representation afforded to any housed person. It's a sad fact that both nationally and locally, we are seeing dramatic increases in the number of people living on the streets. The demographics of homelessness have changed; people experiencing homelessness are not only getting younger, but they are more likely to work at full-time jobs. Research indicates that one in three people who are homeless have college degrees. Many are families with children. Some are elderly who have aged into homelessness. Still others have fallen on hard times and can't afford the high housing prices. It is vital to gain a historical perspective of the current conditions that lead to homelessness - by understanding the past and present, we can hopefully visualize a better future.

CAIL 200 - Trees in Paradise (3.00)

"Trees in Paradise asks students to consider the landscaped and endemic history of California by researching both native and non-native trees and plants in local Los Angeles ecosystems. Through a series of fields trips, lectures and group research students will understand the role these plants and trees play in the current state of climate change in the state of California, and how we can manage them to help create an environmentally sustainable future for the state. Working with Friends of Ballona Wetlands, students will have the opportunity to take part in plant restoration and creek clean-up projects to protect one of LA County's only remaining wetlands and use their knowledge and skills to create tools to assist the organization in educating and raising awareness of the environmental importance of the Ballona wetlands and the restoration and preservation of native species. Partner: Helper Foundation"

CAIL 200 - True Stories (3.00)

This course improves writing, self-expression, communication, and collaborative skills by introducing students to interviewing techniques and writing skills that will be useful in their professional practice. Small interdisciplinary student groups conduct interviews at the Wende Museum or the Culver City Senior

Center. The research focuses on learning about an elder's life experiences and the associated historical period and location in which they lived. As they collect the information, students are guided through a process in which they work individually and collectively to create an original book that explores the Elder's personal identity, family history, and various compelling intergenerational issues. The illustrated book is based on transcriptions of the interviews, students' research, observations, and revelations concerning the seniors' life experiences. The course culminates in presentations of each subject's life story and the associated student artwork at the Wende Museum.

ENGL 102 - DEV Writing Lab (1.00)

ENGL 103 - Writing Lab (1.00)

ENGL 108 - Writing as Discovery (3.00)

LIBS 115 - Activism, Change, and Justice (3.00)
What does social justice mean to you? How does our social consciousness develop over time? Courses in this special topic delve into a variety of pressing issues ranging from climate change to food insecurity to systemic inequality in order to explore the impact of large and small social movements in the United States and the world.

LIBS 115 - Media:Environments &Experience (3.00)
What do a music festival, an online game, and a social media platform have in common? Are you curious about the way communities form and connect across physical and virtual platforms and networks

LIBS 115 - Narrative: Story and Culture (3.00)
Are you drawn to stories? The power of narratives is in their ability to give shape and context to the human experience. Whether narratives come in the form of oral histories, lyrics, visual stories, or literary forms such as fiction, nonfiction, or poetry, each exploration creates an opportunity for a greater understanding of the world. Courses in this special topic will invite students to explore the idea of stories as carriers of culture.

LIBS 115 - Technology: Innovation &Design (3.00)
Are you curious about integrating technology into your creative practice? At the center of any exploration of technology in art and design is a recognition of humanity's quest for innovation, ability to surmount unknown challenges, ever-evolving imagination, and potential to affect societies worldwide.

LIBS 210 - Contemporary Fashion Issues (3.00)

LIBS 212 - Creative Writing Workshop I (3.00)
How does one transform the great chaos of experiences, obsessions, dreams, ideas, and observations into compelling literature? This course will explore a variety of methods for making that transformation possible. In addition to weekly writing assignments and a final project, you will be asked to read widely, take creative risks with exercises, and create community through avid participation in class discussions. Refining the ability to discuss peer work will be as important as developing one's own writing. Our focus in this course will be on a specific genre of storytelling—what's known as Flash Fiction or Short-Shorts. These stories are shorter than traditional short stories. They're very short stories, generally anywhere from 25 words to around 1000. Sometimes this genre is called Sudden Fiction, Microfiction, Microstories, Hint Fiction, Minisagas, Postcard Fiction, occasionally even Twitterature. In this class, we'll refer to these stories as FFSS (Flash Fiction Short-shorts). Even though these stories are short, they contain the main elements of traditional stories: a beginning, middle, and end. FFSS are compressed, the text doesn't take up much space, but always hints at a story much larger than what's on the page. They provide a story framework that allows the reader to intuit the larger story and its implied meaning.

LIBS 214 - Alternative Spaces (3.00)
This course explores the phenomenon of the alternative art space, which emerged in the 1970s as an artist-driven counterpoint to traditional galleries and museums. These spaces, ranging from repurposed warehouses to digital platforms, continue to shape contemporary art practices by fostering experimentation and challenging institutional norms. We will examine iconic spaces like White Columns in New York and LACE in Los Angeles, alongside international examples such as La Panadería in Mexico City and Greenhouse Berlin. The course will critically analyze how these spaces navigate the tension between remaining "alternative" and becoming institutionalized. Importantly, we will explore the political dimensions of alternative spaces, considering how they provide platforms for marginalized voices and practices, and address pressing social issues. By studying their evolution, students will gain insight into the ongoing struggle for independent artistic expression and community engagement in today's cultural landscape.

LIBS 214 - Creative Writing Workshop 1 (3.00)
How does one transform the great chaos of experiences, obsessions, dreams, ideas, and observations into compelling literature? This course will explore a variety of methods for making that transformation possible. In addition to weekly writing assignments and a final project, you will be asked to read widely, take creative risks with exercises, and create community through avid participation in class discussions. Refining the ability to discuss peer work will be as important as developing one's own writing. Our focus in this course will be on a specific genre of storytelling—what's known as Flash Fiction or Short-Shorts. These stories are shorter than traditional short stories. They're very short stories, generally anywhere from 25 words to around 1000. Sometimes this genre is called Sudden Fiction, Microfiction, Microstories, Hint Fiction, Minisagas, Postcard Fiction, occasionally even Twitterature. In this class, we'll refer to these stories as FFSS (Flash Fiction Short-shorts). Even though these stories are short, they contain the main elements of traditional stories: a beginning, middle, and end. FFSS are compressed, the text doesn't take up much space, but always hints at a story much larger than what's on the page. They provide a story framework that allows the reader to intuit the larger story and its implied meaning.

LIBS 214 - Culture of the Copy Honors (3.00)
This course examines the role that reproduction, imitation, appropriation and reenactment play in both historical and contemporary aesthetic cultures. It asks us to consider the difference between something authentic or original and a fake, a forgery, or a copy. It raises questions about when forgeries, frauds, and appropriations are dangerous or harmful, and when they are acts of productive imagination. It introduces us to the idea of historical re-enactments, and helps us understand how these performances can either promote historical healing or prolong hatred, racism and resentment. More than anything, this is a class full of ideas, each of which is some way relates to the idea of the copy. We'll look at examples as varied as Harlem Renaissance house parties, "fake" authors and artists, drag performance, remix, tacos, and TikTok dance videos, to name just a few. As we look together at these historical and recent examples of cultural blending, translation and theft, we'll consider how they provide insight about our current moment, with its emphasis on social justice and cultural respect, as well as its technologies of rapid exchange, duplication, reaction and response.

LIBS 214 - Echoes of the Afterlife (3.00)
How do different cultures imagine what happens after death—and why do these beliefs matter for artists and designers today? Echoes of the Afterlife explores global death rituals, mythologies, and memorial practices as dynamic systems of storytelling and worldbuilding. Students investigate how concepts of the afterlife shape architecture, visual art, games, and interactive media, drawing connections between cultural cosmologies and contemporary design. Key areas of exploration will include how societies visualize, memory, transition, and rebirth as central to their social order and perceptions of movement between the living world and the afterlife. Through discussion, in-class activities, and individual creative projects, students

will conceptualize and design an alternate reality based on their understanding of the afterlife expressed in their reflective essays, visual analyses, and historical research.

LIBS 219 - Methods and Materials (3.00)

LIBS 238 - Sophomore Seminar II (3.00)

LIBS 313 - Teaching for Learning II (3.00)

Students will synthesize art and design education theories and philosophies emphasizing aesthetic development in youth and adults, museum and community settings, public practices, critical pedagogy, K-12 classroom management, English language learners and special education, health and safety, engaging teaching styles, and best classroom practices. Required for Teacher Credential Preparation and Community Arts Engagement Minors

Pre-requisites: LIBS 311

LIBS 314 - Art through LA (3.00)

This course is predominantly a site visit-focused class, which requires students to participate in one week of field trips throughout Los Angeles during the week of May 18-22. This hybrid course will combine asynchronous online learning with site-specific field trips to analyze the rich relationships between art, space and community in Los Angeles. Research and case studies will include examples from art theory, historic sites, public space, architecture, landscape, urban practices and activism. At the end of the semester, in-depth tours, artist visits and workshops will examine the evolved landscapes of our contemporary city and their impact on communities and art production. Student analysis and feedback will focus on the relationships between art and space via the course texts and experiential learning activities. A detailed itinerary for daily site visits will be provided during the spring semester. This is a travel-study class that will be available OLAY (online asynchronous) during the semester, and will include 4 IN-PERSON workshops/site visits/studio visits in May. Students are REQUIRED to attend all field trips and to be available from 9am-4pm each day. Students will be responsible for their own transportation and parking fees for this course.

LIBS 314 - Arts Incubator (3.00)

Do you want to develop your art and design skills while honing your oral and verbal communication skills and cultural understanding? This innovative incubator program is designed to bridge the gap between your artistic talent and professional success in a global context. This course offers a unique opportunity to: Develop industry-relevant projects: Work on projects aligned with your chosen major (fashion, product, toy, graphic design, animation, game design, or illustration). Receive personalized mentorship: Gain insights and guidance from experienced faculty and guest lecturers who are actively working in creative industries. Improve your verbal and written communication through critical discourse, presentations, and collaborative projects in a supportive environment. Connect with industry professionals, potential employers, and fellow students. Develop a portfolio-worthy project and gain the skills and confidence needed to secure internships and take advantage of opportunities. This incubator is open to all second and third year students, with a special focus on supporting the unique needs of international students. Through hands-on projects, personalized feedback, and a focus on cultural understanding, you'll gain the skills and connections needed to launch your art and design career on a global stage.

LIBS 314 - Business Communication (3.00)

What do you need when you have a product or idea for a business and you have an upcoming meeting with a potential angel investor or other funder? How do you present a proposal and tell the story of your brand, product or idea? How do you use the world of social media to enhance your business? How will you use words, pictures, video and other media to best pitch yourself and your business? Learn to hone your business communication tools for your enterprise or business in this course. Through case studies and critiques, you will learn the art of naming and creating taglines. You will do market research, write a product positioning and a brand story. By semester's end, you will present your business proposal as a pecha kucha. Required for Entrepreneurship minors. Prerequisites: ENTR 301 - Intro to Entrepreneurship and MATH 137 - Mathematics of a Startup. Co-requisite: ENTR401 - Launchpad.

LIBS 314 - MFK Malawi: Professional Pract (3.00)

Made for Kids Malawi: Professional Practice is an interdisciplinary, project-based course designed to prepare students for cross-cultural, socially engaged, and technically complex international fieldwork and design ideation experience. In this advanced collaboration, Otis College students partner with their research and design peers from the EK School of Business in Copenhagen, who specialize in Sustainable Digital Concept Development, as well as Jacaranda graduates who will conduct all of the on-site research the two virtual teams need to analyze larger systems within the Jacaranda School educational complex and outreach programs. Through comparative cultural study, applied design research, software testing, and platform exploration, students have an opportunity to develop their professional collaboration skills as they translate creative ideas into real-world outcomes. By the end of the course, students will have produced a body of work demonstrating global citizenship, interdisciplinary collaboration, and professional readiness. Note: Some students may have the opportunity to travel to Malawi to work with EK students on-site in project implementation teams.

LIBS 314 - Fluid Identitie/ Plural Selves (3.00)

The notion of the individual as a singular being with unique qualities and characteristics that distinguishes them from others seems at odds with the fact that our identities can and do change, and that our self-concept may be multiple. This on-line course will focus on works from different disciplines (literature, the visual arts, and film) that explore the fluid nature of identity and / or the plural self, whether in their subject matter or authorial status. To bring nuance to our understanding, we will approach the topic from different perspectives (as critique, methodology, and content) complementing it with occasional critical readings. By semester's end, you will have developed your appreciation of the ways in which its complexities have been addressed in the arts.

LIBS 314 - Food Memoir (3.00)

Food writer Michael Ruhlman says that two activities are unique to us as humans: cooking and storytelling. If you eliminate either of these activities from our lives, he says, our species will cease to exist, "So telling stories about food and cooking is not only natural, it's necessary for our survival." This online asynchronous course invites you to explore the food memoir and learn of its ability to present authentic stories about family and culture, history and nature, trauma and justice--all through the lens of food. You will examine food autobiographies in various formats--such as books, essays, articles, comics and graphic novels--written by authors of diverse backgrounds. By semester's end, you will write and workshop a collection of personal stories of your own that use food as a vehicle for storytelling.

LIBS 314 - How Fiction Works: A Workshop (3.00)

How does a writer transform the wondrous chaos of experiences, obsessions, dreams, observations, ideas, and discourse into compelling fiction? This course will explore various methods and approaches for making that transformation possible through an examination of narrative devices in stories and novels, and through writing assignments which will invite students to take creative risks. Areas of focus will include deepening detail in imagery and language; using dialogue to advance story; understanding point-of-view and encounters with other; making the most of climate and setting, and tense and temporality; complicating conflict; and embedding social discourse and cultural criticism into fiction. The reading will be selected for its diversity in authorship, style, and subject matter. In the first half of the course, students will read short fiction and novel excerpts with relevance to the above topics; they will read two short novels during the second half of the course. Throughout the semester, students will workshop a short story or novel chapter. For this project, students will be asked to bring together something they have long been curious about outside their experience (possibly requiring research)

with something personal and particular to their lives. With permission of the instructor, students may work on graphic novels, comics, animation, games, or other narrative media

LIBS 314 - Human Nature (3.00)

Western culture's relationship with nature is one of exploitation, conquest, industry, and waste, but it's also empowerment, mythology, conservation, and wonder. In Human Nature, LIBS 314, students examine their own relationship with the natural world. How do fiction, film, science, industry, religion, politics, and advertising shape our connection to our environment and our selves? By studying fiction from indigenous and environmentalist authors as well as cross-genre film about nonhuman species, we will see how stories shape our relationship with nature. From the sustainability and environmental justice movements, we will identify our particular concerns about the planet and make strides to recover our birthright: moving from estrangement with the natural world to integration, from despair to hope, from apathy to care. Or, if we already have a practice of climate resilience--we will fine tune our mission. We will compose narratives and analysis that demonstrate an understanding of how storytelling, language, and the visual realm inform our many roles in this altering ecology. Finally, we will reflect on a plan for future engagement with the natural world, be it protective measures through civic engagement, integration through professional practice, or simply more time spent outdoors.

LIBS 314 - Illusions: Simulacra in Art (3.00)

What is Hyperreality? And when did it start as a form of visual representation? In other words: is hyperreality a modern invention or an old preoccupation? The culture of simulation lies at the intersection of art and science and is as old as humankind. Since antiquity, artists have employed a wide range of optical strategies to effectively emulate the physical world. From Zeuxis' illusionistic paintings to Albertian perspective, anamorphoses, dioramas, anatomical waxes, and polymateric sculpture, human fascination with replicating the physical world is far older than our theme parks and recent exploration of Virtual and/or Augmented Reality. This course explores the concepts and practices of hyper-realistic representation and optical illusionism from the ancient world to our contemporary experiments in CGI Imagineering and digital technology. The quest for ingenious methods to fool the eye of the viewer has preoccupied artists for as long as they have made art. This course will introduce students to optical illusions and hyperreal simulacra by means of lectures, discussions, group research projects, and interactive exercises. Although the course will have a few written assignments, the students will also recreate some of the techniques examined in class.

LIBS 314 - Media and Propaganda (3.00)

Words and Images have power. That power can be used to inform and inspire; that power can similarly be used to incite, to shape thoughts, values and to influence or change thought or behavior. When Canadian philosopher Marshall Mcluhan wrote the 'medium was the message' in Understanding Media, he understood that it's not only the words, but the medium that determines the information being communicated. Mcluhan appeared to have been prescient in comprehending that we would be living at a time when individuals are overwhelmed by information from a variety of sources (newspapers, magazines, radio, television, cable, motion pictures, advertising, public relations, and the internet) each vying for our attention to communicate their message. Media and Propaganda introduces students to theories of communication, presents them with techniques used in propaganda and shows how the impact of mass media can affect the individual as well as society. Students learn how to critically analyze messages and the implications of the media's coverage of political events, wars, civil disturbances, environmental issues and social events. Community Partner: United States Holocaust Memorial Museum

LIBS 314 - Screenwriting Shorts (3.00)

How can you turn a terrific idea into a great little YouTube video? Do you plan to work in the TV and film industry, create animated stories, or design branding and advertising campaigns? Maybe you just want to learn how to tell a good short story or understand the difference between story, narrative, and plot? How can conflict be used to create compelling characters? How does a screenwriter hold everything together? Learn the craft of scripting shorts by exploring these questions and writing scripts in this online course. Through lectures, short assignments, critiques, and the study of short and full-length scripts, you will learn to craft a one-minute and a ten-minute screenplay that can be used to make an animated short or an online clip, take to festivals or develop into a full screenplay.

LIBS 314 - Social Entrepreneurship (3.00)

What role do non-profit entities play in the art world and beyond? What is social entrepreneurship? How do the goals of non-profit arts concerns differ from their for-profit counterparts? This course will examine the current climate for non-profit arts organizations generally and start-ups, in particular, especially those involved in public service, charity work, education, and social justice. Students will research and debate various issues while considering how these may affect their future endeavors. In addition, students will work in groups on a self-generated, unique social entrepreneurship project, where they are encouraged to address social, environmental, and/or cultural issues that interest and motivate them. Students will gain insight into the realities of managing a non-profit arts enterprise by participating in the simulated launch and management of the business concept they designed. Required for Entrepreneurship minors.

LIBS 314 - Story of Brand (3.00)

How is storytelling used to brand a product and how do brands tell stories through multiple platforms? How are Covid 19, #MeToo, Black Lives Matter, Climate Change, and the 2020 Presidential Election changing us and our stories? And how do these stories influence society, branding, and the narratives we tell of ourselves? This junior online elective will explore branding through the lens of history, mythology, psychology, and current events. We'll examine how popular brands have changed societies and how they do it. We'll investigate how narrative is intimately connected to our cognition of ourselves and our world and how it influences the way we evolve. Specifically, we will probe how it alters artists, designers, marketers, and storytellers in our newly configured world. By the end of the semester, students will use one of their own designs or an existing product to create a unified brand message that can live in multiple platforms.

LIBS 314 - Teaching for Learning II (3.00)

Students will synthesize art and design education theories and philosophies emphasizing aesthetic development in youth and adults, museum and community settings, public practices, critical pedagogy, K-12 classroom management, English language learners and special education, health and safety, engaging teaching styles, and best classroom practices. Required for Teacher Credential Preparation and Community Arts Engagement Minors

LIBS 314 - The Book as Art(work) (3.00)

The Millard Sheets Library is filled with art books, as you probably know, but you may not know that it also houses a significant collection of artists' books—that is, artworks in book form. These may take the shape of the familiar codex containing text and/or imagery, or they may be idiosyncratic objects made of varied materials that, in one way or another, engage "the book" conceptually or formally. In this course, we will review the history of this unique medium and explore the library's collection via a curated selection of items. Students will do weekly readings and reading responses, write one paper on an artist's book of their choosing, and collaborate with a classmate to create an artist's book, drawing inspiration from our explorations and discussions.

LIBS 314 - The Business of Creativity (3.00)

This course will examine the business side of the art business. We will discuss principles, concepts, and specific practices necessary to create a viable long-term career as an artist. Discussions will cover a broad range of industries and examine the factors essential to commercial endeavors in general. We will explore in detail primary forms of ownership, commercial exploitation, types of intellectual property rights, and the tools needed to protect your creative work like copyright, trademark, trade name, patent, licensing, sales, etc. to give students a working knowledge of how to effectively protect, control, and monetize their creative output.

LIBS 316 - How Fiction Works (3.00)

How does a writer transform the wondrous chaos of experiences, obsessions, dreams, observations, ideas, and discourse into compelling fiction? This course will explore various methods and approaches for making that transformation possible through an examination of narrative devices in stories and novels, and through writing assignments which will invite students to take creative risks. Areas of focus will include deepening detail in imagery and language; using dialogue to advance story; understanding point-of-view and encounters with other; making the most of climate and setting, and tense and temporality; complicating conflict; and embedding social discourse and cultural criticism into fiction. The reading will be selected for its diversity in authorship, style, and subject matter. In the first half of the course, students will read short fiction and novel excerpts with relevance to the above topics; they will read two short novels during the second half of the course. Throughout the semester, students will workshop a short story or novel chapter. For this project, students will be asked to bring together something they have long been curious about outside their experience (possibly requiring research) with something personal and particular to their lives. With permission of the instructor, students may work on graphic novels, comics, animation, games, or other narrative media

LIBS 317 - Social Entrepreneurship (3.00)

What role do non-profit entities play in the art world and beyond? What is social entrepreneurship? How do the goals of non-profit arts concerns differ from their for-profit counterparts? This course will examine the current climate for non-profit arts organizations generally and start-ups, in particular, especially those involved in public service, charity work, education, and social justice. Students will research and debate various issues while considering how these may affect their future endeavors. In addition, students will work in groups on a self-generated, unique social entrepreneurship project, where they are encouraged to address social, environmental, and/or cultural issues that interest and motivate them. Students will gain insight into the realities of managing a non-profit arts enterprise by participating in the simulated launch and management of the business concept they designed.

LIBS 318 - Business Communication (3.00)

What do you need when you have a great product and a meeting with a potential investor or funder? How do you present a proposal and tell the story of your brand through social media? Learn to hone your business communication for your entrepreneurial endeavor, be it a complex business or a personal art or design practice in this online course. Through case studies and critiques, you will learn the art of creating mission statement and taglines. You will do market research, and write a product positioning, and brand story. You will communicate a business idea to potential investors through short form and expanded tools. These include Business Pitch, Mission Statement, company description, analysis of opportunities and advantages as well as social and sustainability impact.

Pre-requisites: ENTR 300

LIBS 440 - Capstone (3.00)

LIBS 445 - Capstone Continuation (1.00)

MATH 136 - Introduction to Programming (3.00)

Programming is the medium in which our digital world lives, from smartphone apps to IoT and AI. Our world depends on how we program and the job market requires basic programming knowledge. This course aims to teach the fundamentals of programming skills to students with no prior coding experience. Students will be able to recognize HTML, CSS, and an Object Oriented Programming language to help them identify how these languages intertwine with the world of digital art, website design, AI (code prompting), animation, and a multitude of other use cases.

MATH 136 - Math for Artists and Designers (3.00)

This Mathematics course is designed for non-Math majors, covering most mathematical concepts needed for everyday life. Emphasis is on the application of those concepts and their connection to other disciplines to help students learn how math affects the world around them. Topics include critical thinking skills, inductive and deductive reasoning, problem-solving techniques, number theory, sequences, the Fibonacci sequence, conversions to and from the metric system, geometry, topology, consumer mathematics including personal loans, simple and compounded interest, mortgages, annuities, sinking funds, and retirement investments, and finally some topics in probability and statistics. Real-life applications are used for each topic. The textbook, most assignments, and many interactive learning materials, such as instructional videos and animations, are accessible via the Pearson MyMathLab.

MATH 136 - Money Matters (3.00)

This course is intended to empower the students with key skills they need to handle their personal and business finances. Students will be introduced to personal finance and business math concepts through interactive activities, instructional videos, multiple examples, case studies, lectures, and applied problems that resemble real-life situations. Topics include business statistics, payroll, taxes, insurance, financial statements, simple interest, compound interest, consumer credit, mortgages, and investments. All class materials, including the textbook and assignments, will be delivered digitally on MyMathLab by Pearson, providing an excellent learning interface and allowing students to complete assignments at their own pace and get immediate feedback on their performance. Throughout the semester, students will also review some relevant math concepts from high school, such as whole numbers, decimals, fractions, equations, and percents– these will be incorporated into their weekly homework assignments. The class is designed to meet students where they are with their math skills and help them advance to the successful completion of this business mathematics course.

MATH 137 - Mathematics of a Startup (3.00)

The Business Model Generation Canvas is a tool used by innovators and entrepreneurs around the world in different stages of the business life cycle: planning, raising capital, evaluation, restructuring, testing innovative ideas, mergers and acquisitions, and development. Students will study the nine building blocks of a business, analyze financial statements, and discuss their mathematical components. This is a project-based course where students will apply the principles they learn to create their own business model or analyze a start-up venture and present their assessment. Required for Entrepreneurship minors.

MATH 247 - Programmng/Scripting for Games (3.00)

NSCI 305 - Science & Sustainable Design (3.00)

With the current shift toward more sustainable forms of art and design, contemporary artists and designers are uniquely challenged by issues unfamiliar to artists in previous eras. Sustainable design is concerned with the processes and outcomes needed to respond to the growing consciousness surrounding various impacts of art and design on the world's ecological systems and humankind. Through predominantly science-based methods, students will study approaches to sustainability including, but not limited to climate change, biodiversity, biomimicry, cradle to cradle, and life cycle analysis. Content will emphasize the interdisciplinary nature of sustainable design and how it is defined, measured, and tracked by looking at concepts like design for use, dematerialization, substitution, localization and reuse. Note: At least a 1/3 of instruction (5-8 weeks) is delivered online rather than via face-to-face contact. The virtual course contact will occur asynchronously (not at the same time). Required for Sustainability Minors.

NSCI 307 - Science and Sustainable Design (3.00)

With the current shift toward more sustainable forms of art and design, contemporary artists and designers are uniquely challenged by issues unfamiliar to artists in previous eras. Sustainable design is concerned with the processes and outcomes needed to respond to the growing consciousness surrounding various impacts of art and design on the world's ecological systems and humankind. Through predominantly science-based methods,

students will study approaches to sustainability including, but not limited to climate change, biodiversity, biomimicry, cradle to cradle, and life cycle analysis. Content will emphasize the interdisciplinary nature of sustainable design and how it is defined, measured, and tracked by looking at concepts like design for use, dematerialization, substitution, localization and reuse. Note: At least a 1/3 of instruction (5-8 weeks) is delivered online rather than via face-to-face contact. The virtual course contact will occur asynchronously (not at the same time). Required for Sustainability Minors.

NSCI 307 - Smart Textiles (3.00)

This course will start with a survey of how smart textiles are utilized today in personalized healthcare, sports, wellness, and security by exploring a range of art, design, and scientific projects using smart materials. This will serve as a foundation of knowledge to build from and inspire students to create their own smart textile prototypes. Further, the course will introduce key theoretical elements of each discipline related to smart textiles, such as material and textile science, electronics, and artificial intelligence. This field is evolving fast, with teams of multi-disciplinary scientists worldwide constantly proposing innovative materials and improved textile-based and AI-enabled electronics. Some reading materials will be assigned from recent peer-reviewed articles to expose students to advanced technologies that have not been commercialized yet but have the potential to revolutionize multiple industries in the near future.

NSCI 308 - Human Factors in Toy Design (3.00)

NSCI 319 - Human Factors in Product Des (3.00)

MFA IN FINE ARTS

Our Mission

The MFA program provides an artistic learning environment where artists of different backgrounds, ages, experiences, and approaches to creative practice can flourish together. Our courses, events, studios, labs, galleries, and social spaces are welcoming places where everyone in our community can develop as artists and as engaged participants in society. The program encourages emerging artists to think critically and challenge existing modes of expression.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the MFA in Fine Arts program learning outcomes here or request information.

Course Descriptions

AHCS 560 - ST: Modernism to Conceptualism (3.00)

This course examines the development of Modernism as a discourse in the visual arts, from its development in the 1840s to challenges of its key assumptions in the 1960s. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course. The primary intention of this course is to provide a critical survey of work and discourses that have contributed to the development of Modernism as a specific aesthetic and discursive tradition. Our attention will focus on the development of visual art, and a trajectory of practices traceable from traditions of European painting and sculpture to challenges leveled at that tradition, most identified with artists working in the United States after World War II. Understanding the importance and context of these practices will require that we simultaneously explore other developments significant throughout this period including social environment, political and economic currents, technological change and related fields of practice. It is a period characterized by extraordinary change, gross inequities, and the formation of conventions on which a contemporary view of art as an aesthetic discipline are based. We will attempt to actively engage these concepts with the goal of developing a view of Modernism in direct dialog with the question of the role of art and artists in this period and in contemporary society.

GRAD 740 - Graduate Critique I (3.00)

In this two-year course sequence, all graduate students, regardless of media, individually present work to their peers and faculty for an in-depth discussion about the work's material, theoretical, and cultural positioning. The course provides time and space to collectively examine how an artist's work is perceived as a public statement and how one's work exists in the world. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 700 - Graduate Studio I (3.00)

Graduate Studio is a 6-hour course structured around dedicated studio time and one-on-one studio visits between students and faculty members. This two-year course sequence focuses on each individual student's practice, specifically directed toward an interrogation of the aesthetic, conceptual, and technical issues arising out of their work. It will culminate in the end-of-semester review during which the student and a review committee will discuss and evaluate the development of the student's practice as observed over the course of the semester. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

AHCS 650 - Art, Theory, Practice I (3.00)

In this seminar we will develop an understanding of the material, social, and political implications of aesthetic form. Form is understood as an organizing principle that is anchored within material reality and which affects this reality in turn. The essays we will read engage in questions of humanity, power relations, representation, and aesthetics from a variety of perspectives and discursive fields. We will use these texts as a starting point to discuss how cultural producers and theorists have responded to the representational politics of the present. Alongside, we will consider art practices within the larger cultural and socio-political environment. The goal will be the development of individual, subjective voices within a collective, collaborative, and relational process.

GRAD 630 - Collaborative Projects (3.00)

Collaborative Projects is a seminar/studio class. Students form collaborative relationships to produce and exhibit collaborative projects - installations, performances, sound works, events, happenings, etc. that culminate in the Mid-Residency Exhibition. Collaborative projects will activate traditional and non-traditional exhibition spaces throughout the Otis campus in the spirit of an international art biannual. Students will publicly present, document, and archive their work. Students acquire experiential and theoretical knowledge pertaining to collaborative art production, curation, pedagogy, diplomacy, consensus-building marketing, and community leadership.

AHCS 561 - ST: 60's to the Present (3.00)

The historical development of the discourse of Modernism established a narrative that proved very influential. However, the terms of that narrative came under question from a diverse range of artists and voices. This course looks at Contemporary Art as a varied field arising out of challenges to historical "modern art" in the late 1960s and developing a range of practices that continue to challenge our understanding of art and its relation to society today. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

GRAD 740 - Graduate Critique II (3.00)

In this two-year course sequence, all graduate students, regardless of media, individually present work to their peers and faculty for an in-depth discussion about the work's material, theoretical, and cultural positioning. The course provides time and space to collectively examine how an artist's work is perceived as a public statement and how one's work exists in the world. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 700 - Graduate Studio II (3.00)

Graduate Studio is a 6-hour course structured around dedicated studio time and one-on-one studio visits between students and faculty members. This two-year course sequence focuses on each individual student's practice, specifically directed toward an interrogation of the aesthetic, conceptual, and technical issues arising out of their work. It will culminate in the end-of-semester review during which the student and a review committee will discuss and evaluate the development of the student's practice as observed over the course of the semester. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

AHCS 651 - Art, Theory, Practice II (3.00)

This two-semester, cross-disciplinary seminar examines both the creation of contemporary art and the ideas and theories that shape it. Through a selection of essays, we will explore the material, social, and cultural connotations of aesthetic form. We will consider form as an organizing principle that is rooted in material reality while simultaneously influencing that reality. Discussions will focus on how works of art can prompt encounters that challenge our established modes of perception and understanding, fostering curiosity and encouraging shifts in perspective.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

GRAD 740 - Graduate Critique III (3.00)

In this two-year course sequence, all graduate students, regardless of media, individually present work to their peers and faculty for an in-depth discussion about the work's material, theoretical, and cultural positioning. The course provides time and space to collectively examine how an artist's work is perceived as a public statement and how one's work exists in the world. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 700 - Graduate Studio III (3.00)

Graduate Studio is a 6-hour course structured around dedicated studio time and one-on-one studio visits between students and faculty members. This two-year course sequence focuses on each individual student's practice, specifically directed toward an interrogation of the aesthetic, conceptual, and technical issues arising out of their work. It will culminate in the end-of-semester review during which the student and a review committee will discuss and evaluate the development of the student's practice as observed over the course of the semester. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 776 - Professional Practice (3.00)

We will be analyzing the definition of PROFESSIONAL and PRACTICE, singularly and in tandem and how they apply to real life situations. In relationship to determining how "one presents onself" we will access and research grants, residencies, jobs, etc. Applications, contacts, and experience will be both analyzed and explored. In addition basic artist survival skills and sustainability issues will be discussed in depth. As this is a seminar; discussion and presentation in conjunction with outside support, will form the basis of this course. Student interests and concerns will be addressed. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

LIBS 774 - Thesis I (3.00)

In this course, students will develop a written thesis about their work and practice. Students will acquire critical writing skills that will prepare them for the literary demands of an artist.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

GRAD 740 - Graduate Critique IV (3.00)

In this two-year course sequence, all graduate students, regardless of media, individually present work to their peers and faculty for an in-depth discussion about the work's material, theoretical, and cultural positioning. The course provides time and space to collectively examine how an artist's work is perceived as a public statement and how one's work exists in the world. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 700 - Graduate Studio IV (3.00)

Graduate Studio is a 6-hour course structured around dedicated studio time and one-on-one studio visits between students and faculty members. This two-year course sequence focuses on each individual student's practice, specifically directed toward an interrogation of the aesthetic, conceptual, and technical issues arising out of their work. It will culminate in the end-of-semester review during which the student and a review committee will discuss and evaluate the development of the student's practice as observed over the course of the semester. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 777 - Exhibition Preparation (3.00)

The goal of this course is to seek out both group and individual needs to attain one's goals as they relate to the presentation and production of an individual Thesis Show. In addition, issues that deal with and about art post-graduation will also be addressed. What it means to be an artist will be challenged and articulated for each individual. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

Elective Descriptions

GRAD 550 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

GRAD 550 - Adv. Sem: All About Love (3.00)

Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. We will learn alongside theorists in somatics, performance studies, feminist studies, queer and trans studies, and Indigenous and Black studies to guide our foray into the inter-personal, political, performative, and transformative aspects of love as they shape our relationships to one another and to our creative practices. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

GRAD 550 - SCNG: Experimental Film (3.00)

In this introductory filmmaking class, we will consider expansive ways to think about personal, non-narrative, and independent film practices through investigations of the moving image's essential components: light, movement, and time. We will examine examples from around the world and throughout cinema history to explore what constitutes "experimental" film and how this form challenges conventional cinematic language. Particular attention will be given to artists and filmmakers historically excluded from the dominant canon, especially women, queer artists, and filmmakers of color, whose work expands and complicates the boundaries of experimental practice. Drawing inspiration from class discussions, assigned readings, and weekly creative exercises, students will create two short films one using analog Super 8 film and one using digital technologies. Emphasis will be placed on hands-on experimentation, in-camera editing, sound-image relationships, and alternative approaches to structure, rhythm, and visual expression. Students will be encouraged to challenge typical cinematic conventions and engage deeply with both material, form and process. Alongside production, students will practice skills in critical viewing, analysis, and constructive critique to support a collaborative learning environment supporting vulnerability, openness, and individual expression. This course is designed to nurture personal vision while situating experimental filmmaking within the evolving landscape of contemporary visual culture and aesthetics.

GRAD 550 - Photography II (3.00)

This is an intermediate course within the Photography program that aims to build upon technical knowledge and conceptual structuring acquired in Photo 1. Students will spend time working with image capture and output processes, refining technical and communication methods, and making decisions to achieve their desired aesthetic and conceptual frameworks. Experimentation with new processes is expected as is the development of artistic and critical reasoning.

GRAD 550 - Lighting Studio I (3.00)

This course introduces students to basic studio skills in lighting and electronic flash applications, including 4x5 and medium formats, tungsten and strobe lighting, and in-depth exploration of genres such as photo illustration, still life and portraiture. Students develop a critical understanding of how imagery functions within a commercial context and the relationship between fine art and commercial work. Shooting assignments include still life, portraiture, and photo illustration projects. This course is required for Photography emphasis. Prerequisite: Photo I or equivalent

GRAD 550 - Phot Genres: Steal This Class (3.00)

What is appropriation, and what are its rules? Who is permitted to borrow from whom? At what point does imitation become theft, and reuse into ripping-off? Is the "taking" of a photograph ever not an apprehension of something else? Is there even such a thing as an original? In this class, we will search out society's rules in order to break them. Students will investigate the long legacies of appropriation, citation, parody, and pastiche within photography and fine art, and find new frontiers of possibility. We will embezzle each other, ourselves, and our favorite photographic forebears. We will consider how context and gesture have the unique power to "move us to tears." Students will be expected to produce and share presentations on relevant artists, generate their own work in response to thematic assignments, and contribute to group discussions.

GRAD 550 - Phot Genres:Personal Histories (3.00)

This course will explore ideas of personal histories and narratives through portrait photography. We'll develop lighting techniques and other technical methodologies to address the portrait as a way of creating new understandings of the self. Readings and experiments will expand ideas around portraiture. The work will culminate in an exhibition at the Fulcrum Press Gallery

GRAD 550 - Painting II (3.00)

Painting 2 is the second core class devoted to painting. Each person who teaches it will have a slightly different approach but in general the class will provide students with an intermediate level painting experience. Equipped with the skills and knowledge of painting 1, students in Painting 2 will further develop their command of the technical and conceptual knowledge of western painting. They will develop a group of works specific to the requirements of the class and they will increase their confidence and their production. Perhaps devoted to critical concepts of interpretation or to material exploration or both, painting 2 will provide a dynamic and open, inclusive environment in which students will feel supported as they explore their own ideas and the rich landscape of contemporary painting.

GRAD 550 - Distinguished Visiting Artist (3.00)

Starting from the position that each student is an artist with their own interests and experiences, this studio elective will focus on developing the connection between research and painting methodologies. We will deep dive into our own research, data collection, and content formation through physical acts of walking, mapping, reading (both image and text) and experimentation. We will look at the various ways in which we can carry out research to gather knowledge, generate images, and build upon our practices to create unique and complex paintings. The course ARTIST AS RESEARCHER will explore translations of concepts into paintings, and the fluency of those messages as they are created and understood. The course will include field work,

several group site visits, independent trips, alongside studio work. Students will be exposed to different research methodologies and explore the many roles of the artist –from reporter to interpreter, anthropologist, historian, activist, medium, prophet, etc. Students will create a series of paintings from their research conducted during the course. As artists, they will consider experimental thinking outside of the studio, and what can happen outside of a painting

GRAD 550 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

GRAD 550 - Sculpture/New Genres II (3.00)

Sculpture New Genres 2 is an intermediate studio course that expands on concepts and skills in 3- dimensional and time based media developed in SCNG I. This class will consist of a series of both short and long term prompts, lectures, readings, critiques and demos aimed at providing a wide range of cultural concepts, contexts and techniques to consider when developing works and situating them within time and space. New skills will include advanced techniques of construction in wood, metal, clay, fabric, video, further mold making, some plastics, and new computer technologies.

GRAD 550 - Ceramics (3.00)

This sculpture elective will teach fundamental skills of working with clay. You will learn the foundational skills of wheel throwing and hand building: centering and forming shapes on the wheel, wedging, pinching, coiling, soft and hard slab construction, building and assembling in parts, using a banding wheel, and various ways to manipulate the surface of the clay, such as carving, stamping, printing, drawing, painting, and glazing. You will learn how kilns work and various ways to fire the clay, with an introduction to how different glazes and clays react to different firing techniques. Exposure to the historical use and international variety of techniques in ceramics will be integrated into the contemporary context. This is an introductory course; no experience is necessary.

GRAD 550 - Adv Tec: Into the Fold: Fabric (3.00)

Historically and pre-historically fabric(s) have been used as protection, coded language, resistance, structure, identity, style, communication, play, community building, camouflage, and more. Through skill building in context, students will grow confident in their ability to engage techniques, be supported to expand upon them, to develop a way of working within their own practice(s). This course will include hand and machine sewing, pattern-making based in but going beyond methodologies of garment construction, felting, weaving, dying, hand, machine and digital embellishment/adornment (embroidery, beading, couching), three dimensional "soft sculpture" and stretching/draping on an armature. Knitting, knot-work, macramé and crochet subject to interest. This course will move towards an interdisciplinary integration of digital and analog media. Maximizing the facilities, labs and equipment at Otis, students will grow comfortable using Adobe Creative Cloud software (Photoshop and Illustrator) and understand how these are set up to work with vector based output machines, for "fabric-informed" projects. Working with fabric as a pliable structure, surface and conceptual framework, we explore its construction, historical and cultural contexts (including with/by the more-than-human) to develop and expand upon skills to make projects possible within fields of sculpture, installation (including video, sound, multi-sensory work), performance, painting and drawing.

GRAD 550 - Advanced Ceramics (3.00)

This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

GRAD 550 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

GRAD 650 - Performance, cakewalk (3.00)

In this course we will examine how Black artists have used their bodies to recontextualize themselves in explosive and radical ways throughout American history. I will be explicitly referencing Adrian Piper"s "funk lessons" we will learn to cakewalk. (yes you will have to move/dance in this class. I assure you it will be painless and enlightening like yoga, except fun;) Furthermore we will be comparing and contrasting Black dance and movement of the past and present. From the plantation to soultrain to the ballroom, Aida to Adrian.

GRAD 654 - Installation Art Practices (3.00)

In this seminar/studio hybrid students will learn how to expand their creative vision from a singular object to an entire environment while producing two installation projects in a safe, supportive, workshop environment. Students will learn about the history of installation art practices past and present, and become familiar with artists that have made significant contributions to the field. Students will learn skills, strategies and techniques for transforming space, place and environment into immersive sensory and narrative experiences that fully engage audiences emotionally, physically, spiritually and conceptually. Essential skills developed in this class include: conceptualizing, designing and configuring installation spaces and environments; producing 3D models for installation proposals with maps for wiring sound and projection, and placement of other media and materials within the environment; producing sound and video and configuring material for immersive experiences; synchronizing multiple channels of video, sound and light; spatializing sound; and managing technologies and cables within installation spaces and environments.

MFA IN GRAPHIC DESIGN

Our Mission

The Otis MFA in Graphic Design program is a community of students, faculty, and international and Los Angeles-based designers dedicated to visual research and discovery through making. We blend design exploration, critical inquiry, and applied projects to interrogate and better the field of graphic design. We partner with organizations and engage in studio visits and travel to foster impact beyond the classroom.

Students use curriculum to explore visual culture and critical thinking and making, while faculty develop curriculum in response to students and contemporary culture.

During the course of study, students work across platforms to complete a series of studio projects. Writing and discussions enrich in-class making; students and faculty learn from each other. Coursework engages research, discourse, and the iterative process with the goal of discovering many possible outcomes. In so doing, the program supports students in taking on the challenges and opportunities in contemporary graphic design practice.

Degree Requirements

All programs' curricula are developed in response to Program Learning Outcomes, which signify what students learn within a degree program or emphasis area. All program learning outcomes respond to overarching Institutional Learning Outcomes. View the MFA in Graphic Design program learning outcomes here or request information.

Course Descriptions

GRDS 601 - Seminar Studio I (3.00)

Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This fourterm course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 655 - Seminar Round Table (3.00)

Students discuss issues pertaining to being an active designer in the world. Led by guests invited from various disciplines, students look at design from philosophic, historical, and theoretical positions. The course provides an opportunity to speak at length about the value of inquiry, research, and engagement in issues and disciplines outside graphic design. On occasion students will have the opportunity to engage with Visiting Artists in special events or meetings.

GRDS 670 - Graduate Studio (3.00)

Graduate Studio focuses on critical iterative processes. Throughout the course students cultivate working methodologies to discover varied outcomes through working fluidly across media. With guidance and mentorship from the faculty, students begin to develop a body of work reflecting their interests, agendas, and values.

AHCS 577 - Contemp. Graphic Design Issues (3.00)

This course is total immersion into the field of graphic design. Current and critically important figures will be covered; students will be given tools to use in their practice to ensure that they are informed on the discipline on a global scale. In addition, students will begin to engage visiting artists in dialogue during lectures.

GRDS 711 - Visiting Artists Projects (3.00)

Visiting Artist Projects consists of workshops where visiting artists from around the United States and abroad lead groups of students through a short-term, socially relevant themed projects. Outcomes fall somewhere between speculation and real-world design solutions with an aim to inspire all parties to apply design thinking in an innovative way.

AHCS 579 - Theory and Criticism (3.00)

A diversity of critical approaches to twentieth and twenty-first century design are situated historically while introducing current themes and debates in contemporary design practice and related disciplines.

GRDS 602 - Seminar Studio II (3.00)

Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 623 - Graduate Typography (3.00)

This course is a graduate level exploration to the fundamentals of typography and typographic systems and letterforms. Students will explore the theoretical and applied use of type as visual form and visible language by learning the nuances of type families, texture, hierarchy, grid, composition, and sequence.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

GRDS 665 - Entrepreneurship (3.00)

This course is designed for graduate students that are interested in starting their own business and or freelance business. Students will be introduced to all facets of running a business, such as writing a business plan, promotion, developing a client base, pricing, legal and financial aspects as well as ethical standards. Students will be exposed to guest lectures from a variety of business areas such as small business owners, a life coach, accountant/bookkeeper and an attorney, on the proper way to set-up and run a business.

AHCS 587 - Models of Practice (3.00)

In this course students will work to contextualize their future practice through close examination of their own body of work, research, and on and off-site visits with contemporary design practitioners. The course will provide opportunities to experience the many roles that designers can play today focusing on the way practice models continue to evolve in response to socio economic technological, cultural, economic and political conditions.

GRDS 701 - Seminar Studio III (3.00)

Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, dis- course. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-

depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

ELEC 599 - Graduate Studio Elective (3.00)

Graduate level studio elective course. See department for specific courses.

GRDS 702 - Seminar Studio IV (3.00)

Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 655 - Seminar Round Table (3.00)

Students discuss issues pertaining to being an active designer in the world. Led by guests invited from various disciplines, students look at design from philosophic, historical, and theoretical positions. The course provides an opportunity to speak at length about the value of inquiry, research, and engagement in issues and disciplines outside graphic design. On occasion students will have the opportunity to engage with Visiting Artists in special events or meetings.

GRDS 770 - Final Studio (6.00)

Unlike a traditional thesis project our department recognizes the value of finishing the degree with a series of wide-ranging artifacts. Based on the work and research generated in the previous 3 semesters, students frame a position and a future practice that moves seamlessly through time and space.

GRDS 711 - Visiting Artists Projects (3.00)

Visiting Artist Projects consists of workshops where visiting artists from around the United States and abroad lead groups of students through a short-term, socially relevant themed projects. Outcomes fall somewhere between speculation and real-world design solutions with an aim to inspire all parties to apply design thinking in an innovative way.

Electives

Course Title	Course Number	Credits
Printmaking Workshop	GRDS 621	3.00
Advanced Image Making	GRDS 621	3.00

Elective Descriptions

GRDS 621 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

GRDS 621 - Advanced Image Making (3.00)

To create advanced images, we need advanced tools. In this class, we will explore various methods for developing these tools and examine our relationships with them.

Majors

Undergraduate Programs
Graduate Programs

Minors

MINORS

INTERDISCIPLINARY STUDIES

Our Mission:

Interdisciplinary Studies gives undergraduate students the opportunity to extend and complement their work in the major by pursuing a minor—a defined or self directed course sequence that explores a specific theme, topic, or discipline. Minors are optional, and most Interdisciplinary Studies students pursue only one, however, students may be approved to pursue two minors on a case-by-case basis. Students in Interdisciplinary Studies hone a broad range of skills and knowledge, developing an art and design practice that is grounded in two or more disciplines or situated uniquely in between.

Program Learning Outcomes:

See each specific minor for PLOs.

Minors Offered

Eligibility and Enrollment Requirements

Not all minors are open to all majors. See each specific minor for details.

In order to pursue a minor, students must be on track in their major and in good academic standing, with fewer than 6 credits outstanding and a cumulative GPA of at least 2.0. Students who fall behind 6 credits or more after declaring a minor will be advised to drop their minor. Students who fall below a 2.0 cumulative GPA after declaring a minor will be given a written warning at first, then advised to drop their minor if their GPA is not above 2.0 in the subsequent semester. In both cases students can reapply for the minor once they've caught up in their major and/or liberal arts requirements and/or raised their GPA.

Students will be allowed to register for courses on a space-available basis, which is not guaranteed, but registering early will significantly increase the chances of getting into their required courses.

Transfer students who apply for and are approved to pursue a minor must meet the requirements above and fulfill degree program requirements through an appropriate combination of transfer courses and courses completed at Otis.

The Application Process

Students should complete their declaration of minor form during registration advising for either the first or second semester of the sophomore year. Under limited circumstances, students may declare a minor in the junior year. Declaration forms are available online, via the registration page of the otis dashboard and www.otis.edu/minors. Academic Advising, the Director of Interdisciplinary Studies, the Minor Area Head(s), and the Registrar must approve the application.

- Meet with the Interdisciplinary Studies Director to discuss your interests, options, and Declaration process (only required if you are unsure which minor to pursue).
- Complete the online Declaration of Minor Form.
- Meet with Academic Advising to review Academic Plan.
- Students declaring CONC, DGMD, GRDS, ILUS, PNTG, PHOT, PRDS, and/or SCNG minors are recommended to also meet with the Minor Area Head for one-on-one advising.
- Students receive email confirmation once their declaration form has been approved by the Registrar.
- Attend group meetings with Minor Area Heads during Registration Advising periods.

Students who wish to drop their minor must complete the online Dropping Minor form. Students who wish to change their minor or add a second minor must complete a new Declaration of Minor form following the instructions above.

Course Requirements

Each minor requires students to complete 15 credits. Minor course requirements can fulfill studio electives and in some cases also Creative Action and Liberal Arts and Sciences requirements. Required major las courses for which students do not have choices of topics cannot count towards a minor without department approval. For some majors, pursuing a minor may require additional coursework or degree requirements above the 120 credit BFA.

Course Descriptions

INTR 330 - Interdisciplinary Practices (3.00)
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

INTR 330 - ST: Design Lab (3.00)
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

ART HISTORY MINOR

Our Mission:

The Art History minor offers students an opportunity to focus on an expanded range of historical and cultural ideas about art and art making. The minor provides a guided and structured approach to diverse critical methods for exploring the cultural creation, meaning, dissemination, and impact of visual images, objects, and practices.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Art History Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Art History Minor Student Will:

Grow

Art History Minor student work will demonstrate: Disciplinary knowledge and skills • Proficiency in industry-standard skills, technologies, and processesAdvanced visual and information literacy skills, utilizing both traditional and emerging technologies to locate, critically evaluate, ethically use, and effectively communicate art historical research and insights to diverse audiences. Audience-focused research, historical context, and field-specific discourseAbility to analyze and contextualize canonical, non-canonical, and marginalized art historical narratives as tools for critical and creative problem-solving in both academic and professional contexts. Capacity to identify and solve creative problems Ability to apply art historical methodologies to contemporary challenges in art and design, transforming historical understanding into innovative creative solutions.

Dare

Art History Minor student work will demonstrate: Innovation • Experimentation and playEngagement in experimental and risk-taking research practices that push the boundaries of historical inquiry, embracing innovative methodologies and challenging conventional interpretations of art, design, and visual culture. Challenge to the status quoCritical approaches to the study of art history that challenge normalized assumptions and dominant narratives within the field. This includes questioning traditional hierarchies, exploring alternative perspectives, and advocating for more inclusive and equitable representations of art/design and artists/designers.

Reflect

Art History Minor student work will demonstrate: Self-awarenessDevelopment of self-awareness of one's own biases and perspectives in art historical analysis. Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between the field of art history and their majors, and how these studies will help them achieve personal and professional goals. Capacity to seek, assemble, evaluate, and ethically apply information and ideas from diverse sourcesCapacity to critically evaluate and ethically use diverse sources in art historical research Analysis of both ethical and aesthetic impacts of art and designArticulation of the ethical and aesthetic impacts of art, design and visual culture throughout history and in contemporary society, across diverse geographies and cultures.

Connect

Art History Minor student work will demonstrate: Awareness of positionality – in the world, their field, their communitiesAbility to develop and articulate connections across applied studio and Liberal Studies disciplinary perspectives and one's own positionality in these fields. Integration of skills, information, and conceptsAbility to identify and analyze diverse histories of art and design production, recognizing specific cultural, regional, and temporal contexts, and connecting these histories to real-world applications in current and future creative job markets.Awareness of how art and design's plural histories connect artists/designers to social justice, community engagement, and the development of intercultural competency and respect.

Shine

Art History Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economyAbility to articulate the relevance of art historical knowledge to one's major and various career pathways in the creative economy. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfoliosEffective presentation skills in discussing and writing about art and design history.Professional portfolio showcasing their writing informed by art historical research and a personal vision.

Course Descriptions

AHCS 226 - FA Contemporary Art Survey (3.00)

This Contemporary Art for Fine Artists is a survey of key fine art objects, practices and issues from the late 1950s to the present. Taking key historical events as its structure, the class uses contemporary art movements and counter movements to investigate mechanisms of form, taste, value, class, gender and exclusion, as these are demonstrated and challenged by artists in the US and globally. Included is a consideration of postmodern theory and fine art creation as systems capable of both perpetuating and effectively challenging normalized and marginalized identities. Required for Fine Arts majors.

AHCS 310 - Topics in Art History (3.00)

AHCS 310 are elective Art History courses that address a variety of issues in fine art and visual culture. Course offerings vary each semester and certain LIBS314 topics will satisfy this elective. See the Liberal Arts and Sciences department for course offerings and course descriptions. This course may be taken in either fall or spring.

AHCS 310 - Topics in Art History (3.00)

AHCS 310 are elective Art History courses that address a variety of issues in fine art and visual culture. Course offerings vary each semester and certain LIBS314 topics will satisfy this elective. See the Liberal Arts and Sciences department for course offerings and course descriptions. This course may be taken in either fall or spring.

AHCS 310 - Topics in Art History (3.00)

AHCS 310 are elective Art History courses that address a variety of issues in fine art and visual culture. Course offerings vary each semester and certain LIBS314 topics will satisfy this elective. See the Liberal Arts and Sciences department for course offerings and course descriptions. This course may be taken in either fall or spring.

LIBS 440 - Capstone (3.00)

The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

Community Arts in LA	SSCI 214	3.00
Alternative Spaces	LIBS 214	3.00

Elective Descriptions

AHCS 229 - Art History of Game Design (3.00)

AHCS 222 - Graphic Design/ Illus History (3.00)

LIBS 314 - Art through LA (3.00)

This course is predominantly a site visit-focused class, which requires students to participate in one week of field trips throughout Los Angeles during the week of May 18-22. This hybrid course will combine asynchronous online learning with site-specific field trips to analyze the rich relationships between art, space and community in Los Angeles. Research and case studies will include examples from art theory, historic sites, public space, architecture, landscape, urban practices and activism. At the end of the semester, in-depth tours, artist visits and workshops will examine the evolved landscapes of our contemporary city and their impact on communities and art production. Student analysis and feedback will focus on the relationships between art and space via the course texts and experiential learning activities. A detailed itinerary for daily site visits will be provided during the spring semester. This is a travel-study class that will be available OLAY (online asynchronous) during the semester, and will include 4 IN-PERSON workshops/site visits/studio visits in May. Students are REQUIRED to attend all field trips and to be available from 9am-4pm each day. Students will be responsible for their own transportation and parking fees for this course.

LIBS 314 - Human Nature (3.00)

Western culture's relationship with nature is one of exploitation, conquest, industry, and waste, but it's also empowerment, mythology, conservation, and wonder. In Human Nature, LIBS 314, students examine their own relationship with the natural world. How do fiction, film, science, industry, religion, politics, and advertising shape our connection to our environment and our selves? By studying fiction from indigenous and environmentalist authors as well as cross-genre film about nonhuman species, we will see how stories shape our relationship with nature. From the sustainability and environmental justice movements, we will identify our particular concerns about the planet and make strides to recover our birthright: moving from estrangement with the natural world to integration, from despair to hope, from apathy to care. Or, if we already have a practice of climate resilience--we will fine tune our mission. We will compose narratives and analysis that demonstrate an understanding of how storytelling, language, and the visual realm inform our many roles in this altering ecology. Finally, we will reflect on a plan for future engagement with the natural world, be it protective measures through civic engagement, integration through professional practice, or simply more time spent outdoors.

SSCI 214 - Community Arts in LA (3.00)

How do artists and designers engage communities and the public in their work? What does it mean to work within a community as a collective, as opposed to publicly presenting work as a solo artist or designer? In this course you will explore the aesthetic, historical, and socio-cultural aspects of community arts and socially engaged art through lectures, field trips, videos, readings, reflections and discussions. We will uncover the relationship artists/designers have with building communities and creating localized cultures, and how specific Los Angeles communities have used art as a means to occupy political territories over time. We will meet with contemporary artists, designers and local non-profit arts organizations, museums and public sites to engage in current social practice work in the field and to learn how they create cultural agency and cultivate a rich sense of place. Lastly, you will learn how to develop and write your own proposal for working with local communities to create positive change through socially engaged art. Required for Community Arts Engagement & Art and Design Education minors. Open to all majors/minors as a SSCI210 elective.

LIBS 214 - Alternative Spaces (3.00)

This course explores the phenomenon of the alternative art space, which emerged in the 1970s as an artist-driven counterpoint to traditional galleries and museums. These spaces, ranging from repurposed warehouses to digital platforms, continue to shape contemporary art practices by fostering experimentation and challenging institutional norms. We will examine iconic spaces like White Columns in New York and LACE in Los Angeles, alongside international examples such as La Panadería in Mexico City and Greenhouse Berlin. The course will critically analyze how these spaces navigate the tension between remaining "alternative" and becoming institutionalized. Importantly, we will explore the political dimensions of alternative spaces, considering how they provide platforms for marginalized voices and practices, and address pressing social issues. By studying their evolution, students will gain insight into the ongoing struggle for independent artistic expression and community engagement in today's cultural landscape.

* It is recommended that at least one AHCS310 course has a non-western focus. Students who have a discipline specific art/design history requirement for their major may have that count towards one AHCS310 elective. Certain LIBS314 topics will satisfy this requirement with approval from the Minor Area Head and Director of Interdisciplinary Studies.

** LIBS440 Capstone paper should address an Art History topic. LIBS440 Capstone/Senior Thesis for Fine Arts majors will fulfill this requirement. Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor

ART AND DESIGN EDUCATION MINOR

Our Mission:

The Art and Design Education minor prepares students for a range of professional practices as socially engaged artists, designers and educators in diverse communities and contexts including K-12 schools, museum education departments, community art centers, correctional facilities, therapeutic arts programs, public art, design companies that focus on educational materials, and the use of art and design as an agent for positive social change.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Art & Design Education Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Art & Design Education Minor Student Will:

Grow

Disciplinary Knowledge and Skills • Proficiency in Industry-Standard Skills, Technologies, and ProcessesCompetency across all Art Subject Matter Domains required by the CA Commission on Teaching Credentialing. Cross-disciplinary awareness and practiceDeveloped and equally valued practices as both educator and artist/designer. Audience-Focused Research, Historical Context, and Field-Specific DiscourseProficient knowledge about historical and current trends in educational theory and practice by engaging in comparative dialogues to determine how these forces shape teaching and learning today. Capacity to research K-12 schools, museum education departments, community arts centers, correctional facilities, therapeutic arts programs, and design companies focused on educational materials to gain insight into trends, values, standards and opportunities.

Dare

Art & Design Education Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersAbility to develop, and in some cases implement, in person and online projects for school and/or community settings that are innovative, engaging, developmentally appropriate, and culturally responsive, challenging the status quo of traditional art and design education.

Reflect

Art & Design Education Minor student work will demonstrate: Self-awareness • Capacity to communicate (orally, written, and/or visually) about their practiceClearly articulate the relationships between their work in art and design education and their majors, and how these studies will help them achieve personal and professional goals. Capacity to seek, assemble, evaluate, and ethically apply information and ideas from diverse sourcesincluding art and design examples for use in lesson plans, workshops and curricula. Analysis of both ethical and aesthetic impacts of art and designMake responsible decisions about the ethical and aesthetic impacts their work has on the students and communities they engage with.

Connect

Art & Design Education Minor student work will demonstrate: Ability to work well, collaborate, and build relationships across differences in identity, perspective, aesthetics and disciplineswithin a community of educators and learners. Integration of skills, information, and conceptsAbility to synthesize and analyze the connections between history and theory of art and design education and community engagement and the realities of what happens in the classroom, studio and/or community setting.

Shine

Art & Design Education Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economyClear statement of Teaching Philosophy and professional application materials for internships and jobs in the field of art and design education. Awareness of audience and ability to cultivate relationships with others in their chosen fields.Capacity to propose, plan, design and manage developmentally appropriate and culturally responsive lesson plans, curricula, course activities and events that cultivate and build professional social capital. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfoliosProfessional teaching portfolio that includes lesson plans, internship documentation, teaching philosophy, and career goals. Proficiency in budgeting, time and project managementDevelop an understanding of supply budgets and timing for demos, workshops, lesson plans, curricula and community projects. Career readiness, as evidenced by strong interpersonal skills, self-advocacy, adaptation, autonomy, initiative, and willingness to both receive and offer feedback as a pre-service educator.

Course Descriptions

LIBS 311 - Teaching for Learning I (3.00)

Art and Design educators make a huge impact on students of all ages. The arts are often what keep K- 12 students engaged in learning, whether it is taught as a discrete subject or integrated into other subjects. Art and design education can help adult learners develop new skills and stay connected to their communities. In this introductory course, you will gain a historical overview of education and art/design development theories and philosophies while exploring models of art and design education such as student-centered, discipline-based, standards-based, and integration-based. You will observe local elementary, middle, high school and community classrooms to understand how all this theory plays out in practice. You will also learn to write your own lesson plans for a K-12, community or adult learners and practice teaching to your peers in the class. This is your chance to begin to transform art and design education systems to be more diverse, equitable and inclusive. Required for Art and Design Education Minors, open to all others as an elective.

SSCI 214 - Community Arts in LA (3.00)

How do artists and designers engage communities and the public in their work? What does it mean to work within a community as a collective, as opposed to publicly presenting work as a solo artist or designer? In this contemporary art history course, you will explore the aesthetic, historical and socio-cultural aspects of community arts and socially engaged art through lectures, videos, readings, reflections and discussions. We will uncover the relationship artists and designers have with building communities and creating localized cultures, and how specific Los Angeles communities have used art as a means to occupy political territories over time. We will meet with contemporary artists, designers and local non-profit arts organizations, museum education departments and public sites to engage in current social practice work in the field and to learn how they create cultural agency and cultivate a rich sense of place. Lastly, you will learn how to develop and write your own proposal for working with local communities to create positive change through socially engaged art. Required for Art and Design Education minors, open to all others as an elective.

LIBS 313 - Teaching for Learning II (3.00)

Building on Teaching for Learning I, this course provides further development of your knowledge and skills as future art and design educators. Through readings, reflections, and discussions you will synthesize education theories and philosophies emphasizing aesthetic development in youth and adults, museum and community settings, public practices, critical pedagogy, classroom management, English Language Learners, Special Education, and best practices such as trauma informed teaching, culturally responsive teaching, and anti-racist / anti-biased practices. You will build your own curricula, write lesson plans, and hone your teaching skills by collaborating with a local art/design educator to teach a lesson to their students while being videotaped for your portfolio. This is your chance to refine your pedagogy (teaching practice) and update your teaching philosophy and portfolio in preparation

for a career as a credentialed art teacher or a community-based teaching artist/designer. Required for Art and Design Education minors. Prerequisite: LIBS311/314 Teaching for Learning I.

ADED 336 - Teaching Internship (3.00)

In this Blended Course, students will synthesize and analyze the connections between history and theory of art and design education and community engagement and the realities of what happens in the classroom, studio and/or community setting. Students will do so by participating in a 10 week internship assisting with a K-12 school, museum education department, cultural organization, or a socially engaged artist /designer of their choice. This field experience along with readings, videos and discussions provide the opportunity to expand and reflect on one's understanding of education theory and community engagement, all of which culminates in the development of a professional online teaching portfolio. Required for ADED minor students. Pre-requisites SSCI210/214 Community Arts in LA and LIBS311/314 Teaching for Learning I, or ADED Minor Area Head's permission.

ADED 299 - Art& Design Education Elective (3.00)

Students will choose Art and Design Education Electives from the Minors Course Lists, selected by the Interdisciplinary Studies Director and Minor Area Head, in collaboration with each Academic Department. . Examples include ADED300 Special Topics like Art Therapy and Teaching and Learning for Neurodiversity, CAIL301 Creative Action Studio (if taken a second time), SSCI211 Child Psychology, and studio classes outside of one's major or area of emphasis that expand their art and design making skills.

Electives

Course Title	Course Number	Credits
Ceramics	SCNG 236	3.00
Reimagining MacArthur Park	CAIL 301	3.00
Made For Kids Malawi	CAIL 301	3.00

Elective Descriptions

SCNG 236 - Ceramics (3.00)

CAIL 301 - Reimagining MacArthur Park (3.00)

This course engages students in a process that looks at history, urban planning, art, design, and community organizing in order to reimagine MacArthur Park in the Westlake neighborhood of Los Angeles (the original home of Otis College). Student work will support three planned closures of Wilshire Blvd where it bisects the park. Working with the City of Los Angeles Council District 1 as a client, Student artists will design alternative visions of the park that interrogate the park's history, reunify its 35 acres of greenspace and reimagine its place in the city.

CAIL 301 - Made For Kids Malawi (3.00)

Black Lives Matter Everywhere. Enacting and reinforcing values central to creating equitable lives and opportunities for all people requires participation. The Made for Kids: Malawi class, team-taught by CAIL studio and LAS faculty, applies real-world research and design processes in two settings. First in Los Angeles and second via Zoom in Malawi. By working with local and international partners, students have two opportunities to learn about colonialism's effect on Black lives everywhere. Although we will be working online with students from Malawi, you also will have a chance to help them develop their creative skills by working in collaborative teams. Students in Los Angeles and Malawi will participate in one or two workshops led by artists to introduce new creative practices. By the end of the semester, you will have completed a socially conscious research project, designed, and recorded a lesson plan based on your skill set, and strengthened your research, collaborative, and professional skills.

CONCEPT ART MINOR

Our Mission:

In the Concept Art minor students explore the intersections of Illustration, Animation, Game Design and Entertainment Design while developing technical skills in hand drawing and painting from observation, digital drawing and painting, and a range of AI techniques to design characters, props and environments.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Concept Art Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Concept Art Minor Student Will:

Grow

Concept Art Minor student work will demonstrate: Disciplinary knowledge and skills Proficient skills in perspective drawing, composition, color theory and visual storytelling, using wet, dry and digital media to design characters, props and environments. Proficiency in industry-standard skills, technologies, and processesAbility to create production ready assets using current industry technologies and workflows. Cross-disciplinary awareness and practiceDeveloped practice grounded in two or more disciplines, understanding of how Concept Art fits into the overall production pipelines of animation, illustration, game and entertainment design.

Dare

Concept Art Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersAbility to combine aspects of Concept Art with work in one's major and/or push the boundaries between each field.

Reflect

Concept Art Minor student work will demonstrate: Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between their work in Concept Art and their major and how these studies will help them achieve personal and professional goals. Analysis of both ethical and aesthetic impacts of art and designCritical examination of the social, cultural, and environmental implications of their work, demonstrating responsibility in designing characters, props and environments that engage and resonate with diverse audiences.

Connect

Concept Art Minor student work will demonstrate: Ability to work well, collaborate, and build relationships across differences in identity, perspective, aesthetics and disciplineswith directors, artists and designers all contributing to different stages of a project's pipeline. Awareness of positionality – in the world, their field, their communities. • Integration of skills and concepts:between their majors and Concept Art minor, while understanding and articulating their positionality in their chosen fields.

Shine

Creative Writing Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and one's role as an interdisciplinary creative within the creative economy. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of original Concept Art that resonates with intended audiences.

Course Requirments

15 credits of Concept Art and related courses are required to complete this minor. This can be 5 studio courses or 4 studio courses + 1 LAS course.

Students select courses based on guidance from the Director of Interdisciplinary Studies, Minor Area Heads and Academic Advisors and must follow prerequisites when applicable. For the full list of courses that will count for this minor, along with recommended courses to take first, see the Minors Course Lists on the Registration page of the Dashboard (my.otis.edu). Students are advised to take minor classes in place of studio electives (or in place of one LAS elective), or for majors without electives by taking one extra class in each of 5 semesters spread out between sophomore and senior year.

Elective Descriptions

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

ILUS 213 - Drawing and Painting II (3.00)

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

LIBS 212 - Creative Writing Workshop I (3.00)

How does one transform the great chaos of experiences, obsessions, dreams, ideas, and observations into compelling literature? This course will explore a variety of methods for making that transformation possible. In addition to weekly writing assignments and a final project, you will be asked to read widely, take creative risks with exercises, and create community through avid participation in class discussions. Refining the ability to discuss peer work will be as important as developing one's own writing. Our focus in this course will be on a specific genre of storytelling—what's known as Flash Fiction or Short-Shorts. These stories are shorter than traditional short stories. They're very short stories, generally anywhere from 25 words to around 1000. Sometimes this genre is called Sudden Fiction, Microfiction, Microstories, Hint Fiction, Minisagas, Postcard Fiction, occasionally even Twitterature. In this class, we'll refer to these stories as FFSS (Flash Fiction Short-shorts). Even though these stories are short, they contain the main elements of traditional stories: a beginning, middle, and end. FFSS are compressed, the text doesn't take up much space, but always hints at a story much larger than what's on the page. They provide a story framework that allows the reader to intuit the larger story and its implied meaning.

PNTG 214 - Painting II (3.00)

PNTG 306 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

ILUS 301 - Illustration IV (3.00)

Pre-requisites: ILUS 300

ILUS 213 - Drawing and Painting II (3.00)

ILUS 313 - Drawing and Painting IV (3.00)

Pre-requisites: ILUS 312

ILUS 358 - ST: Scientific Illustration (3.00)

Scientific Illustration will introduce students to scientific illustration as it could be used to educate, preserve, advertise, etc for various types of California farms. These could include food farms (vegetable, animal, orchards, vineyards, olive, date), non food farms (biofuels, building- hemp, bamboo, flax, and pharmaceuticals), using traditional farming methods or non-traditional such as hydroponics or aquaculture. Projects will be based on one chosen farm and include taxonomy of a farmed species, diagrams of the species and informational illustrations of farmed species.

ILUS 358 - ST: Watercolor Illustration (3.00)

Students are introduced to traditional and contemporary watercolor approaches and concepts, with emphasis on its formal language and the fundamentals of artistic expression using this medium. It helps prepare students for the field of illustration. Students will be using watercolors to paint from observation as well as from imagination in conjunction with reference materials and various other painting and mixed media methods.

ILUS 358 - ST: Digital Paths (3.00)

Digital paths is a basic introduction to computer graphics and video editing software, such as Adobe Photoshop/Illustrator/After Effects/Media Encoder and Procreate in iPad. Students do not need relevant experience to enroll in this course, but the final assignments are presented in digital media. Through classroom demonstration and video watching, students will be able to make one motion graphic animation, and one experimental film.

ILUS 358 - ST: Narrative Illustration (3.00)

Students will create illustrations that convey moments in a story or script. They will use existing or personal ideas to illustrate these scenes while learning from film compositions, scripts, books, and other works to help communicate the narrative. Students should have a Tablet or Drawing Tablet that can attach to a laptop or computer, styles pen to use with Photoshop.

ANIM 215 - Storyboarding and Pre-viz (3.00)

Pre-requisites: ANIM 220

ANIM 310 - Character Design for Animation (3.00)

The purpose of the class is to introduce students to methodologies and styles for designing characters with appeal that are ready to animate. Assignments and critiques develop problem-solving, collaboration, creative visual interpretations that result in portfolio ready art/ illustrations of unique character designs for the purpose of animation.

Pre-requisites: ANIM 230

ANIM 490 - Digital Painting II (3.00)

This course will train you in the fundamentals of digital painting/design. Students will learn to use the tools and techniques of digital painting to produce artwork with applications to the fields of game design and animation such as animation backgrounds, textures for 3D animation, concept art, and illustration.

ANIM 490 - Advanced Storyboarding (3.00)

This course will cover the concepts of storyboarding for 2D television animation, visual storytelling, and basic filmmaking/ cinematography. Lecture topics will begin with reverse engineering thumbnails and move through assignments that simulate a variety of visual storytelling projects which commonly are seen in the industry. Basic professional practices for today's working storyboard artists will also be included.

GAME 215 - Color and Lighting for Games (3.00)

GAME 310 - Cinematic Visualization (3.00)

Learn the pipeline for pre-viz and post-viz work by an Otis alumni with years of visualization experience. Taking concepts, scripts, and storyboards to the next step by creating a comprehensive sequence that combines 3D animation in Maya, Visual Effects and Rendering in Unreal Engine 5, and compositional work in After Effects. You do not need to be a specialist as this course is customizable to focus on different elements of the pipeline to hone your skills and work together with the rest of your team. Eli graduated in 2021 and immediately started his career as a technical animator at Halon Entertainment, and worked his way into becoming a visualization artist for commercials, Triple AAA video games, and blockbuster movies. Credits include Fortnite, Planet of the Apes, A Minecraft Movie, Hunger Games, and more.

GAME 310 - Gesture Drawing (3.00)

Gesture Drawing emphasizes observational drawing from live models to develop strong posing skills for artists In animation, storyboard, illustration and fine arts tracks. In class lectures and demos will reinforce principles of animation. This course is designed to introduce and develop an understanding of life drawing that will serve as foundation for further studies in animation and entertainment arts. The class will focus on aspects of drawing that are used in the field of entertainment arts including but not limited to: Constructive Drawing based on gesture and form. Narrative or storytelling drawing and creating strong poses with emotion and impact. Observational drawing. Review of anatomical features. Thumbnail and quick sketch for quick concept sharing. Students will become familiar with successful artists relating to this field..

GAME 490 - Character Design for Game (3.00)

Conceptual designers for the game and animation industry must skillfully combine real world logic and design techniques to create unique and compelling environments, interiors, exteriors, props and vehicles for a variety of stories and historical eras. This requires a dynamic understanding of architecture, industrial design, structure and materials, as well as using illustration, design and modeling techniques to present cohesive architectural narratives, imaginative environments and accurate planning. DESIGN CONCEPTS FOR GAMES is an introduction to the conceptual process of Environment Design and World Building for visual development for feature animation, video games and film. Students will create original design solutions for real world situations utilizing scale, accurate layout, location, structural realities and available materials to create believable environments. Students will create plan and elevation drawings and dimensional studies in support of their original conceptual structures. Students will obtain a solid understanding of how to create original environments utilizing traditional methods, available technology and 3D visualization techniques to create layouts. Over the course of the semester students will design their own unique functioning community as an asset to an Environment Design Portfolio.

GAME 310 - Animal + Creature Drawing (3.00)

This course teaches fundamental skills and techniques for creating realistic and imaginative animal and creature drawings. You will learn anatomy, structure, proportions, perspective, texture, and detail, which are essential for creating convincing and dynamic drawings. You will also develop your creativity and design skills by inventing your own unique creatures. Throughout the course, you will practice through a series of exercises and projects and receive feedback to refine your skills. By the end of the course, you will have a solid foundation in animal.

GAME 310 - Anatomy for Entertnmnt Design (3.00)

This course is designed to guide students in mastering the art of bringing characters to life by deeply understanding the human figure from the inside out. Students will learn to visualize the structure of the body by studying gestures, skeletal frameworks, muscles, and forms, and translating them into dynamic figures. They will work with various basic shapes—such as cylinders, cubes, and blocks—to build figures with accurate proportions and motion. As they progress, students will focus on challenging aspects such as hands, feet, and the head in perspective, and learn techniques to stylize anatomy and create exaggerated poses for more dynamic storytelling in their designs. In addition to technical skill development, this course will explore how muscle movement, body types, and aging impact character design. A diverse range of body types, genders, and ages will be examined to ensure students can create authentic, relatable characters. The course will also delve into light logic, hair studies, and value rendering to give students a holistic approach to figure drawing and visual storytelling. Ultimately, students will develop their skills to creatively connect anatomical accuracy with expressive, narrative-driven character designs in the context of entertainment.

FSHD 390 - ST: Fashioning the Fantastic (3.00)

As the intersection of technology and fashion continues to evolve, students will develop digital-only fashion runway collections inspired by a game franchise, or brand. The project will showcase digital runway show that will serve as the backdrop for fantastical collections created on avatars. Students will integrate a fashion/digital perspective to widen the demographic of the gaming community in a fashion fantasy world.

CONC 301 - Storytelling for Concept Art (3.00)

Pre-requisites: CONC 300

CONC 301 - Storytelling for Concept Art (3.00)

Pre-requisites: CONC 300

CONC 400 - Concept Art Production & Devel (3.00)

Pre-requisites: CONC 301

CONC 401 - Concept Art Packaging & Finish (3.00)

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

DRWG 204 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

CONTEMPORARY CLAY MINOR

Our Mission:

The Contemporary Clay Minor provides students the opportunity to explore several aspects of working in clay from the handmade to the mass produced, including utilitarian objects, unique sculptures, and installations utilizing the multiple. Students learn a combination of hand-building, potter's wheel throwing, slip-casting, glazing, and firing techniques as well as emerging digital technologies. Environmental and financial sustainability is also emphasized.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Contemporary Clay Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Contemporary Clay Minor Students Will:

Grow

Contemporary Clay Minor student work will demonstrate: Disciplinary knowledge and skills • Proficiency in industry-standard skills, technologies, and processes Proficiency in ceramics techniques including hand-building, wheel throwing, slip casting, glazing, kiln stacking and firing, and an introduction to current digital technologies. Cross-disciplinary awareness and practice • Audience-focused research, historical context, and field-specific discourseDeveloped practice grounded in two or more disciplines, understanding the place of ceramics within historical and contemporary art, design, industry, and global cultures.

Dare

Contemporary Clay Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersCapacity to push the boundaries of what clay as a material can do in various contexts and for a variety of purposes (artistic, functional, industrial, etc.), and what ceramic artists/designers can do in combination with or in relation to their majors.

Reflect

Contemporary Clay Minor student work will demonstrate: Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between their work in clay and their majors, and how these studies will help them achieve personal and professional goals. Analysis of both ethical and aesthetic impacts of art and designAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture and the environment.

Connect

Contemporary Clay Minor student work will demonstrate: Ability to work well, collaborate, and build relationships across differences in identity, perspective, aesthetics and disciplinesin a communal ceramics studio, and among local artists, designers and curators in the contemporary ceramics community. Integration of skills and concepts:Successfully integrate skills, information and concepts between their majors and Contemporary Clay minor, while understanding and articulating their positionality in their chosen fields.

Shine

Contemporary Clay Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and one's role as an interdisciplinary creative within the creative economy. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of original work in clay with or without other materials, that resonates with intended audiences. Proficiency in budgeting, time and project management.Functional knowledge of basic business practices, including budgeting, time and project management.

Course Descriptions

PRDS 362 - Beginning Ceramics (3.00)
This course introduces students to a wide range of ceramic practices through cross-cultural, thematic, and technical approaches. Students explore functional, sculptural, and production ceramics, beginning with sketched ideas or sketch models and culminating in finished ceramic pieces.

SCNG 236 - Ceramics (3.00)
This sculpture elective will teach fundamental skills of working with clay. You will learn the foundational skills of wheel throwing and hand building: centering and forming shapes on the wheel, wedging, pinching, coiling, soft and hard slab construction, building and assembling in parts, using a banding wheel, and various ways to manipulate the surface of the clay, such as carving, stamping, printing, drawing, painting, and glazing. You will learn how kilns work and various ways to fire the clay, with an introduction to how different glazes and clays react to different firing techniques. Exposure to the historical use and international variety of techniques in ceramics will be integrated into the contemporary context. This is an introductory course; no experience is necessary.

CLAY 299 - Clay Electives (3.00)
Students will choose Clay Electives from the Minors Course Lists, selected by the Interdisciplinary Studies Director and Minor Area Head, in collaboration with each Academic Department. Clay Electives include any ceramics class offered across the college, as well as other applicable courses on related topics as determined each semester by the Minor Area Head and Director of Interdisciplinary Studies. Examples include: CAIL200 Made in USA, LIBS314 Business of Creativity, ENTR300 Intro. to Entrepreneurship, INTR330 ST: Design Lab, and PRDS462 ST: Packaging

CLAY 299 - Clay Electives (3.00)
Students will choose Clay Electives from the Minors Course Lists, selected by the Interdisciplinary Studies Director and Minor Area Head, in collaboration with each Academic Department. Clay Electives include any ceramics class offered across the college, as well as other applicable courses on related topics as determined each semester by the Minor Area Head and Director of Interdisciplinary Studies. SCNG 236 - Ceramics (3.00)

PRDS 362 - Beginning Ceramics (3.00)

PRDS 363 - Intermediate Ceramics (3.00)

INTR 330 - ST: Design Lab (3.00)
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

MATH 137 - Mathematics of a Startup (3.00)
The Business Model Generation Canvas is a tool used by innovators and entrepreneurs around the world in different stages of the business life cycle: planning, raising capital, evaluation, restructuring, testing innovative ideas, mergers and acquisitions, and development. Students will study the nine building blocks of a business, analyze financial statements, and discuss their mathematical components. This is a project-based course where students will apply the principles they learn to create their own business model or analyze a start-up venture and present their assessment. Required for Entrepreneurship minors.

SCNG 237 - Advanced Ceramics (3.00)
This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

INTR 330 - Interdisciplinary Practices (3.00)
This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

The five required courses to complete the Contemporary Clar minor replace studio electives or in some cases up to one LAS elective.

CREATIVE WRITING MINOR

Our Mission:

The Creative Writing minor offers art and design students an opportunity to give voice and shape to their creativity through a variety of written expressive forms. The minor provides guidance and support to students in a structured environment to develop their writing, and an exciting way to explore their personal visions through workshops and lectures.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Creative Writing Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Creative Writing Minor Students Will:

Grow

Creative Writing Minor student work will demonstrate: Disciplinary Knowledge and Skills An understanding of genre and an exploration of writing in multiple forms. Proficiency in Industry-Standard Skills, Technologies, and ProcessesAbility to identify and employ writing techniques and habits of revision, workshop, and close reading that allow critical thought and expression.

Dare

Creative Writing Minor student work will demonstrate: InnovationAbility to combine writing with studio work in one's major and/or push boundaries between each field. Experimentation and Playwith language and narrative. Challenge to the Status QuoWillingness to challenge dominant worldviews and be flexible with ideas.

Reflect

Creative Writing Minor student work will demonstrate: Self-AwarenessCultivation of self-awareness through reflective writing, reading, revision, and peer feedback. Capacity to Communicate (Orally, Written, and/or Visually) about their PracticeAbility to clearly articulate the relationship between creative writing and their major and how these studies will help them achieve personal and professional goals. Analysis of Both Ethical and Aesthetic Impacts of Art and DesignUnderstanding of meaning, justice, and community in literature and in personal writing practice.

Connect

Creative Writing Minor student work will demonstrate: Ability to Work Well, Collaborate, and Build Relationships across Differences in Identity, Perspective, Aesthetics and DisciplinesAbility to collaborate with writers and thinkers, exchanging ideas across differences in identity, perspective, aesthetic, and discipline. Integration of Skills and Concepts:Recognize the political and social elements of a text and demonstrate multiple critical approaches.Experiment with the relationship between text and image and identify intersections between writing and one's chosen major.

Shine

Creative Writing Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and one's role as both a writer and maker within the creative economy. Awareness of audience and ability to cultivate relationships with others in their chosen fields.Developed awareness of audience and ability to nurture relationships in creative writing communities. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion of the Creative Writing Capstone project that resonates with intended audiences. Proficiency in budgeting, time and project management.Ability to budget time to write and develop creative projects. Career readiness. Ability to advocate for your work, submitting projects for publication, exhibition, performance, or any opportunity to share with a community of readers and writers.

Course Descriptions

LIBS 212 - Creative Writing Workshop I (3.00)

An introduction to the experience and practice of writing fiction and poetry. Includes visits by guest writers in a workshop setting. Students produce a portfolio of writing in revised and publishable form. This course is restricted to students who have submitted a writing sample to the Liberal Studies Department. Required for Creative Writing minors.

LIBS 312 - Creative Writing Workshop II (3.00)

Creative Writing Workshops offer art and design students an opportunity to give voice and shape to their creativity through a variety of written expressive forms. The Creative Writing Workshop II provides guidance and support in a structured environment for students enrolled in the minor to develop their writing and explore their personal visions through workshops and lectures. Creative Workshop I & II are required for Creative Writing Minors.

LIBS 316 - Creative Writing Elective (3.00)

A limited choice of Upper Division Liberal Studies elective courses will count as Creative Writing Minor Electives, as determined each semester by the Interdisciplinary Studies Director, LAS Chair, and Creative Writing Minor Head. Creative Writing Minor Electives cover a range of literature and writing topics such as Reading Visiting Writers, Screenwriting Shorts, Food Memoirs, Translation/Multilingual Writing, and Human Nature (climate narratives).

LIBS 316 - Creative Writing Elective (3.00)

A limited choice of Upper Division Liberal Studies elective courses will count as Creative Writing Minor Electives, as determined each semester by the Interdisciplinary Studies Director, LAS Chair, and Creative Writing Minor Head. Creative Writing Minor Electives cover a range of literature and writing topics such as Reading Visiting Writers, Screenwriting Shorts, Food Memoirs, Translation/Multilingual Writing, and Human Nature (climate narratives).

LIBS 442 - Capstone: Creative Writing (3.00)

The Liberal Studies Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Studies Program, the class design allows for independent research and private mentoring through Blended classes that meet both in-person and online. This asynchronous format encourages students to apply the skills they've accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass. Students who earn a D will automatically be enrolled in the 1-unit Spring semester Continuation class to raise their grade to passing. Note: Creative Writing, Art History, Sustainability minors, and Fine Arts majors take specific Capstones. Please see department for courses. Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor.

LIBS 212 - Creative Writing Workshop I (3.00)

How does one transform the great chaos of experiences, obsessions, dreams, ideas, and observations into compelling literature? This course will explore a variety of methods for making that transformation possible. In addition to weekly writing assignments and a final project, you will be asked to read widely, take creative risks with exercises, and create community through avid participation in class discussions. Refining the ability to discuss peer work will be as important as developing one's own writing. Our focus in this course will be on a specific genre of storytelling—what's known as Flash Fiction or Short-Shorts. These stories are shorter than traditional short stories. They're very short stories, generally anywhere from 25 words to around 1000. Sometimes this genre is called Sudden Fiction, Microfiction, Microstories, Hint Fiction, Minisagas, Postcard Fiction, occasionally even Twitterature. In this class, we'll refer to these stories as FFSS (Flash Fiction Short-shorts). Even though these stories are short, they contain the main elements of traditional stories: a beginning, middle, and end. FFSS are compressed, the text doesn't take up much space, but always hints at a story much larger than what's on the page. They provide a story framework that allows the reader to intuit the larger story and its implied meaning.

LIBS 214 - Creative Writing Workshop 1 (3.00)

How does one transform the great chaos of experiences, obsessions, dreams, ideas, and observations into compelling literature? This course will explore a variety of methods for making that transformation possible. In addition to weekly writing assignments and a final project, you will be asked to read widely, take creative risks with exercises, and create community through avid participation in class discussions. Refining the ability to discuss peer work will be as important as developing one's own writing. Our focus in this course will be on a specific genre of storytelling—what's known as Flash Fiction or Short-Shorts. These stories are shorter than traditional short stories. They're very short stories, generally anywhere from 25 words to around 1000. Sometimes this genre is called Sudden Fiction, Microfiction, Microstories, Hint Fiction, Minisagas, Postcard Fiction, occasionally even Twitterature. In this class, we'll refer to these stories as FFSS (Flash Fiction Short-shorts). Even though these stories are short, they contain the main elements of traditional stories: a beginning, middle, and end. FFSS are compressed, the text doesn't take up much space, but always hints at a story much larger than what's on the page. They provide a story framework that allows the reader to intuit the larger story and its implied meaning.

LIBS 314 - The Book as Art(work) (3.00)

The Millard Sheets Library is filled with art books, as you probably know, but you may not know that it also houses a significant collection of artists' books—that is, artworks in book form. These may take the shape of the familiar codex containing text and/or imagery, or they may be idiosyncratic objects made of varied materials that, in one way or another, engage "the book" conceptually or formally. In this course, we will review the history of this unique medium and explore the library's collection via a curated selection of items. Students will do weekly readings and reading responses, write one paper on an artist's book of their choosing, and collaborate with a classmate to create an artist's book, drawing inspiration from our explorations and discussions.

LIBS 314 - Food Memoir (3.00)

Food writer Michael Ruhlman says that two activities are unique to us as humans: cooking and storytelling. If you eliminate either of these activities from our lives, he says, our species will cease to exist, "So telling stories about food and cooking is not only natural, it's necessary for our survival." This online asynchronous course invites you to explore the food memoir and learn of its ability to present authentic stories about family and culture, history and nature, trauma and justice--all through the lens of food. You will examine food autobiographies in various formats--such as books, essays, articles, comics and graphic novels--written by authors of diverse backgrounds. By semester's end, you will write and workshop a collection of personal stories of your own that use food as a vehicle for storytelling.

LIBS 314 - How Fiction Works: A Workshop (3.00)

How does a writer transform the wondrous chaos of experiences, obsessions, dreams, observations, ideas, and discourse into compelling fiction? This course will explore various methods and approaches for making that transformation possible through an examination of narrative devices in stories and novels, and through writing assignments which will invite students to take creative risks. Areas of focus will include deepening detail in imagery and language; using dialogue to advance story; understanding point-of-view and encounters with other; making the most of climate and setting, and tense and temporality; complicating conflict; and embedding social discourse and cultural criticism into fiction. The reading will be selected for its diversity in authorship, style, and subject matter. In the first half of the course, students will read short fiction and novel excerpts with relevance to the above topics; they will read two short novels during the second half of the course. Throughout the semester, students will workshop a short story or novel chapter. For this project, students will be asked to bring together something they have long been curious about outside their experience (possibly requiring research) with something personal and particular to their lives. With permission of the instructor, students may work on graphic novels, comics, animation, games, or other narrative media

LIBS 316 - How Fiction Works (3.00)

How does a writer transform the wondrous chaos of experiences, obsessions, dreams, observations, ideas, and discourse into compelling fiction? This course will explore various methods and approaches for making that transformation possible through an examination of narrative devices in stories and novels, and through writing assignments which will invite students to take creative risks. Areas of focus will include deepening detail in imagery and language; using dialogue to advance story; understanding point-of-view and encounters with other; making the most of climate and setting, and tense and temporality; complicating conflict; and embedding social discourse and cultural criticism into fiction. The reading will be selected for its diversity in authorship, style, and subject matter. In the first half of the course, students will read short fiction and novel excerpts with relevance to the above topics; they will read two short novels during the second half of the course. Throughout the semester, students will workshop a short story or novel chapter. For this project, students will be asked to bring together something they have long been curious about outside their experience (possibly requiring research) with something personal and particular to their lives. With permission of the instructor, students may work on graphic novels, comics, animation, games, or other narrative media

LIBS 314 - Human Nature (3.00)

Western culture's relationship with nature is one of exploitation, conquest, industry, and waste, but it's also empowerment, mythology, conservation, and wonder. In Human Nature, LIBS 314, students examine their own relationship with the natural world. How do fiction, film, science, industry, religion, politics, and advertising shape our connection to our environment and our selves? By studying fiction from indigenous and environmentalist authors as well as cross-genre film about nonhuman species, we will see how stories shape our relationship with nature. From the sustainability and environmental justice movements, we will identify our particular concerns about the planet and make strides to recover our birthright: moving from estrangement with the natural world to integration, from despair to hope, from apathy to care. Or, if we already have a practice of climate resilience--we will fine tune our mission. We will compose narratives and analysis that demonstrate an understanding of how storytelling, language, and the visual realm inform our many roles in this altering ecology. Finally, we will reflect on a plan for future engagement with the natural world, be it protective measures through civic engagement, integration through professional practice, or simply more time spent outdoors.

LIBS 314 - Screenwriting Shorts (3.00)

How can you turn a terrific idea into a great little YouTube video? Do you plan to work in the TV and film industry, create animated stories, or design branding and advertising campaigns? Maybe you just want to learn how to tell a good short story or understand the difference between story, narrative, and plot? How can conflict be used to create compelling characters? How does a screenwriter hold everything together? Learn the craft of scripting shorts by exploring these questions and writing scripts in this online course. Through lectures, short assignments, critiques, and the study of short and full-length scripts, you will learn to craft a one-minute and a ten-minute screenplay that can be used to make an animated short or an online clip, take to festivals or develop into a full screenplay.

LIBS 314 - Human Nature (3.00)

Western culture's relationship with nature is one of exploitation, conquest, industry, and waste, but it's also empowerment, mythology, conservation, and wonder. In Human Nature, LIBS 314, students examine their own relationship with the natural world. How do fiction, film, science, industry, religion, politics, and advertising shape our connection to our environment and our selves? By studying fiction from indigenous and environmentalist authors as well as cross-genre film about nonhuman species, we will see how stories shape our relationship with nature. From the sustainability and environmental justice movements, we will identify our particular concerns about the planet and make strides to recover our birthright: moving from estrangement with the natural world to integration, from despair to hope, from apathy to care. Or, if we already have a practice of climate resilience--we will fine tune our mission. We will compose narratives and analysis that demonstrate an understanding of how storytelling, language, and the visual realm inform our many roles in this altering ecology. Finally, we will reflect on a plan for future engagement with the natural world, be it protective measures through civic engagement, integration through professional practice, or simply more time spent outdoors.

SSCI 210 - Fairytales, Folklore and Story (3.00)

Who doesn't love a good yarn? We will be discussing fairy tales along with a smattering of legends and myths that say something about diverse cultures and their belief systems. The manner in which these tales are analyzed and perceived by various societies and the contexts in which they are told will also be addressed. Students will tell tales, read and collect them, and create projects around and with them. Students will read about and discuss the scholarship from different cultures regarding oral narration. Most particularly students will be introduced to major theoretical perspectives regarding narrative, including: viewing stories as survivals and historical entities, as definable structures, as aspects of culture, as manifestations of human behavior and as manifestations of the human mind. Students will learn about the relation between fieldwork and the study of narration and perform their own fieldwork with a storyteller. Students will view films regarding narratives, hear storytellers, read stories and tell stories. They will have the opportunity to understand, analyze and even create their own oral narrative.

LIBS 314 - Fluid Identitie/ Plural Selves (3.00)

The notion of the individual as a singular being with unique qualities and characteristics that distinguishes them from others seems at odds with the fact that our identities can and do change, and that our self-concept may be multiple. This on-line course will focus on works from different disciplines (literature, the visual arts, and film) that explore the fluid nature of identity and / or the plural self, whether in their subject matter or authorial status. To bring nuance to our understanding, we will approach the topic from different perspectives (as critique, methodology, and content) complementing it with occasional critical readings. By semester's end, you will have developed your appreciation of the ways in which its complexities have been addressed in the arts.

*A limited choice of Upper Division Liberal Studies elective courses will count as Creative Writing Minor Electives, as determined each semester by the Interdisciplinary Studies Director, LAS Chair, and Creative Writing Minor Head.

**The five required courses to complete the Creative Writing minor replace LAS electives. Up to one LIBS316 can replace a studio elective, with major department approval.

DIGITAL MEDIA MINOR

Our Mission:

The Digital Media minor provides students with the opportunity to explore skills related to creative designers, artists, and storytellers in animation, game design, motion design, visual effects and concept art for film, television, video games and advertising industries.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Digital Media Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Digital Media Minor Students Will:

Grow

Digital Media Minor student work will demonstrate: Disciplinary Knowledge and Skills Understanding of design principles, storytelling techniques, cinematic language and production pipelines used in digital content creation, animation, concept art, and game design. Proficiency in Industry-Standard Skills, Technologies, and ProcessesProficiencies in utilizing industry-standard tools such as Adobe Suite, Maya, Toon Boom, Unreal Engine, Houdini, and/or Substance Painter to create high-quality assets, animations, environments, and/or gameplay experiences. Cross-Disciplinary Awareness and PracticeDeveloped practice grounded in two or more disciplines.

Dare

Digital Media Minor student work will demonstrate: Innovation • Experimentation and Play • Challenge to the Status Quo • Bravery in their Work and their Interactions with OthersCapacity to combine aspects of digital media with work in one's major and/or push the boundaries between each field.

Reflect

Digital Media Minor student work will demonstrate: Capacity to Communicate (Orally, Written, and/or Visually) about their PracticeAbility to clearly articulate the relationship between their work in digital media and their major and how these studies will help them achieve personal and professional goals. Analysis of Both Ethical and Aesthetic Impacts of Art and DesignAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture, and the environment.

Connect

Digital Media Minor student work will demonstrate: Awareness of Positionality – in the World, their Field, their Communities. • Integration of Skills and Concepts:Successful integration of skills, information and concepts between their majors and Digital Media minor, while understanding and articulating their positionality in their chosen fields.

Shine

Digital Media Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as an interdisciplinary creative within the creative economy. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation (portfolio and/or reel) of original work in digital media that resonates with intended audiences.

Course Requirements

15 credits in Digital Media, Animation or Game and Entertainment Design courses are required to complete this minor.
This can be 5 studio courses or 4 studio courses + 1 LAS course.

Students select courses based on guidance from the Director of Interdisciplinary Studies, Minor Area Heads and Academic Advisors and must follow prerequisites when applicable. For the full list of courses that will count for this minor, along with recommended courses to take first, see the Minors Course Lists on the Registration page of the Dashboard (my.otis.edu). Students are advised to take minor classes in place of studio electives (or in place of one LAS elective), or for majors without electives by taking one extra class in each of 5 semesters spread out between sophomore and senior year.

Elective Descriptions

INTR 330 - ST: Design Lab (3.00)
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

ANIM 211 - 3D Fundamentals (3.00)

Pre-requisites: ANIM 230

ANIM 215 - Storyboarding and Pre-viz (3.00)

Pre-requisites: ANIM 220

ANIM 250 - Animation Studio Project I (3.00)

ANIM 310 - 3D Rigging & Animation (3.00)
This hands-on course provides a comprehensive introduction to essential rigging techniques for 3D animation. Students will learn the technical processes required for 3D character animation, non-linear 3D animation, and procedural rigging setups. Key topics include joint systems, constraints, skinning, and FK/IK controls, enabling students to create functional rigs for a range of animation applications. The course emphasizes mechanical rigging for hard-surface models as well as organic character rigs. Through lectures, demonstrations, and hands-on projects, students will develop a strong understanding of rigging's role within production pipelines, equipping them to collaborate effectively with animators and modelers.

Pre-requisites: ANIM 230

ANIM 310 - Scriptwriting for Animation (3.00)

In "Scriptwriting for Animation" we will dive into the vibrant, detailed world of animation storytelling, crafting engaging scripts and bringing your animated characters and worlds to life. Through a mix of lectures, hands-on exercises, and collaborative projects, you'll explore the unique narrative techniques specific to animation, including character development, dialogue, and visual storytelling. There's a reason Homer J. Simpson is still on the air! Through collaborative projects and peer workshops, you'll gain hands-on experience as you learn to write for various formats. We'll analyze iconic animated works, from Disney to Seth MacFarlane, break down their scripts, and discuss the role of visual elements in enhancing stories. With a mix of playful exercises, insightful discussions, and industry insights, this course will empower you to turn your imaginative ideas into captivating animated narratives. Perfect for both seasoned writers and newcomers. Get ready to bring your stories to life in a lively, supportive environment.

Pre-requisites: ANIM 230

ANIM 310 - Character Design for Animation (3.00)

The purpose of the class is to introduce students to methodologies and styles for designing characters with appeal that are ready to animate. Assignments and critiques develop problem-solving, collaboration, creative visual interpretations that result in portfolio ready art/ illustrations of unique character designs for the purpose of animation.

Pre-requisites: ANIM 230

ANIM 310 - 2D Character Animation (3.00)

In this course, students will develop skills and techniques for creating 2D character animation. Students will learn in-depth character design, development, rigging, and animation techniques, used to create facial expressions and lip syncing.

Pre-requisites: ANIM 230

ANIM 310 - Pixels to Products (3.00)

Pixels to Products is an elective course for Animation students to transform digital designs into marketable products, including T-shirts, stickers, and more. Students will learn techniques for designing physical merchandise, building brand identity, and understanding eco-conscious production options like drop shipping, sourcing local and sustainable manufacturing. This course blends creative design with practical skills, preparing students to bring their digital art to a broader audience through merchandisable products.

Pre-requisites: ANIM 230

ANIM 332 - Advanced Animation (3.00)

Pre-requisites: ANIM 230

ANIM 350 - Animation Studio Project II (3.00)

Pre-requisites: ANIM 250

ANIM 490 - Digital Painting II (3.00)

This course will train you in the fundamentals of digital painting/design. Students will learn to use the tools and techniques of digital painting to produce artwork with applications to the fields of game design and animation such as animation backgrounds, textures for 3D animation, concept art, and illustration.

ANIM 490 - Advanced Storyboarding (3.00)

This course will cover the concepts of storyboarding for 2D television animation, visual storytelling, and basic filmmaking/ cinematography. Lecture topics will begin with reverse engineering thumbnails and move through assignments that simulate a variety of visual storytelling projects which commonly are seen in the industry. Basic professional practices for today's working storyboard artists will also be included.

MOTN 230 - Motion Design Fundamentals (3.00)

MOTN 490 - 3D Motion Graphic Cinema 4D II (3.00)

This course builds on foundational skills in Cinema 4D and introduces students to advanced concepts in 3D motion design. Emphasis will be placed on dynamic simulations, lighting and rendering. Through a series of projects, students will strengthen their ability to conceptualize and execute motion graphics that combine technical skill with strong design principles. By the end of the course, students will have developed portfolio-ready pieces that demonstrate mastery of advanced 3D animation techniques and industry-standard production practices.

Pre-requisites: MOTN 230

GAME 210 - Game Engine Fundamentals (3.00)

GAME 215 - Color and Lighting for Games (3.00)

GAME 250 - Game Studio Project I (3.00)

GAME 310 - Cinematic Visualization (3.00)

Learn the pipeline for pre-viz and post-viz work by an Otis alumni with years of visualization experience. Taking concepts, scripts, and storyboards to the next step by creating a comprehensive sequence that combines 3D animation in Maya, Visual Effects and Rendering in Unreal Engine 5, and compositional work in After Effects. You do not need to be a specialist as this course is customizable to focus on different elements of the pipeline to hone your skills and work together with the rest of your team. Eli graduated in 2021 and immediately started his career as a technical animator at Halon Entertainment, and worked his way into becoming a visualization artist for commercials, Triple AAA video games, and blockbuster movies. Credits include Fortnite, Planet of the Apes, A Minecraft Movie, Hunger Games, and more.

GAME 310 - Gesture Drawing (3.00)

Gesture Drawing emphasizes observational drawing from live models to develop strong posing skills for artists In animation, storyboard, illustration and fine arts tracks. In class lectures and demos will reinforce principles of animation. This course is designed to introduce and develop an understanding of life drawing that will serve as foundation for further studies in animation and entertainment arts. The class will focus on aspects of drawing that are used in the field of entertainment arts including but not limited to: Constructive Drawing based on gesture and form. Narrative or storytelling drawing and creating strong poses with emotion and impact. Observational drawing. Review of anatomical features. Thumbnail and quick sketch for quick concept sharing. Students will become familiar with successful artists relating to this field..

GAME 490 - Character Design for Game (3.00)

Conceptual designers for the game and animation industry must skillfully combine real world logic and design techniques to create unique and compelling environments, interiors, exteriors, props and vehicles for a variety of stories and historical eras. This requires a dynamic understanding of architecture, industrial design, structure and materials, as well as using illustration, design and modeling techniques to present cohesive architectural narratives,

imaginative environments and accurate planning. DESIGN CONCEPTS FOR GAMES is an introduction to the conceptual process of Environment Design and World Building for visual development for feature animation, video games and film. Students will create original design solutions for real world situations utilizing scale, accurate layout, location, structural realities and available materials to create believable environments. Students will create plan and elevation drawings and dimensional studies in support of their original conceptual structures. Students will obtain a solid understanding of how to create original environments utilizing traditional methods, available technology and 3D visualization techniques to create layouts. Over the course of the semester students will design their own unique functioning community as an asset to an Environment Design Portfolio.

GAME 310 - Animal + Creature Drawing (3.00)

This course teaches fundamental skills and techniques for creating realistic and imaginative animal and creature drawings. You will learn anatomy, structure, proportions, perspective, texture, and detail, which are essential for creating convincing and dynamic drawings. You will also develop your creativity and design skills by inventing your own unique creatures. Throughout the course, you will practice through a series of exercises and projects and receive feedback to refine your skills. By the end of the course, you will have a solid foundation in animal.

GAME 315 - Adv Game Creative w/ USC I (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

GAME 316 - Adv Game Creative w/ USC II (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 315

GAME 317 - Adv Game Creative w/ USC III (3.00)

This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

Pre-requisites: GAME 316

GAME 350 - Game Studio Project II (3.00)

Pre-requisites: GAME 250

GAME 360 - 3D for Game & Entertainment II (3.00)

Pre-requisites: GAME 260

AHCS 229 - Art History of Game Design (3.00)

GAME 310 - Introduction to Blender (3.00)

This course is designed for artists who wish to implement 3D software into their 2D pipeline. Prerequisites include a basic understanding of Photoshop and a familiarity with Blender or other 3D programs. Throughout this course, students will learn world-building techniques starting from 2D sketches to composition thumbnails, 3D sketching in Blender, intermediate to advanced Blender functions such as modeling, texturing, simple UV mapping, lighting techniques, cameras/composition, and render passes; finalizing with Photoshop with digitally painting and post-processing. Students will learn to incorporate these techniques into their artwork regardless of art style to create professional-grade digital paintings and learn fundamental workflows for any industry or pipeline.

GAME 310 - Anatomy for Entertnmnt Design (3.00)

This course is designed to guide students in mastering the art of bringing characters to life by deeply understanding the human figure from the inside out. Students will learn to visualize the structure of the body by studying gestures, skeletal frameworks, muscles, and forms, and translating them into dynamic figures. They will work with various basic shapes—such as cylinders, cubes, and blocks—to build figures with accurate proportions and motion. As they progress, students will focus on challenging aspects such as hands, feet, and the head in perspective, and learn techniques to stylize anatomy and create exaggerated poses for more dynamic storytelling in their designs. In addition to technical skill development, this course will explore how muscle movement, body types, and aging impact character design. A diverse range of body types, genders, and ages will be examined to ensure students can create authentic, relatable characters. The course will also delve into light logic, hair studies, and value rendering to give students a holistic approach to figure drawing and visual storytelling. Ultimately, students will develop their skills to creatively connect anatomical accuracy with expressive, narrative-driven character designs in the context of entertainment.

GAME 332 - VFX for Games (3.00)

Pre-requisites: GAME 220

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

MOTN 325 - Motion Design Explorations (3.00)

MOTN 310 - MOTN: Pro Studio Practices (3.00)

In this class students will be immersed in the environment of a professional motion design studio. Begging with concept development including creating storyboards, the class will break down the project into production phases and develop a plan how to produce the project as a motion design team. The class will then focus on the last phase of the production pipeline of finishing, rendering and delivering the final motion design assets. Emphasis will be on learning professional studio practices including: file hierarchy,

GAME 445 - Technical Game Arts (3.00)

Pre-requisites: GAME 360

GAME 445 - Technical Game Arts (3.00)

Pre-requisites: GAME 360

GAME 445 - Technical Game Arts (3.00)

Pre-requisites: GAME 360

ENTREPRENEURSHIP MINOR

Our Mission:

Students who minor in Entrepreneurship will dive deep into the world of start-ups, small businesses, and solo-preneurship within the Creative Economy. This minor will prepare students to enrich our world by forming their own studio, office, firm or organization, develop their work (products and services), and market themselves for visibility, recognition, and success.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Entrepreneurship Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Entrepenuership Minor Students Will:

Grow

Entrepreneurship Minor student work will demonstrate: Disciplinary Knowledge and Skills • Proficiency in Industry-Standard Skills, Technologies, and Processes • Cross-Disciplinary Awareness and Practice Audience-Focused Research, Historical Context, and Field-Specific Discourse • Capacity to Identify and Solve Creative ProblemsCapacity to identify and solve problems, identify and understand target audiences, evaluate market competition, calculate expenses and profit / loss forecasts, and make sound business decisions that support creative and entrepreneurial practices.

Dare

Entrepreneurship Minor student work will demonstrate: Innovation • Experimentation and Play • Bravery in their Work and their Interactions with OthersDeveloped entrepreneurial concepts, pursuits and exercises that shape the future creative economy and, where appropriate, challenge the status quo in ideation, leadership, methodology or specific business practices.

Reflect

Entrepreneurship Minor student work will demonstrate: Self-Awareness • Capacity to Communicate (Orally, Written, and/or Visually) about their Practice • Capacity to Seek, Assemble, Evaluate, and Ethically Apply Information and Ideas from Diverse SourcesAbility to clearly articulate one's entrepreneurial pursuits in ways that are compelling and convincing, supported by research and data. Analysis of Both Ethical and Aesthetic Impacts of Art and DesignDemonstrate an awareness of the legal, social, ethical and environmental impacts of various art and design business models and practices.

Connect

Entrepreneurship Minor student work will demonstrate: Ability to Work Well, Collaborate, and Build Relationships across Differences in Identity, Perspective, Aesthetics and DisciplinesAbility to leverage each collaborators' distinct strengths in support of shared vision and goals, and/or cross-promotion and support of each other's creative businesses. Awareness of Positionality – in the World, their Field, their Communities. • Integration of Skills and Concepts:Successful integration of skills, information and concepts between their majors and the Entrepreneurship minor, while understanding and articulating their position in their chosen fields.

Shine

Entrepreneurship Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as a creative business person, whether in their own endeavors or in service of an employer. Awareness of audience and ability to cultivate relationships with others in their chosen fields. • Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Develop, pitch and launch a viable creative business that garners interest and support through cultivated relationships with potential collaborators, funders, clients, and customers. Proficiency in budgeting, time and project management. • Career readiness.Proficiencies in budgeting, time management, project ideation and management, constructive critique, personal initiative, leadership skills and an awareness of areas for growth.

Course Requirements

The following five courses are required to complete the Entrepreneurship minor, replacing both LAS and studio electives.

Course Descriptions

ENTR 301 - Intro to Entrepreneurship (3.00)

How can you turn your hard-earned art and design school education into a career? How can what you've learned and what you create be monetized to create a meaningful and sustainable life's work? This course introduces you to Entrepreneurship and the basics of creating and operating a business. You will learn concepts of visioning, planning and budgeting, fundraising, marketing, promotion and leadership, both in theory and in practice. You will be exposed to the legal and business underpinnings of operating any sort of enterprise, learn how to protect their art and their integrity, and discuss concepts of ethics within the context of the marketplace. In addition, the course will cover the tricks and techniques of pitching a project, as well as the necessary ingredients of a successful business plan. Guest speakers who have launched their own businesses (representing a wide range of art and design disciplines) will present best practices. Required for Entrepreneurship minors. Open to all others as a studio elective.

LIBS 317 - Social Entrepreneurship (3.00)

What role do non-profit entities play in the art world and beyond? What is social entrepreneurship? How do the goals of non-profit arts concerns differ from their for-profit counterparts? This course will examine the current climate for non-profit arts organizations generally and start-ups, in particular, especially those involved in public service, charity work, education, and social justice. Students will research and debate various issues while considering how these may affect their future endeavors. In addition, students will work in groups on a self-generated, unique social entrepreneurship project, where they are encouraged to address social, environmental, and/or cultural issues that interest and motivate them. Students will gain insight into the realities of managing a non-profit arts enterprise by participating in the simulated launch and management of the business concept they designed. Required for Entrepreneurship minors. Open as an elective for all other majors and minors

LIBS 318 - Business Communication (3.00)

What do you need when you have a product or idea for a business and you have an upcoming meeting with a potential angel investor or other funder? How do you present a proposal and tell the story of your brand, product or idea? How do you use the world of social media to enhance your business? How will you use words, pictures, video and other media to best pitch yourself and your business? Learn to hone your business communication tools for your enterprise or business in this course. Through case studies and critiques, you will learn the art of naming and creating taglines. You will do market research, write a product positioning and a brand story. By semester's end, you will present your business proposal as a pecha kucha. Required for Entrepreneurship minors. Prerequisites: ENTR 301 - Intro to Entrepreneurship and MATH 137 - Mathematics of a Startup. Co-requisite: ENTR401 Launchpad.

ENTR 401 - Launchpad (3.00)

The time has come to employ what you've learned about Entrepreneurship and about yourselves as part of the Entrepreneurship Minor, through your major and all your other classes. What do you want to do and make professionally, and how can you monetize it to create a satisfying, challenging and sustainable career? Functioning as an Incubator this class provides you with the opportunity to define and develop the creative business you want to launch after graduation. In tandem with the Business Writing course, you'll focus on Strategic Planning, Business Plan writing, Marketing and Project Management, Business Loan and Venture Capital processes. You'll also receive expert advice from successful, creative entrepreneurs across a range of disciplines through one-on-one mentor meetings. You will be required to create real world, as well as more "academic," deliverables, and accurately chart out the beginnings of an actual business that will launch your career as a creative entrepreneur. Required for Entrepreneurship minors. Pre-requisite: Prerequisites: ENTR 301 - Intro to Entrepreneurship and MATH 137 - Mathematics of a Startup. Co-requisite: LIBS318 - Business Communication.

MATH 137 - Mathematics of a Startup (3.00)

This is primarily a project-based course - students will apply principles they learn in order to create their own business model or analyze a start-up venture and present their assessment to the class. One tool that will be used to provide the scaffolding for these exercises and group projects is The Business Model Generation Canvas. This is a widely used text by innovators and entrepreneurs globally, and maps out the different stages of a business life cycle: planning, raising capital, evaluation, restructuring, testing innovative ideas, mergers and acquisitions, and development. Students will study the building blocks of a business, analyze financial statements, and discuss their mathematical components. Required for Entrepreneurship minors. Open as an elective for all other majors and minors.

Electives

Course Title	Course Number	Credits
ST: Design Lab	INTR 330	3.00
Story of Brand	LIBS 314	3.00

Elective Descriptions

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

LIBS 314 - Story of Brand (3.00)

How is storytelling used to brand a product and how do brands tell stories through multiple platforms? How are Covid 19, #MeToo, Black Lives Matter, Climate Change, and the 2020 Presidential Election changing us and our stories? And how do these stories influence society, branding, and the narratives we tell of ourselves? This junior online elective will explore branding through the lens of history, mythology, psychology, and current events. We'll examine how popular brands have changed societies and how they do it. We'll investigate how narrative is intimately connected to our cognition of ourselves and our world and how it influences the way we evolve. Specifically, we will probe how it alters artists, designers, marketers, and storytellers in our newly configured world. By the end of the semester, students will use one of their own designs or an existing product to create a unified brand message that can live in multiple platforms.

*These courses must be taken as co-requisites.

FINE ARTS: PAINTING MINOR

Our Mission:

The Painting minor provides students the opportunity to explore the technical, formal, historical and theoretical approaches to painting in a fine arts context. Explorations in oil, acrylic and mixed media as well as analysis of contemporary practices lead to students developing personal strategies in painting.

Participating Departments:

Painting minors will only participate in the Annual Exhibition of their home department, however depending on space availability they may utilize Fine Arts Senior Studios on a case-by-case basis with approval from the Department Chair.

Program Learning Outcomes

Otis College Interdisciplinary Studies: Painting Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Painting Minor Students Will:

Grow

Painting Minor student work will demonstrate: Disciplinary knowledge and skills • Audience-focused research, historical context, and field-specific discourse • Proficiency in industry-standard skills, technologies, and processesProficient knowledge and skills in historical, technical, formal, and conceptual approaches to painting (from representation to abstraction), including preparing canvases, mixing and applying colors, considerations of scale and composition, and the use of a variety of wet and dry media. Cross-disciplinary awareness and practice Developed practice grounded in two or more disciplines. Capacity to identify and solve creative problemsAbility to define issues and to use their artistic skills to give those issues a form that others can engage and interact with.

Dare

Painting Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersCapacity to combine aspects of painting with work in one's major and/or push the boundaries between each field.

Reflect

Painting Minor student work will demonstrate: Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between their work in painting and their major and how these studies will help them achieve personal and professional goals. Analysis of both ethical and aesthetic impacts of art and designAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture, and the environment.

Connect

Painting Minor student work will demonstrate: Awareness of positionality – in the world, their field, their communities. • Integration of skills and concepts:Successful integration of skills, information and concepts between their majors and Painting minor, while understanding and articulating their positionality in their chosen fields.

Shine

Painting Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as an interdisciplinary creative within the creative economy. Awareness of audience • Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of original work in painting, with or without other media, that resonates with intended audiences.

Course Requirements

15 credits in Painting related courses are required to complete this minor. This can be 5 studio courses or 4 studio courses + 1 LAS course.

This can be 5 studio courses or 4 studio courses + 1 LAS course.

Students select courses based on guidance from the Director of Interdisciplinary Studies, Minor Area Heads and Academic Advisors and must follow prerequisites when applicable. For the full list of courses that will count for this minor, along with recommended courses to take first, see the Minors Course Lists on the Registration page of the Dashboard (my.otis.edu). Students are advised to take minor classes in place of studio electives (or in place of one LAS elective), or for majors without electives by taking one extra class in each of 5 semesters spread out between sophomore and senior year.

Elective Descriptions

PNTG 214 - Painting II (3.00)

PNTG 306 - Painting Genres: Storytelling (3.00)

This interdisciplinary course explores storytelling through images, objects and other media. Content may be, but is certainly not limited to, identities, cultural affinities, formative experiences, personal histories, personal fictions, history, and other interests. While the emphasis of this course is studio practice and developing technique, critiques will be complemented by discussions on history painting, cultural hybridity, post colonial discourse, and storytelling. We will read and discuss short texts by various novelists, theorists, poets, as well as looking at works by artists engaged in making work about complex narratives.

PNTG 306 - Distinguished Visiting Artist (3.00)

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

LIBS 238 - Sophomore Seminar II (3.00)

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

DRWG 204 - Intro to Experimental Drawing (3.00)

This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

FINA 406 - Advanced Critique (3.00)

Through sustained critical dialogue, this course gives advanced students a unique opportunity to assess how their work and that of their peers is (or is not) relevant to current conditions in contemporary art and culture. Unlike beginning and intermediate course work, the sustained critiques in this course are not focused on how works conform to faculty designed assignments but rather on how the student's self-directed approach has the potential to find an audience.

FINA 415 - Adv. Sem: All About Love (3.00)

Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. We will learn alongside theorists in somatics, performance studies, feminist studies, queer and trans studies, and Indigenous and Black studies to guide our foray into the inter-personal, political, performative, and transformative aspects of love as they shape our relationships to one another and to our creative practices. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

FINA 420 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

FINE ARTS: PHOTOGRAPHY MINOR

Our Mission:

The Photography minor provides students the opportunity to explore the technical, formal, historical, theoretical, and ethical concerns of fine art, commercial, and editorial photography. A variety of traditional, experimental, darkroom and digital approaches are explored as students develop their individual representational languages.

Participating Departments:

Photography minors will only participate in the Annual Exhibition of their home department, however, depending on space availability, they may utilize Fine Arts Senior Studios on a case-by-case basis with approval from the Department Chair.

Program Learning Outcomes

Otis College Interdisciplinary Studies: Photography Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Photography Minor Students Will:

Grow

Photography Minor student work will demonstrate: Disciplinary knowledge and skills • Audience-focused research, historical context, and field-specific discourse • Proficiency in industry-standard skills, technologies, and processesProficient knowledge and skills in the historical, technical, formal, and conceptual approaches to photography and lens based media (fine art, editorial, commercial, moving images, etc.), including using an SLR camera, considerations of lighting and composition, and printing with analog and digital processes. Cross-disciplinary awareness and practice Developed practice grounded in two or more disciplines. Capacity to identify and solve creative problemsAbility to define issues and to use their artistic skills to give those issues a form that others can engage and interact with.

Dare

Photography Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersCapacity to combine aspects of photography with work in one's major and/or push the boundaries between each field.

Reflect

LIBS 238 - Sophomore Seminar II (3.00)

PHOT 214 - Photography II (3.00)

PHOT 230 - Lighting Studio I (3.00)

PHOT 335 - Phot Genres: Steal This Class (3.00)

What is appropriation, and what are its rules? Who is permitted to borrow from whom? At what point does imitation become theft, and reuse into ripping-off? Is the "taking" of a photograph ever not an apprehension of something else? Is there even such a thing as an original? In this class, we will search out society's rules in order to break them. Students will investigate the long legacies of appropriation, citation, parody, and pastiche within photography and fine art, and find new frontiers of possibility. We will embezzle each other, ourselves, and our favorite photographic forebears. We will consider how context and gesture have the unique power to "move us to tears." Students will be expected to produce and share presentations on relevant artists, generate their own work in response to thematic assignments, and contribute to group discussions.

PHOT 335 - Phot Genres:Personal Histories (3.00)

Since Photography's inception, "The Portrait" has been used as a vehicle for representation. In this course, students will explore themes of personal histories as it relates to portraiture. Through a series of readings, film screenings, technical lighting demos, gallery visits, guest lectures and critiques students will develop a body of work that investigates themes related to their topic of choice. Experimentation and research will be critical to the student's success as they work through approximately 4 shooting assignments and a final project. Students will engage in discussions and develop critical inquiries surveying a wide range of topics that are contextualized by photo history such as representations of the body, utilizing the archive, voyeurism and the rise in selfie culture. The class will culminate with a week-long exhibition at The Fulcrum Press gallery in Chinatown.

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. FINA 420 - Fine Arts Internship (3.00)

This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

SCNG 309 - SCNG: Experimental Film (3.00)

In this introductory filmmaking class, we will consider expansive ways to think about personal, non-narrative, and independent film practices through investigations of the moving image's essential components: light, movement, and time. We will examine examples from around the world and throughout cinema history to explore what constitutes "experimental" film and how this form challenges conventional cinematic language. Particular attention will be given to artists and filmmakers historically excluded from the dominant canon, especially women, queer artists, and filmmakers of color, whose work expands and complicates the boundaries of experimental practice. Drawing inspiration from class discussions, assigned readings, and weekly creative exercises, students will create two short films one using analog Super 8 film and one using digital technologies. Emphasis will be placed on hands-on experimentation, in-camera editing, sound-image relationships, and alternative approaches to structure, rhythm, and visual expression. Students will be encouraged to challenge typical cinematic conventions and engage deeply with both material, form and process. Alongside production, students will practice skills in critical viewing, analysis, and constructive critique to support a collaborative learning environment supporting vulnerability, openness,

and individual expression. This course is designed to nurture personal vision while situating experimental filmmaking within the evolving landscape of contemporary visual culture and aesthetics.

FINE ARTS: SCULPTURES/ NEW GENRES MINOR

Our Mission:

The Sculpture/New Genres minor provides students the opportunity to explore the technical, formal, historical, and theoretical concerns of creating meaningful objects, installations and time-based art (including video, sound and performance). Students will explore a range of techniques and methods while developing individual artistic practices in three and four dimensions.

Participating Departments:

Program Learning Outcomes

Elective Descriptions

SCNG 214 - Sculpture/New Genres II (3.00)

SCNG 236 - Ceramics (3.00)

SCNG 237 - Advanced Ceramics (3.00)
This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality -- its mystical plasticity -- with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff.

SCNG 306 - Adv Tec: Into the Fold: Fabric (3.00)
Historically and pre-historically fabric(s) have been used as protection, coded language, resistance, structure, identity, style, communication, play, community building, camouflage, and more. Through skill building in context, students will grow confident in their ability to engage techniques, be supported to expand upon them, to develop a way of working within their own practice(s). This course will include hand and machine sewing, pattern-making based in but going beyond methodologies of garment construction, felting, weaving, dying, hand, machine and digital embellishment/adornment (embroidery, beading, couching), three dimensional "soft sculpture" and stretching/draping on an armature. Knitting, knot-work, macramé and crochet subject to interest. This course will move towards an interdisciplinary integration of digital and analog media. Maximizing the facilities, labs and equipment at Otis, students will grow comfortable using Adobe Creative Cloud software (Photoshop and Illustrator) and understand how these are set up to work with vector based output machines, for "fabric-informed" projects. Working with fabric as a pliable structure, surface and conceptual framework, we explore its construction, historical and cultural contexts (including with/by the more-than-human) to develop and expand upon skills to make projects possible within fields of sculpture, installation (including video, sound, multi-sensory work), performance, painting and drawing.

FINA 415 - Adv. Sem: All About Love (3.00)
Given our current, increasingly polarized, socio-political landscape, a course "All About Love" seems timely and a promising starting point to foster connection across differences. "Love conquers all," as the saying goes. If this were true, why do we often find ourselves troubled by love? What is love? We use this word ubiquitously but what do we mean when we say we love something or someone? And more importantly, what can love do? In this advanced seminar course, we will delve into a curio-critical engagement with love as a foundational concept, a material-discursive practice, an analytic, and a drive. Love names a feeling, a desire, a relationship with someone or something, but it can also be a way of analyzing the world, because love, ultimately, tells us about power—and what matters most to us. Beginning with the family—where we learn how to give and receive love—we will journey with/in various forms of love from self-love to friendships and romance to love of community, place, life, and our love of art. This seminar will include readings, in-depth discussions on the readings and selected artists, and student projects all about love.

FINA 406 - Advanced Critique (3.00)
Through sustained critical dialogue, this course gives advanced students a unique opportunity to assess how their work and that of their peers is (or is not) relevant to current conditions in contemporary art and culture. Unlike beginning and intermediate course work, the sustained critiques in this course are not focused on how works conform to faculty designed assignments but rather on how the student's self-directed approach has the potential to find an audience.

INTR 330 - Interdisciplinary Practices (3.00)
This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

INTR 330 - ST: Design Lab (3.00)
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

LIBS 314 - MFK Malawi: Professional Pract (3.00)
Made for Kids Malawi: Professional Practice is an interdisciplinary, project-based course designed to prepare students for cross-cultural, socially engaged, and technically complex international fieldwork and design ideation experience. In this advanced collaboration, Otis College students partner with their research and design peers from the EK School of Business in Copenhagen, who specialize in Sustainable Digital Concept Development, as well as Jacaranda graduates who will conduct all of the on-site research the two virtual teams need to analyze larger systems within the Jacaranda School educational complex and outreach programs. Through comparative cultural study, applied design research, software testing, and platform exploration, students have an opportunity to develop their professional collaboration skills as they translate creative ideas into real-world outcomes. By the end of the course, students will have produced a body of work demonstrating global citizenship, interdisciplinary collaboration, and professional readiness. Note: Some students may have the opportunity to travel to Malawi to work with EK students on-site in project implementation teams.

LIBS 238 - Sophomore Seminar II (3.00)

GRAPHIC DESIGN MINOR

Our Mission:

The Graphic Design minor familiarizes students with graphic design principles, skills, professional practices and historical and theoretical understanding of the field. Students participate in critically engaged studio classes to develop their own viewpoint and practice, while creating books, posters, websites, campaigns, identities, and conceptual propositions using the considered interplay of text and image. A dynamic curriculum empowers students to creatively solve problems, propose alternatives, and work collaboratively to address the communication challenges of today.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Graphic Design Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Graphic Design Minor Students Will:

Grow

Graphic Design Minor student work will demonstrate: Disciplinary Knowledge and Skills • Audience-Focused Research, Historical Context, and Field-Specific DiscourseProficient knowledge and skills in graphic design including design historical precedents, visual design principles and effective use of typography, composition, hierarchy, color theory, storytelling techniques, and semiotic concepts to create compelling visual communication that responds to specific design problems and audiences. Proficiency in Industry-Standard Skills, Technologies, and ProcessesThe ability to create professional-level design projects using current industry software and hardware tools, successfully execute production workflows across both physical and digital media, and demonstrate adaptability by mastering emerging technologies as they're introduced to the field. Cross-Disciplinary Awareness and PracticeDeveloped practice grounded in two or more disciplines.

Dare

Graphic Design Minor student work will demonstrate: Innovation • Experimentation and Play • Challenge to the Status Quo • Bravery in their Work and their Interactions with OthersCapacity to combine aspects of Graphic Design with work in one's major and/or push the boundaries between each field.

Reflect

Graphic Design Minor student work will demonstrate: Capacity to Communicate (Orally, Written, and/or Visually) about their PracticeAbility to clearly articulate the relationship between their work in Graphic Design and their major and how these studies will help them achieve personal and professional goals. Analysis of Both Ethical and Aesthetic Impacts of Art and DesignAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture and the environment.

Connect

Graphic Design Minor student work will demonstrate: Awareness of Positionality – in the World, their Field, their Communities. • Integration of Skills and Concepts:Successful integration of skills, information and concepts between their majors and Graphic Design minor, while understanding and articulating their positionality in their chosen fields.

Shine

Graphic Design Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as an interdisciplinary creative within the creative economy. Awareness of audience • Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of original work in Graphic Design that resonates with intended audiences.

Course Requirements

Graphic Design Minor Required Courses: 15 credits of Graphic Design courses

This can be 5 studio courses or 4 studio courses + 1 LAS course.

Students select courses based on guidance from the Director of Interdisciplinary Studies, Minor Area Heads and Academic Advisors and must follow prerequisites when applicable. For the full list of courses that will count for this minor, along with recommended courses to take first, see the Minors Course Lists on the Registration page of the Dashboard (my.otis.edu). Students are advised to take minor classes in place of studio electives (or in place of one LAS elective), or for majors without electives by taking one extra class in each of 5 semesters spread out between sophomore and senior year.

Electives

Course Title	Course Number	Credits
ST: Design Lab	INTR 330	3.00
Graphic Design II	GDES 201	3.00
Typography II	GDES 221	3.00
Graphic Design IV	GDES 301	3.00

Hybrid Letterpress	PRNT 375	3.00
Interdisciplinary Practices	INTR 330	3.00
Printmaking Workshop	GDIL 499	3.00

Elective Descriptions

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

GDES 201 - Graphic Design II (3.00)

GDES 221 - Typography II (3.00)

GDES 301 - Graphic Design IV (3.00)

Pre-requisites: GDES 300

GDES 321 - Typography IV (3.00)

Pre-requisites: GDES 320

GDES 458 - Advanced Imagemaking (3.00)

This class will be an exploration into practicing, contextualizing, and reflecting on image-making processes that you are already familiar with, as well as discovering new ways of making. We will connect reading to making, ideas to making, research to making, and language to making through weekly exercises. The goal is for you to understand and articulate processes that can become tools for making and investigating your subject matter in a critical way. Open to juniors, seniors and graduate students only.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

AHCS 222 - Graphic Design/ Illus History (3.00)

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

GDIL 499 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

ILLUSTRATION MINOR

Our Mission:

The Illustration minor prepares students to enter a world where boundaries between artistic disciplines are constantly changing and art is activated in the service of multiple audiences, in diverse venues and across existing and emerging markets. This minor provides a curriculum emphasizing strong concepts, proficient skills, and civic mindedness to support the communication needs of a variety of contexts, including client-led publications, merchandise, and self-directed exhibitions. A balance of conceptual, historical, and technical instruction helps students locate their own style, voice, and conceptual foothold to meet the rich opportunities afforded by today's shifting creative landscape.

Participating Departments:

Program Learning Outcomes

Elective Descriptions

ILUS 201 - Illustration II (3.00)

ILUS 301 - Illustration IV (3.00)

Pre-requisites: ILUS 300

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

ILUS 201 - Illustration II (3.00)

ILUS 213 - Drawing and Painting II (3.00)

ILUS 301 - Illustration IV (3.00)

Pre-requisites: ILUS 300

ILUS 313 - Drawing and Painting IV (3.00)

Pre-requisites: ILUS 312

ILUS 358 - ST: Scientific Illustration (3.00)

Scientific Illustration will introduce students to scientific illustration as it could be used to educate, preserve, advertise, etc for various types of California farms. These could include food farms (vegetable, animal, orchards, vineyards, olive, date), non food farms (biofuels, building- hemp, bamboo, flax, and pharmaceuticals), using traditional farming methods or non-traditional such as hydroponics or aquaculture. Projects will be based on one chosen farm and include taxonomy of a farmed species, diagrams of the species and informational illustrations of farmed species.

ILUS 358 - ST: Watercolor Illustration (3.00)

Students are introduced to traditional and contemporary watercolor approaches and concepts, with emphasis on its formal language and the fundamentals of artistic expression using this medium. It helps prepare students for the field of illustration. Students will be using watercolors to paint from observation as well as from imagination in conjunction with reference materials and various other painting and mixed media methods.

ILUS 358 - ST: Digital Paths (3.00)

Digital paths is a basic introduction to computer graphics and video editing software, such as Adobe Photoshop/Illustrator/After Effects/Media Encoder and Procreate in iPad. Students do not need relevant experience to enroll in this course, but the final assignments are presented in digital media. Through classroom demonstration and video watching, students will be able to make one motion graphic animation, and one experimental film.

ILUS 358 - ST: Narrative Illustration (3.00)

Students will create illustrations that convey moments in a story or script. They will use existing or personal ideas to illustrate these scenes while learning from film compositions, scripts, books, and other works to help communicate the narrative. Students should have a Tablet or Drawing Tablet that can attach to a laptop or computer, styles pen to use with Photoshop.

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

AHCS 222 - Graphic Design/ Illus History (3.00)

ILUS 358 - ST: Energetic Editorial Exp. (3.00)

This class explores the dynamic blend of illustration and animation, teaching students how to create animated editorial illustrations for digital platforms such as online portfolios, news websites, and streaming services. Students will develop practical skills in bringing illustrations to life with movement and storytelling.. No prior experience is required.

ILUS 358 - ST: Painting For Illustrators (3.00)

This course is designed for illustrators at all levels interested in painting.Through a series of projects students will learn to paint on different substrates as well as various techniques. Students will develop skills in rendering, conceptual and representational painting using photo references and observation. Assignments are based on typical areas of concentration found in the field of illustration including conceptual, narrative, editorial, and exhibition.

GDIL 456 - Bookmaking Projects (3.00)

This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 499 - Printmaking Workshop (3.00)

In this graduate level elective, students will interrogate their design practice through the lens of printmaking. The course will be structured around technical demonstrations in the printmaking and letterpress lab with an emphasis on experimentation and tactility. Project parameters are largely open-ended, with the expectation that students will work independently to conceptualize and execute their projects using varied printmaking techniques. The course time will be split between the 6th floor, Lab Press, and the Printmaking Lab.

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

PRNT 375 - Hybrid Letterpress (3.00)

Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing,plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects.

ILUS 470 - Internship for Illustrators (3.00)

MOTION DESIGN MINOR

Our Mission:

The Motion Design minor will provide students the opportunity to combine graphic design principles with animation techniques to create visually compelling and dynamic graphics for a wide range of applications, such as television, film, advertising, and social media. Students in this minor will develop a unique and valuable skill set that can enhance their career prospects in the rapidly evolving digital media landscape.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Motion Design Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Motion Design Minor Students Will:

Grow

Motion Design Minor student work will demonstrate: Disciplinary Knowledge and Skills Proficient knowledge and skills in motion design including effective use of visual design principles, typography, color theory, and animation techniques. Proficiency in Industry-Standard Skills, Technologies, and ProcessesProficiencies in utilizing current industry-standard tools and emerging technologies (eg. Adobe After Effects, Blender, Cinema 4D, etc.). Cross-Disciplinary Awareness and Practice • Audience-Focused Research, Historical Context, and Field-Specific DiscourseDeveloped practice grounded in two or more disciplines, understanding how Motion Design contributes to art, film, television, animation, games, advertising and social media for a variety of audiences.

Dare

Motion Design Minor student work will demonstrate: Innovation • Experimentation and Play • Challenge to the Status Quo • Bravery in their Work and their Interactions with OthersCapacity to combine aspects of motion design with work in one's major and/or push the boundaries between each field.

Reflect

Motion Design Minor student work will demonstrate: Capacity to Communicate (Orally, Written, and/or Visually) about their PracticeAbility to clearly articulate the relationship between their work in motion design and their major and how these studies will help them achieve personal and professional goals. Analysis of Both Ethical and Aesthetic Impacts of Art and DesignAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture, and the environment.

Connect

Motion Design Minor student work will demonstrate: Ability to Work Well, Collaborate, and Build Relationships across Differences in Identity, Perspective, Aesthetics and DisciplinesThrough group projects and interdisciplinary collaborations, students will learn to work effectively with peers from diverse backgrounds and fields, valuing and incorporating different perspectives into cohesive collaborations. Awareness of Positionality – in the World, their Field, their Communities. • Integration of Skills and Concepts:Successful integration of skills, information and concepts between their majors and Motion Design minor, while understanding and articulating their positionality in their chosen fields.

Shine

Motion Design Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as an interdisciplinary creative within the creative economy. Awareness of audience and ability to cultivate relationships with others in their chosen fields. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of a reel demonstrating original work in motion design that resonates with intended audiences.

Course Descriptions

TYPG 299 - Typography Elective (3.00)

Choose from: GDES/220 Typography I GDES/221 Typography II GDES/320 Typography III TGDES/321 Typography IV GDES312 Experimental Typography GDES312 Experimental Type in Motion GDES/315 Experimental Typography For The Web ILUS220 Type for Illustrators

MOTN 230 - Motion Design Fundamentals (3.00)

An introduction to basic design and motion design principles and techniques. The pre-requisite for Motion Design Fundamentals (Storytelling for Digital Artists) will be waived for Motion Design minors

MOTN 330 - Motion Design I (3.00)

This course gives students a comprehensive overview of the motion graphic production process using industry standard applications. Emphasis will be placed on the fundamental concepts of digital media, motion design, editing techniques and art direction.

MOTN 325 - Motion Design Explorations (3.00)

This course guides students through the full process of creating a comprehensive identity rebrand campaign for an existing product. Through research, concept development, design production, and professional-style pitch sessions, students will learn how to translate strategic insights into a polished, portfolio-ready campaign. Learning objectives: • Conduct in-depth research and competitive analysis within the industry • Identify core brand challenges and interpret a creative brief • Develop a distinctive, concept-driven identity rebrand • Produce visual assets that demonstrate strong design craft and cohesive brand systems • Present and defend creative decisions in a professional pitch environment • Assemble a refined, portfolio-ready identity rebrand campaign

MOTN 299 - Motion Design Electives (3.00)

A limited choice of LAS and Studio courses will count as Motion Design Minor Electives, as determined each semester by the Interdisciplinary Studies Director, Animation Chair, Game and Entertainment Design Chair and Graphic Design / Illustration Chair. Examples include: AHCS222 History of Graphic Design and Illustration, various courses in typography, social media, motion design, UX/UI and video editing.

Elective Descriptions

MOTN 310 - MOTN: Pro Studio Practices (3.00)

In this class students will be immersed in the environment of a professional motion design studio. Begging with concept development including creating storyboards, the class will break down the project into production phases and develop a plan how to produce the project as a motion design team. The class will then focus on the last phase of the production pipeline of finishing, rendering and delivering the final motion design assets. Emphasis will be on learning professional studio practices including: file hierarchy,

MOTN 490 - 3D Motion Graphic Cinema 4D II (3.00)

This course builds on foundational skills in Cinema 4D and introduces students to advanced concepts in 3D motion design. Emphasis will be placed on dynamic simulations, lighting and rendering. Through a series of projects, students will strengthen their ability to conceptualize and execute motion graphics that combine technical skill with strong design principles. By the end of the course, students will have developed portfolio-ready pieces that demonstrate mastery of advanced 3D animation techniques and industry-standard production practices.

Pre-requisites: MOTN 230

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

GDES 221 - Typography II (3.00)

GDIL 334 - Making with AI Generators (3.00)

This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors and seniors students only.

Pre-requisites: GDES 320

*A limited choice of LAS and Studio courses will count as Motion Design Minor Electives, as determined each semester by the Interdisciplinary Studies Director, Animation Chair, Game and Entertainment Design Chair and Graphic Design / Illustration Chair. Examples include: AHCS222 History of Graphic Design and Illustration, various courses in typography, social media, motion design, and video editing.

**The pre-requisite for Motion Design Fundamentals (Storytelling for Digital Artists) will be waived for Motion Design minors.

See Animation, Game and Entertainment Design, Graphic Design, Illustration and Liberal Arts and Sciences for course descriptions.

PRODUCT DESIGN MINOR

Our Mission:

The Product Design minor offers students the opportunity to develop basic skills utilized in a variety of consumer product related industries through studio courses in Visual Communication, Digital Design, prototype and model making techniques related to industry applications. Communication of these creative concepts through thoughtful execution of projects displays student abilities in an organized body of work.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Product Design Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Product Design Minor Students:

Grow

Product Design Minor student work will demonstrate: Disciplinary knowledge and skills • Audience-focused research, historical context, and field-specific discourseProficient knowledge and skills in product design including research, historical influences, aesthetics, materials, ergonomics, user experience design, marketing and manufacturing processes. Proficiency in industry-standard skills, technologies, and processesProficiency in industry-standard software, tools, and processes including CAD software, 3D printing, and prototyping, to develop functional, market-ready, and appropriate products that meet user needs and also industry standards. Cross-disciplinary awareness and practice Developed practice grounded in two or more disciplines. Capacity to identify and solve creative problems Ability to navigate complex design challenges with innovation and creativity, delivering well-researched, user-centered solutions that move from initial ideation to final, manufacturable products.

Dare

Product Design Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo • Bravery in their work and their interactions with othersCapacity to combine aspects of product design with work in one's major and/or push the boundaries between each field.

Reflect

Product Design Minor student work will demonstrate: Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between their work in product design and their major and how these studies will help them achieve personal and professional goals. Analysis of both ethical and aesthetic impacts of art and designAnalysis of the ethical and aesthetic impacts their work has on their fields of study as well as society, culture, and the environment.

Connect

Product Design Minor student work will demonstrate: Awareness of positionality – in the world, their field, their communities. • Integration of skills and concepts:Successful integration of skills, information and concepts between their majors and Product Design minor, while understanding and articulating their positionality in their chosen fields.

Shine

Product Design Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role as an interdisciplinary creative within the creative economy. Awareness of audience and ability to cultivate relationships with others in their chosen fields. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion and presentation of original product designs that are technically and economically feasible and strategically positioned for real-world impact, enhancing user experience and market viability.

Course Requirements

15 credits in Product Design and related courses are required to complete this minor.This can be 5 studio courses or 4 studio courses + 1 LAS course.

Students select courses based on guidance from the Director of Interdisciplinary Studies, Minor Area Heads and Academic Advisors and must follow prerequisites when applicable. For the full list of courses that will count for this minor, along with recommended courses to take first, see the Minors Course Lists on the Registration page of the Dashboard (my.otis.edu). Students are advised to take minor classes in place of studio electives (or in place of one LAS elective), or for majors without electives by taking one extra class in each of 5 semesters spread out between sophomore and senior year.

Elective Descriptions

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

PRDS 203 - Design Studio II (3.00)

PRDS 211 - Design Communication II (3.00)

Pre-requisites: PRDS 210

PRDS 231 - Methods & Materials II (3.00)

PRDS 302 - Design Studio III (3.00)

PRDS 303 - Design Studio IV (3.00)

Pre-requisites: PRDS 210 PRDS 203

PRDS 311 - Design Communication IV (3.00)

Pre-requisites: PRDS 310

PRDS 362 - Beginning Ceramics (3.00)

PRDS 363 - Intermediate Ceramics (3.00)

PRDS 403 - Design Studio VI (3.00)

Pre-requisites: PRDS 402

PRDS 441 - Design & Market II (3.00)

Pre-requisites: PRDS 402

PRDS 441 - Design & Market II (3.00)

Pre-requisites: PRDS 402

PRDS 345 - Product Design – Jewelry (3.00)

This course examines jewelry and adornment as a bridge between product and fashion design. Students explore the cultural, functional, and expressive roles of wearable objects through both traditional and digital fabrication methods. Coursework integrates metalworking, forming, CAD modelling and 3D printing to develop a comprehensive understanding of materials, processes, and form. Emphasis is placed on designing for the body with attention to ergonomics, movement, and narrative expression. Through iterative prototyping and critical discussion, students develop their ability to merge craft and technology in the creation of meaningful contemporary adornment.

PRDS 345 - Prod Dsgn: Future of Furniture (3.00)

Transform the way we live by partnering with Jonathan Louis, one of the largest furniture companies in the US, to define the future of interiors. In this course, you'll collaborate with working designers, trend forecasters, and sample makers to craft visionary solutions that reflect the evolving needs of contemporary and future living spaces. With cultural, technological, environmental and economic developments, the world of interiors is changing fast. This is your opportunity to tap into those trends, designing furniture that harmonizes with diverse living environments—from compact city apartments to flexible home offices. You'll delve into the psychology of what makes a living space feel like home and explore how an existing furniture company can adapt and broaden its offerings to meet the needs of renters, urban dwellers, and design-forward consumers. By understanding the driving factors behind furniture choices, you'll design innovative furniture pieces and expand the realm of modern interior design.

PRDS 345 - Prod Design: Luxury Packaging (3.00)

This course positions the designer as a director of storytelling, branding, form development, communication, and execution. Co-taught by two expert instructors, this course offers a holistic approach to fragrance packaging design within the context of luxury fashion brands. Students integrate two- and three-dimensional design principles with advanced visualisation and prototyping methods, exploring how narrative, sensory experience, and material choice shape perception, narrative, and brand positioning. Emphasis is placed on deep three-dimensional form exploration, time-based storytelling, and cohesive brand communication through packaging, both as an object and an experience.

SUSTAINABILITY MINOR

Our Mission:

Recognizing the innovative role artists and designers can play in solving pressing challenges, the Sustainability Minor provides students with a broad understanding of the social, political, economic and environmental issues impacting the future of humanity and our planet. Students will study and develop strategies and systems, as applicable to art and design, which can meet the needs of current generations without compromising those of future generations. Courses fulfill requirements in Integrated Learning and Liberal Arts and Sciences, as well as electives across all studio departments.

Participating Departments:

Program Learning Outcomes

Otis College Interdisciplinary Studies: Sustainability Minor Program Learning Outcomes are action words describing our approach to learning, and what we commit to our students.

Sustainability Minor Students Will:

Grow

Sustainability Minor student work will demonstrate: Disciplinary knowledge and skills Understanding and application of the practices, theories and science of sustainability. Proficiency in industry-standard skills, technologies, and processes • Capacity to identify and solve creative problemsProficiency in both creative and conventional research methodologies, including material and form exploration, interviewing, observation, and data analysis to define, investigate and solve sustainability-related problems from multiple perspectives. Cross-disciplinary awareness and practice • Audience-focused research, historical context, and field-specific discourseUnderstanding of the social, political, economic and environmental issues that impact the future of our planet and all its inhabitants, and the role artists and designers can play in securing sustainable futures.

Dare

Sustainability Minor student work will demonstrate: Innovation • Experimentation and play • Challenge to the status quo Produce works of art and design that address or solve sustainability issues in ways that are innovative, environmentally conscious, socially responsive, culturally relevant, and economically viable. Bravery in their work and their interactions with othersBravery in using their positions as artists and designers to advocate for a more just and sustainable world.

Reflect

Sustainability Minor student work will demonstrate: Capacity to communicate (orally, written, and/or visually) about their practiceAbility to clearly articulate the relationship between their major and sustainability concerns and how these studies will help them achieve personal and professional goals. Capacity to seek, assemble, evaluate, and ethically apply information and ideas from diverse sourcesIncluding data and evidence that support their arguments for social and environmental change. Analysis of both ethical and aesthetic impacts of art and designEvaluate the impacts of human actions, including one's creative practice, on the environment and other beings.

Connect

Sustainability Minor student work will demonstrate: Understanding of themselves as parts of a larger whole made up of human and non-human beings.Understanding the interconnectedness of everything on the planet, advocating for equitable access to resources and opportunities for all members of society, human and non-human. Awareness of positionality – in the world, their field, their communities.Understanding of how one's own lived experiences, geographic locations and cultures shape one's understanding of sustainability challenges locally and globally. Ability to work well, collaborate, and build relationships across differences in identity, perspective, aesthetics and disciplinesCollaboratively using art and design to solve complex problems related to issues of social and environmental justice. Integration of skills and concepts:Successfully integrate skills, information and concepts between their majors and Sustainability minor, while understanding and articulating their positionality in their chosen fields.

Shine

Sustainability Minor student work will demonstrate: Ability to define aspirations, future goals and their role within the creative economy.Defined aspirations, future goals and their role within the creative economy through the lens of sustainability. Awareness of audience and ability to cultivate relationships with others in their chosen fields. Compelling presentation and exhibition skills, through Annual Exhibition, Capstone, and portfolios.Successful completion of sustainable and impactful projects that resonate with specific audiences and promote meaningful dialogue and action. Career readiness, as evidenced by strong interpersonal skills, self-advocacy, adaptation, autonomy, initiative, and willingness to both receive and offer feedback.Ability to take initiative, adapt, and contribute meaningfully to discussions and collaborations, while assessing strengths, weaknesses and areas for growth personally and professionally.

Course Descriptions

CAIL 201 - Human Ecology (3.00)

The course provides an introduction to the relationship among cultural, social, and ecological systems. A course goal is to advance awareness of how artists and designers can problem solve the issues collaboratively, beyond the confines of any one discipline. Required for Sustainability Minors. Online Partner: Transition Mar Vista *OLSY - 100% of instruction is online. Some online classes may also include 1 - 2 weeks of an on-campus meeting. A component of the instruction will require meeting virtually with the instructor the same day and time through the web-conference platform, Zoom. The virtual course contact will occur synchronously (at the same time).

NSCI 305 - Science Sustainable Design (3.00)

With the shift toward more sustainable forms of art and design, the task facing artists and designers is uniquely challenging from previous eras. Sustainable design is concerned with the processes and outcomes to meet a world that is growing increasingly conscious of the significant impacts of art and design on the world's ecological systems and humankind. Through a predominantly science-based approach, students will study approaches to sustainability including, but not limited to, climate change, biodiversity, biomimicry, cradle to cradle, and life cycle analysis. It will emphasize the interdisciplinary nature of sustainable design and how it is defined, measured and tracked, looking at concepts like design for use, dematerialization, substitution, localization, and design for reuse. Through a combination of online lectures and discussion, field trips and hands-on exercises students will learn about the broader issues of sustainability as they pertain to the global context, and also how as individuals they are personally affected by these issues on a daily basis. After providing a thorough scientific background to the subject of sustainability through case studies and activities looking at the natural world as inspiration for design-based problems and solutions, students will be asked to identify and explore a specific design based sustainable project of their own using the biomimetic solution concept. Through this process it is intended that they will begin to understand the relevance of sustainability to the practice of art and design, and the necessity of its integration into their individual practices as they go forward in their career. Required for Sustainability minors.

LIBS 441 - Capstone: Sustainability (3.00)

The Sustainability Capstone is designed as a culmination of the Sustainability minor; it is an opportunity for students to synthesize what they learned in Human Ecology, Science & Sustainable Design, and their Sustainability electives by developing a research paper that addresses a topic related to their disciplinary field. The goal is to give students an opportunity to a) apply what they have learned and b) to have a clear sense of their knowledge and skills as a sustainability minor so that when they enter the workforce they can adequately speak to their specialization. Required for Sustainability Minors. A minimum grade of C- or better on the Capstone paper and course is required to pass. Students who earn a D will automatically be enrolled in the 1-unit Spring semester Continuation class to raise their grade to passing. *Prerequisite: CAIL201 Human Ecology - 3.0 credits, NSCI305 Science and Sustainable Design - 3.0 credits. Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor.

SUST 299 - Sustainability Electives (3.00)

A limited choice of Creative Action, Liberal Arts and Sciences, and Studio Elective courses across the college will count towards the Sustainability minor Electives, as determined each semester by the Interdisciplinary Studies Director, Sustainability Minor Area Head, and Department Chairs. Examples include Photographing an Inconvenient Truth, Call to Action, and Post-Apocalypse, Otis Goes Green, Costal Stories, Human Nature, Futuristic Foodways and Avoiding Climate Change.

SUST 299 - Sustainability Electives (3.00)

A limited choice of Creative Action, Liberal Arts and Sciences, and Studio Elective courses across the college will count towards the Sustainability minor Electives, as determined each semester by the Interdisciplinary Studies Director, Sustainability Minor Area Head, and Department Chairs. Examples include Photographing an Inconvenient Truth, Call to Action, and Post-Apocalypse, Otis Goes Green, Costal Stories, Human Nature, Futuristic Foodways and Avoiding Climate Change.

Elective Descriptions

INTR 330 - ST: Design Lab (3.00)

Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

CAIL 301 - Collaborating with Catastophy (3.00)

In line with disaster design projects such as the 2008 Post-Disaster Design Competition in which New York City sought innovative ideas for providing provisional housing for residents who may lose their homes as the result of a catastrophic coastal storm, Collaborating w/ Catastrophe: Disaster Design will engage in a site-specific, conceptually dynamic approach to disaster design. This course will take into consideration pre-disaster and post-disaster potentials and engage a variety of design processes to develop emergency housing solutions, survival products or other cultural engagements with how we, as a society, cope with catastrophe. Students will be put into work groups that take into account varied experiences and skill sets. These work groups will spend the first part of the semester doing research into the cultural ideas surrounding disaster. Field trips to outside sites and institutions, such as the El Segundo Fire Department, are planned so that students will have a chance to meet with individuals and organizations involved with "disaster". The same groups will then begin the design process of their final projects, which will be completed by the end of the semester.

CAIL 301 - Rise Above Plastics (3.00)

Students develop creative ideas and strategies to support the mission of the class partner to help reduce global single-use plastic pollution and microplastics from cosmetics and textiles. The class will educate students in understanding how plastic pollution fits into the broader issues of social and environmental justice, climate change, and the context of the gas and oil industries. Starting with research on the impact plastic trash has on our local oceans, wildlife, and communities, they will then work in multidisciplinary teams to develop and execute project proposals to educate and encourage the reduction, reuse, and refusal of single-use plastics such as plastic bags, bottles, and packaging and create awareness around microplastic and nanoplastic pollution.

CAIL 301 - Birding in Winged Los Angeles (3.00)

Birding is exploding in popularity, and the city of Los Angeles is well positioned as a bird's paradise with 500+ native species recorded, more than any county in the United States. But bird populations are under threat. The 2025 US State of the Birds reported continued widespread declines in American bird populations across all mainland and marine habitats, with 229 species requiring urgent conservation action, including the much-loved Allen's

hummingbird found nesting throughout Southern California. This class will explore and learn about the birds of Los Angeles, their habitats, and habits, and will partner with a local Audubon organization to promote and support conservation efforts for LA's feathered friends.

SUST 300 - ST: Sustainability (3.00)

Come collaborate with and learn from fungi, algae, yeast, bacteria, and other living materials in this new hands-on studio class. Study with artists and designers working with a range of biomaterials to create living textiles, sustainable building materials, bio pigments, and multimedia interspecies installations. Hands-on workshops will include mycelium brickmaking, bioplastic textiles, SCOBY leather, botanical ink making, and digital sonification. Where possible, students will work with site-specific materials gathered from Otis' campus and the surrounding community to enrich our engagement with our local ecosystem. Students will be introduced to experimental methods and processes throughout the class and empowered to develop their own material recipes through research and experimentation. Students will apply the knowledge they gain in class to develop art and design proposals using their own biomaterials. Class will culminate with an exhibition of student work.

CAIL 301 - Otis Goes Green (3.00)

This course provides art and design students with the knowledge and tools needed to make ecodesign an integral part of the design process. Students in this course will have an opportunity to discuss Green Design with top Green Designers and work with Otis College's Environmental Steering Committee to create green solutions for the campus. We believe it is at the design education level where we have the best opportunity to create a sustainable future. Sustainability minor elective. Partner: Environmental Steering Committee, Otis College

SSCI 210 - Artists &Environmental Justice (3.00)

Do artists have a role to play in discussions of climate change, toxic waste in BIPOC communities, and police violence against Black Americans? You bet they do! In fact, artists have historically been on the forefront of change-making actions, and we explore these activist stances through the lens of critical environmental justice studies. This course provides foundational ideas that a) inform an understanding of the interconnections between environmental and social causes, but also b) inspire action. It is important for students to a) learn how to inform themselves and b) develop confidence to take action in support of human and more-than-human rights, equity for all, and earth care. This course aims to empower everyone in class to take action for change whether that be individual daily actions or public art practice and installations. In turn, this class seeks to inform, but also to give students practical tools for application. The class is divided into three parts; the first 4 weeks students learn about the environmental justice movement in the United States, who the leaders of the movement have been, and what issues were championed. Next, students are placed in groups so they can select a case study to research and report on to the class. Lastly, students apply what they have learned to the development of an artistic intervention they can do to address an environmental justice concern in their own communities. An informed artist is a liberated artist with the power to take action for change whether big or small. Sustainability minor elective. Modality: OLAY *OLAY - This course provides 100% of instruction online. Some online classes may also include 1 - 2 weeks of an on-campus meeting. Students will work independently for a predetermined set of time to complete coursework by the due date. The virtual course contact will occur asynchronously (not at the same time)

LIBS 314 - Human Nature (3.00)

Western culture's relationship with nature is one of exploitation, conquest, industry, and waste, but it's also empowerment, mythology, conservation, and wonder. In Human Nature, LIBS 314, students examine their own relationship with the natural world. How do fiction, film, science, industry, religion, politics, and advertising shape our connection to our environment and our selves? By studying fiction from indigenous and environmentalist authors as well as cross-genre film about nonhuman species, we will see how stories shape our relationship with nature. From the sustainability and environmental justice movements, we will identify our particular concerns about the planet and make strides to recover our birthright: moving from estrangement with the natural world to integration, from despair to hope, from apathy to care. Or, if we already have a practice of climate resilience--we will fine tune our mission. We will compose narratives and analysis that demonstrate an understanding of how storytelling, language, and the visual realm inform our many roles in this altering ecology. Finally, we will reflect on a plan for future engagement with the natural world, be it protective measures through civic engagement, integration through professional practice, or simply more time spent outdoors.

CAIL 200 - Food & Community Garden (3.00)

Food and Urban Gardening: Food justice is defined by three principles: 1. Access to fresh, healthy, locally grown, and culturally appropriate food 2. Living wages and fair working conditions for all food system workers 3. Community control over food systems, through community-based agriculture, cooperatives, faith-based initiatives, etc (Los Angeles Community Garden Council). Moreover, food justice as a theoretical concept recognizes that "food choice" is impacted by intersecting factors such as race, class, and gender at all levels: production, distribution, and consumption. A food justice framework shows how inadequate access to nutritious and whole food options leads to chronic ailments that could be prevented if people had affordable, healthy choices in their neighborhoods. Corporate control of food, along with real estate practices, have contributed to the development of food deserts, which further impacts BIPOC women and children's right to access affordable and healthy food options. This class will therefore explore food justice through partnership with Holy Nativity Community Garden in Westchester, which has been helping to address food injustice since 2008. Through meetings with the garden manager/master gardener, students will learn why the garden was started, the community it serves, and other ways they contribute to food justice in the city. Students will use ethnographic fieldwork techniques (e.g., observation and mapping) to understand how the places where we live fundamentally impact our health. Fieldwork practices will be complemented by collaborative games and a group project that will challenge students to develop socially responsible, culturally relevant, and sustainable responses to food injustice in their communities.

CAIL 200 - Trees in Paradise (3.00)

"Trees in Paradise asks students to consider the landscaped and endemic history of California by researching both native and non-native trees and plants in local Los Angeles ecosystems. Through a series of fields trips, lectures and group research students will understand the role these plants and trees play in the current state of climate change in the state of California, and how we can manage them to help create an environmentally sustainable future for the state. Working with Friends of Ballona Wetlands, students will have the opportunity to take part in plant restoration and creek clean-up projects to protect one of LA County's only remaining wetlands and use their knowledge and skills to create tools to assist the organization in educating and raising awareness of the environmental importance of the Ballona wetlands and the restoration and preservation of native species. Partner: Helper Foundation"

INTR 330 - Interdisciplinary Practices (3.00)

This is an upper-division studio courses designed to foster interdisciplinary thinking and collaboration across media, genres, and disciplines. Students explore hybrid and cross-media practices that connect art and design with fields such as science, technology, politics, and culture. Emphasis is placed on experimentation, collaboration, and critical engagement across multiple methods and modes of making. Course topics are developed collaboratively and decided by the class, allowing students to shape the focus and direction of their collective inquiry. Guest speakers and visiting artists introduce models of interdisciplinary and transdisciplinary professional practice.

CAIL 301 - Be Their Voice: (3.00)

Students will work with International Bird Rescue - a nonprofit organization providing direct care for thousands of sick and injured marine birds; rapid response care teams to rescue birds impacted by oil spills; and public education on human activities impacting the health of marine birds and their larger ecosystems. Students will visit the clinic, meet patients and staff, and develop creative projects responding to the clinic's needs and mission. Students will also have the opportunity to collaborate with a team of artists, composers, and designers to contribute to a multi-year ecologically engaged public performance art project centered on the Bird Rescue Clinic and its mission. Creative opportunities will include site-specific costume and set design; sound

sculpture; community-based interviewing; sound and video recording and composition; creative writing; performance; and visual design. An ecological performance art festival showcasing work created with the Bird Rescue Clinic will be held at the Audobon Center in May 2026. Students will have the opportunity to participate in this festival and contribute their creative work.

*Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor. **A limited choice of Creative Action, Liberal Arts and Sciences, and Studio Elective courses across the college will count towards the Sustainability minior Electives, as determined each semester by the Interdisciplinary Studies Director, Sustainability Minor Area Head, and Department Chairs. See the Minors Course List.

COURSES

Main Content

COURSES

ADVERTISING DESIGN (ADVT)

ADVT 240   Advertising Workshop   **3.0 UNITS**
Introduces students to the world of advertising with real-world assignments. They analyze various historical and contemporary campaigns to learn why they were successful and how they affected American culture.

AFRICAN AMERICAN STUDIES - LMU (AFAM)

AFAM 2221   Black Cultural Arts   **4.0 UNITS**

AMERICAN SIGN LANGUAGE - LMU (ASLL)

ASLL 2101   American Sign Language 1   **4.0 UNITS**

ANIMATION (ANIM)

ANIM 101   Introduction to 3D Graphics   **3.0 UNITS**
Animation Foundation elective. See Browse Courses for specific topics each semester.

ANIM 210   Storytelling Fundamentals   **3.0 UNITS**
The basic principles of story structure are applicable to any medium: film, TV, novels, comic books, theatre, video games, even works of sculpture and dance. A foundational understanding of basic storytelling structure will deepen audience engagement and help to create emotional resonance. This course will utilize multimedia presentations, group work, reading and viewing assignments, response papers, and creative writing to foster a deeper understanding of the nature of story structure, its role in various mediums, and techniques to enhance its effectiveness.

ANIM 211   3D Fundamentals   **3.0 UNITS**
This course provides an overview of the tools and techniques used to produce digital art for animation. This includes 2D and 3D art assets, animation, sound and video. Upon completion of this module, students will gain a working knowledge of the common tools, techniques and terminologies used in the Digital Media industry.

ANIM 215   Storyboarding and Pre-Viz   **3.0 UNITS**
In this class students will learn how to illustrate a story through the use of storyboarding and Previsualization (Pre-viz). Students will learn how to break down a script and translate it onto a presentable, self-explanatory, traditional and digital format. Pre-viz will be used to expand on storyboards, testing different shot angles, timing and transitions with different camera placements and movements.

ANIM 220   Design and Drawing for Animation I   **3.0 UNITS**
In this course students will learn how to apply research, critical analysis, brainstorming, and improvisational techniques to enhance a students' drawing capabilities with a focus on space and objects in space. Emphasis is on developing a basic understanding of, and familiarity with, perspective as a means of organizing space and defining a point of view.

ANIM 230   Animation Basics   **3.0 UNITS**
In this course, students will learn industry standard principles and techniques for creating professional animation t. Students will gain an introductory level understanding of the "12 animation principles" using Digital 2D and 3D animation tools and techniques. In each class, students will concentrate on a series of exercises related to the many topics of study in Traditional Animation techniques.

ANIM 250   Animation Studio Project I   **3.0 UNITS**
Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management using shotgrid.

ANIM 310   2D Character Animation   **3.0 UNITS**
This is an elective course that addresses specific areas and issues in animation. See schedule of courses or the department for offerings each semester.

ANIM 320   Design and Drawing for Animation II   **3.0 UNITS**
This focuses on advance design concepts with an emphasis on creating memorable characters with interesting personalities & shapes to tell a story. The goal is to get students used to the idea of research and sketching from life or reference. Then apply the process of revisions to refine their designs in better serving the story. Students will practice draftsmanship to demonstrates the interplay of structure, anatomy, design, and expression in effective figures.

ANIM 332   Advanced Animation   **3.0 UNITS**
n this course, students will expand their understanding of character animation and motion graphics using Maya 3d software as well as using traditional animation media. In addition to basic animation theory, the students will draw from and incorporate 2d elements into their projects using various techniques. Traditional design studies will be translated into 3d environments. Modeling, texturing and lighting techniques will also be explored. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

ANIM 340   Acting for Animation   **3.0 UNITS**
This class will introduce acting techniques of the to enhance animation principles. Students will work on selected monologue and scene work, to utilize the different concepts learned. Scenes are extensively rehearsed and performed, and students will receive critiques and adjustments from the lecturers and fellow students.

ANIM 350   Animation Studio Project II   3.0 UNITS
Students will work in teams to create a digital animation project, synergizing skills learned in all Previous courses. Students will be exposed to the dynamics of teamwork and the importance of project management. This is an advancement of Animation Studio project I. Student will be expected to use advance techniques.

ANIM 420   Design and Drawing for Animation III   3.0 UNITS
Students will explore concepts through research, critical analysis, and brainstorming to create elements needed for conveying story. Design and Drawing Fundamentals III is a class that combines artistic exploration, perceptions, observations, personal narratives, and intuition to create new work. A series of stories and situations will provide both context and a point of departure for our projects.

ANIM 445   Animation Explorations   3.0 UNITS
In this course, students will focus on creating several animated pieces experimenting with multiple techniques with the dual purpose of telling stories and embracing the idea of play. In addition to completing assignments, students are expected to participate in group discussions and be present during in-class work sessions.

ANIM 450   Advanced Senior Project I   3.0 UNITS
This course provides a practical introduction to skills for acquiring and keeping a job, as well as the processes for developing a final project. Class and professional critiques help students develop their work, while learning from the creative processes of their classmates. Students collect their work from drawing classes, their storyboards, and other parts of the creative process, to be used as windows into their personal working styles.

ANIM 451   Animation Senior Project II   3.0 UNITS
Animation Senior Project II is a production class which takes students through the process of conceptualizing, proposing, planning and executing an original project. Students will learn how to deliver professional level work and deliver presentations to represent their work. Goal setting, scheduling, research, and expanding knowledge will be skills developed through the class. For the final project, each student will complete an original work or project and present it to members of the professional community. Goal: To create an original work and demo reel in a production environment.

ANIM 470   Animation Internship   3.0 UNITS
This course engages students to work with established companies that are related to their academic and career interests. The purpose of this course is to expose students to live workplace environments and expand networking resources. Students are expected to do well and represent Otis and the BFA animation program. At the end of the Internship, students will report on their experience through a sharing session. Students who wish to participate in the internship program need to submit updated resume, portfolios and websites. **Students need to apply for internship opportunities on their own or through career services

ANIM 490   Producing and Production Management   3.0 UNITS
This is an area of concentration elective to extend students' skills and experience with digital and/or hand animation and film/video tools. These electives will be created with industry advances in mind in order to keep students up-to-date with current industry practices.

ANIM 491   Animation Mentorship   3.0 UNITS

ARCHITECTUR/LNDSCAPE/INTERIORS (ARLI)

ARLI 352   Studio III   4.0 UNITS
Design theory, process, and interior technologies are applied to projects that address non-residential interiors, such as restaurants, stores, spas, exhibits, entertainment and meeting venues, etc. Prerequisites: ARLI250 Studio I, ARLI261 Technologies + Ecologies II, ARLI273 Digital Media II-B

ARLI 353   Studio IV   5.0 UNITS
Design theory, process, building and interior technologies are applied to the problem of a residential program sited within an existing building. Prerequisites: ARLI352 Studio III, ARLI360 Technologies + Ecologies III

ARLI 360   Technologies + Ecologies III   3.0 UNITS
The materials and methods of building construction are studied. Basic structural principles are presented through an introduction to forces and resultants in beams and columns. Prerequisite: ARLI250 Studio I, ARLI271 Digital Media II-A

ARLI 362   Lighting Fundamentals   2.0 UNITS
The basic design and technical requirements of lighting systems are introduced with an emphasis on commercial and entertainment applications. Prerequisite: ARLI250 Studio I, or equivalent. This course can be used as a Sustainability Elective

ARLI 363   Planning to Plan   2.0 UNITS
Space planning conventions, with an emphasis on access and circulation, are introduced, practiced and modified. Resultant effects on use and lifestyle are discussed through precedents as well as the students' projects. Prerequisite: ARLI 250 Studio I

ARLI 454   Studio V:Architecture   5.0 UNITS
Design theory, process and building technologies are applied to the problem of a building within an urban context. Prerequisite: ARLI353 Studio IV.

ARLI 455   Studio VI   5.0 UNITS
Design theory, process, architecture, and landscape technologies are applied to the problem of a building, or buildings, integrated with landscape.

ARLI 459   Studio Topics: Donghia Masterclass   1.0 UNIT
Design theory, process, and appropriate technologies are introduced and applied to a focused spatial design project. The topic varies per offering and is determined on the basis of faculty and student interest. Prerequisites vary as noted per offering. This course may be repeated for credit.

ARLI 461   Constructions   3.0 UNITS
An interior or exterior environment is designed, documented and constructed. Prerequisite: ARLI454 Studio V

ARLI 463   Constructions/Installation   **1.0 UNIT**
Students participate in the collaborative construction and/or installation of an interior or exterior environment. No homework. Three contact hours per credit as scheduled by the Instructor. No prerequisite, open to students in any department. This course may be repeated for credit.

ARLI 464   Design Development   **2.0 UNITS**
Interior, landscape, or architectural components of a prior or current studio project are designed, developed, and represented in orthographic drawings and rendered views.

ARLI 465   Presentation Techniques   **2.0 UNITS**
Comprehensive presentations of selected studio projects are designed and produced for display and/ or public presentation. Co-requisite: Concurrent enrollment in ARLI462 Constructions.

ARLI 466   Internship   **2.0 UNITS**
Students work under supervision of existing staff of a professional design firm (Employer). Work includes the observation and/or practice of professional activities, excluding clerical, as documented by the Employer. The duration of work must equal and may not exceed 45 hours per enrolled credit, per semester.

ARLI 467   Internship   **3.0 UNITS**
Students work under supervision of existing staff of a professional design firm (Employer). Work includes the observation and/or practice of professional activities, excluding clerical, as documented by the Employer. The duration of Work must equal and may not exceed 45 hours per enrolled credit, per semester. This course may be repeated for credit.

ARLI 469   Lighting Internship   **2.0 UNITS**
Students work under supervision of existing staff of a professional lighting firm (Employer). Work includes the observation and/or practice of professional activities, excluding clerical, as supervised and documented by the Employer. The duration of work must equal and may not exceed 45 hours per enrolled credit, per semester. This course may be repeated for credit. Prerequisites: ARLI471 Advanced Lighting Design and enrollment in the Certificate in Lighting Design through Otis College Extension Division.

ARLI 475   Fabrications S   **2.0 UNITS**
Methods of wood joinery and detailing are introduced and practiced through the design, documentation and fabrication of a container for the housing and display of small objects. Prerequisite: ARLI 250 Studio I and ARLI 271 Digital Media II-A, or equivalents

ART HISTORY & CRITICAL STUDIES (AHCS)

AHCS 122   Visual Culture 1 Advanced   **3.0 UNITS**
"Visual Culture 1: Gateways to Art and Culture" will address the history of visual communication and the changes that visual culture has undergone up until the 18th century across geographical boundaries, while providing students with the tools to understand the visual culture of the present. The class will address formal analysis, the study and history of materials, techniques, and genres. Students will also learn the semiotic language of visual culture and the socio-cultural contexts framing the history of art, past and present. This course will help students understand how visual objects reflect the cultural context in which they were originally produced and consumed, and how the meaning assigned to them changes over time. This will create bridges for the students to connect to the present visual culture while understanding that images are fluid signs which help create and maintain cultural, social, and political discourse.

AHCS 123   Visual Culture 2: Unpacking Art, Power, & Modernity   **3.0 UNITS**
Planned as a continuation of Visual Culture 1," Visual Culture 2: Unpacking Art, Power & Modernity" offers a transparent chronology to continue but deepen an investigation of art, design and world perspectives from roughly 1800 to 1960. These are years loosely associated with "modernisms." It explores Western and non-Western, dominant, and marginalized histories during this proposed 160-year time frame, broadening and reinforcing first-year students' historical awareness, while de-centering dominant canons. Visual Culture 2 uses multi-cultural artifacts, readings, seminar-like discussions and experiential collaborations to explore and critically analyze key works and key themes like colonialism, structural racism, xenophobia, industrialization, technology, capitalism and consumerism from multiple perspectives. By the end of the semester, students should have the necessary critical tools to become empathic citizen-artists who can engage an equitable, transglobal, diasporic, technically creative and environmentally demanding present and future.

AHCS 222   Graphic Design/ Illus History   **3.0 UNITS**
How do the communication arts reveal the expectations and values of a culture and society at any given time? What are the moral and ethical responsibilities of the communication artist? From typography to photography, trademarks to corporate logos, and from posters to postcards to illustrated electronic paperless forms, the communication arts provide a crucial link to people, places, and to popular culture. This course presents an overview of the communication arts, focusing upon the instrumentality of graphic design, advertising, and illustration in the construction of complex social, political, cultural, racial, ethnic, and gender identities. Activities and assignments such as panel discussions and photo essays afford students a chance to see the connection between their work, and larger historical, contemporary, and global aspects of culture. Most significantly, this course provides an opportunity to understand the vast influence that the communication arts have wielded and continue to wield across the world. This course may be taken in either fall or spring, must be completed in the sophomore year.

AHCS 224   Theories and Trends in Contemporary Art, Media and Culture   **3.0 UNITS**
This course stresses the relationships between contemporary culture and media and their connections to related creative and theoretical disciplines that have influenced art practice and human experience in the years roughly from 1955 to the present. "Theories and Trends in Contemporary Art, Media and Culture" critically examines the range of roles that popular culture, mass media and colonial institutions of privilege play in all creative practices. This class challenges facile and well-worn constructions of gender, difference, ableism, race, ethnicity, "high" and "low" art to work towards conceptions of the self, identity, and of culture that are fluid. Research and case studies focus on the inter-textual and the inter-disciplinary. Students learn and critically evaluate major theories of contemporary art and design through textual, visual, and hands-on inquiry, encouraging independent thinking via active in-class and student-directed projects. Required for Graphic Design, Illustration, Fashion,Toy, Product, Animation, and Game and Entertainment majors.

AHCS 225   History & Future of Product Design   **3.0 UNITS**
When did art become design? Product design influences and is influenced by culture and technological developments. From the Dark Satanic Mills and the Spinning Jenny to advanced 3D printers and the advent of AI, how have technology and manufacturing processes influenced and driven product design and what were the global societal and cultural consequences of these? Objects and products do not exist in a vacuum and thus must be seen through

various lenses and themes such as the continual search for utopia and social reforms, the economic and psychological implications of man vs. machine, material exploration for functional and aesthetic potential, human inspiration from the natural world and our impact on the environment. This course examines how technology shaped today's design thinking and its potential impact on transforming the future of designed objects and the world as we know it. Required for Product Design majors.

AHCS 226   Fine Arts Contemporary Art Survey   3.0 UNITS
This Contemporary Art for Fine Artists is a survey of key fine art objects, practices and issues from the late 1950s to the present. Taking key historical events as its structure, the class uses contemporary art movements and counter movements to investigate mechanisms of form, taste, value, class, gender and exclusion, as these are demonstrated and challenged by artists in the US and globally. Included is a consideration of postmodern theory and fine art creation as systems capable of both perpetuating and effectively challenging normalized and marginalized identities. Required for Fine Arts majors.

AHCS 228   Art History of Animation   3.0 UNITS
The "Art History of Animation" course provides a comprehensive survey of the history of animation from its earliest beginnings to the present day. The course explores the development of animation techniques, styles, and themes, and their relationship to cultural and social contexts. Students will gain a thorough understanding of the artistry and creative processes that underlie animated productions and develop an appreciation for the role of animation in shaping popular culture. Upon completion of this course, students will be able to: Identify the key historical milestones in the development of animation as an art form, and the social and cultural contexts in which they occurred. Analyze the visual language and stylistic techniques used in animated productions, including the use of color, line, and shape. Evaluate the role of animation in shaping cultural values and attitudes towards race, gender, and identity. Discuss the cultural and artistic significance of major animated films and series, and their impact on popular culture. Demonstrate an understanding of the creative processes involved in animation, including storyboarding, character design, and animation production. Required for Animation majors.

AHCS 229   Art History of Game Design   3.0 UNITS
This course provides an overview of the history of video games, tracing their evolution from their early beginnings to the present day. Through a combination of lectures, readings, discussions, and hands-on experiences, students will explore the social, cultural, and technological factors that have shaped the development of video games. Topics covered in the course include: The Origins of Video Games: The course will begin with an overview of the early history of video games, including the development of the first electronic games, such as Spacewar!, and the emergence of arcade games in the 1970s. Iconic Games: The course will examine some of the most iconic and influential video games in history, such as Pac-Man, Super Mario Bros., and Doom. Students will analyze the gameplay mechanics, cultural impact, and historical significance of these games. Landmark Companies: The course will also explore the companies that have played a significant role in the development of video games, such as Atari, Nintendo, and Sony. Students will learn about the business strategies, marketing tactics, and technological innovations that enabled these companies to succeed in the industry. Innovative Technology and Hardware: The course will delve into the technological advancements that have driven the evolution of video games, such as the introduction of 3D graphics, motion controls, and virtual reality. Students will also examine the hardware platforms that have enabled video games to become increasingly sophisticated and immersive. By the end of the course, students will have gained a comprehensive understanding of the history of video games and the cultural impact they have had on society. They will be able to analyze and critically evaluate video games as a form of media, and understand the challenges and opportunities facing the video game industry today. Required for Game and Entertainment majors.

AHCS 234   History of Costume   3.0 UNITS
Study fibers, yarns, knit construction and acquire a practical understanding of how each affects the appearance and performance of the textile product. Knit swatches using a variety of stitches, combining yarns of varying gauges. Other topics include dyeing, printing, and finishes as processes that affect the aesthetic appeal of the finished product, and as functional finishes which enhance performance. The impact of these processes and issues of sustainability are examined as they relate to the cultivation and production of fibers. Learn to make fabric choices based on an understanding of the woven structure and knowledge of individual fabric properties.

AHCS 236   History of Toys   3.0 UNITS
Today we understand play as a child's universal language and right. But was it always this way? This synchronous online course explores historical global perspectives on toys, trends, and play, providing valuable context for the emerging toy designer. You will develop a cultural awareness of the evolution of the toy industry reflected by past and current societal changes. Active research, videos, readings, and discussions inform personal narrative writing along with engaging, creative group projects. Class projects will be relevant and enhance the experience of studio toy design classes. By the semester's end, you will have completed quality research on your favorite childhood toy and designed an instructional game focusing on a chosen era, genre, or region related to the history of toys. Required for Toy Design majors.

AHCS 237   Sophomore Seminar: DEI in Global Art and Culture   3.0 UNITS
The Sophomore Seminar 1 & 2 sequence is a key part of the Fine Arts curriculum and a course required of all sophomores. Sophomore Seminar 1 is designed to introduce Fine Art majors to key concepts in ancient and modern philosophy and its relationship to art and culture. Sophomore Seminar 2 critically considers postmodern theorists and artists who question the philosophical canon and the function of art in society. In both courses/semesters, students learn to evaluate the ideological impact of power, gender, economics, and social class on social and artistic norms. The purpose of the course is to develop the student's capacity to think critically about a broad range of issues and their relationship to the student's artistic practice. The course is a blended studio and seminar course that places a strong emphasis on close reading, critical listening, open-minded group discussion and critical making. Required for Fine Arts majors.

AHCS 310   Topics in Art History   3.0 UNITS
AHCS 310 are elective Art History courses that address a variety of issues in fine art and visual culture. Course offerings vary each semester and certain LIBS314 topics will satisfy this elective. See the Liberal Arts and Sciences department for course offerings and course descriptions. This course may be taken in either fall or spring.

AHCS 499   Contemporary Graphic Design Issues   3.0 UNITS

AHCS 560   Special Topics in Art History: Modernism to Conceptualism   3.0 UNITS
This course examines the development of Modernism as a discourse in the visual arts, from its development in the 1840s to challenges of its key assumptions in the 1960s. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course. The primary intention of this course is to provide a critical survey of work and discourses that have contributed to the development of Modernism as a specific aesthetic and discursive tradition. Our attention will focus on the development of visual art, and a trajectory of practices traceable from traditions of European painting and sculpture to challenges leveled at that tradition, most identified with artists working in the United States after World War II. Understanding the importance and context of these practices will require that we simultaneously explore other developments significant throughout this period including social environment, political and economic currents, technological change and related fields of practice. It is a period characterized by extraordinary change, gross inequities, and the

formation of conventions on which a contemporary view of art as an aesthetic discipline are based. We will attempt to actively engage these concepts with the goal of developing a view of Modernism in direct dialog with the question of the role of art and artists in this period and in contemporary society.

AHCS 561   Special Topics in Art History: 60's to the Present   3.0 UNITS
The historical development of the discourse of Modernism established a narrative that proved very influential. However, the terms of that narrative came under question from a diverse range of artists and voices. This course looks at Contemporary Art as a varied field arising out of challenges to historical "modern art" in the late 1960s and developing a range of practices that continue to challenge our understanding of art and its relation to society today. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

AHCS 562   Out on the Town   3.0 UNITS
This course is structured around field trips and designed to acquaint students with the artwork currently being exhibited in Los Angeles at a variety of exhibition spaces throughout the city. We will consider the exhibitions we visit in terms of the conceptual intent of the artists, the programing of the venue, and the installation and curatorial decisions of each institution. The class will meet on Fridays from noon-5PM, mostly every other week, eight times during the semester. Meeting dates will be listed in the class syllabus.

AHCS 577   Contemporary Graphic Design Issues   3.0 UNITS
This course is total immersion into the field of graphic design. Current and critically important figures will be covered; students will be given tools to use in their practice to ensure that they are informed on the discipline on a global scale. In addition, students will begin to engage visiting artists in dialogue during lectures.

AHCS 579   Theory and Criticism   3.0 UNITS
A diversity of critical approaches to twentieth and twenty-first century design are situated historically while introducing current themes and debates in contemporary design practice and related disciplines.

AHCS 587   Models of Practice   3.0 UNITS
In this course students will work to contextualize their future practice through close examination of their own body of work, research, and on and off-site visits with contemporary design practitioners. The course will provide opportunities to experience the many roles that designers can play today focusing on the way practice models continue to evolve in response to socio economic technological, cultural, economic and political conditions.

AHCS 650   Art, Theory, Practice I   3.0 UNITS
In this seminar we will develop an understanding of the material, social, and political implications of aesthetic form. Form is understood as an organizing principle that is anchored within material reality and which affects this reality in turn. The essays we will read engage in questions of humanity, power relations, representation, and aesthetics from a variety of perspectives and discursive fields. We will use these texts as a starting point to discuss how cultural producers and theorists have responded to the representational politics of the present. Alongside, we will consider art practices within the larger cultural and socio-political environment. The goal will be the development of individual, subjective voices within a collective, collaborative, and relational process.

AHCS 651   Art, Theory, Practice II   3.0 UNITS
This two-semester, cross-disciplinary seminar examines both the creation of contemporary art and the ideas and theories that shape it. Through a selection of essays, we will explore the material, social, and cultural connotations of aesthetic form. We will consider form as an organizing principle that is rooted in material reality while simultaneously influencing that reality. Discussions will focus on how works of art can prompt encounters that challenge our established modes of perception and understanding, fostering curiosity and encouraging shifts in perspective.

ART HISTORY - LMU (ARHS)

ARHS 4351   Asian Art Snc 1945: Rgn to Glb   4.0 UNITS

ART AND DESIGN EDUCATION (ADED)

ADED 299   Art & Design Education Elective   3.0 UNITS
Students will choose Art and Design Education Electives from the Minors Course Lists, selected by the Interdisciplinary Studies Director and Minor Area Head, in collaboration with each Academic Department. . Examples include ADED300 Special Topics like Art Therapy and Teaching and Learning for Neurodiversity, CAIL301 Creative Action Studio (if taken a second time), SSCI211 Child Psychology, and studio classes outside of one's major or area of emphasis that expand their art and design making skills.

ADED 300   Special Topics: TBD   3.0 UNITS
ADED Special Topics are a series of studio-based courses that focus on conceptual, aesthetic, and interdisciplinary approaches to art and design education and community engagement. Visiting artists, designers and educators share their innovative approaches and guide students through experimenting and developing their own. Topics vary each semester. Required for Art and Design Education minors. Open to all other majors as a studio elective.

ADED 336   Teaching Intership   3.0 UNITS
In this Blended Course, students will synthesize and analyze the connections between history and theory of art and design education and community engagement and the realities of what happens in the classroom, studio and/or community setting. Students will do so by participating in a 10 week internship assisting with a K-12 school, museum education department, cultural organization, or a socially engaged artist /designer of their choice. This field experience along with readings, videos and discussions provide the opportunity to expand and reflect on one's understanding of education theory and community engagement, all of which culminates in the development of a professional online teaching portfolio. Required for ADED minor students. Pre-requisites SSCI210/214 Community Arts in LA and LIBS311/314 Teaching for Learning I, or ADED Minor Area Head's permission.

ARTISTS, COMMUNITY & TEACHING (ACTS)

ACTS 335   Community Arts Internship   2.0 UNITS
Students intern at K-12 schools, museums, galleries, cultural organizations, or with socially engaged artists and designers to expand and reflect on their understanding of education theory and community engagement. Required for Community Arts Engagement minors. Can be taken as a studio elective for all other students. This is course is Blended Asynchronous. Ten weeks of this course will be conducted online asynchronously (not meeting at the same time) to allow for internships. Prerequisite: Community Arts in LA, or Interdisciplinary Studies Director's approval.

ASIAN AMERICAN STUDIES -LMU (AAAS)

AAAS 4998   **SS: Asian Art Snc 1945**   **4.0 UNITS**

CATALOG ELECTIVE COURSE (ELEC)

ELEC 299   **Studio Elective**   **3.0 UNITS**
Studio Elective See each major and minor for a list of electives.

ELEC 599   **Graduate Studio Elective**   **3.0 UNITS**
Graduate level studio elective course. See department for specific courses.

CHICANA/O & LATINA/O STDS-LMU (CLST)

CLST 3998   **SS: Latin American Art**   **4.0 UNITS**

CLAY ELECTIVES (CLAY)

CLAY 299   **Clay Electives**   **3.0 UNITS**
Students will choose Clay Electives from the Minors Course Lists, selected by the Interdisciplinary Studies Director and Minor Area Head, in collaboration with each Academic Department. Clay Electives include any ceramics class offered across the college, as well as other applicable courses on related topics as determined each semester by the Minor Area Head and Director of Interdisciplinary Studies. Examples include: CAIL200 Made in USA, LIBS314 Business of Creativity, ENTR300 Intro. to Entrepreneurship, INTR330 ST: Design Lab, and PRDS462 ST: Packaging

COMMUNICATION STUDIES - LMU (CMST)

CMST 2510   **Digital Diversities**   **4.0 UNITS**

CMST 3451   **Disability Justice**   **4.0 UNITS**

CONCEPT ART (CONC)

CONC 299   **Concept Art Elective**   **3.0 UNITS**
A limited choice of Studio and LAS courses will count as Concept Art Minor Electives, as determined each semester by the Interdisciplinary Studies Director, Animation Chair, Game and Entertainment Design Chair and Graphic Design/Illustration Chair. Students choose three electives that are not also requirements of their majors. Examples include courses in storytelling and representational image making with wet, dry, digital and Ai processes.

CONC 300   **Concept Art Drawing Intensive**   **3.0 UNITS**
This course is an in-depth exploration of the fundamentals of perspective drawing, composition, and visual storytelling in concept art. Students will develop essential skills in creating immersive environments, mastering perspective techniques, and refining their craft through iterative design processes. Assignments will emphasize research, reference gathering, and professional presentation to align with industry standards.

CONC 301   **Storytelling for Concept Art**   **3.0 UNITS**
This course focuses on visual storytelling as it applies to concept art for games, film, and animation. Students will explore composition, framing, sequential storytelling, and environmental storytelling to create compelling narrative-driven imagery. Through research, thumbnails, and final illustrations, students will develop skills in staging, lighting, and character/environment interaction to enhance storytelling clarity and impact.

CONC 400   **Concept Art Production and Development**   **3.0 UNITS**
This team-based course simulates a real-world concept art production pipeline, where students collaborate to develop cohesive visual assets for a game or film project. Emphasizing professional workflows, students will explore ideation, iteration, visual research, style development, and final presentation. The course covers both character and environment design, prop development, and technical considerations for production-ready assets. By working in teams, students will gain experience in industry-standard collaborative workflows, feedback integration, and refining work based on production constraints.

CONC 401   **Concept Art Packaging and Finishing**   **3.0 UNITS**
This course focuses on the final stages of concept art production, emphasizing professional presentation, refinement, and packaging of assets for industry use. Students will learn to prepare their work for production bibles, pitches, portfolios, and marketing materials. The course covers composition, polish, layout design, and final rendering techniques to ensure concept art is clear, compelling, and production-ready. Through iterative feedback and industry-standard formatting, students will create high-quality, polished concept presentations suitable for professional portfolios and pitches.

CREATIVE ACTION/INTEGRATED LRN (CAIL)

CAIL 102   **Contemporary Studio and Creative Action**   **3.0 UNITS**
Students explore the built environment, analyzing its physical, spatial, and temporal elements. This course introduces students to art and design fundamentals, including scale, material, measurement, context, and function. They will explore innovative and sustainable solutions using fabrication, techn ology, studio labs, and joint activities with other classes. This course includes the Creative Action & Integrated Learning (CAIL) component, which encourages engagement with the city of Los Angeles. Students will participate in site visits, lectures, and relevant readings that highlight cultural, social, political, ecological, or economic aspects of responsive design. Throughout the course, students will also develop pr ofessionalism and collaboration skills.

CAIL 200   **Creative Action Liberal Arts**   **3.0 UNITS**
An integrative course using collaborative methodology, synthesizing diverse perspectives, and using the skills of creative and critical thinking, clear communication, research, and information literacy. See CAIL section for course descriptions. May be taken in either fall or spring, must be completed in the sophomore year

CAIL 201   **Human Ecology**   **3.0 UNITS**
The course provides an introduction to the relationship among cultural, social, and ecological systems. A course goal is to advance awareness of how artists and designers can problem solve the issues collaboratively, beyond the confines of any one discipline. Required for Sustainability Minors. Online Partner: Transition Mar Vista *OLSY - 100% of instruction is online. Some online classes may also include 1 - 2 weeks of an on-campus meeting. A component of the instruction will require meeting virtually with the instructor the same day and time through the web-conference platform, Zoom. The virtual course contact will occur synchronously (at the same time).

CAIL 301   **AI Play**   **3.0 UNITS**
An upper-division interdisciplinary studio course offering unique core content that shifts from term to term. This studio affords students the opportunity to engage with professionals from various fields and expand their notion of problem solving beyond their major in public site real world challenges. This course may be taken in either the fall or spring of the junior year. A limited choice of CAIL301 courses will count for the Sustainability Minor. See CAIL section for course descriptions.. CAIL301 may be taken in either the fall or spring semester of the junior year

DRAWING (DRWG)

DRWG 204   **Intro to Experimental Drawing**   **3.0 UNITS**
This course explores drawing as a way of thinking rather than as a specific medium. Assignment prompts such as Materiality, Plans and Diagrams, Physical Action and Gesture encourage problem solving across all mediums. In addition, we will explore traditional drawing with technical demonstrations in charcoal, color pencil, sumi ink and brushes watercolor paint, gouache, on supports such as hot press and cold press watercolor papers, architects' drafting mylar, rice papers and more.

DRWG 320   **Experimental Drawing Projects**   **3.0 UNITS**
Provides an opportunity for students to explore advanced techniques and ideas in drawing and explore many uses of drawing. It helps students develop their vision and awareness of the drawing media through independent projects and building a body of work. Offered in the Fall only.

ENGLISH (ENGL)

ENGL 050   **Developmental English I**   **3.0 UNITS**
Developmental English I is a for-credit, non-degree applicable course designed to support native and non-native speakers of the English language in developing the basic Standard English language skills needed for reading, analyzing, writing, and discussing college-level material. The class focuses on organizing ideas into unified and coherent sentences and paragraphs and developing these into a portfolio of drafted, revised, and edited essays. Students are required to work with an SLC tutor on a weekly basis. A minimum grade of "C" (2.0) is required to pass this course. Prerequisite: Successful completion of ENGL050 Developmental English I or placement through the Writing Placement Assessment.

ENGL 090   **Developmental English II**   **3.0 UNITS**
Developmental English II is a for-credit, non-degree applicable course in developing the Standard English skills needed for reading, analyzing, writing, and discussing college-level material. The class focuses on critical thinking, exploring the writing process, and organizing information and ideas, culminating into a portfolio of drafted, revised, and edited essays. A minimum grade of "C-" is required to pass this course. Students who earn a "C-" must also enroll in the English 103 Writing Lab when satisfying Writing in the Digital Age ENGL 107. Prerequisite: Successful completion of ENGL050 Developmental English I or placement through the Writing Placement Assessment. Students receiving a C- may continue on to ENGL 107 if enrolled in ENGL 103. In the fall, ENGL 090 Developmental English II may be linked to AHCS 122 Visual Culture 1: Gateways to Culture or LIBS 115 Writing as Discovery: Thought Lab 1 courses.

ENGL 102   **DEV Writing Lab**   **1.0 UNIT**
The ENGL 102 Writing Lab focuses on oral communication, reading in context, and critical thinking to support you in your Developmental II English course and beyond as an artist and designer in the world. Through small-group instruction and discussion, each week, you will learn tools that you can apply to your ongoing reading and writing assignments as well as complete activities tailored to meet your individual needs. All coursework is assigned and completed during lab hours, underscoring the importance of regularly attending to benefit from 1:1 support. This course is Pass/Fail. If you complete the course at the C or better level, you will receive a "Pass (P)" on your transcript. If you finish the course at the C-, D, or F level, you will receive a "No Pass (NP)" on your transcript.

ENGL 103   **Writing Lab**   **1.0 UNIT**
The ENGL 103 Writing Lab focuses on building written communication, content development, and critical thinking skills and competencies to support you in your Writing in the Digital Age course and beyond as an artist and designer in the world. Through small-group instruction and discussion, each week, you will learn tools that you can apply to your ongoing reading and writing assignments as well as complete activities tailored to meet your individual needs. All coursework is assigned and completed during lab hours, underscoring the importance of regularly attending to benefit from 1:1 support. This course is Pass/Fail. If you complete the course at the C or better level, you will receive a "Pass (P)" on your transcript. If you finish the course at the C-, D, or F level, you will receive a "No Pass (NP)" on your transcript.

ENGL 108   **Writing as Discovery**   **3.0 UNITS**
How does the world influence you, and how do you influence the world? In this class, you will discover narratives and other texts that reveal the complexity of your identity. You will apply that understanding to a broader exploration of the necessity of empathy in navigating difference in today's global society. You'll be invited to turn your awareness into advocacy by posing a research question about a topic that captures your interest and fuels your curiosity. By the end of the semester, you will have completed a personal narrative, learned how to critically analyze diverse texts, and developed research techniques that will be valuable during your academic career and beyond. You will continue to hone these skills in a specialized Thought Lab II course of your choosing during your second semester.

ENTREPRENEURSHIP (ENTR)

ENTR 301   **Intro to Entrepreneurship**   **3.0 UNITS**
How can you turn your hard-earned art and design school education into a career? How can what you've learned and what you create be monetized to create a meaningful and sustainable life's work? This course introduces you to Entrepreneurship and the basics of creating and operating a business. You will learn concepts of visioning, planning and budgeting, fundraising, marketing, promotion and leadership, both in theory and in practice. You will be exposed to the legal and business underpinnings of operating any sort of enterprise, learn how to protect their art and their integrity, and discuss concepts of ethics within the context of the marketplace. In addition, the course will cover the tricks and techniques of pitching a project, as well as the necessary ingredients of a successful business plan. Guest speakers who have launched their own businesses (representing a wide range of art and design disciplines) will present best practices. Required for Entrepreneurship minors. Open to all others as a studio elective.

ENTR 310   Entrepreneurial Internship   **2.0 UNITS**

Students will intern at small businesses, start-ups, non-profits and/or artist/designer studios to experience and reflect on the day-to-day business practices of their chosen field. Ten weeks of this blended course will be conducted online asynchronously (not meeting at the same time) to allow for internships. Required for Entrepreneurship minors. Prerequisites: ENTR300 Introduction to Entrepreneurship, MATH137 Money Matters, and LIBS317 Issues in Entrepreneurship.

ENTR 400   Launchpad   **2.0 UNITS**

The time has come to employ what you've learned about Entrepreneurship and about yourselves as part of the Entrepreneurship Minor, through your major and all your other classes. What do you want to do and make professionally, and how can you monetize it to create a satisfying, challenging and sustainable career? Functioning as an Incubator this class provides you with the opportunity to define and develop the creative business you want to launch after graduation. In tandem with the Business Writing course, you'll focus on Strategic Planning, Business Plan writing, Marketing and Project Management, Business Loan and Venture Capital processes. You'll also receive expert advice from successful, creative entrepreneurs across a range of disciplines through one-on-one mentor meetings. You will be required to create real world, as well as more "academic," deliverables, and accurately chart out the beginnings of an actual business that will launch your career as a creative entrepreneur. Required for Entrepreneurship minors. Pre-requisite: ENTR310 Entrepreneurial Internship. Co-requisite: LIBS318 Business Communication.

ENTR 401   Launchpad   **3.0 UNITS**

The time has come to employ what you've learned about Entrepreneurship and about yourselves as part of the Entrepreneurship Minor, through your major and all your other classes. What do you want to do and make professionally, and how can you monetize it to create a satisfying, challenging and sustainable career? Functioning as an Incubator this class provides you with the opportunity to define and develop the creative business you want to launch after graduation. In tandem with the Business Writing course, you'll focus on Strategic Planning, Business Plan writing, Marketing and Project Management, Business Loan and Venture Capital processes. You'll also receive expert advice from successful, creative entrepreneurs across a range of disciplines through one-on-one mentor meetings. You will be required to create real world, as well as more "academic," deliverables, and accurately chart out the beginnings of an actual business that will launch your career as a creative entrepreneur. Required for Entrepreneurship minors. Pre-requisite: Prerequisites: ENTR 301 - Intro to Entrepreneurship and MATH 137 - Mathematics of a Startup. Co-requisite: LIBS318 - Business Communication.

FASHION DESIGN (FSHD)

FSHD 101   Digital Print Design for Fashion   **3.0 UNITS**

Fashion Design Foundation elective. See Browse Courses for specific topics each semester.

FSHD 202   Sophomore Studio I   **4.0 UNITS**

Your journey into the fashion studio starts here! This on campus course introduces you to processes used in garment construction including draping, patternmaking and sewing. Beginning with these basic principles you will learn industry techniques to construct muslin garments, sewing samples, and paper patterns using industrial equipment. By the end of this course, you will have created several garment samples, patterns, and a sewing notebook to use for future courses.

FSHD 214   Sophomore Studio I   **3.0 UNITS**

Your journey into the fashion studio starts here! This on campus course introduces you to processes used in garment construction including draping, patternmaking and sewing. Beginning with these basic principles you will learn industry techniques to construct muslin garments, sewing samples, and paper patterns using industrial equipment. By the end of this course, you will have created a sample garment, paper patterns, a draped basic dress, and a sewing notebook to use for future courses.

FSHD 215   Sophomore Studio II   **3.0 UNITS**

Diving deeper into techniques used for garment construction, this in-class course builds on the foundational knowledge of draping, pattern making and sewing acquired in Sophomore Studio I. You will construct and pattern increasingly complex garments using industry procedures and equipment. You will be challenged to interpret 3-dimensional design ideas through the creation of garments using fabrics that accurately reflect your sketches. During this course, you will create one garment of your own design, a full-size sample knit t-shirt, paper patterns, and complete a sewing notebook to use as reference for your career as a designer. Prerequisite: FSHD214 Sophomore Studio I

FSHD 234   Digital Design I   **3.0 UNITS**

Take your fashion croquis to the next level using Adobe Photoshop and a drawing tablet. In this online course you will learn how to render, make quick and easy color changes, and digitally drape fabric prints onto your fashion croquis. You will learn to create your own custom brushes to replicate elements like lace and stitching. Using drawing tools and filters you will develop fashion graphics and basic textile print designs to use in your work while learning digital terminology and professional practices. Mastering these tools will help you generate engaging mood-boards and professional fashion design presentations.

FSHD 235   Digital Design II   **3.0 UNITS**

Introduction to Adobe Illustrator to draw flats/CADs is a requirement for anyone working in the fashion industry. In this online course, beginners will learn the tools and techniques needed to draw industry standard flats quickly and efficiently including digital terminology, professional workflow, and presentations. Throughout this course you will learn to create a custom brush library including specialty stitches, zippers, and trims. You will create a symbol library containing buttons, buttonholes, eyelets, rivets, bar tacks, and zipper pulls. These libraries along with custom templates, and graphic styles will be used to draw a range of different garment types including shirts, blazers, jackets, skirts, pants, jeans, denim jackets, turtleneck sweaters, and cardigans that you can build on in your professional career.

FSHD 244   Sophomore Fashion Design I   **3.0 UNITS**

Fashion Illustration is the language designers use to quickly express their ideas in a 2-dimensional format. This course introduces you to drawing techniques fashion designers use to show their thought process. You will draw clothes on the figure, as well as rendering techniques to communicate a variety of textiles. You will develop an understanding of garment construction through flat technical drawings. Throughout the course you will have completed multiple projects that highlight specific markets. Your semester will culminate in a resort-wear collection that will demonstrate your knowledge of design development, croquis sketches, composition/layout, and technical flats.

FSHD 245   Sophomore Fashion Design II   **3.0 UNITS**

Fashion Design is communicated in a 2-dimensional format, a critical skill for professional fashion designers. This course introduces you to the design process, and what it means to follow a design direction. You will implement your drawing skills obtained in previous coursework to create fashion croquis (quick sketches) that express your design concepts. You will continue to explore croquis sketching and flats, while integrating your experience from

Sophomore Studio I by creating sewing samples to support your 2-dimensional designs. During this course, you will complete two projects that will expand your understanding of fabric/color stories, research, and adequate execution of your designs in a 2-dimensional format. Your semester will culminate with an athletic inspired collection that will prepare you for your first Mentor Project at Junior level. Prerequisites: FSHD244 Sophomore Fashion Design I, FSHD214 Sophomore Studio I.

FSHD 314   Junior Studio I   **6.0 UNITS**
Knowledge of construction is crucial for becoming a successful fashion designer. This on-campus course focuses on everything related to the moderately priced market. You will construct different types of garments through in-person demonstrations, instructional videos, and step-by-step pictorial manuals. Along the process, you will also learn how to create treatment samples for your Mentor Projects. Woven pants, a Bomber jacket, and a swimsuit are a few projects you will develop. You will also complete a bustier in cotton twill by draping, pattern making, fitting, and sewing, using intermediate-level industry methods. This project parallels the production process used in the fashion industry. You will also learn how to generate spec sheets and cost sheets, and how to incorporate them into a basic design technical packet (Tech Pack) digitally. Prerequisite: FSHD215 Sophomore Studio II, Co-requisite: FSHD344 Junior Fashion Design I

FSHD 315   Junior Studio II   **6.0 UNITS**
Transform your own designs from 2-dimensional drawings to real-life garments. This on-campus course allows you to apply the skills and knowledge you've acquired while continuing to explore more advanced draping and pattern-making techniques. You will approach the mentor project by following the same methods used in the fashion industry, developing a work calendar, and incorporating your treatment samples made in Junior Studio I into your selected design. You will also create a more advanced Tech Pack based on the mentor project which mirrors the requirements of the fashion industry. There are also opportunities for advanced draping exercises. The final project focuses on constructing a pair of pants inspired by one of your own. Prerequisites: FSHD314 Junior Studio I, FSHD344 Junior Fashion Design I

FSHD 325   Digital Design III   **1.0 UNIT**
Improve your Illustrator and Photoshop skills even further in this online course. Learn advanced skills and techniques for quickly illustrating and editing projects necessary for an exciting fast-paced fashion industry. Working in conjunction with Design you will focus on specific skills required to create your first Mentor Project including techniques for developing, applying, and recoloring original textile print designs and custom graphics. You will also learn to add sophisticated details and flourish to your flats using advanced illustrator techniques and along the way you will be polishing your layout and presentation skills. Prerequisite: FSHD323 Digital Design I & II

FSHD 344   Junior Fashion Design I   **3.0 UNITS**
Clothing centered around streetwear, dress and performance markets is accessible to every consumer of that division at the moderate price-level. This course introduces you to your first Mentor project with focus on the Junior market. Using fashion forecast resources, this course enables you to create fabric stories, garment construction and fashion croquis. You will have the opportunity to work with industry designers, with possibility for a sustainability project. By the end of the course, you will produce a collection, including fabric stories with surface treatments and industry level flat sketches to present to your Mentor during sketch selection. You will produce your top design selected by the Mentor in Junior Studio II class. Prerequisite: FSHD245 Sophomore Fashion Design II, Co-requisite: FSHD314 Junior Studio I

FSHD 345   Junior Fashion Design II   **3.0 UNITS**
Self-expression and a focus on your individual design aesthetic is a key element to becoming a good fashion designer. Through this course, you will develop your own design concepts for a series of design competitions focused on the contemporary market. This opportunity allows you to compete in the world with other designers and enables you to gain both exposure and scholarship funds. There will be opportunities for a sustainable project if you so desire. By the end of this course, you will have designed two collections for a contemporary market, a sketch book, fabric stories with treatments and designer level flat sketches aimed at preparing you for an internship in the fashion industry. Prerequisite: FSHD344 Junior Fashion Design I

FSHD 390   Special Topics in Fashion: **3.0 UNITS**
These studio-based courses will explore cross-disciplinary special topics or broader topics in fashion. Course titles and descriptions will vary based upon topic to be determined on the basis of faculty and student interest. The department will provide a listing of course offerings each semester. Prerequisite: Students must have completed their sophomore year courses.

FSHD 400   Senior Studio I   **6.0 UNITS**
The global contemporary Fashion Market is growing at an unprecedented rate. This on-campus course introduces you to construction techniques used by fashion houses. You will learn about bespoke tailoring techniques needed to construct a classic tailored jacket. In preparation for your Senior Mentor Project, your instructors will guide you to drape, draft a pattern and sew a finished garment. Through these projects you will come to understand the handling and constructing of couture fabrics and be challenged to experiment with sophisticated hand-sewing techniques. By the end of the course, you will create a classic tailored jacket and a Mentor-guided higher priced designer garment of your own design. Prerequisite: FSHD301 Junior Studio II; Co-requisite: FSHD462, Fashion Design and Illustration III; Lab Fee: $150

FSHD 401   Senior Studio II   **6.0 UNITS**
Turning your 2-Dimensional design into a high-end luxury garment entails sophisticated and precise construction methods. This in-class course further engages you in the 3-D interpretation and completion of your original designs developed for Mentor Projects. You will perform advanced applications of draping, pattern drafting, classic tailoring, and couture sewing techniques for a luxury label that could include an eveningwear project. You will develop and abide by strict timelines, be proactive and offer suggestions during professional fittings. By the end of the course, you will complete an original designer-level creation, encouraged to work independently and innovatively within the context of a professional working environment.

FSHD 414   Senior Studio I   **6.0 UNITS**
The global contemporary Fashion Market is growing at an unprecedented rate. This on-campus course introduces you to construction techniques used by the industry. You will learn about tailoring techniques needed to construct a classic tailored jacket. In preparation for your Senior Mentor Project, your instructors will guide you to drape, draft a pattern and sew a finished garment. Through these projects you will come to understand the handling and construction of diverse fabrics and experiment with hand-sewing techniques. By the end of the course, you will create a classic tailored jacket and a Mentor-guided look of your own design. Prerequisite: FSHD315 Junior Studio II; Co-requisite: FSHD444 Senior Fashion Design

FSHD 415   Senior Studio II   **6.0 UNITS**
Turning your 2-Dimensional design into a 3D garment entails precise construction methods. This on-campus course further engages you in the 3-D interpretation and completion of your original designs developed for Mentor Projects. You will perform intermediate applications of draping, pattern drafting, classic tailoring, and sewing techniques for a contemporary label that could include an eveningwear project. You will develop and abide by strict

timelines during professional fittings. By the end of the course, you will complete an original designer-level creation, work independently within the context of a professional working environment. Prerequisites: FSHD414 Senior Studio I, FSHD444 Senior Fashion Design.

FSHD 425   Digital Design IV   **1.0 UNIT**
A Technical Pack is a blueprint used in the fashion industry to communicate creative ideas to a factory or clothing "maker". This skill set is required by clothing manufacturers when young designers enter the work force. In this online course, you will walk through the process of developing an industry standard tech pack for two different garments. You will draw technical flats with all the construction details, develop spec sheets, pattern cards, bill of materials, and branding. Upon completion of the class, you will have generated 2 Tech Packs for your Senior Portfolio.

FSHD 426   Digital Portfolio   **1.0 UNIT**
Digital Portfolio will help you pull your portfolio together in a clean, professional, dynamic, and efficient manner. In this class you will follow the lead from the course "Portfolio Development." Design goals and direction will be laid out by "Portfolio Development." However, in "Digital Portfolio" we take that direction, and we digitize it. All your work will be moved into the computer where we will create beautifully laid-out and designed presentations. Your instructor will work one on one with you to help you make a Book that reflects your taste and understanding of your desire to be a Fashion Designer. In addition to making a Portfolio, we will also take your work and make a Portfolio Website that will allow professionals in the industry to view your work anywhere in the world. When this course is complete, not only will you have an amazing Portfolio, but you will also have expanded your knowledge of working within a digital environment.

FSHD 444   Senior Fashion Design   **3.0 UNITS**
Senior students design apparel for Mentor Projects representing the designer/contemporary markets. Working with designers following the fashion industry's seasonal schedule, students design contemporary clothes in better fabrics and finishing techniques. Students learn how to sketch their ideas to capture a look appropriate to the project, develop technical flats using analog and digital methods and create fabric boards with advanced fabric treatments. This course will culminate in a contemporary men's and women's collection. Prerequisite: FSHD345 Junior Fashion Design II; Co-requisite: FSHD414 Senior Studio I

FSHD 445   Senior Portfolio   **3.0 UNITS**
The Fashion Portfolio is the apparatus used to showcase the skills you've acquired as a designer to prospective employers. Students develop professional Portfolios, targeting a specific market in the fashion industry, and produce four collections to that end, each including a concept board, color story, fabric and treatment developments, fashion drawings and technical flats. A Tech Pack developed in Junior Studio is included. This course concludes with a Senior Exhibit Portfolio Review where industry representatives and recruiters provide insightful critique of portfolios and potential job offers. Prerequisite: FSHD444 Senior Fashion Design

FSHD 462   Fashion Design and Illustration III   **4.0 UNITS**
Senior students design apparel alongside professional designers representing the designer/contemporary market. Working within Mentors following the fashion industry's seasonal schedule, students design contemporary clothes and a potential costume project in finer/couture fabrics and finishing techniques. Illustration emphasizes complex sketches to capture a look appropriate to the project. Students will develop technical flats using traditional and digital methods. This on-campus course will culminate in a high-end menswear, or womenswear collection of 12 designs, including technical flats and fabric boards with complex fabric treatments. Prerequisite: FSHD363 Fashion Design and Illustration II, Co-requisite: FSHD400 Senior Studio

FSHD 476   Portfolio Development   **3.0 UNITS**
The Fashion Portfolio is the apparatus used to showcase the skills you've acquired as a designer to prospective employers. Students develop professional Portfolios, targeting a specific market in the fashion industry, and produce four collections to that end, each including a concept board, color story, fabric and treatment developments, illustrations, and technical flats. A Tech Pack developed in Digital Design IV is included. This blended course concludes with a Senior Exhibit Portfolio Review where industry representatives and recruiters provide insightful critique of the portfolios and potential job offers. Optional Costume Portfolio.

FINE ARTS (FINA)

FINA 101   Intro to Fine Arts: Painting and Sculpture   **3.0 UNITS**
Fine Arts Foundation elective. See Browse Courses for specific topics each semester.

FINA 217   Digital Media   **3.0 UNITS**
Digital Media is an introductory course in new media – exposing students to a wide range of digital art-making practices while providing the technical fundamentals that enable students to begin integrating digital methods in their respective practices. The course consists of lectures, demonstrations, and computer lab experience. Particular attention is placed on balancing technical skills with creative content and experimental approaches. We will explore the evolution of new media and the corresponding social and cultural impact. The core software is Adobe Premiere, InDesign and Photoshop.

FINA 374   Studio III: Painting, Photography, Sculpture/New Genres   **3.0 UNITS**
This advanced studio course allows students to learn advanced methods, materials, and techniques in painting, photography, and sculpture/new genres and accomplish advanced projects with the guidance of faculty. The course is also a welcoming place for students and faculty to exchange artistic and cultural attitudes, beliefs, and assumptions to develop together a more open-minded and generative approach to our artmaking and the evaluation of the works of other artists. Attending the Visiting Artist Lecture Series is required. Offered fall semester only.

FINA 375   Studio IV: Painting, Photography, Sculpture/New Genres   **3.0 UNITS**
This production-oriented advanced studio course emphasizes concepts, processes, and visual strategies toward developing an individual studio practice across the three main disciplines. Critiques, seminars, and individual meetings provide insight into contemporary discourses and practices while helping students find the working methods that best suit them. Attending the Visiting Artist Lecture Series is required. Offered spring semester only

FINA 406   Adv. Topics: Embodied Expression, Movement, Creativity and Emotional Intelligence   **3.0 UNITS**
This course allows the student access to a cohesive body of information connected with simultaneous components of subject and object making. A three- or six-hour seminar and/or studio explores the historical and contemporary models and contexts of artistic practice. See the schedule of classes for course offerings and course descriptions. Only certain courses will count for the Sustainability Minor. Please see the Interdisciplinary Studies Director.

FINA 415   Advanced Seminar: All About Love   **3.0 UNITS**
The course allows students access to a cohesive body of information connected with simultaneous components of subject and object making. A three- or six-hour seminar and studio explores the historical and contemporary models and contexts of artistic practice. See Fine Arts Department for additional course descriptions.

FINA 420   Fine Arts Internship   **3.0 UNITS**
This blended course allows students to do an internship under the guidance of faculty and gain experience in the creative and business practices in contemporary art. We will meet on campus in the first five weeks of the course. Students will learn to seek internships, create a compelling application, interview, and work effectively in organizations. The course will be asynchronous for the next nine weeks as students intern at small businesses, start-ups, non-profit art organizations, and artist studios. In the final week, students and faculty will meet to discuss what students have learned from their internship experience and how to average that experience in their developing careers.

FINA 474   Senior Studio I   **6.0 UNITS**
Each student is given their own studio and works with a group of faculty mentors to develop a body of work. Critiques, individual meetings with mentors, visiting artists and critics, and group exhibitions expand students' knowledge base while focusing their practice. Attending the Visiting Artist Lecture Series is required. Prerequisite: FINA375 Studio IV. Offered fall semester only.

FINA 475   Senior Studio II   **6.0 UNITS**
This course is devoted to completing a cohesive body of work culminating in the building and mounting of the senior exhibition. Students continue independent studio practices, discussions, and critiques with mentors, peers, visiting artists, and critics. This course addresses issues that prepare students for a life in art. Attending the Visiting Artist Lecture Series is required. Prerequisite: Senior Studio I. Offered spring semester only.

FINA 499   Out on the Town   **3.0 UNITS**
Studio elective class.

FINE ARTS MEDIA (MEDA)

MEDA 211   Intro to Time-Based Work   **3.0 UNITS**
This is an advanced course in the technical and aesthetic aspects of video, sound and performance. It will emphasize the creative issues involved in a time- based, expressive medium through the discussion of examples. Students will become familiar with current discourses in time based art and receive instruction in digital post-production procedures and advanced technology.

MEDA 320   Time Based Media Projects   **3.0 UNITS**
This is an advanced course in the technical and aesthetic aspects of video, sound and performance. It will emphasize the creative issues involved in a time- based, expressive medium through the discussion of examples. Students will become familiar with current discourses in time based art and receive instruction in digital post-production procedures and advanced technology.

FOUNDATION STUDIO (FNDT)

FNDT 105C   Design and Color   **3.0 UNITS**
This course explores intersections of photography, imaging, language, graphic design, print and digital media in service of sharpening the designer's liberatory voice. Students explore visual language and compositional strategies across image-text fields that lead to innovative design solutions with a focus on social justice and design/publishing's revolutionary potential. Note: The two rotating topics (Documentary Strategies & Design for Change) will be offered bi-annually.

FNDT 103D   Exp Studio:Drawing   **3.0 UNITS**
Students will build on acquired drawing skills and learn to communicate concepts from ideation to object, using drawing as a language. Projects can include working from specific concepts to working from imagination or memory. Courses will be speculative, critical, and design focused. These projects can range from rendering a single object or a figure to building a whole environment and narrating a story. Note: The two rotating topics (Experimental Drawing & Drawing and Concept Visualization) will be offered bi-annually

FNDT 103B   Exp Studio:Drawing   **3.0 UNITS**
Structural drawing, perceptual and conceptual approaches, and figurative drawing skills are expanded through the study of the figure's relation to design, composition, environments, draping, and movement. Students discover personal approaches to drawing and mark-making by experimenting with a variety of traditional and contemporary methods, media, and techniques.

FNDT 104C   Expanded Studio Dimensional St   **3.0 UNITS**
This material studies course will explore the principles and elements of 3D design while offering an introduc-tion to basic 3D modeling software skills. Students will engage in exercises to learn about the political, eco-logical, and historical implicattion of materials while working from concept through iteration to a final product using the model shop and expanding on their existing hand building skills. Note: The two rotating topics (World-Building & Materials and Fab-lab) will be offered bi-annually.

FNDT 104A   Expanded Studio Dimensional Studies: Body by Design   **3.0 UNITS**
This course explores art and design for and about the human and more-than-human body. By focusing on the scale and interaction, the coursework will Investigate making objects in relation to the body. It will incorporate elements such as silhouette, scale, textiles, fibers, sculpture, wearables, time, while considering topics such as disability access, social and political dimension of body and identity, post-humanism, cyborg, anime. Research themes could deal with fashion, ergonomics, participatory/performance art. (open media, clay, or fiber)

FNDT 103A   Expanded Studio Drawing: Drawing From Observation - Dynamics of Color and Space: Still Life   **3.0 UNITS**
In this course, students will explore color, composition, and various drawing materials through working from direct observation. Our unique and exciting compositional setups within the classroom will provide the students with the arena to investigate color relationships, compositional strategies and complexities of ideas. Students will acquire research skills and examine modern and contemporary approaches to cityscape and landscape by experimenting with a wide range of drawing media, and students will begin to shape their personal artistic vision.

FNDT 105A   Expanded Studio Transmedia: Design Cultures   **3.0 UNITS**
This course explores design principles in visual communication across cultural contexts and contemporary media. Students will engage in projects, critiques, and discussions that focus on the relationship between media, platforms, technology, and society. Emphasis is placed on collaborative problem-solving, innovative thinking, and the exploration of media.

FNDT 100   Form and Figure   **3.0 UNITS**
This course provides a comprehensive study in drawing from observation. Students begin by lear ning to draw a simple geometrical form, progressing to rendering objects within a compositional setting and drawing the entire human figure based on an investigation of its anatomical structur es. Students will develop an awar eness of the playful, rhythmic relationships between various components of a compositional sett ing and the human form, constructing drawings which reflect their unique vision. Drawing techniques such as perspective and isometric projection facilitate successful form generation. Skills of r elational measurement, compositional organization, and the accurate placement of form in space, will infor m all drawing activities such as drawing objects, figures, and environments, which will enhance students' per ceptual abilities.

FNDT 101   Color and Design   **3.0 UNITS**
Students will create innovative and impactful designs by lear ning and applying essential elements including, line, shape, color, texture, space, balance, contrast, and rhythm. Utilizing digital and analog tools, students will engage in diverse design challenges, enhancing their pr oblem-solving and critical thinking skills, as well as de veloping their visual literacy and communication abilities. Thr ough this course, students will lear n fundamental concepts relevant to today's creative industries, laying a solid foundation for further explor ations.

FNDT 103   Expanded Studio Drawing   **3.0 UNITS**
These drawing courses are designed to support students in preparation for their chosen majors. Students will experiment with various materials and mediums while exploring a broad spectrum of approaches to drawing as an active form of thinking, seeing, and understanding. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. NOTE: Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 104   Expanded Studio Dimensional Studies   **3.0 UNITS**
Dimensional Studies explores the tangible world, built environment, and object making. Courses are offered in a variety of mediums and investigate a range of topics including spatial analysis and thinking, material experimentation, form design, digital fabrication, hand skills, and building strategies while creating in 3 dimensional and 4-dimensional space. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 105   Expanded Studio Transmedia   **3.0 UNITS**
Transmedia explores strategies for visual communication. A range of cross-disciplinary studio courses investigate multi-model applications for conveying bold ideas through form. Courses invite innovative approaches to contemporary media, strengthening fluency in design principles and cultural literacy. See the schedule of classes for course offerings and course descriptions. Students must complete 6 credits from the following course options: FNDT103,FNDT104 and FNDT105. Students may take 2 courses with the same course number if the topics are different, for example FNDT103A and FNDT103B.

FNDT 150   Major Studio Elective   **3.0 UNITS**
The Foundation Major elective is the introductory course in each major. Courses are numbered as ANIM101, GAME101, etc. The Foundation major elective will introduce students to a range of foundational principles in the major's field. Students will develop a way of thinking and approaching work in the field and will have the opportunity to develop a self-reflective, creative practice. Social, cultural and/or environmental issues facing the field will also be addressed.

FRENCH - LMU (FREN)

FREN 2101   French 1   **4.0 UNITS**

GAMES AND ENTERTAINMENT (GAME)

GAME 101   Drawing to Digital for Games   **3.0 UNITS**
Game and Entertainment Design Foundation elective. See Browse Courses for specific topics each semester.

GAME 200   Game Design I   **3.0 UNITS**
A foundational understanding of the basics of game designing for various platforms like PCs, laptops, mobiles, TVs, and tablets. The course teaches students the technical skills required for creating games, including industry pipelines to make real-time development projects, team positions, and tools.

GAME 210   Game Engine Fundamentals   **3.0 UNITS**
The Game Engine Fundamentals course is a 15-week program that is divided into five main areas of study. The first part of the course introduces students to game engines, their history, types, and architecture, which includes scene management and rendering pipelines. The second part delves into asset management, importing assets, resource management, and guides students in creating a simple game. The third part covers physics, collision detection and response, as well as input methods such as keyboard, mouse, and touch input. The fourth part focuses on cross-platform development, API abstraction, platform-specific optimizations, and advanced rendering techniques, such as lighting, shading, and post-processing effects. The fifth and final part explores advanced physics, audio implementation, and optimization techniques such as profiling, debugging, and performance tuning, culminating in a final project where students apply their knowledge in creating their own game using the game engine.

GAME 215   Color and Lighting for Games   **3.0 UNITS**
This course on Color and Lighting for Games covers the fundamentals of color theory and lighting techniques as they relate to game development. The course is broken down into five topics: Fundamentals of Color Theory, Lighting Techniques, Color and Mood, Dynamic Lighting Effects, and Case Studies and Best Practices. Throughout the course, students will learn how to use color and lighting effectively in game design, through assignments and projects that reinforce their learning and allow them to apply the techniques and concepts discussed in class. By the end of the course, students will have a comprehensive understanding of color and lighting for games, and a portfolio of work showcasing their skills in this area.

GAME 220   Design & Drawing for Game I   **3.0 UNITS**
This 15-week Design and Drawing for Games course covers the fundamentals of game art and design, Props and Assets, character and environment design, storytelling, worldbuilding, animation, and portfolio development. Students will learn to create 2D and 3D game assets, design game characters and environments, translate game scripts, and develop a personal brand for their game design portfolio. The course includes a mid-term project, where students will create a concept art package for a game character or environment, and a final project where students will design a game level or world that includes a narrative, environment design, character design, and animation, and present it in the form of a pitch package with a playable demo or video walkthrough. By the end of the course, students will have the skills and knowledge to prepare for a career in game art and design.

GAME 250   Game Studio Project I   **3.0 UNITS**
Students will work solo to create a real-time development project, synergizing skills learned in all previous courses. Students will be exposed to the self-management and importance of project management in a controlled environment

GAME 260   3D for Game and Entertainment I   **3.0 UNITS**
In 3D for Games and Entertainment, students will learn the basics of game art design. Using software such as Maya, Blender, Substance Painter, and Photoshop. The course includes topics such as creating and manipulating 3D models, applying textures and materials, designing game environments, and basic principles of lighting and shading. The course also covers intermediate 3D game art modeling, Unreal Engine, advanced texturing and surfacing, set dressing and lighting, and a final project that involves developing a small area of a game or game experience using Unreal Engine. Students will gain a solid foundation in game art design and CG content creation and will have the opportunity to apply their skills in creating a game art environment or game experience.

GAME 300   Game Design II   **3.0 UNITS**
In this course, students continue their journey into real-time development. Students are introduced to other applications for the Unreal Game engine outside of games. Students will be introduced to basic blueprints, character and animation implementation, and tools and plugins to help create experiences that will bring their projects to life. Students will complete a complex and unique final project that will be built upon the skills learned in class each week for their portfolio.

GAME 310   Animal & Creature Drawing   **3.0 UNITS**
Elective courses in Game and Entertainment Design. See schedule of classes for course offerings and course descriptions.

GAME 315   Advanced Game Creative with USC I   **3.0 UNITS**

GAME 316   Advanced Game Creative with USC II   **3.0 UNITS**

GAME 317   Advanced Game Creative with USC III   **3.0 UNITS**
This course provides an immersive, professional-style game development experience for advanced undergraduate and graduate students. Students from Design, Computer Science-Games, and other disciplines will collaborate on large-scale team projects, mirroring the real-world development pipeline of the gaming industry. Through teamwork, technical execution, and creative vision, students will design and develop a polished, playable game demo over the course of the academic year.

GAME 320   Cultural and Social Design for Game   **3.0 UNITS**
This course will focus on the cultural and social aspects of game through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of the SSCI LAS requirement: Cultural and Social Design for Games

GAME 332   VFX for Games   **3.0 UNITS**
This 15-week VFX course for games using Unreal Engine and Houdini is divided into five topics. In the first three weeks, students will learn the fundamentals of VFX creation in Unreal Engine, including an introduction to Niagara, Unreal's VFX system, and basic workflows in Houdini. In weeks four to six, they will explore advanced techniques for controlling particle behavior and creating complex VFX using both Unreal Engine and Houdini. Weeks seven to nine focus on lighting and post-processing effects, while weeks ten to twelve cover creating VFX for different types of games. The final three weeks are dedicated to a hands-on project, where students will apply the concepts and techniques covered in the course to create a custom VFX sequence using Unreal Engine, Houdini, and Niagara. The course will provide students with a comprehensive understanding of VFX workflows and techniques for games, as well as practical experience creating VFX sequences for different genres of games. May be taken in either the fall or spring semesters. Must be completed in the junior year.

GAME 350   Game Studio Project II   **3.0 UNITS**
For Game Studio Project II, students will work in teams to develop a game experience using the principles and techniques learned in all prior courses. The project will be developed in Unreal Engine and will be a more complex and ambitious experience than the solo project in Game Studio Course I. Students will be required to work collaboratively and use best practices in project management, version control, and QA. The group project will be presented during the last week of the course, where each team will showcase their game to the class. Additionally, throughout the course, students will be encouraged to build a portfolio of their work and incorporate it into their résumé. By the end of the course, students will have a solid understanding of advanced game design principles, programming and game mechanics, game art and sound design, project management and collaboration, and portfolio creation for game development.

GAME 360   3D for Game and Entertainment II   **3.0 UNITS**
The 3D for Game and Entertainment II course is a 15-week program that focuses on character modeling, hero piece asset creation, advanced material/PBR creation, texturing and UV mapping, character prop creation, lighting, rendering, and portfolio presentation. Students will learn the fundamentals of character modeling, including anatomy, topology, and sculpting techniques, and create a simple character model based on provided concept art. They will also create hero piece assets, learn advanced material and physically based rendering techniques, texture the models using industry-standard software, and create character props such as weapons, tools, or accessories. The course will culminate in a portfolio review and presentation.

GAME 440   Practicum in Game and Entertainment Design II   **3.0 UNITS**
Further advanced tools and techniques, with an emphasis on creating work that supports the storytelling and interactive aspects of games and entertainment. Concept artists, modelers, lighters, and so on, will have their own areas of study. Prerequisite: GAME430 Practivum in Games and Entertainment I

GAME 445   Technical Game Arts   **3.0 UNITS**
The Technical Game Art class is a 15-week course divided into five topics that introduce Real-time Development experiences, including In Camera VFX (ICVFX), AR/VR, Virtual Production, and project integration tools. The course begins with an overview of the industry, followed by deep dives into ICVFX, AR/VR, and Virtual Production, covering their principles, technical aspects, and software tools. The final topic brings everything together by applying the learned knowledge to a project, exploring project management techniques and collaboration tools to ensure a successful outcome. By the end of the course, students will have gained a strong foundation in Real-time Development experiences and experience using industry-standard tools, which will benefit their future careers in the gaming or film industry.

GAME 450   Game Senior Project I   **3.0 UNITS**
Game Senior Project I is a 15-week course that focuses on creating a real-time development project that meets the criteria for a Senior show and creating work for a high-level portfolio. The course is divided into five sections, with the first section focusing on project planning and proposal, the second section focusing on project design and development, the third section focusing on project testing and refinement, the fourth section focusing on portfolio creation, and the fifth section focusing on networking and final presentations. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a real-time project, refined it based on user feedback, and created work for a high-level portfolio while establishing a professional network.

GAME 451   Game Senior Project II   **3.0 UNITS**
Game Senior Project II is a 15-week course that builds upon the skills learned in Game Senior Project I. The course is divided into five sections, with the first section focusing on advanced project development, the second section focusing on project testing and iteration, the third section focusing on multiplayer and online game development, the fourth section focusing on game business and marketing, and the fifth section focusing on final project presentation and industry networking. Throughout the course, students will be encouraged to establish mentors and maintain a professional network to accomplish their goals. By the end of the course, students will have developed a more advanced real-time project, refined it based on user feedback, learned about advanced game development techniques such as multiplayer and online gameplay, and established relationships with industry professionals.

GAME 460   3D for Game and Entertainment III   **3.0 UNITS**
3D for Game Entertainment III is a 15-week course focused on teaching students about pipelines for level assembly, optimization, and workflows to take their game projects to a final status. The course will be divided into 5 topics: Introduction to Game Entertainment III, Level Assembly, Optimization, Workflows, and Finalizing and Presenting. Throughout the course, students will learn about game development processes, level design, optimization techniques, workflow management, and adding finishing touches to their games. The course aims to equip students with the necessary skills to present their projects in a professional manner and succeed in the gaming industry.

GAME 470   Game Internship   **3.0 UNITS**
The 15-week Game Internship course is divided into two parts. The first part, spanning weeks 1-7, focuses on establishing networks within the internship. Students will learn about professionalism, networking, communication skills, goal setting, time management, and professional development. In the second part, spanning weeks 8-15, students will focus on creating a portfolio that includes work and experience from the internship. They will learn about portfolio basics, content, presentation, and review. The course will culminate in a final sharing session where students will present their portfolios and share their experiences and lessons learned during the internship, receiving feedback and support from their peers and faculty.

GAME 490   Advanced Texture Painting   **3.0 UNITS**
As the industries are ever evolving, these electives help students refine and extend their skill set, while addressing current advancements in tools and techniques. Course topics vary each semester.

GRADUATE STUDIES (GRAD)

GRAD 550   Adv. Topics: Embodied Expression, Movement, Creativity and Emotional Intelligence   **3.0 UNITS**
Graduate level elective class. See the schedule of classes for course offering and course descriptions.

GRAD 630   Collaborative Projects   **3.0 UNITS**
Collaborative Projects is a seminar/studio class. Students form collaborative relationships to produce and exhibit collaborative projects - installations, performances, sound works, events, happenings, etc. that culminate in the Mid-Residency Exhibition. Collaborative projects will activate traditional and non-traditional exhibition spaces throughout the Otis campus in the spirit of an international art biannual. Students will publicly present, document, and archive their work. Students acquire experiential and theoretical knowledge pertaining to collaborative art production, curation, pedagogy, diplomacy, consensus-building marketing, and community leadership.

GRAD 650   Performance, cakewalk   **3.0 UNITS**
Graduate level elective class. See Browse Courses for specific topics each semester.

GRAD 654   Installation Art Practices   **3.0 UNITS**

GRAD 700   Graduate Studio   **3.0 UNITS**
Graduate Studio is a 6-hour course structured around dedicated studio time and one-on-one studio visits between students and faculty members. This two-year course sequence focuses on each individual student's practice, specifically directed toward an interrogation of the aesthetic, conceptual, and technical issues arising out of their work. It will culminate in the end-of-semester review during which the student and a review committee will discuss and evaluate the development of the student's practice as observed over the course of the semester. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 740   Graduate Critique   **3.0 UNITS**
In this two-year course sequence, all graduate students, regardless of media, individually present work to their peers and faculty for an in-depth discussion about the work's material, theoretical, and cultural positioning. The course provides time and space to collectively examine how an artist's work is perceived as a public statement and how one's work exists in the world. Prerequisite: The four course sequence must be taken successively and may not be taken concurrently.

GRAD 776   Professional Practice   **3.0 UNITS**
We will be analyzing the definition of PROFESSIONAL and PRACTICE, singularly and in tandem and how they apply to real life situations. In relationship to determining how "one presents onself" we will access and research grants, residencies, jobs, etc. Applications, contacts, and experience will be both

analyzed and explored. In addition basic artist survival skills and sustainability issues will be discussed in depth. As this is a seminar; discussion and presentation in conjunction with outside support, will form the basis of this course. Student interests and concerns will be addressed. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

GRAD 777   Exhibition Preparation   **3.0 UNITS**
The goal of this course is to seek out both group and individual needs to attain one's goals as they relate to the presentation and production of an individual Thesis Show. In addition, issues that deal with and about art post-graduation will also be addressed. What it means to be an artist will be challenged and articulated for each individual. Attendance at Visiting Artists Lecture Series (VALS) is required as part of this course.

GRAD 799   Installation Art Practices   **0.5 UNITS**

GRAPHIC DESIGN (GDES)

GDES 101   Introduction to Graphic Design   **3.0 UNITS**
Graphic Design Foundation elective. See Browse Courses for specific topics each semester.

GDES 200   Graphic Design I   **3.0 UNITS**
Graphic Design I is an introduction to the mechanics (technique), histories, culture and methodologies (practice and process) used by graphic designers in visual communication. Through exercises and projects, you will develop a process of articulating ideas, research, concept generation, experimentation, form-making, and craft skills. The coursework will oscillate between technique and culture throughout the semester, working incrementally from basic form-making to complex meaning and composition.

GDES 201   Graphic Design II   **3.0 UNITS**
Graphic Design II is the continued exploration of the visual communication theories and methodologies commonly used by graphic designers. Through exercises and projects emphasizing type + image integration and visual + cultural literacy, you will continue to develop a work process that involves articulation of intent, visual research, concept generating, form-making, and craft skills.

GDES 220   Typography I   **3.0 UNITS**
Typography I introduces the mechanics (technique) and concepts (culture) of typographic applications. Throughout the semester's coursework, the class will oscillate between learning basic typesetting techniques and reading about and discussing the cultural conversations that typography can be part of. The coursework evolves incrementally: beginning with single letterforms and sentences to paragraphs and complex typographic applications.

GDES 221   Typography II   **3.0 UNITS**
Typography II is a continuation of Typography 1, extending the typographic palette beyond form and composition to focus on the detail in typography—letter-spacing, typesetting, typographic history, type systems, typeface familiarity, complex layout, grid structures, and multi-page applications. You will work on assignments with rigorous parameters, increasing in complexity throughout the semester. You will develop and refine your typographic sensibility and design process. Prerequisite: GDES220 Typography I or approval of Chair

GDES 300   Graphic Design III   **3.0 UNITS**
Graphic Design III is an increasingly sophisticated examination of design and its applications. Students broaden their understanding of effective design as a visual language in print and screen-based media. Assignments focus on form-making and problem-solving for specific audiences, using research, prototyping, testing, iteration, and developing proposals. The course builds on the skills learned in Graphic Design 1 and 2, preparing students to practice professionally in the 21 century. Prerequisite: GRDS201 Graphic Design II or approval of Chair

GDES 301   Graphic Design IV   **3.0 UNITS**
Graphic Design IV expands and builds upon the previous course by focusing on experimentation with form and media and building increasingly complex visual systems and narratives. Students cultivate their interests via research and begin developing their working methods, emphasizing presentation skills, iteration, articulation, and refinement. Throughout the course, students develop visual narratives and apply them to print and screen-based media, including 2d, 3d, 4d, using analog and digital methods. Prerequisite: GRDS300 Graphic Design III

GDES 314   Experimental Type   **3.0 UNITS**
Beyond the crystal goblet, can we view typography as a playground? By focusing on its molecular basis and questioning the ubiquitous design unit, the course centers on advanced composition in Typography. It explores the denotative, connotative, and conceptual potential of typography through experimentation with letters, words, and language. Students will work on a series of typographic projects across 2D, 3D, and time-based design, utilizing tools such as After Effects and code, as well as type design software like Glyphs and RoboFont. Students will be expected to push the boundaries of forms and mediums, engaging in experimental form-making and image-making using generative and iterative approaches to create expressive, dynamic, and interactive typography.

GDES 320   Typography III   **3.0 UNITS**
Typography III focuses on designing and building complex typographic systems/structures for printed publications. The publication design process will help you understand and create relationships between these systems and your concept, content, and narrative. We will place heavy emphasis on understanding an advanced application of grid systems and typographic detailing and refinement (typographic craft). Through rigorous research and design presentations, you will also expand your visual literacy in contemporary and historical publications.

GDES 321   Typography IV   **3.0 UNITS**
Typography IV is an expansion of typographic fundamentals from Type 1–3 (hierarchy, composition, system, structure, sequence/ pacing) to new contexts and mediums. Although projects are more self-directed and outcomes are more open-ended, assessment of work is still based on functionality, legibility in context, visual interest, and typographic craft regardless of medium, scale, or format. The projects emphasize a dialogue between classroom work and the larger cultural and historical context. There is no programming requirement for this class.

GDES 440   Senior Project(Graphic Design)   **3.0 UNITS**
In Senior Project/Seminar, students explore conceptual, theoretical, and experimental communications problems in graphic design, offering them the opportunity to integrate their personal vision with professional goals into a semester-long project. The course schedule is self-driven—each student is expected to define the goals, milestones, and schedule of their project. Weekly lectures, demonstrations, and workshops supplement the coursework and

expand/expose students to a variety of technical and critical approaches defining a well-rounded contemporary practice. The result is a well-researched, thoroughly executed project representative of the culmination of education up to this point.

GDES 453   Systems and Identity   3.0 UNITS
In this course, students explore the past, present, and future of visual identity, branding, and systems design. The course asks whether a static mark can truly represent an organization in our hyper-connected global world. The work produced in the course focuses on identity as a system (typography, voice, color, application, etc...) of interrelated parts derived from a research-driven, conceptual premise. In seeking more nuanced approaches, students will create a distinctive visual identity system through a structured, yet experimental process. They will work through iterations and build an expansive visual language that moves beyond traditional branding applications. While developing these applied skills, students will begin to think about these practices critically from socio-political contexts as well as potentially through speculative investigations and world-building. Class Level Eligibility: Must be at Senior Level Standing

GDES 458   Advanced Imagemaking   3.0 UNITS
This class will be an exploration into practicing, contextualizing, and reflecting on image-making processes that you are already familiar with, as well as discovering new ways of making. We will connect reading to making, ideas to making, research to making, and language to making through weekly exercises. The goal is for you to understand and articulate processes that can become tools for making and investigating your subject matter in a critical way. Open to juniors, seniors and graduate students only.

GDES 459   Visual Language   3.0 UNITS
In this course, we will investigate what visual language is through reading, discussion, and your creation of a visual language and a multi-modal campaign (series of separate but related components) built in response to a concept, audience, and context determined by you. The project outcomes can be in any format, medium or scale. The class is structured as a studio workshop. Class time will be used for work, discussion, and visual research with your classmates and teachers. Critique will be both individual and group-based.

GDES 472   Designing for Digital Products   3.0 UNITS
This course investigates fundamental principles of user experience (UX) and user interface (UI) design through a graphic design lens. Students will learn how to create intuitive, visually appealing digital products that respond to user needs articulated through research. Key topics include user-centered design methodologies, information architecture and wireframing, visual design principles for digital interfaces, prototyping and interaction design, usability testing and iterative design processes, and current trends in digital product design. Through hands-on projects and critiques, students will develop a series of interactive projects while gaining practical skills valued in today's digital design industry. Open to juniors, seniors and graduate students only.

GRAPHIC DESIGN (GRDS)

GRDS 550   ST: Design and Worldbuilding   3.0 UNITS
Studio Elective Courses. Check the schedule of classes for course offerings.

GRDS 601   Seminar Studio I   3.0 UNITS
Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This fourterm course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 602   Seminar Studio II   3.0 UNITS
Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 621   ST: Design and Worldbuilding   3.0 UNITS
The projects assigned use theory, methodology, and personal interests to expand student, knowledge of typography and its role within graphic design. Each section host a visiting type designer who will workshop with the students and establish the beginnings of designing a typeface.

GRDS 623   Graduate Typography   3.0 UNITS
This course is a graduate level exploration to the fundamentals of typography and typographic systems and letterforms. Students will explore the theoretical and applied use of type as visual form and visible language by learning the nuances of type families, texture, hierarchy, grid, composition, and sequence.

GRDS 655   Seminar Round Table   3.0 UNITS
Students discuss issues pertaining to being an active designer in the world. Led by guests invited from various disciplines, students look at design from philosophic, historical, and theoretical positions. The course provides an opportunity to speak at length about the value of inquiry, research, and engagement in issues and disciplines outside graphic design. On occasion students will have the opportunity to engage with Visiting Artists in special events or meetings.

GRDS 665   Entrepreneurship   3.0 UNITS
This course is designed for graduate students that are interested in starting their own business and or freelance business. Students will be introduced to all facets of running a business, such as writing a business plan, promotion, developing a client base, pricing, legal and financial aspects as well as ethical standards. Students will be exposed to guest lectures from a variety of business areas such as small business owners, a life coach, accountant/bookkeeper and an attorney, on the proper way to set-up and run a business.

GRDS 670   Graduate Studio   3.0 UNITS
Graduate Studio focuses on critical iterative processes. Throughout the course students cultivate working methodologies to discover varied outcomes through working fluidly across media. With guidance and mentorship from the faculty, students begin to develop a body of work reflecting their interests, agendas, and values.

GRDS 701 **Seminar Studio III** **3.0 UNITS**
Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, dis- course. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 702 **Seminar Studio IV** **3.0 UNITS**
Students work in a collaborative learning environment on a theme-based project, focusing on inquiry, research, discourse. This four-term course encourages a wide range of opinions, with course outcomes exploring media literacy and critical form- making. Faculty will provide the opportunity for in-depth discussion and critique as well as to connect research to conceptual and formal investigation. Together students and faculty work collectively and individually to produce publishable outcomes that will contribute to design scholarship.

GRDS 711 **Visiting Artists Projects** **3.0 UNITS**
Visiting Artist Projects consists of workshops where visiting artists from around the United States and abroad lead groups of students through a short-term, socially relevant themed projects. Outcomes fall somewhere between speculation and real-world design solutions with an aim to inspire all parties to apply design thinking in an innovative way.

GRDS 770 **Final Studio** **6.0 UNITS**
Unlike a traditional thesis project our department recognizes the value of finishing the degree with a series of wide-ranging artifacts. Based on the work and research generated in the previous 3 semesters, students frame a position and a future practice that moves seamlessly through time and space.

GRAPHIC DESIGN/ILLUSTRATION (GDIL)

GDIL 333 **Special Topics: RISO Print** **3.0 UNITS**

GDIL 334 **Making with AI Generators** **3.0 UNITS**
This class uses established methods for idea and image-generation while employing new tools. Students work with faculty to generate and test guidelines for the use of AI art generators in projects and portfolios. Constrained projects pave the way for open-ended prompts. Guests include artists/designers who use AI in their process, as well as those that have been included in AI training sets without their permission. Students will present their work thus far to establish a baseline for their output. We will hold each other accountable, seek transparency, and test the boundaries of the tools and the value of their use in our creative practices. Open to juniors, seniors and graduate students only.

GDIL 354 **Professional Practice** **3.0 UNITS**
This course will establish a baseline understanding of professionalism in the Graphic Design and Illustration fields. We will define these terms collectively and consider how being a professional reflects our communication (written and spoken), preparation, business acumen, and presentation. Additionally, this course will ask you to reflect and expand your perspectives and working process. What is often overlooked in school is the ability to think/act as both an artist and a business-minded individual——understanding that the two are intertwined. May be taken in either fall or spring, must be completed in the junior year

GDIL 357 **Editorial Illustration** **3.0 UNITS**
This intermediate course develops conceptual strategies available to contemporary illustrators, focusing on work appropriate for editorial situations and collaborations with art directors in a professional context. This course enables students to create works establishing a relationship between text, idea, and image. Creative approaches in terms of content, execution, chance-taking, personal voice, and future marketplaces are stressed. Portfolio-level projects are assigned, focusing on idea creation, strengthening concepts, experimentation, and appropriate execution strategies.

GDIL 410 **Entrepreneurship 101** **3.0 UNITS**
An intensive introduction to all facets of running a business - marketing, promotion, developing a client base, pricing, legal, ethical, financial aspects, mindset, networking, interviewing. Students will learn best practices from: creative agencies, creative directors, Otis Alumna, clients, an accountant, an attorney, business coach and recruiters. This course teaches students how to plan, establish, and sustain a meaningful studio, office, and/or agency. It also provides tools and insights for sustaining winning strategies and securing FT work within an organization - integrating with career services, job fairs and recruitment opportunities. Eligibility: senior level standing. Must be at senior level standing.

GDIL 442 **Exhibition Design/Senior Show** **3.0 UNITS**
Exhibition: Senior Show is a course in which students work collaboratively to conceptualize, design, and produce the Senior Exhibitions showcasing the work of Seniors in the Graphic Design and Illustration Departments at Otis College of Art & Design. Forming a real team and working closely with the faculties, from pitching the curation concept, designing identity, to the entire execution - this is a valuable experience for students to rehearse their leadership, curation, environmental & identity design, digital campaign, career networking and communication skills before stepping into the professional career. Aside from the main thread, there will be hands-on demos based on needs, including but not limited to: environmental design presentation, creative coding and web architecture, advanced print production, etc. Open to juniors and seniors. Prerequisite: GDES301 or ILUS301

GDIL 456 **Bookmaking Projects** **3.0 UNITS**
This course introduces the skills, craft, materials and techniques used in making book structures by hand. Course assignments have the potential to evolve into creative and personal objects that hold visual work and text. Students learn book binding methods involving paper folding, cutting, sewing, gluing, and ways of assembling individual sheets, signatures and text blocks with or without covers. Students produce a sample collection of book structure options and explore structures that can hold content and expression of meaning.

GDIL 499 **ST: Design and Worldbuilding** **3.0 UNITS**
Studio elective class.

ILLUSTRATION (ILUS)

ILUS 101 **Introduction to Illustration** **3.0 UNITS**
Illustration Foundation elective. See Browse Courses for specific topics each semester.

ILUS 200   Illustration I   **3.0 UNITS**
Professional Illustrators capture your attention and compel you to look further. Illustration 1 is an introduction to the visual communication methodologies that illustrators use to craft that skill. You will explore exercises and projects in diverse media to begin to develop a work process that involves visual research, observational drawing, concept generation, and journalistic storytelling. Projects are designed to encourage expression of your individual voice. The coursework includes historical and contemporary perspectives that have shaped history and culture,and examines the range of markets available to illustrators.

ILUS 201   Illustration II   **3.0 UNITS**
Effective illustration can inform, provoke, and delight while shaping ideas and culture. Illustration II is a continued exploration of the visual communication theories and methodologies used by professional illustrators. Through exercises and projects emphasizing concept development, cultural literacy, type and metaphor, this course will further develop personal image-making, visual problem solving, editorial and narrative methods. Projects will focus on strategies and skills through the conditions of real world illustration projects.

ILUS 212   Drawing and Painting I   **3.0 UNITS**
This first part of consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting. Drawing and Painting I will focus on value, line, observation, material, composition, color, narrative, and development of your unique style and perspective through the form of visual communication.

ILUS 213   Drawing and Painting II   **3.0 UNITS**
This second part of Illustration core consecutive courses for sophomore illustrators introduces students to a variety of materials and techniques in terms of drawing and painting with a focus on perspective, hard surfaces, materials, and rendering in color.

ILUS 220   Type for Illustrators   **3.0 UNITS**
In this class we will apply your skills as illustrators to the practice of fine typography. We will examine the ways in which illustration and typography intersect and the ways in which they differ. You'll be introduced to typographic theory and challenged to expand your type vocabulary, especially in regards to experimentation and typographic complexity. As illustrators, you are well acquainted with form and meaning; you'll be surprised at how closely related your experience is to the practice of typography. We will look for the unique connections that illustrators have to typography – a practice all designers need to master as a part of their skill set. The sequence of projects is designed to start focused and then expand in scope, so that you have time to become acquainted with fundamental concepts and build on them over the course of the semester.

ILUS 300   Illustration III   **3.0 UNITS**
An increasingly sophisticated examination of illustration concepts and their applications; students broaden their understanding of illustration as visual language in projects that involve research and analysis, focusing on image making, aesthetics, message clarity, audience, and intent with refined use of media and technique. Prerequisite: ILUS201 Illustration II or approval of Chair

ILUS 301   Illustration IV   **3.0 UNITS**
An increasingly sophisticated examination of illustration concepts and their applications; students broaden their understanding of illustration as visual language in projects that involve research and analysis, focusing on image making, aesthetics, message, audience, and intent with refined use of media and technique. Prerequisite: For ILUS301 is ILUS300

ILUS 312   Drawing and Painting III   **3.0 UNITS**
Students will be introduced to a variety of real-world illustration assignments and explore a variety of mediums, both traditional and digital, through image making, visual communication, message, creativity and intent. Emphasis will be on improving drawing and observational skills while developing a work process that includes research and analysis, ideation, media exploration, color theory and visual literacy. This course includes demonstrations in digital applications and includes professional illustration practices such as file management and presentation.

ILUS 313   Drawing and Painting IV   **3.0 UNITS**
This course further develops students' use and understanding of advanced tools and applications defining the most forward-thinking sectors of contemporary Illustration. Students improve technical skills in both traditional and experimental media with regard to line, form, lighting, and space, while focusing on critical and conceptual issues framing the future of Illustration. Students create ambitious projects designed to engage expansive and dispersed audiences. Intensive real-world assignments prepare students for professional experience in diverse established and exploratory venues. Prerequisite: ILUS312 Drawing and Painting III

ILUS 330   Visual Storytelling   **3.0 UNITS**
How can we best engage, motivate, and drive emotion through imagery? In this class students will do various exercises to explore compositional elements, acting, symbolism, and implied narrative. Our midterm will be a one page script, that we'll then create artwork from for the final. Each week we'll study various artworks from literature, painting, script writing and film (live-action and animated), to discuss the differences between genres and how visual communication is used. And In weekly in-class exercises, students will experiment with different devices. Lectures include case studies, commercial techniques, and contemporary methodologies. We'll utilize a sketchbook, traditional mediums, and various programs for compositing/digitizing artwork (Photoshop, After Effects, Toonboom Harmony.)

ILUS 358   Special Topics: Digital Paths   **3.0 UNITS**
Special topic course. See schedule of classes for course offerings and course descriptions.

ILUS 363   Alternative Materials and Processes   **3.0 UNITS**
Course focuses on the use of mixed media and alternative materials for image construction. The class explores the "use values" of different mediums and how they affect communication. Some materials explored are graphite, paint, paper collage, cloth, digital collage, transfers, oil bars, duct tape, resin, inks, wax, and more. Exploring and experimenting with different combinations of materials is required. Class instruction will include lectures, assigned projects, media demonstrations, readings, slide presentations, and group feedback. Prerequisite: ILUS301 Illustration IV

ILUS 440   Senior Project (Illustration)   **3.0 UNITS**
The purpose of this course is to develop complete and professional work derived from research collected during the previous semester in Senior Project Research. In this course, each student will define their own goals, methodologies and schedule of deadlines. We will address appropriate target audiences for each project and the media to best reach those audiences, as well as the specific direction each student wishes to pursue as a professional artist. Emphasis is placed on physical realization of each project's content. Students explore conceptual, theoretical, experimental communications problems

offering them the opportunity to integrate personal vision with professional goals. In cross-disciplinary teams facilitated by faculty advisors, students define the scope and objectives of their inquiry and outline research and production methodologies.

ILUS 470   Internship for Illustrators   3.0 UNITS

INTERDISCIPLINARY STUDIES (INTR)

INTR 330   Creative Industry Internship   3.0 UNITS
Upper division studio courses that facilitate student work across media, genres and disciplines, while also developing skills in interdisciplinary thinking in a supportive community. Topics vary each semester. Examples include: Design Lab, Interdisciplinary Practices, Interdisciplinary Career Pathways Fulfills studio electives.

LIBERAL STUDIES (LIBS)

LIBS 115   Foundation Seminar: Thought Lab 2   3.0 UNITS
Where do your curiosities in the world lead you? How can you transform general interest in a subject into specific knowledge that can fuel a creative practice? Building on concepts from Thought Lab I, Thought Lab II will allow you to take a deep dive into a themed seminar of your choosing. Seminar themes may range from environmental and social justice to narrative to technology. These courses will invite you to explore a special topic through a variety of media to deepen your understanding of key events that have shaped its history. By the end of the semester, you will complete assignments which may include an exploratory essay or a research paper, and ultimately, a creative translation of course themes.

LIBS 210   Contemporary Fashion Issues   3.0 UNITS
FASHION is a cultural and social phenomenon that involves us all. The most visible form of consumption and most relevant form of non-verbal communication, fashion is also a representation and objectification of our identity, enabling and supporting social roles and structures. It accords us individuality while validating our group belongings. It is, in short, a fascinating and befuddling aspect of human history, and one that deserves attention. Particularly now. Since the last decades of the twentieth century, what we traditionally consider 'fashion' has morphed into a global practice that is subverting its own traditions and jeopardizing our environmental survival. Fast Fashion is a multi-billion-dollar business and one of the biggest causes of global pollution and waste production. Widely recognized but not addressed in commercial fashion practices, the destructive power of fast fashion is now – and in the face of mounting social pressure – becoming a pivotal concern for the survival of the industry. This course aims at promoting an understanding of the most pressing issues in the field of fashion. It examines fashion theories, trends, and culture from the early 20th century to the present through the lenses of globalism, gender identity, environmental concerns, labor injustice, and ethical issues. Students will explore recent revolutions, present conditions, and possible future scenarios in the fashion world and be encouraged to question the conventional assumptions of fashion history, particularly as they determined the current crisis. Selected topics will include: the early development of the fashion industry and mid-century democratization of dress, fashion revolutions at the end of the last millennium, the phenomenon of fast fashion and the environmental crisis it caused – including current research and future trends. Required for Fashion Design majors.

LIBS 212   Creative Writing Workshop I   3.0 UNITS
An introduction to the experience and practice of writing fiction and poetry. Includes visits by guest writers in a workshop setting. Students produce a portfolio of writing in revised and publishable form. This course is restricted to students who have submitted a writing sample to the Liberal Studies Department. Required for Creative Writing minors.

LIBS 214   Hong Kong Cinema   3.0 UNITS
These courses introduce students to special topics in the liberal arts and sciences that can inspire them to explore new intellectual and creative pathways. See "Browse Courses", "LAS electives" for the sections offered this semester.

LIBS 219   Methods and Materials   3.0 UNITS
Methods and Materials gives students a strong foundation for understanding the vast assortment of materials and methods by which things are built, made, manufactured with an emphasis on toys and consumer products. One will learn the fundamental technical means for successfully expressing a design concept in mass production. Manufacturing will also be discussed and learned from a world view highlighting in depth global centric topics like Factory Conditions, Product Safety, Sustainability and Up and Recycling. Finally, while the course will be comprehensive and rigorous, the speakers, lectures and course activities will infuse the excitement of what it's like to truly understand and participate in the miraculous supply change of goods and services and view this dynamic system as everything comes together to make, develop, and manufacture products. Required of all Toy Design majors. Available to non-majors as approved by the Chair.

LIBS 238   Sophomore Seminar II   3.0 UNITS
Sophomore Seminar 2 builds on Seminar 1 through the lens of late modern and postmodern theorists and artists who challenge philosophical canons and investigate the social function of art. Students analyze the ideological dimensions of culture and artistic practice, including the ways land, space, and ecological systems inform meaning and power. The course continues to emphasize close reading, critical listening, open-minded discussion, and critical making, supporting students as they refine their capacity for thoughtful, critically engaged artmaking. Required for Fine Arts majors. Available to non-majors as approved by the Chair.

LIBS 311   Teaching for Learning I   3.0 UNITS
Art and Design educators make a huge impact on students of all ages. The arts are often what keep K- 12 students engaged in learning, whether it is taught as a discrete subject or integrated into other subjects. Art and design education can help adult learners develop new skills and stay connected to their communities. In this introductory course, you will gain a historical overview of education and art/design development theories and philosophies while exploring models of art and design education such as student-centered, discipline-based, standards-based, and integration-based. You will observe local elementary, middle, high school and community classrooms to understand how all this theory plays out in practice. You will also learn to write your own lesson plans for a K-12, community or adult learners and practice teaching to your peers in the class. This is your chance to begin to transform art and design education systems to be more diverse, equitable and inclusive. Required for Art and Design Education Minors, open to all others as an elective.

LIBS 312   Creative Writing Workshop II   3.0 UNITS
Creative Writing Workshops offer art and design students an opportunity to give voice and shape to their creativity through a variety of written expressive forms. The Creative Writing Workshop II provides guidance and support in a structured environment for students enrolled in the minor to develop their writing and explore their personal visions through workshops and lectures. Creative Workshop I & II are required for Creative Writing Minors.

LIBS 313   Teaching for Learning II   **3.0 UNITS**
Building on Teaching for Learning I, this course provides further development of your knowledge and skills as future art and design educators. Through readings, reflections, and discussions you will synthesize education theories and philosophies emphasizing aesthetic development in youth and adults, museum and community settings, public practices, critical pedagogy, classroom management, English Language Learners, Special Education, and best practices such as trauma informed teaching, culturally responsive teaching, and anti-racist / anti-biased practices. You will build your own curricula, write lesson plans, and hone your teaching skills by collaborating with a local art/design educator to teach a lesson to your students while being videotaped for your portfolio. This is your chance to refine your pedagogy (teaching practice) and update your teaching philosophy and portfolio in preparation for a career as a credentialed art teacher or a community-based teaching artist/designer. Required for Art and Design Education minors. Prerequisite: LIBS311/314 Teaching for Learning I.

LIBS 314   Art of the Novella--Honors   **3.0 UNITS**
This course can be an upper division art history or liberal studies elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

LIBS 316   Creative Writing Elective   **3.0 UNITS**
A limited choice of Upper Division Liberal Studies elective courses will count as Creative Writing Minor Electives, as determined each semester by the Interdisciplinary Studies Director, LAS Chair, and Creative Writing Minor Head. Creative Writing Minor Electives cover a range of literature and writing topics such as Reading Visiting Writers, Screenwriting Shorts, Food Memoirs, Translation/Multilingual Writing, and Human Nature (climate narratives).

LIBS 317   Social Entrepreneurship   **3.0 UNITS**
What role do non-profit entities play in the art world and beyond? What is social entrepreneurship? How do the goals of non-profit arts concerns differ from their for-profit counterparts? This course will examine the current climate for non-profit arts organizations generally and start-ups, in particular, especially those involved in public service, charity work, education, and social justice. Students will research and debate various issues while considering how these may affect their future endeavors. In addition, students will work in groups on a self-generated, unique social entrepreneurship project, where they are encouraged to address social, environmental, and/or cultural issues that interest and motivate them. Students will gain insight into the realities of managing a non-profit arts enterprise by participating in the simulated launch and management of the business concept they designed. Required for Entrepreneurship minors. Open as an elective for all other majors and minors

LIBS 318   Business Communication   **3.0 UNITS**
What do you need when you have a product or idea for a business and you have an upcoming meeting with a potential angel investor or other funder? How do you present a proposal and tell the story of your brand, product or idea? How do you use the world of social media to enhance your business? How will you use words, pictures, video and other media to best pitch yourself and your business? Learn to hone your business communication tools for your enterprise or business in this course. Through case studies and critiques, you will learn the art of naming and creating taglines. You will do market research, write a product positioning and a brand story. By semester's end, you will present your business proposal as a pecha kucha. Required for Entrepreneurship minors. Prerequisites: ENTR 301 - Intro to Entrepreneurship and MATH 137 - Mathematics of a Startup. Co-requisite: ENTR401 Launchpad.

LIBS 405   Business of Fashion   **2.0 UNITS**
Assuming a position in the Fashion industry requires business knowledge necessary for merchandising, product development, marketing, creative presentations and sales. Through lectures by industry professionals, this on-campus class provides an overview of the apparel manufacturing process outside the realm of the design room, and the marketing partnership of wholesale manufacturers and retailers. The semester begins with professional practice protocols and job search strategies in preparation for a successful entry into the workplace.

LIBS 414   Business of Fashion   **3.0 UNITS**
Assuming a position in the Fashion industry requires business knowledge necessary for merchandising, product development, marketing, creative presentations and sales. Through lectures by industry professionals, this online class provides an overview of the apparel manufacturing process outside the realm of the design room, and the marketing partnership of wholesale manufacturers and retailers. The semester begins with professional practice protocols and job search strategies in preparation for successful entry into the workplace. Required for Fashion Design majors.

LIBS 440   Capstone   **3.0 UNITS**
The Liberal Arts and Sciences Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Arts and Sciences Department, the class design allows for independent research and private mentoring through Blended classes that meet synchronously online. The Capstone research process encourages students to apply the skills they have accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass.

LIBS 441   Capstone: Sustainability   **3.0 UNITS**
The Sustainability Capstone is designed as a culmination of the Sustainability minor; it is an opportunity for students to synthesize what they learned in Human Ecology, Science & Sustainable Design, and their Sustainability electives by developing a research paper that addresses a topic related to their disciplinary field. The goal is to give students an opportunity to a) apply what they have learned and b) to have a clear sense of their knowledge and skills as a sustainability minor so that when they enter the workforce they can adequately speak to their specialization. Required for Sustainability Minors. A minimum grade of C- or better on the Capstone paper and course is required to pass. Students who earn a D will automatically be enrolled in the 1-unit Spring semester Continuation class to raise their grade to passing. *Prerequisite: CAIL201 Human Ecology - 3.0 credits, NSCI305 Science and Sustainable Design - 3.0 credits. Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor.

LIBS 442   Capstone: Creative Writing   **3.0 UNITS**
The Liberal Studies Capstone experience is a required senior-level course designated to facilitate students' critical reflection on a topic that intersects with their own studio practice, discipline, and/or identity. As the signature course and culminating expression of the Liberal Studies Program, the class design allows for independent research and private mentoring through Blended classes that meet both in-person and online. This asynchronous format encourages students to apply the skills they've accrued during their time at Otis College to a project that can advance their understanding of their career path and chosen industry. A minimum grade of C- or better on the Capstone paper and course is required to pass. Students who earn a D will automatically be enrolled in the 1-unit Spring semester Continuation class to raise their grade to passing. Note: Creative Writing, Art History, Sustainability minors, and Fine Arts majors take specific Capstones. Please see department for courses. Students who have a dedicated capstone for their major will complete one capstone course that combines both their major and minor.

LIBS 445   Capstone Continuation   **1.0 UNIT**

We believe the Capstone course to be very important and we want every student to have the opportunity to do their best. If a student, for any reason, is able to write most of their capstone at a C- or above level, but cannot complete it, or if a student receives a D on their work, then they are eligible to take the 1 unit Capstone continuation course during the spring semester. This course is not a complete capstone do over, but rather a guided course to help you improve and complete your already in progress capstone. In very rare instances, in consultation and agreement with the Instructor and Capstone coordinator, students may choose to alter their capstone topic. While it is expected that the student is taking the continuation course to 'finish' their work, it is understood that extraordinary or extenuating circumstances may exist to change this. If someone Fails the course and/or receives an F on their Capstone or the Capstone is less than 60% completed, they are NOT eligible for the 1 unit Capstone continuation course and will instead be asked to retake the full 3 unit Capstone course during the spring semester.

LIBS 774   Thesis I   **3.0 UNITS**

In this course, students will develop a written thesis about their work and practice. Students will acquire critical writing skills that will prepare them for the literary demands of an artist.

LIBS 775   Thesis II   **3.0 UNITS**

This course encourages and trains students to write a thesis about their own work through the development of the requisite critical writing skills that will serve them in the future when applying for grants as well as preparing them for the literary demands of an artist.

MATHEMATICS (MATH)

MATH 136   Infographics   **3.0 UNITS**

Math elective. Covers various topics related to mathematical concepts in art and design. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

MATH 137   Money Matters   **3.0 UNITS**

This is primarily a project-based course - students will apply principles they learn in order to create their own business model or analyze a start-up venture and present their assessment to the class. One tool that will be used to provide the scaffolding for these exercises and group projects is The Business Model Generation Canvas. This is a widely used text by innovators and entrepreneurs globally, and maps out the different stages of a business life cycle: planning, raising capital, evaluation, restructuring, testing innovative ideas, mergers and acquisitions, and development. Students will study the building blocks of a business, analyze financial statements, and discuss their mathematical components. Required for Entrepreneurship minors. Open as an elective for all other majors and minors.

MATH 246   Applied Trigonometry   **3.0 UNITS**

Covers topics in analytical geometry and trigonometry. There is an emphasis on algebraic manipulation and on applications of the topics covered to the design field. Required for Architecture/Landscape/Interiors majors

MATH 247   Programming/Scripting for Game   **3.0 UNITS**

This course is your gateway to the realm of game development, focusing on the programming and scripting aspects using the powerful Unreal Engine. Dive into the fundamentals of game programming, exploring programming languages, logic, and syntax. Learn to write scripts that control gameplay mechanics, implement AI, and create interactive elements. Through hands-on exercises, you'll gain practical experience and master debugging techniques to ensure smooth game performance. In the second part of the course, we'll delve deeper into the Unreal Engine and its scripting language, Blueprint. Unlock the potential of Blueprint's node-based system to create visually stunning and highly interactive games. Discover event-driven programming and object-oriented design to craft complex behaviors. Through engaging projects, you'll design game mechanics, create user interfaces, and integrate audio-visual effects. By the end, you'll have a solid foundation in programming and scripting for games using the Unreal Engine. Unleash your creativity into Programming/Scripting for Games, empowering you to bring your game ideas to life! Required of all Game and Entertainment Design majors.

MOTION DESIGN (MOTN)

MOTN 230   Motion Design Fundamentals   **3.0 UNITS**

An introduction to basic design and motion design principles and techniques. The pre-requisite for Motion Design Fundamentals (Storytelling for Digital Artists) will be waived for Motion Design minors

MOTN 299   Motion Design Electives   **3.0 UNITS**

A limited choice of LAS and Studio courses will count as Motion Design Minor Electives, as determined each semester by the Interdisciplinary Studies Director, Animation Chair, Game and Entertainment Design Chair and Graphic Design / Illustration Chair. Examples include: AHCS222 History of Graphic Design and Illustration, various courses in typography, social media, motion design, UX/UI and video editing.

MOTN 310   MOTN Design: Prof. Studio Stud   **3.0 UNITS**

MOTN 325   Motion Design Explorations   **3.0 UNITS**

This course guides students through the full process of creating a comprehensive identity rebrand campaign for an existing product. Through research, concept development, design production, and professional-style pitch sessions, students will learn how to translate strategic insights into a polished, portfolio-ready campaign. Learning objectives: • Conduct in-depth research and competitive analysis within the industry • Identify core brand challenges and interpret a creative brief • Develop a distinctive, concept-driven identity rebrand • Produce visual assets that demonstrate strong design craft and cohesive brand systems • Present and defend creative decisions in a professional pitch environment • Assemble a refined, portfolio-ready identity rebrand campaign

MOTN 330   Motion Design I   **3.0 UNITS**

This course gives students a comprehensive overview of the motion graphic production process using industry standard applications. Emphasis will be placed on the fundamental concepts of digital media, motion design, editing techniques and art direction.

MOTN 440   Practicum in Motion Design II   **3.0 UNITS**

Continuing the work from Practicum I, spring semester will consist of Test, Select and Iterate, Plan, Produce, and Deliver the finished pieces. Prerequisite: MOTN430 Practicum in Motion Design I

MOTN 490	**Adv Motion Design Elective**	**3.0 UNITS**

MUSIC - LMU (MUSC)

MUSC 455	**African Music Ensemble**	**1.0 UNIT**
MUSC 491	**Consort Singers**	**1.0 UNIT**
MUSC 492	**Guitar Ensemble**	**1.0 UNIT**
MUSC 493	**Oriana Vocal Ensemble**	**1.0 UNIT**
MUSC 495	**Concert Choir**	**1.0 UNIT**

NATURAL SCIENCE (NSCI)

NSCI 305   **Science Sustainable Design**   **3.0 UNITS**

With the shift toward more sustainable forms of art and design, the task facing artists and designers is uniquely challenging from previous eras. Sustainable design is concerned with the processes and outcomes to meet a world that is growing increasingly conscious of the significant impacts of art and design on the world's ecological systems and humankind. Through a predominantly science-based approach, students will study approaches to sustainability including, but not limited to, climate change, biodiversity, biomimicry, cradle to cradle, and life cycle analysis. It will emphasize the interdisciplinary nature of sustainable design and how it is defined, measured and tracked, looking at concepts like design for use, dematerialization, substitution, localization, and design for reuse. Through a combination of online lectures and discussion, field trips and hands-on exercises students will learn about the broader issues of sustainability as they pertain to the global context, and also how as individuals they are personally affected by these issues on a daily basis. After providing a thorough scientific background to the subject of sustainability through case studies and activities looking at the natural world as inspiration for design-based problems and solutions, students will be asked to identify and explore a specific design based sustainable project of their own using the biomimetic solution concept. Through this process it is intended that they will begin to understand the relevance of sustainability to the practice of art and design, and the necessity of its integration into their individual practices as they go forward in their career. Required for Sustainability minors.

NSCI 307   **Avoiding Climate Disaster**   **3.0 UNITS**

Natural Science Elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

NSCI 308   **Human Factors in Toy Design**   **3.0 UNITS**

The class will be a seminar course with lectures, homework assignments and exams. The students will obtain a basic understanding of structural engineering and develop some of the skills necessary to describe the structural systems of their creations. Students are introduced to basic concepts of structural loads, vectors (forces & moments), equilibrium in 2-D and 3-D, and strength of materials (stress and deformation). The course focuses on understanding these fundamental concepts as they relate to art and design with emphasis on the form making opportunities of expressing structural engineering and construction. Various structural elements will be examined for their role in resisting different types of loads and forces including analysis of simple (determinate) beams, trusses, columns, cables, arches, walls, frames and design of beams. Sustainability will be consistently discussed throughout the course with awareness of the environmental impacts of construction in the lectures, assignments and assigned reading. The lectures and reading assignments will include examples of extraordinary engineers and amazing structures including many examples from the instructor's portfolio of work. The signature and team assignments will require the students to develop structural design techniques through collaboratively exploring unconventional structural systems, architecturally exposed structures, and the structural support of sculptures. The course assignments will explore engineering creativity, design thinking, controlled tectonic expression, embodied mind and making. Engineered form generation with sketches and model making will emphasize design and learning about structural behavior through physical contact (touch) with design trajectories that arise through these form-making physical interactions. Concept creation skills will be emphasized through analysis of precedents, scheme generation, sketching and physical model making. Students will learn about how to develop structural design concepts, team collaboration, and how to make good structural design decisions using criteria to evaluate their schemes (conceptual design, engineering performance, environmental impacts, cost effectiveness & buildability). The students will learn together on the project assignments with pin-ups, class discussions and desk crits. Required for Toy Design majors.

NSCI 315   **Textile Science**   **3.0 UNITS**

Study fibers, yarns, knit construction and acquire a practical understanding of how each affects the appearance and performance of the textile product. Knit swatches using a variety of stitches, combining yarns of varying gauges. Other topics include dyeing, printing, and finishes as processes that affect the aesthetic appeal of the finished product, and as functional finishes which enhance performance. The impact of these processes and issues of sustainability are examined as they relate to the cultivation and production of fibers. Learn to make fabric choices based on an understanding of the woven structure and knowledge of individual fabric properties. Required textbook: Fabric for Fashion: The Swatch Book, Second Edition, by Clive Hallett & Amanda Johnston. Lab Fee: $30 Required for Fashion Design Majors. Available to non-majors as approved by the Chair.

NSCI 319   **Human Factors in Product Design**   **3.0 UNITS**

This course introduces Product Design students to human-centered design principles that explore physical, sensory, and emotional responses to consumer products. Through a combination of lectures and hands-on practice, students will assess a range of products for mechanical function and stylistic impact, focusing on enhancing user interaction and experience. Students will engage with statistical data tables and human factors terminology (no mathematical calculations required) to understand the diversity of the human body—its sensory capabilities, physical measurements, and dynamic movement—when designing usable and appealing products. Assignments will feature real-world manufacturing constraints, particularly within light assembly environments. Additionally, students will analyze regulatory compliance and product safety protocols as essential components of responsible and ethical design. Required for Product Design majors.

OUTBOUND MOBILITY/EXCHANGE (MOBI)

MOBI 300   **Mobility/Exchange - Outbound**   **NaN UNITS**

Students who take part in exchange programs will register for this course in order to maintain their full time status.

PAINTING (PNTG)

PNTG 204   Painting I   **3.0 UNITS**
This is a hands-on investigation of technical and formal issues in painting (oil, acrylic, and mixed media), focusing on developing technical abilities in collaboration with concepts and exploration of different methods of achieving visual "dexterity." Offered fall semester only

PNTG 214   Painting II   **3.0 UNITS**
Painting 2 is the second core class devoted to painting. Each person who teaches it will have a slightly different approach but in general the class will provide students with an intermediate level painting experience. Equipped with the skills and knowledge of painting 1, students in Painting 2 will further develop their command of the technical and conceptual knowledge of western painting. They will develop a group of works specific to the requirements of the class and they will increase their confidence and their production. Perhaps devoted to critical concepts of interpretation or to material exploration or both, painting 2 will provide a dynamic and open, inclusive environment in which students will feel supported as they explore their own ideas and the rich landscape of contemporary painting.

PNTG 306   Painting Genres: Oil and Water   **3.0 UNITS**
The genres courses provide students with the opportunity to explore a variety of topics within the context of painting, targeting specific conceptual, aesthetic and material approaches in depth, offering theoretical and vernacular driven investigations. Recent topics offered: Real Art; Methods, Materials & Concepts of Color, Figure

PHOTOGRAPHY (PHOT)

PHOT 204   Photography I   **3.0 UNITS**
This course introduces students to the technical, aesthetic, and conceptual aspects of the medium of photography. Basic skills, including digital and analog (film) camera operation, the fundamentals of image exposure, black-and-white film processing, black-and-white and digital color printing, and basic presentation techniques, are covered in regular lab sessions. Group critiques, slide lectures, and field trips help students to develop a critical vocabulary. Offered fall semester only

PHOT 214   Photography II   **3.0 UNITS**
This is an intermediate course within the Photography program that aims to build upon technical knowledge and conceptual structuring acquired in Photo 1. Students will spend time working with image capture and output processes, refining technical and communication methods, and making decisions to achieve their desired aesthetic and conceptual frameworks. Experimentation with new processes is expected as is the development of artistic and critical reasoning.

PHOT 230   Lighting Studio I   **3.0 UNITS**
This course introduces students to basic studio skills in lighting and electronic flash applications, including 4x5 and medium formats, tungsten and strobe lighting, and in-depth exploration of genres such as photo illustration, still life and portraiture. Students develop a critical understanding of how imagery functions within a commercial context and the relationship between fine art and commercial work. Shooting assignments include still life, portraiture, and photo illustration projects. This course is required for Photography emphasis. Prerequisite: Photo I or equivalent

PHOT 335   Photo Genres: Editorial   **3.0 UNITS**
Genres courses provide students with the opportunity to explore a variety of topics within the context of photography, targeting specific conceptual, aesthetic, and material approaches in-depth, offering theoretical and vernacular driven investigation. Recent topics offered include Text and Image, Photography and Space, and Our Private Selves. Offered on a rotating basis. See schedule of classes for course offerings and course descriptions.

PRINTMAKING (PRNT)

PRNT 362   Introduction to Letterpress   **3.0 UNITS**

PRNT 373   Print Media Workshop   **3.0 UNITS**
Students refine their vision in advanced projects based on their conceptual practice and critical dialogue. Emphasis is on development of personal imagery and exploration of the media through one or two projects that form a body of work related to their practice. In depth consultations and reviews are held. Students draw upon Los Angeles' wide range of print publishers and shops, learning professional methods.

PRNT 375   Hybrid Letterpress   **3.0 UNITS**
Embark on a creative journey where digital dreams come to life through the artistry of letterpress printing with photopolymer plates. This on-campus course provides an exciting progression in your printing expertise expanding letterpress printing to include photopolymer plates, exploring every aspect of this pioneering process for digitally-driven relief printing. Beginning with digital prepress and plate processing, and transitioning into the hands on craft of letterpress printing. Students will learn digital imaging essentials, font editing, plate creation, and the nuances of operating the Vandercook flatbed cylinder press. This course thoroughly investigates printing techniques and typography, preparing you for your own creative endeavors. After the initial training, apply your skills to your own unique design projects. Pre-requisites: PRNT362 / DGMD310 Introduction to Letterpress and prior experience with Adobe Illustrator.

PRODUCT DESIGN (PRDS)

PRDS 101   Designing the World   **3.0 UNITS**
Product Design Foundation elective. See Browse Courses for specific topics each semester.

PRDS 202   Design Studio I: The Profession, Process, Culture and the User **3.0 UNITS**
This course forms the introduction to the profession, practices, and thinking involved in the product design process. Through a series of individual and team-based investigations and projects, students begin their acculturation into the field of Product Design. They use the design process while applying various 2D drawing, computer, and making skills to develop their ideas and explore the relationships between form, function, and how culture can be expressed by and be an influence on the object of design. Skills introduced: design process, user experience, identification of form and function relationships, cultural design influence and forces.

PRDS 203   Design Studio II: Structure and Connections   **3.0 UNITS**
Students deploy the skills learned in the first semester, in thoroughly investigated and contextualized designs, that demonstrate cultural awareness, and self-expression. Digital modeling and design components are introduced as part of the design process. Different projects throughout the semester, allow students to learn how to distill research, contextualize and visualize data and information, recognize trends, and understand the user. Students will connect these insights to questions and decision-making in their design process. Skills introduced: Students learn to communicate their design concepts and user scenarios using 2D, 3D, and 4D methods (UX). Skills reinforced: design process, research, contextualization, user interaction.

PRDS 210   Design Communication I: The Process from Start to Finish   **3.0 UNITS**
Sketching and technical drawings are fundamental to product design in developing and communicating ideas, designs, and concepts. This course presents techniques, tips, and tricks, from quick concept sketching to producing technical drawings to develop and communicate ideas. Students will begin to delineate 3-D forms in 2-D space and the various phases and deliverables of the design process. Skills introduced: rapid ideation, iterations, concept sketches, perspective drawing and shading, color rendering, visual fluency, cross-sections, exploded views and digital rendering, 3-D modeling, and visual presentation. Skills reinforced: design process, design communication, storytelling, and intention.

PRDS 211   Design Communication II: Communication and Interfaces   **3.0 UNITS**
Students continue to develop a 2D drawing foundation of 3D space by hand and digitally. Interface design is introduced to add a digital element to the previous semester's project. Students will learn orthographic hand drawing and rendering (precise annotation, translating physical assets and photographic references into graphic representations) with pencil, pen, and marker, as well as 2D digital drawing and rendering (Illustrator, Photoshop, basic technical package for manufacturing, storyboarding), and advanced digital sketching. Skills introduced: orthographic drawing, composition, digital drawing. Skills reinforced: hand and digital rendering, 2D form, visual fluency, and visual stylization. Software and tools: Illustrator, Photoshop, InDesign, Figma. Students will learn to prepare work for portfolios, presentations, exhibitions, decks, and websites. Pre-requisite: PRDS210 or Chair approval

PRDS 230   Methods & Materials I: Learn to Make, Make to Learn   **3.0 UNITS**
An introduction to all the shops, labs, tools and techniques used in the fabrication of both study and presentation models for Product Design. In this hands-on studio, students work with various materials in a series of small skills-oriented projects. This is an introduction to the basic tools used for both hard and soft materials. Students develop skills in form making, surface treatments, and finishing techniques. Field trips and off-site workshops at local manufacturers enhance students' knowledge of production techniques. Skills introduced: model making, shop skills, 3D form, surface finishing, sketching, visual fluency, and forces on the form,

PRDS 231   Methods & Materials II: Learn to Make, Make to Learn   **3.0 UNITS**
A continuation of the previous semesters' course students continue to visit manufacturers and work with various materials in a series of small skills oriented projects. Students build upon their prior semester's experience and begin to integrate the design process skills they have learned in the Design Studio courses while exploring processes and materials. Skills reinforced: sketching, 3D form giving, forces of form, visual fluency, surface finishing, and craftsmanship.

PRDS 299   Product Design Elective   **3.0 UNITS**

PRDS 302   Design Studio III   **3.0 UNITS**
Students further develop their design process while learning to design a family of products within a brand's design language and visual vocabulary. Projects may include consumer electronics, lighting, or other hard-goods categories. The focus is on exploring human factors, needfinding, materials, functionality, internal components, and user/product interaction, with a strong emphasis on concept development and formal excellence. The content, theme, and focus of the studio vary each semester, allowing for dynamic and responsive learning opportunities. Skills and knowledge introduced: product category analysis, business dynamics, value analysis, product development, and design writing. Skills reinforced: prototyping, sketching, photography, 2D layout, information design, branding, materials, manufacturing, sustainability, industry awareness, individual and group critique, meaning/semantics, model making, 3D form, storytelling, visual and oral presentation, design research, observational research, ideation, and brainstorming.

PRDS 303   Design Studio IV   **3.0 UNITS**
In this junior-level course, students apply and expand upon foundational soft goods–making skills to design objects within the soft goods category, including fashion accessories, footwear, and apparel. Students design and construct three-dimensional products from flat patterns, developing a deep understanding of form, function, and style. The course emphasizes concept development, material exploration, and technical execution. Students investigate human factors, need finding, material and hardware selection, and performance considerations while producing high-quality prototypes. Skills and knowledge introduced: patternmaking, CLO software. Skills reinforced: prototyping, sketching, photography, 2D layout, information design, branding, materials, manufacturing, sustainability, industry awareness, individual and group critique, meaning/semantics, modelmaking, 3D form, storytelling, visual and oral presentation, design and observational research, ideation, and brainstorming.

PRDS 310   Design Communication III: Introduction to SolidWorks   **3.0 UNITS**
This introductory course to SolidWorks teaches the basics of 3D modeling, rendering techniques, and the processes for manufacturing. Students learn to digitally build and manipulate 3D forms and communicate these renderings, drawings, or 3D objects. There are weekly demonstrations of the software techniques and capabilities. Feedback on each student's design process and abilities is provided through individual desk crits as well as group presentations and critiques. Skills introduced: Solidworks 3D CAD software, modeling, rendering, and 3D print output. Skills reinforced: drafting, rendering, 2D digital fluency, visual stylization, and composition. Software: Solidworks, Keyshot.

PRDS 311   Design Communication IV: Intermediate SolidWorks   **3.0 UNITS**
This studio course is a continuation of Design Communication III. The instructor provides feedback on each student's design process and abilities through individual desk crits and group presentations, and critiques. Skills reinforced: 3D modeling, digital rendering, and visual storytelling. Skills introduced: SolidWorks or Rhino 3D CAD software, modeling, rendering, and 3D print output. Skills reinforced: drafting, rendering, 2D digital fluency, visual stylization, and composition. Pre-requisites: PRDS310

PRDS 345   Furniture & Lighting   **3.0 UNITS**
Product Design Electives. See the schedule of classes for course offerings and course descriptions.

PRDS 362   Beginning Ceramics   **3.0 UNITS**
This course introduces students to a wide range of ceramic practices through cross-cultural, thematic, and technical approaches. Students explore functional, sculptural, and production ceramics, beginning with sketched ideas or sketch models and culminating in finished ceramic pieces.

PRDS 363   Intermediate Ceramics   **3.0 UNITS**
This intermediate-level course explores two advanced ceramic approaches: multiples and modules. In the multiples track, students learn to create master models, either handmade or 3D printed, followed by plaster mold-making, slip casting, glazing, and an introduction to the commercial aspects of production such as drop shipping, invoicing, royalties, and small-scale manufacturing.

PRDS 402   Design Studio V   **3.0 UNITS**
This advanced project-based studio guides students through complex product design scenarios, exploring potential solutions, users, and markets. Students conduct research within a field of interest to identify a problem, theme, or opportunity, and develop a self-directed brief rooted in their personal interests and professional goals. This brief guides their design direction and supports the development of their senior project. Students are expected to integrate previous learning and knowledge into a comprehensive design process that includes research, concept development, and design. Instructors assign key deliverables throughout the semester. Final outcomes include a presentation, physical models, and written process book. Students are assessed on critical thinking, creativity, aesthetics, functionality, craftsmanship, communication, and presentation Skills developed: research, teamwork, information design, sustainability, prototyping, leadership, ideation, time management, semantics, design writing, ethics, and personal voice. Pre-requisite PRDS 302 & 303

PRDS 403   Design Studio VI   **3.0 UNITS**
Having completed their designs the previous semester, the course serves as a place to execute and create a professional-grade prototype. This course also prepares students for their post-Otis experience by introducing professional practices germane to product design. This includes a heavy focus on their presentation skills and exhibition design aimed at their Senior Exhibition. Skills introduced: Exhibition design, graphic communication, video, animation, and editing. Skills reinforced: design research, observational research, UX-UI, FIGMA, teamwork, information design, sustainability, prototyping, leadership, ideation, brainstorming, time management, meaning/semantics, design writing, ethics, point of view, and voice. Pre-requisites: PRDS 402

PRDS 410   Design Communication V   **3.0 UNITS**
This studio allows students to further advance their digital skills as they prepare to graduate. Skills introduced or reinforced: 3D modelling, digital rendering, and visual storytelling. Solidworks or Rhino 3D CAD software, rendering, and 3D print output. Software: SolidWorks or Rhino 3D CAD software. Keyshot, drafting, rendering, 2D digital fluency, visual stylization, and composition. Pre-requisite PRDS 311

PRDS 440   Design & Market I   **3.0 UNITS**
Design-driven companies increasingly seek hybrid designers who can navigate the intersections of design, business strategy, and marketing while maintaining a strong foundation in creative thinking and craft. Many designers also pursue independent careers as entrepreneurs or individual consultants, where the ability to position, brand, and launch a product becomes essential. This advanced, project-based course challenges Product Design seniors to integrate real-world market considerations into their design process. Students will work within defined market segments, brand identities, and manufacturing constraints to develop product concepts that are not only insightful but viable for production and distribution. Through assigned, industry-facing projects, students will examine how market research, consumer insights, competitive analysis, branding, and pricing affect product design decisions. Emphasis is placed on collaboration, critical thinking, and adaptability as students refine their concepts with the realities of positioning, promotion, and scalability in mind. Line extensions, packaging, and product families may also be explored as students learn to develop cohesive, strategically aligned offerings. Rather than emphasizing purely personal expression or speculative design, this course mirrors professional practice, preparing students to respond to real-world design briefs and contribute meaningfully within industry contexts.

PRDS 441   Design & Market II   **3.0 UNITS**
Students continue to deepen their understanding of brand alignment, production considerations, and user experience. The course integrates strategic thinking and encourages cross-disciplinary collaboration as part of the design process. Students are guided to think beyond the studio, considering how their designs function within markets and larger systems of use, value, and communication, as well as how they operate within professional contexts. Skills reinforced: collaboration, strategic thinking, brand development, production planning, communication, and presentation. Pre-requisite PRDS 440

PSYCHOLOGY - LMU (PSYC)

PSYC 1000   General Psychology   **4.0 UNITS**

SCULPTURE/NEW GENRES (SCNG)

SCNG 204   Sculpture/New Genres I   **3.0 UNITS**
An introduction to the history and practice of sculpture and new genres (new art forms that use time and space). Students are introduced to technical and contemplative approaches to commanding space and material to produce meaningful objects, events, or places. Technical instruction covers introductory use of wood and metal shops (including digital 3D printer), adhesives and joinery, basic mold making and casting, as well as contemporary new genres forms such as performance and installation art. Offered in Fall semester only.

SCNG 214   Sculpture/New Genres II   **3.0 UNITS**
Sculpture New Genres 2 is an intermediate studio course that expands on concepts and skills in 3- dimensional and time based media developed in SCNG I. This class will consist of a series of both short and long term prompts, lectures, readings, critiques and demos aimed at providing a wide range of cultural concepts, contexts and techniques to consider when developing works and situating them within time and space. New skills will include advanced techniques of construction in wood, metal, clay, fabric, video, further mold making, some plastics, and new computer technologies.

SCNG 236   Ceramics   **3.0 UNITS**
This sculpture elective will teach fundamental skills of working with clay. You will learn the foundational skills of wheel throwing and hand building: centering and forming shapes on the wheel, wedging, pinching, coiling, soft and hard slab construction, building and assembling in parts, using a banding wheel, and various ways to manipulate the surface of the clay, such as carving, stamping, printing, drawing, painting, and glazing. You will learn how kilns work and various ways to fire the clay, with an introduction to how different glazes and clays react to different firing techniques. Exposure to the historical use and international variety of techniques in ceramics will be integrated into the contemporary context. This is an introductory course; no experience is necessary.

SCNG 237   Advanced Ceramics   **3.0 UNITS**
This advanced ceramics elective is ideal for student artists seeking to deepen their relationship to the clay studio. Together, we will explore (and aim to understand) clay's most distinctive quality - its mystical plasticity - with a sequence of sculptural provocations meant to expand our portfolio of technical skills. Simultaneously, we will consider ceramics as a position within the larger sphere of contemporary art, thinking and working through the possibilities available in installation, performance, collaboration with emerging technologies, and perhaps even the humble vessel. Get ready to probe the limits of this sticky, gooey, muddy, dirty, impressionable Stuff. Prerequisites: Ceramics or Introductory Ceramics

SCNG 306   Adv Tec: Into the Fold: Poetics and Structures of Fabric   **3.0 UNITS**
This class introduces a variety of methods in advanced sculpture fabrication and aims to give students a broad range of skills in transforming sculptural ideas into professional works of art. Throughout the term, students will work individually and collectively as a class to develop material research, schematic planning, and fabrication practices. Through demonstrations, hands-on workshops, and lectures, students will learn different approaches to making sculpture in a diverse array of materials. Some of the workshops include: laser cutting, hot shop glass working, foam carving, metalwork, silicone mold-making, and casting.

SCNG 309   SCNG Advanced Topics:Miniature Worlds and Surreal Screens   **3.0 UNITS**
Advanced Sculpture Workshop supports Sculpture majors with more in-depth instruction in particular techniques and technologies in use in contemporary art. In addition to more traditional technologies like woodworking, metal working, bronze casting, glass blowing, and fiber arts; contemporary practices also include digital technologies like Virtual Reality, computer-aided 3-D prototyping and C-N-C milling. Some sections include a fee of up to $250. See the schedule of classes for course offerings and course descriptions.

SOCIAL SCIENCE (SSCI)

SSCI 210   Anthropology through a Sci Fi Lens   **3.0 UNITS**
Social Science elective. May be taken in either fall or spring, must be completed in the junior year. Course offerings vary by semester. See LAS Electives in Browse Courses for course offerings

SSCI 211   Child Psychology: Development and Play   **3.0 UNITS**
This course provides a comprehensive overview of child development from birth to adolescence, including developmental stages, critical periods, effects of early stimulation, environmental enrichment, and how to apply this information when designing children's toys, books, games, products, and entertainment. Special attention is given to toy design issues of aesthetics, safety, age-relevance, socio-cultural parameters, marketability, and characteristics of successful toys. By the end of this course students will have an introduction to the principles, theories, and practices of developmental psychology as they relate particularly to the periods of infancy, childhood, and adolescence. They will demonstrate the ability to apply these principles in the design process for toys and games. Specifically, they will: • Demonstrate that they can think about toys from a developmental perspective. • Learn to see the activity of play as central to developing healthy individuals. • Will demonstrate that they can creatively apply the results of developmental psychology to design, creation, and critique of toys. • Understand qualitative and quantitative tenets and tools of consumer research as they relate to play and toy design. • Be able to identify concepts of play such as play patterns and storytelling to name a few and how they impact toy design and development in positive ways for children. Required for Toy Design Majors

SSCI 213   Cultural and Social Design for Games   **3.0 UNITS**
This course will focus on the cultural and social aspects of games (computer games / video games) through the history of games. Students will explore the impact of games on social demographics and cultural events. Students will take this information and learn to create their own characters and worlds based on their research and analysis. This class is a co-requisite of GAME331: Cultural and Social Design for Games In this course we will engage with how developers and artists are navigating AI and ethics in practical and imaginative ways. These ideas will be grounded in the perspectives of local artists, and prominent reference points connecting representation, cultural concerns, the use and exploitation of art/artists, and if the characters and world created reflect the cultural values of the workplace and industry that creates these games. Games will be explored in holistic and tangential ways to explore the complex formation of culture (for example parsing the differences between appropriation and theft). Furthermore, we will start with a study- group styled introduction to how historical technological advancements shifted the landscape and playing style of art/games and how that connects to the present day. After a cursory exploration of bias in race, class, gender and other identity markers, students will shift towards teaching giving the class their own deep dive presentation on a topic of their choice resulting in either a re-imagined game or drawing from lived experiences of researching games. Disability justice will also be used to guide our activities where we embrace interdependence (relying on one another), auditing products for their accessibility, and to practice creating solidarity and promoting diversity and equity ahead of entering the workplace. Overall, students will actively participate in shaping the course experience. This course aims to have students lead discussions and classroom activities pre-figuring their professional work. By practicing a critical engagement with 'neutral' tools, students will develop a comprehensive understanding of the cultural and social design of games and be able to advocate for conscientious choices in characters, worlds, and game play.

SSCI 214   Community Arts in LA   **3.0 UNITS**
How do artists and designers engage communities and the public in their work? What does it mean to work within a community as a collective, as opposed to publicly presenting work as a solo artist or designer? In this contemporary art history course, you will explore the aesthetic, historical and socio-cultural aspects of community arts and socially engaged art through lectures, videos, readings, reflections and discussions. We will uncover the relationship artists and designers have with building communities and creating localized cultures, and how specific Los Angeles communities have used art as a means to occupy political territories over time. We will meet with contemporary artists, designers and local non-profit arts organizations, museum education departments and public sites to engage in current social practice work in the field and to learn how they create cultural agency and cultivate a rich sense of place. Lastly, you will learn how to develop and write your own proposal for working with local communities to create positive change through socially engaged art. Required for Art and Design Education minors, open to all others as an elective.

SOCIOLOGY - LMU (SOCL)

SOCL 1000   Principles of Sociology   **4.0 UNITS**

SPANISH - LMU (SPAN)

SPAN 2101   Spanish 1   **4.0 UNITS**

SUSTAINABILITY (SUST)

SUST 299   Sustainability Electives   **3.0 UNITS**
A limited choice of Creative Action, Liberal Arts and Sciences, and Studio Elective courses across the college will count towards the Sustainability minor Electives, as determined each semester by the Interdisciplinary Studies Director, Sustainability Minor Area Head, and Department Chairs. Examples include Photographing an Inconvenient Truth, Call to Action, and Post-Apocalypse, Otis Goes Green, Costal Stories, Human Nature, Futuristic Foodways and Avoiding Climate Change.

SUST 300   **Special Topics in Sustainability: Making for the End of the World**   **3.0 UNITS**
Upper division courses that combine studio practice with theory and/or science to address interdisciplinary approaches to sustainability through art and design. Topics vary each semester. Fulfills studio electives.

THEORY AND CRITICAL STUDIES (CRIT)

CRIT 304   **History + Theory III**   **2.0 UNITS**
A diversity of critical and generative approaches to twentieth and twenty-first century design is situated historically, while introducing current themes and debates in contemporary architectural practice and related disciplines. Prerequisite: CRIT205 History + Theory I or CRIT206 History + Theory II. Required for Architecture/Landscape/Interiors majors.

CRIT 405   **History + Theory IV**   **2.0 UNITS**
Interior organizations are examined through spaces of work and consumption, ergonomics, office landscaping, corporate parks, brandscapes, junk space, malls, themed environments, surveillance, and spectacle. Prerequisite: CRIT304 History + Theory III. Required for Architecture/Landscape/Interiors majors.

CRIT 406   **History + Theory V**   **2.0 UNITS**
Landscape as a system of representation and performance is studied through the tradition of formal and picturesque gardens, the discourses of the beautiful and sublime, urban parks, the integration of modernism and landscape, earth art, everyday and extreme landscapes, industrial and natural ecologies, and landscape urbanism. Prerequisite: CRIT304 History + Theory III. Required for Architecture/Landscape/Interiors majors.

TOY DESIGN (TOYD)

TOYD 101   **Introduction to Toy Design**   **3.0 UNITS**
Toy Design Foundation elective. See Browse Courses for specific topics each semester.

TOYD 200   **Toy Design I**   **3.0 UNITS**
Toys are fundamental to our growth and culture. We learn to make decisions, socialize, and create through play. In these on-campus courses, you will develop an understanding of the creative process of toy design and learn the fundamentals of becoming a successful toy designer. Emphasis is placed on brainstorming and designing both hard and soft good toys that engage children across various play patterns. You'll apply drawing, model-making, and fabrication skills to create original toy concepts across categories such as Plush and Preschool toys. You'll learn to conduct market research and analysis to ensure your designs are viable and positioned strategically for their intended audience. Using various fabrication techniques, you'll translate your idea into a 3-D model and present the final product to faculty and visiting toy industry professionals. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined.

TOYD 201   **Toy Design II**   **3.0 UNITS**
Toys are fundamental to our growth and culture. We learn to make decisions, socialize, and create through play. In these on-campus courses, you will develop an understanding of the creative process of toy design and learn the fundamentals of becoming a successful toy designer. Emphasis is placed on brainstorming and designing both hard and soft good toys that engage children across various play patterns. You'll apply drawing, model-making, and fabrication skills to create original toy concepts across categories such as Plush and Preschool toys. You'll learn to conduct market research and analysis to ensure your designs are viable and positioned strategically for their intended audience. Using various fabrication techniques, you'll translate your idea into a 3-D model and present the final product to faculty and visiting toy industry professionals. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined. TOYD 200 - Toy Design I is a prerequisite for TOYD 201 - Toy Design II

TOYD 232   **Visual Communication I**   **3.0 UNITS**
To communicate effectively, a designer should have a broad range of both traditional and digital drawing skills. In these on-campus courses, you will develop your ability to communicate ideas through drawing from quick ideation sketches to final illustrations. Through the study of shape, perspective, style, use of character, and storytelling, students will learn to communicate with compelling, dynamic drawings. On the digital side, you'll learn how to take a concept from rough sketch to a refined set of technical illustrations. You'll learn Adobe digital tools that will enable you to produce drawings that accurately convey your design intent and serve as a blueprint when creating a prototype model. The skills acquired during these courses will be utilized throughout the remainder of your Toy Design studio courses.

TOYD 233   **Visual Communication II**   **3.0 UNITS**
To communicate effectively, a designer should have a broad range of both traditional and digital drawing skills. In these on-campus courses, you will develop your ability to communicate ideas through drawing from quick ideation sketches to final illustrations. Through the study of shape, perspective, style, use of character, and storytelling, students will learn to communicate with compelling, dynamic drawings. On the digital side, you'll learn how to take a concept from rough sketch to a refined set of technical illustrations. You'll learn Adobe digital tools that will enable you to produce drawings that accurately convey your design intent and serve as a blueprint when creating a prototype model. The skills acquired during these courses will be utilized throughout the remainder of your Toy Design studio courses. TOYD 232 - Visual Communication I is a prerequisite for TOYD 233 - Visual Communication II

TOYD 242   **Design Prototyping I**   **3.0 UNITS**
As a Toy Designer, it's essential to know how to translate your 2D concepts into 3D form. These on-campus classes will equip you with practical prototyping skills and vocabulary that will enable you to develop and communicate your designs accurately. With guidance from your instructor, you'll work in the model shop, and learn to use the tools, equipment, and machinery. You'll integrate these skills and techniques into your concepts, developing an understanding of the design and development process. Ultimately, these courses will provide you with working knowledge in the processes and techniques used in model-making for the toy industry. Fabrication, sculpting, molding, and casting will be taught through lectures and hands-on experience. With the building blocks learned throughout the year, you can move on with confidence to more advanced prototyping in subsequent courses.

TOYD 243   **Design Prototyping II**   **3.0 UNITS**
As a Toy Designer, it's essential to know how to translate your 2D concepts into 3D form. These on-campus classes will equip you with practical prototyping skills and vocabulary that will enable you to develop and communicate your designs accurately. With guidance from your instructor, you'll work in the model shop, and learn to use the tools, equipment, and machinery. You'll integrate these skills and techniques into your concepts, developing an understanding of the design and development process. Ultimately, these courses will provide you with working knowledge in the processes and techniques used in model-making for the toy industry. Fabrication, sculpting, molding, and casting will be taught through lectures and hands-on experience. With the building blocks learned throughout the year, you can move on with confidence to more advanced prototyping in subsequent courses. TOYD 242 - Design Prototyping I is a prerequisite for TOYD 243 - Design Prototyping II

TOYD 302   Toy Design III   **3.0 UNITS**

Students will apply principles they have learned in Toy Design I and II to create original toys across categories such as Dolls, Action Figures, Vehicles and Playets, which can be expanded to become a toy brand with line extensions. Story-based toys and line extensions are important in building toy brands. In these on-campus courses, you will conceptualize and bring a character based product line to life. Storyboarding will be utilized to show how the characters live in their world. You will also create your own accessory as a stand-alone item or to complement your existing toy line. Advanced presentation and building techniques will be used to showcase toy concepts and features. Students will learn the most effective methods of presenting their toy concepts visually, demonstrating new features digitally when it is the most effective way of communicating play patterns and function. Corporate sponsored projects may occur during either semester, but regardless, critiques will include visiting toy industry professionals. TOYD 201 - Toy Design II is a prerequisite for TOYD 302 - Toy Design III

TOYD 303   Toy Design IV   **3.0 UNITS**

Students will apply principles they have learned in Toy Design I and II to create original toys across categories such as Dolls, Action Figures, Vehicles and Playets, which can be expanded to become a toy brand with line extensions. Story-based toys and line extensions are important in building toy brands. In these on-campus courses, you will conceptualize and bring a character based product line to life. Storyboarding will be utilized to show how the characters live in their world. You will also create your own accessory as a stand-alone item or to complement your existing toy line. Advanced presentation and building techniques will be used to showcase toy concepts and features. Students will learn the most effective methods of presenting their toy concepts visually, demonstrating new features digitally when it is the most effective way of communicating play patterns and function. Corporate sponsored projects may occur during either semester, but regardless, critiques will include visiting toy industry professionals. TOYD 302 - Toy Design III is a prerequisite for TOYD 303 - Toy Design IV

TOYD 334   Visual Communication III   **3.0 UNITS**

Sketching original characters and developing storyboards is an effective way of communicating original concepts and features of toys and related accessories. In this on-campus drawing and portfolio development class, you'll acquire advanced skills in the theory and practice of sketching, drawing, and rendering techniques as applied to toy products. You'll design a logo and create a promotional sheet that reflects your graphic skill and creative styling with best-in-class examples of your work. You will also concentrate on the creation, organization, and presentation of your portfolio. Finally, you'll write a résumé that expresses your creativity and design experience with links to a digital portfolio. TOYD 233 - Visual Communication II is a prerequisite for TOYD 334 - Visual Communication III

TOYD 340   Design Prototyping III   **3.0 UNITS**

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as Rhino, which is often used in the construction of prototype models. You'll learn modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. Students will progress to more advanced modeling techniques and will continue to develop their rendering and animation skills. You'll be introduced to programs such as Adobe After Effects to create more compelling digital video presentations with animation, titles, sound effects, and transitions. Students will be able to apply acquired learning to improve all their toy design projects and presentations.

TOYD 343   Design Prototyping IV   **3.0 UNITS**

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as Rhino, which is often used in the construction of prototype models. You'll learn modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. Students will progress to more advanced modeling techniques and will continue to develop their rendering and animation skills. You'll be introduced to programs such as Adobe After Effects to create more compelling digital video presentations with animation, titles, sound effects, and transitions. Students will be able to apply acquired learning to improve all their toy design projects and presentations. TOYD 340 - Design Prototyping III is a prerequisite for TOYD 343 - Design Prototyping IV (3.00)

TOYD 404   Toy Design V   **3.0 UNITS**

In this advanced level on-campus course, students will continue in their development of conceptual, technical, and creative skills and methodologies relating to toy design across categories such as Games, Collectibles or a category of their choice. Toy Design studio courses may be sponsored, in which case the toy category or brand would be predetermined. TOYD 303 - Toy Design IV is a prerequisite for TOYD 404 - Toy Design V

TOYD 405   Toy Design Vi   **3.0 UNITS**

The focus of this advanced level on-campus course is professional preparation and presentation of a collected body of work to be displayed at the Annual Senior Exhibition. Seniors will participate individually and work cooperatively as a class to prepare. Seniors will plan and execute a formal exhibition with each student having their own designated "gallery space" where they will display selected projects that showcase their best work. Students will participate in the scheduled event with industry professionals. In addition, the class will work together to curate and create a class website. Each student will also have completed a personal design website, pdf portfolio, resume, promo sheet, and contribute work to the online Otis Senior Exhibition. All required TOYD courses must be completed or in progress and students must be eligible for Commencement in order to participate in TOYD 405 - Toy Design VI

TOYD 436   Visual Communication IV   **3.0 UNITS**

This advanced on-campus computer lab course featuring programs in the Adobe Creative Suite allows you to apply your skills and knowledge to improve ongoing projects and enhance your portfolio. Students may have participated in summer internships where they gained real world experience and will be able to apply that learning as well as their classroom experience to design and prepare their final projects, portfolio, and senior show. The course covers a wide range of Advanced Photoshop techniques, including AI Art integration into your ideation process and how to prepare your digital assets for senior show.

TOYD 437   Package Design   **3.0 UNITS**

Branding and packaging play a pivotal role in the success of toy products. This on-campus course emphasizes developing branding strategies and creating three-dimensional package mockups to address a range of packaging styles and retail challenges. In conjunction with marketing considerations, package design must also account for storage, safety, and sustainability factors. Participants can tackle these issues while implementing unique graphic treatments on full-color 3D mockup packages. Upon course completion, attendees will understand various packaging types, including the closed box, window box, tray box, and blister card options. They will recognize the significance of effective communication on packaging to engage consumers.

TOYD 442   Design Prototyping V   **3.0 UNITS**

The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as ZBrush, which is often used in the construction of prototype models. You'll learn advanced modeling and prototyping

techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine.

TOYD 443   Design Prototyping Vi   **3.0 UNITS**
The use of Computer-Aided Design (CAD) programs is an essential and necessary skill in the field of Toy Design. These on-campus courses focus on 3D modeling programs such as ZBrush, which is often used in the construction of prototype models. You'll learn advanced modeling and prototyping techniques used in the toy industry. These courses combine instruction on the computer with guidance on the standards required to produce 3D models through output to a rapid prototyping machine. TOYD 442 – Design Prototyping V is a prerequisite for TOYD 443 – Design Prototyping VI

TOYD 452   Professional Development I   **3.0 UNITS**
This two-course professional development series requires students to engage in an immersive manner on career development and working professionalism by exploring and participating in all facets of career development in the toy and related industries. These classes are part of a professional development journey that requires each student to engage in a path of focused study of working professionalism by actively participating in and interacting with classroom simulations, industry speakers, and seminars that will bring the toy industry directly to the classroom in a one-of-kind hands on experience. Students will gain an understanding of toy industry practices across the board. It introduces core behaviors, business and industry concepts including but not limited to advertising, brand directional outlines, consumer behavior, costing, legal, logistics, marketing, marketing research, management, manufacturing, merchandising, operations, pricing, product development, sales, and social media as well as workplace recognition and decolonization. Students will understand how this industry scaffold impacts design and how it will affect them as designers.

TOYD 453   Professional Development II   **3.0 UNITS**
This two-course professional development series requires students to engage in an immersive manner on career development and working professionalism by exploring and participating in all facets of career development in the toy and related industries. These classes are part of a professional development journey that requires each student to engage in a path of focused study of working professionalism by actively participating in and interacting with classroom simulations, industry speakers, and seminars that will bring the toy industry directly to the classroom in a one-of-kind hands on experience. Students will gain an understanding of toy industry practices across the board.
